CHEMTURA CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1) NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Chemtura Corporation is dedicated to delivering innovative, application-focused specialty chemical and consumer product offerings. Our corporate headquarters is located at 1818 Market Street, Suite 3700, Philadelphia, PA 19103. Our principal executive offices are located at 1818 Market Street, Suite 3700, Philadelphia, PA 19103 and at 199 Benson Road, Middlebury, CT 06749. We operate in a wide variety of end-use industries including agriculture, automotive, construction, electronics, lubricants, packaging, plastics for durable and non-durable goods, pool and spa chemicals, and transportation.

When we use the terms “Corporation,” “Company,” “Chemtura,” “Registrant,” “We,” “Us” and “Our,” unless otherwise indicated in the context otherwise requires, we are referring to Chemtura Corporation and our consolidated subsidiaries.

We are the successor to Crompton & Knowles Corporation (“Crompton & Knowles”), which was incorporated in Massachusetts in 1900 and engaged in the manufacture and sale of specialty chemicals beginning in 1954. Crompton & Knowles traces its roots to Crompton Loom Works incorporated in the 1840s. Chemtura expanded the specialty chemical business through acquisitions in the United States and Europe, including the 1996 acquisition of Uniroyal Chemical Company, Inc. (“Uniroyal”), the 1999 merger with Witco Corporation (“Witco”) and the 2005 acquisition of Great Lakes Chemical Corporation (“Great Lakes”).

The information in the foregoing Consolidated Financial Statements for the quarters and six months ended June 30, 2011 and 2010 is unaudited but reflects all adjustments which, in the opinion of management, are necessary for a fair presentation of the results of operations for the interim periods presented. All such adjustments are of a normal recurring nature, except as otherwise disclosed in the accompanying notes to our Consolidated Financial Statements.

Basis of Presentation

The accompanying Consolidated Financial Statements include the accounts of Chemtura and our wholly-owned and majority-owned subsidiaries that we control. Other affiliates in which we have a 20% to 50% ownership interest or a non-controlling majority interest are accounted for in accordance with the equity method. Other investments in which we have less than 20% ownership are recorded at cost. All significant intercompany balances and transactions have been eliminated in consolidation.

Our Consolidated Financial Statements have been prepared in conformity with U.S. generally accepted accounting principles (“GAAP”), which require us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

We operated as a debtor-in-possession under the protection of the U.S. Bankruptcy Court from March 18, 2009 (the “Petition Date”) through November 10, 2010 (the “Effective Date”). From the Petition Date through the Effective Date, our Consolidated Financial Statements were prepared in accordance with Accounting Standards Codification (“ASC”) Section 852-10-45, Reorganizations – Other Presentation Matters (“ASC 852-10-45”) which requires that financial statements, for periods during the pendency of our Chapter 11 proceedings, distinguish transactions and events that are directly associated with the reorganization from the ongoing operations of the business. Accordingly, certain income, expenses, realized gains and losses and provisions for losses that were realized or incurred during the Chapter

11 proceedings were recorded in reorganization items, net on our Consolidated Statements of Operations in 2010 and will continue in 2011, but at a much reduced amount. In connection with our emergence from Chapter 11 on November 10, 2010, we recorded certain “plan effect” adjustments to our Consolidated Financial Statements as of the Effective Date in order to reflect certain provisions of our plan of reorganization.

The interim Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and notes included in our Annual Report on Form 10-K for the period ended December 31, 2010. The consolidated results of operations for the quarter and six months ended June 30, 2011 are not necessarily indicative of the results expected for the full year.

Accounting Policies and Other Items

Cash and cash equivalents include bank term deposits with original maturities of three months or less. Included in cash and cash equivalents in our Consolidated Balance Sheets at both June 30, 2011 and December 31, 2010 is \$1 million of restricted cash that is required to be on deposit to support certain letters of credit and performance guarantees, the majority of which will be settled within one year.

Included in our restricted cash balance at June 30, 2011 and December 31, 2010 is \$8 million and \$38 million, respectively, of cash on deposit for the settlement of disputed bankruptcy claims that existed on our Effective Date. At June 30, 2011, \$5 million and \$3 million of restricted cash is included within current assets and non-current assets, respectively, in our Consolidated Balance Sheet. At December 31, 2010, \$32 million and \$6 million of restricted cash is included within current assets and non-current assets, respectively, in our Consolidated Balance Sheet.

Included in accounts receivable are allowances for doubtful accounts of \$26 million and \$24 million as of June 30, 2011 and December 31, 2010, respectively.

During the six months ended June 30, 2011 and 2010, we made interest payments of approximately \$28 million and \$14 million, respectively. During the six months ended June 30, 2011 and 2010, we made payments for income taxes (net of refunds) of \$6 million and \$2 million, respectively.

Accounting Developments

In May 2011, the FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (“ASU 2011-04”). ASU 2011-04 amends U.S. GAAP to conform it with fair value measurement and disclosure requirements in International Financial Reporting Standards (“IFRS”). The amendments in ASU 2011-04 changed the wording used to describe the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. The provisions of ASU 2011-04 are effective for the first reporting period (including interim periods) beginning after December 15, 2011. We are currently evaluating the impact this accounting standard update will have on our results of operations, financial condition or disclosures.

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income (“ASU 2011-05”). ASU 2011-05 requires the presentation of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The new standard also requires presentation of adjustments for items that are reclassified from other comprehensive income to net income in the statement where the components of net income and the components of other comprehensive income are presented. The provisions of ASU 2011-04 are effective for the first reporting period (including interim periods) beginning after December 15, 2011. The adoption of this standard will have no material impact as it only impacts the presentation of our financial statements.

2) EMERGENCE FROM CHAPTER 11

The onset of the global recession in the fourth quarter of 2008 caused a rapid deterioration in our operating performance, reductions in availability under our credit facilities and reduced our liquidity. The crisis in the credit markets that had deepened in the late summer of 2008 compounded the liquidity challenges we faced. Under normal market conditions, we believed we would have been able to secure additional liquidity and refinance our \$370 million notes that were due to mature on July 15, 2009 (the “2009 Notes”) in the debt capital markets. In the first quarter of 2009, having carefully explored and exhausted all possibilities to gain near-term access to liquidity, we determined

that debtor-in-possession (“DIP”) financing presented the best available alternative for us to meet our immediate and ongoing liquidity needs and preserve the value of our business. As a result, having obtained the commitment of \$400 million senior secured super priority DIP credit facility agreement (the “DIP Credit Facility”), Chemtura and 26 of our U.S. affiliates (collectively the “U.S. Debtors”) filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Code (the “Bankruptcy Code”) on the Petition Date in the United States Bankruptcy Court for the Southern District of New York (the “Bankruptcy Court”).

On August 8, 2010, our Canadian subsidiary, Chemtura Canada Co/Cie (“Chemtura Canada”), filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code. On August 11, 2010, Chemtura Canada commenced ancillary recognition proceedings under Part IV of the Companies’ Creditors Arrangement Act (the “CCAA”) in the Ontario Superior Court of Justice (the “Canadian Court” and such proceedings, the “Canadian Case”). The U.S. Debtors along with Chemtura Canada (collectively the “Debtors”) requested the Bankruptcy Court to enter an order jointly administering Chemtura Canada’s Chapter 11 case with the previously filed Chapter 11 cases and appoint Chemtura Canada as the “foreign representative” for the purposes of the Canadian Case. Such orders were granted on August 9, 2010. On August 11, 2010, the Canadian Court entered an order recognizing the Chapter 11 cases as a “foreign proceedings” under the CCAA.

On June 10, 2011, we filed a closing report in Chemtura Canada's Chapter 11 case and a motion seeking a final decree closing that Chapter 11 case. On June 23, 2011, the Bankruptcy Court granted our motion and entered a final decree closing the Chapter 11 case of Chemtura Canada.

On June 17, 2010, the U.S. Debtors filed the initial version of our plan of reorganization and related disclosure statement (as amended, modified or supplemented, the "Plan" and "Disclosure Statement") with the Bankruptcy Court and on July 9, 2010, July 20, 2010, August 5, 2010, September 14, 2010 and September 20, 2010, the Debtors filed revised versions of the Plan and Disclosure Statement with the Bankruptcy Court. The final version of the Plan was filed with the Bankruptcy Court on October 29, 2010. The Plan organized claims against the Debtors into classes according to their relative priority and certain other criteria. For each class, the Plan described (a) the type of claim or interest, (b) the recovery available to the holders of claims or interests in that class under the Plan, (c) whether the class was "impaired" under the Plan, meaning that each holder would receive less than the full value on account of its claim or interest or that the rights of holders under law will be altered in some way (such as receiving stock instead of holding a claim) and (d) the form of consideration (e.g. cash, stock or a combination thereof), if any, that such holders were to receive on account of their respective claims or interests. Distributions to creditors under the Plan generally included a combination of common shares in the capital of the reorganized company authorized pursuant to the Plan (the "New Common Stock"), cash, reinstatement or such other treatment as agreed between the Debtors and the applicable creditor. Certain creditors were eligible to elect, when voting on the Plan, to receive their recovery in the form of the maximum available amount of cash or the maximum available amount of New Common Stock. Holders of previously outstanding Chemtura stock ("Holders of Interests"), based upon their vote as a class to reject the Plan, received their pro rata share of value available for distribution, after all allowed claims have been paid in full and certain disputed claims reserves required by the Plan have been established in accordance with the terms of the Plan. The Plan provides that Holders of Interests may also be entitled to supplemental distributions if amounts reserved on account of disputed claims exceed the value of claims that are ultimately allowed and one such supplemental distribution has been made to date.

On October 21, 2010, the Bankruptcy Court entered a bench decision approving confirmation of the Debtors' Plan and on November 3, 2010, the Bankruptcy Court entered an order confirming the Plan. On the Effective Date, the Debtors substantially consummated their reorganization through a series of transactions contemplated by the Plan and the Plan became effective. Pursuant to the Plan, on the Effective Date: (i) our common stock, par value \$0.01 per share, outstanding prior to effectiveness of the Plan was cancelled and all of our outstanding publicly registered pre-petition indebtedness was settled, and (ii) shares of our New Common Stock, par value \$0.01 per share, were issued for distribution in accordance with the Plan. On November 8, 2010, the New York Stock Exchange ("NYSE") approved for listing a total of 111 million shares of New Common Stock, as authorized under the Plan, comprising (i) approximately 95.5 million shares of New Common Stock to be issued under the Plan; (ii) approximately 4.5 million shares of New Common Stock reserved for future issuances under the Plan; and (iii) 11 million shares of New Common Stock reserved for issuance under our equity plans. Our New Common Stock started "regular way" trading on the NYSE under the ticker symbol "CHMT" on November 11, 2010.

The Plan provided for payment in full (including interest in certain circumstances) on all allowed claims. Holders of Interests received a pro-rata share of New Common Stock in accordance with the Plan together with the potential right to receive supplemental distributions in certain circumstances.

At the Effective Date, we determined that we did not meet the requirements under ASC Section 852-10-45, Reorganizations – Other Presentation Matters ("ASC 852-10-45") to adopt fresh start accounting because the reorganized value of our assets exceeded the carrying value of our liabilities. Fresh start accounting would have required us to record assets and liabilities at fair value as of the Effective Date.

Pursuant to the Plan, and by orders of the Bankruptcy Court dated September 24, 2010, October 19, 2010 and October 29, 2010, the Debtors established the Diacetyl Reserve, the Environmental Reserve and the Disputed Claims Reserve on account of disputed claims as of the Effective Date of the Plan. All claims as to which an objection was filed and ultimately allowed by the Bankruptcy Court regarding Diacetyl and environmental matters have been satisfied through the Diacetyl and Environmental reserves. To the extent remaining claims are allowed by the Bankruptcy Court, these claims will be paid from the Disputed Claims Reserve. These reserves have been funded through cash (which is reflected as restricted cash on our Consolidated Balance Sheet) and shares of common stock reserved for future issuance. Accruals for expected allowed claims relating to these disputed claims are recorded when the settlement amount is probable and reasonably estimable which may differ from the total of the approved reserve amount.

Pursuant to the Plan and the October 29, 2010 order approving the Disputed Claims Reserve, Holders of Interests in Chemtura may also be entitled to supplemental distributions (in the form of cash and/or stock) if amounts reserved on account of disputed claims exceed the value of claims that are ultimately allowed. These Holders of Interests will be entitled to a portion of any excess value held in specified segregated reserves within the Disputed Claims Reserve following the resolution of the claims for which the segregated reserves are held. These Holders of Interests will also be entitled to all excess value held in the Disputed Claims Reserve after all disputed claims are either disallowed or allowed and satisfied from the Disputed Claims Reserve. Holders of Interests may also be entitled to interim distributions from the Disputed Claims Reserve if the Bankruptcy Court determines that the amount held in the reserve may be reduced before all disputed claims have been allowed or disallowed. We made our first supplemental distribution in March 2011, representing a portion of excess value held in specific segregated reserves within the Disputed Claims Reserve. On June 23, 2011, we filed a motion with the Bankruptcy Court seeking authority to make a second supplemental distribution to Holders of Interests consisting of excess distributable value in the segregated reserve established for the claims of Oildale Energy LLC following the consensual reduction of such reserve in accordance with the Bankruptcy Court's estimation of Oildale Energy's claim. On July 14, 2011, the Bankruptcy Court approved the second supplemental distribution from the Disputed Claims Reserve.

A summary of the above mentioned approved distributable claims reserves is as follows:

(In millions)	Diacetyl Reserve	Environmental Reserve	Disputed Claims Reserve (a)	Segregated Reserves (b)	Total Reserves
Distributable amount approved at Effective Date	\$7	\$ 38	\$42	\$ 30	\$117
Settlements	(7)	(9)	(2)	(4)	(22)
Distributable balance at December 31, 2010	-	29	40	26	95
Settlements	-	(27)	(6)	(1)	(34)
Supplemental distribution	-	-	3	(7)	(4)
Reclass to disputed claims reserve	-	(2)	7	(5)	-
Distributable balance at June 30, 2011	\$-	\$ -	\$44	\$ 13	\$57

(a) Includes \$5 million distributable to Holders of Interests approved by the Bankruptcy Court in July 2011.

(b) Includes \$5 million distributable to Holders of Interests pursuant to the October 29, 2010 order as a result of a consensual reduction of a segregated reserve as approved by the Bankruptcy Court in May 2011.

The Reorganization Items, net recorded in our Consolidated Statements of Operations related to our Chapter 11 cases comprise the following:

(In millions)	Quarters ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Professional fees	\$6	\$24	\$12	\$42
Rejections or terminations of lease agreements (a)	-	-	-	2
Severance - closure of manufacturing plants and warehouses (a)	-	-	-	1
Claim settlements, net (b)	-	2	1	2
Total reorganization items, net	\$6	\$26	\$13	\$47

(a) Represents charges for cost savings initiatives for which Bankruptcy Court approval has been obtained or requested. For additional information see Note 16 – Restructuring Activities.

(b) Represents the difference between the settlement amount of certain pre-petition obligations (obligations settled in New Common Stock are based on the fair value of our stock at the issuance date) and the corresponding carrying value of the recorded liabilities.

3) ACQUISITIONS AND DIVESTITURES

Acquisitions

On January 26, 2011, we announced the formation of ISEM S.r.l. ("ISEM"), a strategic research and development alliance with Isagro S.p.A., which will provide us access to two commercialized products and accelerate the development and commercialization of new active ingredients and molecules related to our Chemtura AgroSolutions segment. ISEM is a 50/50 joint venture between us and Isagro S.p.A. and is being accounted for as an equity method investment. Our investment in the joint venture was €20 million (\$28 million), which was made in January 2011. In addition, we and Isagro S.p.A. have agreed to jointly fund discovery and development efforts for ISEM, which is expected to amount to approximately \$2 million per year from each partner for five years. We will fund our contributions in part by a reduction in our planned direct research and development spending.

On February 1, 2011, we announced the formation of DayStar Materials, LLC, a joint venture with UP Chemical Co. Ltd. that will manufacture and sell high purity metal organic precursors for the rapidly growing LED market in our Industrial Engineered Products segment. The joint venture will begin supplying high purity metal organic precursors in the third quarter of 2011. DayStar Materials, LLC is a 50/50 joint venture and is being accounted for as an equity method investment. We made cash contributions of \$2 million in February 2011 and \$3 million in May 2011, and we expect to make an additional cash contribution of approximately \$2 million during the third quarter of 2011 in accordance with the agreement.

Divestitures

PVC Additives Divestiture

On April 30, 2010, we completed the sale of our polyvinyl chloride (“PVC”) additives business to Galata Chemicals LLC for net proceeds of \$38 million. The net assets sold consisted of accounts receivable of \$47 million, inventory of \$42 million, other current assets of \$6 million and other assets of \$1 million, less pension and other post-retirement health care liabilities of \$25 million, accounts payable of \$3 million and other accrued liabilities of \$1 million. A pre-tax loss of approximately \$13 million (\$12 million after-tax) was recorded on the sale in 2010 after the elimination of \$16 million of accumulated other comprehensive income (“AOCI”) resulting from the liquidation of a foreign subsidiary as part of the transaction. All applicable disclosures included in the accompanying footnotes have been updated to reflect the PVC additives business as a discontinued operation.

Sodium Sulfonates Divestiture

On July 30, 2010, we completed the sale of our natural sodium sulfonates and oxidized petrolatum product lines to Sonneborn Holding, LLC for net proceeds of \$5 million. The sale included certain assets, our 50% interest in a European joint venture, the assumption of certain liabilities and the mutual release of obligations between the parties. The net assets sold consisted of accounts receivable of \$3 million, other current assets of \$7 million, property, plant and equipment, net of \$2 million, environmental liabilities of \$3 million and other liabilities of \$6 million. A pre-tax gain of approximately \$2 million was recorded on the sale in the third quarter of 2010.

4) INVENTORIES

Components of inventories are as follows:

(In millions)	June 30, 2011	December 31, 2010
Finished goods	\$ 366	\$ 325
Work in process	39	41
Raw materials and supplies	197	162
	\$ 602	\$ 528

Included in the above net inventory balances are inventory obsolescence reserves of approximately \$21 million and \$23 million at June 30, 2011 and December 31, 2010, respectively.

5) PROPERTY, PLANT AND EQUIPMENT

(In millions)	June 30, 2011	December 31, 2010
Land and improvements	\$ 82	\$ 79
Buildings and improvements	251	231
Machinery and equipment	1,248	1,174
Information systems equipment	182	173
Furniture, fixtures and other	33	32
Construction in progress	93	97
	1,889	1,786
Less accumulated depreciation	(1,156)	(1,070)
	\$ 733	\$ 716

Depreciation expense was \$25 million and \$36 million for the quarters ended June 30, 2011 and 2010, respectively and \$51 million and \$76 million for the six months ended June 30, 2011 and 2010, respectively. Depreciation expense includes accelerated depreciation of certain fixed assets associated with our restructuring programs of \$10 million for the quarter ended June 30, 2010 and \$1 million and \$21 million for the six months ended June 30, 2011 and 2010, respectively.

The June 30, 2011 net property, plant and equipment balance above reflects a \$1 million asset impairment charge recorded for the quarter ended June 30, 2011 related to the El Dorado, Arkansas facility restructuring activities.

6) GOODWILL AND INTANGIBLE ASSETS

Our goodwill balance of \$179 million at June 30, 2011 increased \$4 million from December 31, 2010 as a result of foreign currency translation. The goodwill is allocated entirely to the Industrial Performance Products segment. The goodwill balance at June 30, 2011 reflected accumulated impairments of \$90 million.

We elected to perform our annual goodwill impairment procedures for all of our reporting units in accordance with ASC Subtopic 350-20, Intangibles – Goodwill and Other - Goodwill (“ASC 350-20”) as of July 31, or sooner, if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We estimate the fair value of our reporting units utilizing income and market approaches through the application of discounted cash flow and market comparable methods (Level 3 inputs as described in Note 14 – Financial Instruments and Fair Value Measurements). The assessment is required to be performed in two steps: step one to test for a potential impairment of goodwill and, if potential impairments are identified, step two to measure the impairment loss through a full fair valuing of the assets and liabilities of the reporting unit utilizing the acquisition method of accounting.

We continually monitor and evaluate business and competitive conditions that affect our operations and reflects the impact of these factors in our financial projections. If permanent or sustained changes in business or competitive conditions occur, they can lead to revised projections that could potentially give rise to impairment charges.

During 2010, we identified risks inherent in Chemtura AgroSolutions reporting units forecast given the recent performance of this reporting unit, which has been below expectations. At the end of the fourth quarter of 2010, this reporting unit’s performance had significantly fallen below expectations for several consecutive quarters. We concluded that it was appropriate to perform a goodwill impairment review as of December 31, 2010. We used revised forecasts to compute the estimated fair value of this reporting unit. These projections indicated that the estimated fair value of the Chemtura AgroSolutions reporting unit was less than the carrying value. Based upon our preliminary step 2 analysis, an estimated goodwill impairment charge of \$57 million was recorded in December 2010 (representing the remaining goodwill of this reporting unit). Due to the complexities of the analysis, which involved an allocation of the fair value, we finalized our step 2 analysis and goodwill impairment charge in the first quarter of 2011. This analysis supported our 2010 conclusion that the goodwill was fully impaired.

Our intangible assets (excluding goodwill) are comprised of the following:

(In millions)	June 30, 2011			December 31, 2010		
	Gross Cost	Accumulated Amortization	Net Intangibles	Gross Cost	Accumulated Amortization	Net Intangibles
Patents	\$ 130	\$ (68)	\$ 62	\$ 127	\$ (62)	\$ 65
Trademarks	271	(68)	203	264	(62)	202
Customer relationships	150	(48)	102	147	(43)	104
Production rights	46	(26)	20	46	(24)	22
Other	73	(41)	32	73	(37)	36
Total	\$ 670	\$ (251)	\$ 419	\$ 657	\$ (228)	\$ 429

The increase in gross intangible assets since December 31, 2010 is primarily due to foreign currency translation, partially offset by a \$2 million impairment charge related to patents with no future use.

Amortization expense related to intangible assets amounted to \$9 million for the quarters ended June 30, 2011 and 2010 and \$20 million and \$18 million for the six months ended June 30, 2011 and 2010, respectively.

7) DEBT

Our debt is comprised of the following:

(In millions)	June 30, 2011	December 31, 2010
7.875% Senior Notes due 2018	\$ 452	\$ 452
Term Loan due 2016	292	292
ABL Facility	91	-
Other borrowings	11	7
Total Debt	846	751
Less: Short-term borrowings	(7)	(3)
Long-term debt	\$ 839	\$ 748

Financing Facilities

In order to emerge from Chapter 11 and provide for future capital needs, we obtained approximately \$1 billion in financing in 2010. On August 27, 2010, we completed a private placement offering under Rule 144A of \$455 million aggregate principal amount of 7.875% senior notes due 2018 (the “Senior Notes”) at an issue price of 99.269% in reliance on an exemption pursuant to Section 4(2) of the Securities Act of 1933. We also entered into a senior secured term facility credit agreement due 2016 (the “Term Loan”) with Bank of America, N.A., as administrative agent, and other lenders party thereto for an aggregate principal amount of \$295 million with an original issue discount of 1%. The Term Loan permits us to increase the size of the facility by up to \$125 million. On the Effective Date, we entered into a five year senior secured revolving credit facility (the “ABL Facility”) with Bank of America, N.A., as administrative agent, and the other lenders party thereto for an amount up to \$275 million, subject to availability under a borrowing base (with a \$125 million letter of credit sub-facility) due 2015. The ABL Facility permits us to increase the size of the facility by up to \$125 million subject to obtaining lender commitments to provide such increase.

Senior Notes

Our Senior Notes contain covenants that limit our ability to enter into certain transactions, such as incurring additional indebtedness, creating liens, paying dividends, and entering into certain dispositions and joint ventures. As of June 30, 2011, we were in compliance with the covenant requirements of the Senior Notes.

Our Senior Notes are subject to certain events of default, including, among others, breach of other agreements in the Indenture; any guarantee of the Senior Notes by a significant subsidiary ceasing to be in full force and effect; a default by us or our restricted subsidiaries under any bonds, debentures, notes or other evidences of indebtedness of a certain amount, resulting in its acceleration; the rendering of judgments to pay certain amounts of money against us or our significant subsidiaries which remains outstanding for 60 days; and certain events of bankruptcy or insolvency.

In connection with the Senior Notes, in June 2011, we consummated an exchange offer registered with the Securities and Exchange Commission to exchange registered Senior Notes for unregistered Senior Notes originally issued in the private placement offering. The terms of the registered Senior Notes are substantially identical to the unregistered Senior Notes, except that transfer restrictions, registration rights and additional interest provisions relating to the unregistered Senior Notes do not apply to the registered Senior Notes.

Term Loan

The Term Loan is secured by a first priority lien on substantially all of our U.S. tangible and intangible assets (excluding accounts receivable, inventory, deposit accounts and certain other related assets), including, without limitation, real property, equipment and intellectual property, together with a pledge of the equity interests of our first tier subsidiaries and the guarantors of the Term Loan, and a second priority lien on substantially all of our U.S. accounts receivable and inventory.

We may, at our option, prepay the outstanding aggregate principal amount on the Term Loan advances in whole or ratably in part along with accrued and unpaid interest on the date of the prepayment. If the prepayment is made prior to the first anniversary of the closing date of the Term Loan agreement, we will pay an additional premium of 1% of the aggregate principal amount of prepaid advances.

Our obligations as borrower under the Term Loan are guaranteed by certain of our U.S. subsidiaries.

The Term Loan contains covenants that limit our ability to enter into certain transactions, such as creating liens, incurring additional indebtedness or repaying certain indebtedness, making investments, paying dividends, and entering into certain acquisitions, dispositions and joint ventures.

Additionally, the Term Loan requires that we meet certain financial maintenance covenants including a maximum Secured Leverage Ratio (as defined in the agreement) of 2.5:1.0 and a minimum Consolidated Interest Coverage Ratio (as defined in the agreement) of 3.0:1.0. As of June 30, 2011, we were in compliance with the covenant requirements of the Term Loan.

The Term Loan is subject to certain events of default applicable to Chemtura, the guarantors and their respective subsidiaries, including, nonpayment of principal, interest, fees or other amounts, violation of covenants, material inaccuracy of representations and warranties (including the existence of a material adverse event as defined in the agreement), cross-default to material indebtedness, certain events of bankruptcy and insolvency, material judgments, certain ERISA events, a change in control, and actual or asserted invalidity of liens or guarantees or any collateral document, in certain cases subject to the threshold amounts and grace periods set forth in the Term Loan agreement.

ABL Facility

Our obligations (and the obligations of the other borrowing subsidiaries) under the ABL Facility are guaranteed on a secured basis by all the guarantors (as defined in the agreement) that are not borrowers, and by certain of our future direct and indirect domestic subsidiaries. The obligations and guarantees under the ABL Facility will be secured by (i) a first-priority security interest in the borrowers' and the guarantors' existing and future inventory and accounts receivable, together with general intangibles relating to inventory and accounts receivable, contract rights under agreements relating to inventory and accounts receivable, documents relating to inventory, supporting obligations and letter-of-credit rights relating to inventory and accounts receivable, instruments evidencing payment for inventory and accounts receivable; money, cash, cash equivalents, securities and other property held by the Administrative Agent or any lender under the ABL Facility; deposit accounts, credits and balances with any financial institution with which any borrower or any guarantor maintains deposits and which contain proceeds of, or collections on, inventory and accounts receivable; books, records and other property related to or referring to any of the foregoing and proceeds of any of the foregoing (the "Senior Asset Based Priority Collateral"); and (ii) a second-priority security interest in substantially all of the borrowers' and the guarantors' other assets, including (a) 100% of the capital stock of borrowers' and the guarantors' direct domestic subsidiaries held by the borrowers and the guarantors and 100% of the non-voting capital stock of the borrowers' and the guarantors' direct foreign subsidiaries held by the borrowers and the guarantors, and (b) 65% of the voting capital stock of the borrowers' and the guarantors' direct foreign subsidiaries (to the extent held by the borrowers and the guarantors), in each case subject to certain exceptions set forth in the ABL Facility agreement and the related loan documentation.

If, at the end of any business day, the amount of unrestricted cash and cash equivalents held by the borrowers and guarantors (excluding amounts in certain exempt accounts) exceeds \$20 million in the aggregate, mandatory prepayments of the loans under the ABL Facility (and cash collateralization of outstanding letters of credit) are required on the following business day in an amount necessary to eliminate such excess (net of our known cash uses on the date of such prepayment and for the two business days thereafter).

The ABL Facility agreement contains certain affirmative and negative covenants (applicable to us, the other borrowing subsidiaries, the guarantors and their respective subsidiaries), including, without limitation, covenants requiring financial reporting and notices of certain events, and covenants imposing limitations on incurrence of indebtedness and guarantees; liens; loans and investments; asset dispositions; dividends, redemptions, and repurchases

of stock and prepayments, redemptions and repurchases of certain indebtedness; mergers, consolidations, acquisitions, joint ventures or creation of subsidiaries; material changes in business; transactions with affiliates; restrictions on distributions from subsidiaries and granting of negative pledges; changes in accounting and reporting; sale leasebacks; and speculative transactions, and a springing financial covenant requiring a minimum trailing 12-month fixed charge coverage ratio (as defined in the agreement) of 1.1 to 1.0 at all times during any period from the date when the amount available for borrowings under the ABL Facility falls below the greater of (i) \$34 million and (ii) 12.5% of the aggregate commitments to the date such available amount has been equal to or greater than the greater of (i) \$34 million and (ii) 12.5% of the aggregate commitments for 45 consecutive days. As of June 30, 2011, we were in compliance with the covenant requirements of the ABL Facility.

The ABL Facility agreement contains certain events of default (applicable to us, the other borrowing subsidiaries, the guarantors and their respective subsidiaries), including nonpayment of principal, interest, fees or other amounts, violation of covenants, material inaccuracy of representations and warranties (including the existence of a material adverse event as defined in the agreement), cross-default to material indebtedness, certain events of bankruptcy and insolvency, material judgments, certain ERISA events, a change in control, and actual or asserted invalidity of liens or guarantees or any collateral document, in certain cases subject to the threshold amounts and grace periods set forth in the ABL Facility agreement.

On March 22, 2011, we entered into Amendment No. 1 to the ABL Facility which permits us to amend the Term Loan (and refinance those facilities in connection with such an amendment) to provide for principal amortization not exceeding 1% of the total principal amount of the Term Loan (such percentage calculated as of the date of any such amendment to the Term Loan). Amendment No. 1 also clarifies that we may, in connection with an otherwise permitted amendment to the Term Loan that refinances those facilities, increase the Term Loan up to the maximum amount permitted under the debt incurrence covenant contained in the ABL Facility.

At June 30, 2011, we had \$91 million of borrowings under the ABL Facility and \$14 million of outstanding letters of credit (primarily related to liabilities for insurance obligations and vendor deposits), which utilizes available capacity under the facility. At December 31, 2010, we had no borrowings under the ABL and \$12 million of outstanding letters of credit. At June 30, 2011 and December 31, 2010, we had approximately \$170 million and \$185 million, respectively, of undrawn availability under the ABL Facility.

8) INCOME TAXES

We reported an income tax benefit from continuing operations of \$6 million and an income tax provision from continuing operations of \$11 million for the quarters ended June 30, 2011 and 2010, respectively. For the six months ended June 30, 2011 and 2010 we reported an income tax benefit from continuing operations of \$3 million and an income tax provision from continuing operations of \$16 million, respectively. The tax benefit reported for the quarter and six months ended June 30, 2011 included a decrease in deferred foreign income taxes of approximately \$17 million that had been recorded in an international jurisdiction in prior years. The tax benefit was recorded after receiving approval from the international jurisdiction to change our filing position. We have offset our current year-to-date U.S. income with net operating loss carryforwards and reduced the associated valuation allowance. In the quarter and six months ended June 30, 2010, we established a valuation allowance against the tax benefits associated with our 2010 U.S. net operating loss. We will continue to adjust our tax provision through the establishment or reduction of non-cash valuation allowances until we determine that it is more-likely than not that the net deferred tax assets associated with our U.S. operations will be utilized.

We have net liabilities related to unrecognized tax benefits of \$47 million and \$41 million at June 30, 2011 and December 31, 2010, respectively.

We recognize interest and penalties related to unrecognized tax benefits as income tax expense. Accrued interest and penalties are included within the related liability captions in our Consolidated Balance Sheet.

We believe it is reasonably possible that our unrecognized tax benefits may decrease by approximately \$14 million within the next year. This reduction may occur due to the expiration of the statute of limitations or conclusion of examinations by tax authorities. We further expect that the amount of unrecognized tax benefits will continue to change as a result of ongoing operations and the outcomes of audits. This change is not expected to have a significant impact on our financial condition.

9) COMPREHENSIVE INCOME (LOSS)

An analysis of the Company's comprehensive income (loss) follows:

(In millions)	Quarters ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Net earnings (loss)	\$70	\$(48)	\$77	\$(227)
Other comprehensive income (loss), (net of tax):				
Foreign currency translation adjustments	13	(59)	44	(83)

Edgar Filing: Chemtura CORP - Form 10-Q

Unrecognized pension and other post-retirement benefit costs	1	4	3	30
Comprehensive income (loss)	84	(103)	124	(280)
Comprehensive income attributable to the non-controlling interest	(1)	-	(1)	(1)
Comprehensive income (loss) attributable to Chemtura	\$83	\$(103)	\$123	\$(281)

13

The components of accumulated other comprehensive loss (“AOCL”), net of tax at June 30, 2011 and December 31, 2010, are as follows:

(In millions)	June 30, 2011	December 31, 2010
Foreign currency translation adjustments	\$ 132	\$ 88
Unrecognized pension and other post-retirement benefit costs	(361)	(364)
Accumulated other comprehensive loss	\$ (229)	\$ (276)

10) EARNINGS (LOSS) PER COMMON SHARE

The computation of basic earnings (loss) per common share is based on the weighted average number of common shares outstanding. The computation of diluted earnings (loss) per common share is based on the weighted average number of common and common share equivalents outstanding.

The following is a reconciliation of the shares used in the computation of earnings (loss) per share:

(In millions)	Quarters ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Weighted average shares outstanding - Basic	100.3	242.9	100.2	242.9
Dilutive effect of common share equivalents	0.2	-	0.1	-
Weighted average shares outstanding - Diluted	100.5	242.9	100.3	242.9

Upon the Effective Date of our Plan all previously outstanding shares of common stock were cancelled and approximately 96 million shares of New Common Stock were issued. The weighted average shares for the quarter and six months ended of 2010 was based upon 243 million of old shares. As a result, the average shares outstanding of our New Common Stock for the quarter and six months ended June 2011 are not comparable to the prior year. The weighted average common shares outstanding for the quarter and six months ended June 30, 2011 include shares of common stock reserved for future issuances under the Plan as disputed claims are settled. As of June 30, 2011, 3.8 million shares are available for future distribution under the Plan.

1.0 million bonus units with a performance criteria and 0.3 million restricted stock units (“RSUs”) with a performance criteria at June 30, 2011 and 2010, respectively, were also excluded from the calculation of diluted earnings (loss) per share because the specified performance criteria for the vesting of these units had not yet been met. The bonus units could be dilutive in the future if the specified performance criteria are met.

11) STOCK-BASED COMPENSATION

In 2010, we implemented the Chemtura Corporation 2010 Long-Term Incentive Plan (the “2010 LTIP”), which was approved by the Bankruptcy Court and became effective upon our emergence from Chapter 11. All stock-based compensation plans existing prior to the Effective Date were terminated and any unvested or unexercised shares associated with these plans were cancelled. The 2010 LTIP provides for grants of nonqualified stock options (“NQOs”), incentive stock options (“ISOs”), stock appreciation rights, dividend equivalent rights, stock units, bonus stock, performance awards, share awards, restricted stock, time-based RSUs and performance-based RSUs. The 2010 LTIP

provides for the issuance of a maximum of 11 million shares. NQOs and ISOs may be granted under the 2010 LTIP at prices equal to the fair market value of the underlying common shares on the date of the grant. All outstanding stock options will expire not more than ten years from the date of the grant. As of June 30, 2011, grants authorized under the 2010 LTIP are being administered through the various award plans that are described below as the 2009 Emergence Incentive Plan (the “2009 EIP”), the 2010 Emergence Incentive Plan (the “2010 EIP”), 2011 Long-Term Incentive Plan (the “2011 LTIP”) and 2010 Emergence Award Plan (the “2010 EAP”), as well as other grants made to the Board of Directors.

Stock-based compensation expense, including amounts for time-based RSU’s, NQOs and the 2010 EAP, was \$8 million and \$16 million for the quarter and six months ended June 30, 2011. Stock-based compensation expense for the quarter and six months ended June 30, 2010 was less than \$1 million. Stock-based compensation expense was primarily reported in SG&A.

Stock Option Plans

In November 2010, we granted under the EIP Settlement Plan approved by the Bankruptcy Court (“EIP Settlement Plan”) 0.8 million NQOs relating to the 2009 EIP with an exercise price equal to the fair market value of the underlying common stock on the date of grant. One third of the NQOs vested immediately upon emergence from Chapter 11, one third vested on March 31, 2011 and one third vests on March 31, 2012.

In March 2011, we granted under the EIP Settlement Plan 0.8 million NQOs relating to the 2010 EIP with an exercise price equal to the fair market value of the underlying common stock at the date of grant. One third vested immediately, one third vests on March 31, 2012 and one third vests on March 31, 2013.

In March 2011, our Board of Directors approved the grant of 1.4 million NQOs under our 2011 LTIP. These options will vest ratably over a three-year period.

We use the Black-Scholes option-pricing model to determine the fair value of NQOs. We have elected to recognize compensation cost for awards of NQOs equally over the requisite service period for each separately vesting tranche, as if multiple awards were granted. Using this method, the weighted average fair value of stock options granted during the six months ended June 30, 2011 was \$8.40.

Total remaining unrecognized compensation cost associated with unvested NQOs at June 30, 2011 was \$13 million, which will be recognized over the weighted average period of approximately 2 years.

Restricted Stock Plans

In November 2010, we granted under the EIP Settlement Plan 0.4 million time-based RSU's relating to the 2009 EIP with a fair market value of the quoted closing price of our stock on that date. One third vested immediately, one third vested on March 31, 2011 and one third vests on March 31, 2012.

In February 2011, we granted 0.1 million time-based RSU's to non-employee directors with a fair market value of the quoted closing price of our stock on that date. These RSU's will vest ratably over a two-year period.

In March 2011, we granted under the EIP Settlement Plan 0.4 million time-based RSU's relating to the 2010 EIP with a fair market value of the quoted closing price of our stock on that date. One third vested immediately, one third vests on March 31, 2012 and one third vests on March 31, 2013.

In March 2011, our Board of Directors approved the grant 0.4 million time-based RSU's under our 2011 LTIP. These RSU's will vest ratably over a three-year period.

In March 2011, we granted bonus units under the 2010 EAP, which was previously approved by the Bankruptcy Court and carries a performance condition requirement. This performance award will be based on achievement against a performance goal for 2011 cumulative earnings before interest, taxes, depreciation and amortization expense ("EBITDA"). Results of EBITDA will be adjusted to exclude certain categories of income and expense as defined in the 2010 EAP. This award is for a maximum of 1 million shares. Shares are awarded based upon the achievement against the performance goal and will vest and be distributed to the participants in March 2012.

Total remaining unrecognized compensation cost associated with unvested time-based RSU's and the 2010 EAP bonus units at June 30, 2011 was \$22 million, which will be recognized over the weighted average period of approximately 1 year.

12) PENSION AND OTHER POST-RETIREMENT BENEFIT PLANS

Components of our defined benefit plans net periodic benefit (credit) cost for the quarters and six months ended June 30, 2011 and 2010 are as follows:

(In millions)	Qualified U.S. Plans		Defined Benefit Plans International and Non-Qualified Plans		Post-Retirement Health Care Plans	
	Quarter ended June 30, 2011	2010	Quarter ended June 30, 2011	2010	Quarter ended June 30, 2011	2010
Service cost	\$-	\$-	\$1	\$1	\$1	\$-
Interest cost	11	12	6	5	1	2
Expected return on plan assets	(14)	(14)	(5)	(4)	-	-
Amortization of prior service cost	3	-	1	-	1	(1)
Amortization of actuarial losses	-	2	-	-	(2)	-
Net periodic benefit cost	\$-	\$-	\$3	\$2	\$1	\$1

(In millions)	Qualified U.S. Plans		Defined Benefit Plans International and Non-Qualified Plans		Post-Retirement Health Care Plans	
	Six months ended June 30, 2011	2010	Six months ended June 30, 2011	2010	Six months ended June 30, 2011	2010
Service cost	\$-	\$-	\$2	\$2	\$1	\$-
Interest cost	23	24	11	11	2	4
Expected return on plan assets	(28)	(28)	(9)	(9)	-	-
Amortization of prior service cost	6	-	1	-	1	(2)
Amortization of actuarial losses	-	4	-	-	(3)	1
Net periodic benefit cost	\$1	\$-	\$5	\$4	\$1	\$3

We contributed \$8 million to our U.S. qualified pension plans, \$2 million to our U.S. non-qualified pension plans and \$57 million to our international pension plans for the six months ended June 30, 2011. Contributions to post-retirement health care plans for the six months ended June 30, 2011 were \$5 million.

In 2009, the Bankruptcy Court authorized us to modify certain benefits under our sponsored post-retirement health care plans. In March 2010, certain participants of these plans were notified of the amendments to their benefits. As a result of these amendments, we recognized a \$23 million decrease in our U.S. post-retirement health care plan obligations during the quarter ended March 31, 2010, with the offset reflected within AOCL.

On April 5, 2010, the Bankruptcy Court entered an order denying certain Uniroyal non-union salaried retirees' (the "Uniroyal Salaried Retirees") motion to reconsider the Bankruptcy Court's 2009 order authorizing the modification of certain benefits under the Company's post-retirement health care plans. On April 8, 2010, the Uniroyal Salaried Retirees appealed the Bankruptcy Court's April 5, 2010 order. On April 14, 2010, the Uniroyal Salaried Retirees sought a stay of the Bankruptcy Court's 2009 order as to the Company's modification of their retiree benefits pending their appeal. On April 21, 2010, the Bankruptcy Court ordered us not to modify the retiree benefits for the Uniroyal Salaried Retirees, pending a hearing and a decision as to the stay. After consulting with the official committees of

unsecured creditors and equity security holders, we requested that the Bankruptcy Court have a hearing to decide, as a matter of law, whether we have the right to modify the post-retirement health care plan benefits of the Uniroyal Salaried Retirees as requested in 2009. No decision has been made on this matter as of June 30, 2011 as the hearing has been postponed until September 21, 2011.

One of our U.K. subsidiaries has entered into definitive agreements with the Trustees of the Great Lakes U.K. Pension Plan (the "UK Pension Plan," or collectively the "UK Pension Trustees") on the terms of additional cash contributions to be made to its defined benefit pension plan to reduce its underfunding over time. The agreements provide, among other things, for Chemtura Manufacturing U.K. Limited ("CMUK") to make cash contributions of £60 million (approximately \$95 million) in just over a three year period starting with the initial contribution of £30 million (\$49 million) that we made in the second quarter of 2011. The agreements also provide for the granting of both a security interest and a guarantee to support certain of the liabilities under this pension plan. There is also an evaluation being undertaken as to whether an additional funding liability exists in connection with the equalization of certain benefits under the UK Pension Plan that occurred in the early 1990s. If such an additional liability exists, additional cash contributions may be required starting in 2013.

13) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Our activities expose our earnings, cash flows and financial condition to a variety of market risks, including the effects of changes in foreign currency exchange rates, interest rates and energy prices. We maintain a risk management strategy that may utilize derivative instruments to mitigate risk against foreign currency movements and to manage energy price volatility. In accordance with ASC Topic 815, Derivatives and Hedging (“ASC 815”), we recognize in AOCL any changes in the fair value of all derivatives designated as cash flow hedging instruments. We do not enter into derivative instruments for trading or speculative purposes.

We have exposure to changes in foreign currency exchange rates resulting from transactions entered into by us and our foreign subsidiaries in currencies other than their functional currency (primarily trade payables and receivables). We are also exposed to currency risk on intercompany transactions (including intercompany loans). We manage these currency risks on a consolidated basis, which allows us to net our exposure. Prior to our Chapter 11 filing we purchased foreign currency forward contracts, to manage our exposure. However, as a result of the changes in our financial condition and our financing agreements, we were unable to continue our prior practice during the course of our Chapter 11 proceedings. The financing agreements that we entered into in connection with our emergence from Chapter 11 permit us to purchase contracts and derivatives to manage foreign exchange and other financial risks subject to certain limitations. We are currently developing new foreign exchange risk management policies and practices that we intend to implement in 2011.

14) FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENTS

Financial Instruments

The carrying amounts for cash and cash equivalents, accounts receivable, other current assets, accounts payable and other current liabilities, approximate their fair value because of the short-term maturities of these instruments. The fair value of debt is based primarily on quoted market values. For debt that has no quoted market value, the fair value is estimated by discounting projected future cash flows using our incremental borrowing rate.

The following table presents the carrying amounts and estimated fair values of material financial instruments used by us in the normal course of business.

	As of June 30, 2011		As of December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(In millions)				
Total debt	\$ 846	\$ 888	\$ 751	\$ 786

Fair Value Measurements

We apply the provisions of ASC 820 with respect to our financial assets and liabilities that are measured at fair value within the financial statements on a recurring basis. ASC 820 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. The fair value hierarchy specified by ASC 820 is as follows:

- Level 1 – Quoted prices in active markets for identical assets and liabilities.
- Level 2 – Quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable

market date.

- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities.

Level 1 fair value measurements in 2011 and 2010 included the deferral of compensation, our match and investment earnings related to the supplemental savings plan. These securities are considered our general assets until distributed to the participant and are included in other assets in our Consolidated Balance Sheets. A corresponding liability is included in other liabilities at June 30, 2011 and December 31, 2010 in our Consolidated Balance Sheets. Quoted market prices were used to determine fair values of the Level 1 investments held in a trust with a third-party brokerage firm. The fair value of the asset and corresponding liability was \$1 million at June 30, 2011 and December 31, 2010. For the six months ended June 30, 2011, there were no transfers into or out of Level 1 and Level 2.

Level 3 fair value measurements are utilized in our impairment reviews of Goodwill (see Note 6 – Goodwill and Intangible Assets). Level 1, Level 2 and Level 3 fair value measurements are utilized for defined benefit plan assets in determining the funded status of our pension and post-retirement benefit plan liabilities on an annual basis (at December 31).

15) ASSET RETIREMENT OBLIGATIONS

We apply the provisions of accounting guidance codified under ASC Topic 410, Asset Retirements and Environmental Obligations (“ASC 410”), which require companies to make estimates regarding future events in order to record a liability for asset retirement obligations in the period in which a legal obligation is created. Such liabilities are recorded at fair value, with an offsetting increase to the carrying value of the related long-lived assets. The fair value is estimated by discounting projected cash flows over the estimated life of the assets using our credit adjusted risk-free rate applicable at the time the obligation is initially recorded. In future periods, the liability is accreted to its present value and the capitalized cost is depreciated over the useful life of the related asset. We also adjust the liability for changes resulting from revisions to the timing of future cash flows or the amount of the original estimate. Upon retirement of the long-lived asset, we either settle the obligation for its recorded amount or incur a gain or loss.

Our asset retirement obligations include estimates for all asset retirement obligations identified for our worldwide facilities. Our asset retirement obligations are primarily the result of legal obligations for the removal of leasehold improvements and restoration of premises to their original condition upon termination of leases at approximately 24 facilities; legal obligations to close approximately 92 brine supply, brine disposal, waste disposal, and hazardous waste injection wells and the related pipelines at the end of their useful lives; and decommissioning and decontamination obligations that are legally required to be fulfilled upon closure of approximately 32 of our manufacturing facilities.

The following is a summary of the change in the carrying amount of the asset retirement obligations for the quarters and six months ended June 30, 2011 and 2010 and the net book value of assets related to the asset retirement obligations at June 30, 2011 and 2010:

(In millions)	Quarters ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Asset retirement obligation balance at beginning of period	\$24	\$30	\$23	\$26
Accretion (income) expense – cost of goods sold (a)	(3)	(3)	(2)	1
Payments	(1)	(1)	(1)	(1)
Reclassifications (b)	1	-	1	-
Asset retirement obligation balance at end of period	\$21	\$26	\$21	\$26
Net book value of asset retirement obligation assets at end of period	\$1	\$1	\$1	\$1

(a) The accretion reversal for the quarter and six months ended June 30, 2010 was primarily due to the extension of the retirement dates for various pipelines and wells related to the El Dorado, Arkansas facility.

(b) Represents a reclassification of asset retirement costs that were previously recorded in another accrued expense account.

Depreciation expense for the quarters and six months ended June 30, 2011 and 2010 was less than \$1 million.

At June 30, 2011 and December 31, 2010, \$5 million and \$11 million of asset retirement obligations were included in accrued expenses and \$16 million and \$12 million, respectively, were included in other liabilities on the Consolidated Balance Sheet.

16) RESTRUCTURING ACTIVITIES

Reorganization Initiatives

In 2009, the Bankruptcy Court approved the implementation of certain cost savings and growth initiatives, including the closure of a manufacturing facility in Ashley, IN, the consolidation of warehouses related to our Consumer products segment, the reduction of leased space at two of our U.S. office facilities, and the rejection of various unfavorable contracts. Additionally, on January 25, 2010, our Board of Directors approved an initiative involving the consolidation and idling of certain assets within the Great Lakes Solutions business operations in El Dorado, Arkansas, which was approved by the Bankruptcy Court on February 23, 2010 and was expected to be substantially completed by the first half of 2012. During 2010, the demand for brominated products used in electronic applications grew significantly and is expected to remain robust. With the evidence that demand is now starting to recover for our products used in oil and gas applications in the Gulf of Mexico as well as insulation and furniture foam applications, and recognizing the emerging demand for mercury removal applications, it has become evident that we will need to produce larger quantities of bromine than were projected when we formulated our consolidation plan. In addition, our partner has informed us that they will exercise their right to purchase our interest in a joint venture in the Middle East that supplies a brominated flame retardant to us. While under the terms of the joint venture agreement, the purchaser is obligated to continue to supply the current volumes of the brominated flame retardant to us for two years following the acquisition, we need to plan for the ultimate production of this product. Under the terms of the joint venture agreement, we expect to receive payments over time for our interest in the joint venture, which will assist in defraying the cost of any required capacity addition that we may be required to make. Our analysis has indicated that the most cost effective source of the additional bromine we require is to continue to operate many of the bromine assets we had planned to idle and to invest to improve their operating efficiency. In light of this analysis, on April 20, 2011, our Board of Directors confirmed that we should defer a portion of the El Dorado restructuring plan and continue to operate certain of the bromine and brine assets that were planned to be idled.

As a result of our reorganization initiatives, we recorded pre-tax charges of \$2 million for the six months ended June 30, 2011 primarily for asset impairments and accelerated depreciation. We recorded pre-tax charges of \$26 million for the six months ended June 30, 2010 (\$3 million was recorded to reorganization items, net for severance, asset relocation costs and contract termination costs, \$21 million was recorded to depreciation and amortization for accelerated depreciation, and \$2 million was recorded to cost of goods sold (“COGS”) for accelerated asset retirement obligations and asset write-offs).

Corporate Restructuring Programs

In March 2010, we approved a restructuring plan to consolidate certain corporate functions internationally to gain efficiencies and reduce costs. As a result of this plan, we recorded a pre-tax charge of \$3 million for severance to facility closures, severance and related costs for the six months ended June 30, 2010.

The reserve balances for all of our reorganization initiatives and corporate restructuring programs of \$1 million at June 30, 2011 and December 31, 2010 were included in accrued expenses.

17) LEGAL PROCEEDINGS AND CONTINGENCIES

We are involved in claims, litigation, administrative proceedings and investigations of various types in a number of jurisdictions. A number of such matters involve, or may involve, claims for a material amount of damages and relate to or allege environmental liabilities, including clean-up costs associated with hazardous waste disposal sites, natural resource damages, property damage and personal injury.

As a result of the Chapter 11 cases, substantially all prepetition litigation and claims against us and our subsidiaries that were Debtors in the Chapter 11 cases have been discharged and permanently enjoined from further prosecution and are described under the subheading “Prepetition Litigation and Claims Discharged under the Plan” below.

Claims and legal actions asserted against non-Debtors or relating to events occurring after the Effective Date, certain regulatory and administrative proceedings and certain contractual and other claims assumed with the authorization of the Bankruptcy Court, were not discharged in the Chapter 11 cases and are described under the subheading “Litigation and Claims Not Discharged Under the Plan” below.

Prepetition Litigation and Claims Discharged Under the Plan

Chapter 11 Plan and Establishment of Claims Reserves

On March 18, 2009, the Debtors filed voluntary petitions in the Bankruptcy Court seeking relief under Chapter 11 of the Bankruptcy Code. The Debtors’ Chapter 11 cases have been assigned to the Honorable Robert E. Gerber and are being jointly administered as Case No. 09-11233. The Debtors continued to operate their business as debtors in possession under the jurisdiction of the Bankruptcy Court until their emergence from Chapter 11 on November 10, 2010. On June 10, 2011, we filed a closing report in Chemtura Canada’s Chapter 11 case and a motion seeking a final decree closing the Chapter 11 case. On June 23, 2011, the bankruptcy Court granted our motion and entered a final decree closing the Chapter 11 case of Chemtura Canada.

Pursuant to the Plan, and by orders of the Bankruptcy Court dated September 24, 2010, October 19, 2010 and October 29, 2010, the Debtors established the Diacetyl Reserve, the Environmental Reserve and the Disputed Claims Reserve, each as defined in the Plan, on account of claims that were not yet allowed in the Chapter 11 cases as of the Effective Date, including proofs of claim asserted against the Debtors that were subject to objection as of the Effective Date (the “Disputed Claims”). The Diacetyl Reserve was approved by the Bankruptcy Court in the amount of \$7 million,

comprised of separate segregated reserves, and has since been reduced as settlement agreements have been approved by the Bankruptcy Court. The Environmental Reserve was approved by the Bankruptcy Court in the amount of \$38 million, a portion of which is further segregated into certain separate reserves established to account for settlements that are pending Bankruptcy Court approval, and has since been reduced as settlement agreements have been approved by the Bankruptcy Court. The Disputed Claims Reserve was approved by the Bankruptcy Court in the amount of \$42 million, plus additional segregated individual reserves for certain creditors' claims in the aggregate amount of approximately \$30 million, some of which have been reduced as settlement agreements have been approved by the Bankruptcy Court.

On June 24, 2011, we resolved the last disputed environmental claim. As a result, under the Plan, the amounts remaining in the Environmental Reserve were transferred to the Disputed Claims Reserve. Any remaining Disputed Claims, to the extent they are ultimately allowed by the Bankruptcy Court, will be satisfied (to the extent allowed and not covered by insurance) from the Disputed Claims Reserve, and holders of the Disputed Claims are permanently enjoined under the Plan from pursuing their claims against us. As of June 30, 2011, as a result of distributions pursuant to the Plan, there were no remaining undisbursed amount in the Environmental Reserve or the Diacetyl Reserve, and the remaining undisbursed amount in the Disputed Claims Reserve, including segregated reserves, was \$57 million.

As we complete the process of evaluating and/or resolving the Disputed Claims, appropriate adjustments to our Consolidated Financial Statements will be made. Adjustments may also result from actions of the Bankruptcy Court, settlement negotiations, and other events.

Australian Civil Antitrust Matters

On September 27, 2007, Chemtura and one of our subsidiaries who did not file a Chapter 11 case, as well as Bayer AG and Bayer Australia Ltd., were sued by Wright Rubber Products Pty Ltd. (“Wright”) in the Federal Court of Australia for alleged price fixing violations with respect to the sale of rubber chemicals in Australia. On November 21, 2008, Wright filed an amended Statement of Claim and further amended its Statement of Claim on August 2, 2010. On May 25, 2011, Chemtura and our subsidiary entered into a settlement agreement to resolve the litigation for an agreed allowed unsecured claim of AUD 0.8 million (approximately \$0.8 million) to be paid from the Disputed Claim Reserve pursuant to the Plan. The settlement has been approved by the Bankruptcy Court and is pending approval by the Federal Court of Australia.

Appeals Relating to the Chapter 11 Cases

During the Chapter 11 cases, a creditor, Pentair Water Pool & Spa, Inc. (“Pentair”), appealed three orders of the Bankruptcy Court: (i) the Bankruptcy Court’s order establishing the Disputed Claims Reserve, (ii) an order partially disallowing the claims asserted by Pentair, and (iii) an order overruling the late-filed objection of Kurt and Amy Stetler to the Debtors’ motion seeking the establishment of the Disputed Claims Reserve. The appeals are pending before the District Court for the Southern District of New York. None of the appeals individually or in the aggregate is expected to have a material adverse effect on our financial condition, results of operations or cash flows. On March 24, 2011, we entered into a term sheet for a cost-sharing agreement with Pentair that provides, among other things, for the sharing of costs in relation to a settlement of the claims of Kurt and Amy Stetler and the dismissal of the appeals upon our payment of the agreed share of the settlement costs. The parties subsequently negotiated definitive documentation of the agreements and, on June 23, 2011, we filed a motion with the Bankruptcy Court to approve the cost-sharing agreement and the settlement of the claims of Kurt and Amy Stetler. The Bankruptcy Court approved the settlement on July 14, 2011.

Litigation and Claims Not Discharged Under the Plan

Other Proceedings

CMUK is the principal employer of the UK Pension Plan, an occupational pension scheme that was established in the UK to provide pensions and other benefits for its employees. Under the UK Pension Plan, certain employees and former employees are entitled to pension benefits, most of which are defined benefits in nature, based on pensionable salary. The UK Pension Plan has approximately 580 pensioners and 690 members entitled to deferred benefits under the defined benefit section. The estimated funding deficit of the UK Pension Plan as of December 31, 2008, as measured in accordance with Section 75 of the Pension Act of 1995 (U.K.), was approximately £95 million.

As previously disclosed, the UK Pension Trustees filed 27 contingent, unliquidated Proofs of Claim against each of the Debtors (other than Chemtura Canada) in the Chapter 11 cases. By agreement with the UK Pension Trustees, the Proofs of Claim were disallowed on the condition that no party may later assert that the Chapter 11 cases operate as a bar to the UK Pension Trustees asserting claims against any of the Debtors in an appropriate non-bankruptcy forum. Also as previously disclosed, CMUK had been engaged with the UK Pension Trustees over the terms of a “recovery plan” to reduce the underfunded deficit in the UK Pension Plan and the applicable regulatory authority, in this case the UK Pensions Regulator (the “Regulator”), had issued a “warning notice” to CMUK and five other Chemtura affiliates, including Chemtura Corporation, stating their intent to request authority to issue a “financial support direction” against each of them for the support of the benefit obligations under the UK Pension Plan, potentially up to the amount of the funding deficit. Definitive agreements have now been entered into between CMUK and the UK Pension Trustees over the terms of a “recovery plan” to reduce the underfunded deficit in the UK Pension Plan and the Regulator has withdrawn the “warning notice” issued against CMUK and the five other Chemtura affiliates, including Chemtura Corporation. The definitive agreements provide, among other things, for CMUK to make cash contributions of £60 million (approximately \$95 million) in just over a three year period starting with an initial contribution of £30 million (\$49 million) that we made in the second quarter of 2011. The agreements also provide for the granting of both a security interest and a guarantee to support certain of the liabilities under this pension plan. There is also an evaluation being undertaken as to whether an additional funding liability exists in connection with the equalization of certain benefits under the UK Pension Plan that occurred in the early 1990s. If such an additional liability exists, additional cash contributions may be required starting in 2013.

Environmental Liabilities

We are involved in environmental matters of various types in a number of jurisdictions. A number of such matters involve claims for material amounts of damages and relate to or allege environmental liabilities, including clean up costs associated with hazardous waste disposal sites and natural resource damages.

The Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (“CERCLA”), and comparable state statutes impose strict liability upon various classes of persons with respect to the costs associated with the investigation and remediation of waste disposal sites. Such persons are typically referred to as “Potentially Responsible Parties” or PRPs. Chemtura and several of our subsidiaries have been identified by federal, state or local governmental agencies or by other PRPs, as a PRP at various locations in the United States. Because in certain circumstances these laws have been construed to authorize the imposition of joint and several liability, the Environmental Protection Agency (“EPA”) and comparable state agencies could seek to recover all costs involving a waste disposal site from any one of the PRPs for such site, including Chemtura, despite the involvement of other PRPs. In many cases, we are one of a large number of PRPs with respect to a site. In a few instances, we are the sole or one of only a handful of PRPs performing investigation and remediation. Where other financially responsible PRPs are involved, we expect that any ultimate liability resulting from such matters will be apportioned between us and such other parties. In addition, we are involved with environmental remediation and compliance activities at some of its current and former sites in the United States and abroad. As described below, certain environmental liabilities asserted against us have been discharged or settled during the Chapter 11 cases.

On June 6, 2011, our subsidiary Great Lakes Chemical Corporation received a proposed Consent Administrative Order (“CAO”) from the Arkansas Department of Environmental Quality alleging violations of the Resource Conservation and Recovery Act in conjunction with its facility located in El Dorado, Arkansas. The proposed CAO included a civil penalty. While we believe that a mutually acceptable settlement amount will be negotiated with the agency, a reasonable estimate of the settlement amount cannot be made at this time. In any event, the ultimate settlement with the agency will not have a material effect on our results of operations, financial condition or cash flows.

Discharged and/or Settled Environmental Liabilities

As part of the Chapter 11 cases, under the Plan, the Debtors retained responsibility for environmental cleanup liabilities relating to currently owned or operated sites (i.e. sites that were part of the Debtors’ estates) and, with certain exceptions, discharged or finally settled liabilities relating to formerly owned or operated sites (i.e. sites that were no longer part of the Debtors’ estates) and third-party sites (i.e. sites that never were part of the Debtors’ estate).

As of December 31, 2010, we had entered into and had obtained Bankruptcy Court approval of environmental settlements with the United States Department of Justice, the EPA and the Connecticut Commissioner of Environmental Protection, the Indiana Department of Environmental Management, the Florida Department of Environmental Protection, the North Carolina Division of Waste Management, the New York Environmental Protection and Spill Compensation Fund, the Georgia Department of Natural Resources, the Louisiana Department of Environmental Quality, the Texas Commission on Environmental Quality, the Ohio Environmental Protection Agency, the State of New York and the New York State Department of Environmental Conservation, the Pennsylvania Department of Environmental Protection, the California Department of Toxic Substances Control, the New Jersey Department of Environmental Protection and the California Regional Water Quality Control Board, Santa Ana Region, the California Regional Water Quality Control Board, San Francisco Bay Region, and the State Water Resources Board for the State of California. The settlement with the EPA resolved alleged violations of the Clean Air Act, CERCLA, the Emergency Planning and Community Right to Know Act, and the Clean Water Act, with respect to our Conyers, Georgia facility, which we had previously reported in our periodic reports.

In addition, in March 2011, we entered into and filed a motion seeking Bankruptcy Court approval of an environmental settlement with the Pennsylvania Department of Environmental Protection with respect to one additional formerly owned site. On June 20, 2011, the Bankruptcy Court entered an order approving this settlement.

All of the above-described settlements have been paid from the Debtors' estates or the Environmental Reserve established under the Plan. As of June 30, 2011, \$36 million has been paid on account of such environmental settlements. As a result of these settlements, we have voluntarily dismissed an adversary proceeding that the Debtors initiated during the Chapter 11 cases against the United States and various States seeking a ruling from the Bankruptcy Court that all of the Debtors' liabilities with respect to formerly owned or operated sites and third-party sites are dischargeable claims in the Chapter 11 cases.

In view of the offers made to settle environmental liabilities and the settlements that have been reached with respect to environmental liabilities, estimates relating to environmental liabilities with respect to formerly owned or operated sites and third-party sites are now classified as accrued expenses and other liabilities in our Consolidated Balance Sheet at June 30, 2011.

Environmental Liabilities that Have Not Been Discharged or Settled

Each quarter, we evaluate and review estimates for future remediation and other costs to determine appropriate environmental reserve amounts. For each site where the cost of remediation is probable and reasonably estimable, we determine the specific measures that are believed to be required to remediate the site, the estimated total cost to carry out the remediation plan, the portion of the total remediation costs to be borne by us and the anticipated time frame over which payments toward the remediation plan will occur. At sites where we expect to incur ongoing operation and maintenance expenditures, we accrue on an undiscounted basis for a period of generally 10 years those costs which we believe are probable and reasonably estimable.

The total amount accrued for environmental liabilities as of June 30, 2011 and December 31, 2010, was \$95 million and \$119 million (which includes \$27 million related to disputed claims in the Chapter 11 proceedings), respectively. At June 30, 2011 and December 31, 2010, \$17 million and \$43 million, respectively, of these environmental liabilities were reflected as accrued expenses and \$78 million and \$76 million, respectively, were reflected as other liabilities. We estimate that the reasonably possible ongoing environmental liabilities could range up to \$116 million at June 30, 2011. Our accruals for environmental liabilities include estimates for determinable clean-up costs. We recorded a pre-tax charge of \$3 million in 2011, and made payments of \$31 million (which includes \$27 million related to the settlement of disputed claims in the Chapter 11 proceedings) during the six month period ended June 30, 2011 for clean-up costs, which reduced our environmental liabilities. At certain sites, we have contractual agreements with certain other parties to share remediation costs. We have a receivable of \$12 million and \$11 million at June 30, 2011 and December 31, 2010, respectively, to reflect probable recoveries. At a number of these sites, the extent of contamination has not yet been fully investigated or the final scope of remediation is not yet determinable. We intend to assert all meritorious legal defenses and will pursue other equitable factors that are available with respect to these matters. However, the final cost of clean-up at these sites could exceed our present estimates, and could have, individually or in the aggregate, a material adverse effect on our financial condition, results of operations or cash flows. Our estimates for environmental remediation liabilities may change in the future should additional sites be identified, further remediation measures be required or undertaken, current laws and regulations be modified or additional environmental laws and regulations be enacted, and as negotiations with respect to certain sites continue or as certain liabilities relating to such sites are resolved as part of the Chapter 11 cases.

Other

We are routinely subject to other civil claims, litigation and arbitration, and regulatory investigations, arising in the ordinary course of our business, as well as in respect of our divested businesses. Some of these claims and litigations relate to product liability claims, including claims related to our current products and asbestos-related claims concerning premises and historic products of our corporate affiliates and predecessors. We believe the claims relating to the period before the filing of the Chapter 11 cases are subject to discharge pursuant to the Plan and will be satisfied, to the extent allowed by the Bankruptcy Court, solely from the Disputed Claims Reserve. Further, we believe that we have strong defenses to these claims. These claims have not had a material impact on us to date and we believe the likelihood that a future material adverse outcome will result from these claims is remote. However, we cannot be certain that an adverse outcome of one or more of these claims, to the extent not discharged in the Chapter 11 cases, would not have a material adverse effect on its financial condition, results of operations or cash flows.

Guarantees

In addition to the letters of credit of \$14 million and \$12 million outstanding at June 30, 2011 and December 31, 2010, respectively, we have guarantees that have been provided to various financial institutions. At June 30, 2011 and December 31, 2010, we had \$5 million and \$6 million, respectively of outstanding guarantees primarily related to vendor deposits. The letters of credit and guarantees were primarily related to liabilities for insurance obligations, vendor deposits and European value added tax (“VAT”) obligations.

We have applied the disclosure provisions of ASC Topic 460, Guarantees (“ASC 460”), to our agreements that contain guarantee or indemnification clauses. We are a party to an agreement pursuant to which we may be obligated to indemnify a third party with respect to certain loan obligations of joint venture companies in which we have an equity interest. These obligations arose to provide initial financing for a joint venture start-up, fund an acquisition and/or provide project capital. Such obligations mature through August 2016. In the event that any of the joint venture companies were to default on these loan obligations, we would indemnify the other party up to its proportionate share of the obligation based upon its ownership interest in the joint venture. At June 30, 2011, the maximum potential future principal and interest payments due under these guarantees were \$14 million and \$1 million, respectively. At December 31, 2010, the maximum potential future principal and interest payments due under these guarantees were \$15 million and \$1 million, respectively. In accordance with ASC 460, we have accrued \$2 million in reserves, which represents the probability weighted fair value of these guarantees at June 30, 2011 and December 31, 2010. The reserve has been included in other liabilities on our Consolidated Balance Sheet at June 30, 2011 and December 31, 2010 with an offset to the investment included in other assets.

We also have a customer guarantee, in which we have contingently guaranteed certain debt obligations of one of our customers. The amount of this guarantee was \$2 million at June 30, 2011 and December 31, 2010. Based on past experience and on the underlying circumstances, we do not expect to have to perform under this guarantee.

In the ordinary course of business, we enter into contractual arrangements under which we may agree to indemnify a third party to such arrangement from any losses incurred relating to the services they perform on our behalf or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation, claims or environmental matters relating to our past performance. For any losses that we believe are probable and estimable, we have accrued for such amounts in our Consolidated Balance Sheets.

18) BUSINESS SEGMENT DATA

We evaluate a segment’s performance based on several factors, of which the primary factor is based on operating profit (loss). In computing operating profit (loss) by segment, the following items have not been deducted: (1) general corporate expense; (2) amortization; (3) facility closures, severance and related costs; (4) certain accelerated depreciation; (5) gain (loss) on sale of business; (6) changes in estimates related to expected allowable claims; and (7) impairment charges. Pursuant to ASC Topic 280, Segment Reporting (“ASC 280”), these items have been excluded from our presentation of segment operating profit (loss) because they are not reported to the chief operating decision maker for purposes of allocating resources among reporting segments or assessing segment performance.

Industrial Performance Products

Industrial Performance Products are engineered solutions for our customers’ specialty chemical needs. Industrial Performance Products include petroleum additives that provide detergency, friction modification and corrosion protection in automotive lubricants, greases, refrigeration and turbine lubricants; castable urethane prepolymers engineered to provide superior abrasion resistance and durability in many industrial and recreational applications; polyurethane dispersions and urethane prepolymers used in various types of coatings such as clear floor finishes,

high-gloss paints and textiles treatments; and antioxidants (as well as UV light stabilizers and polymer modifiers) that improve the durability and longevity of plastics used in food packaging, consumer durables, automotive components and electrical components. These products are sold directly to manufacturers and through distribution channels.

Industrial Engineered Products

Industrial Engineered Products are chemical additives designed to improve the performance of polymers in their end-use applications and fine chemicals used as catalysts, surface treatments and intermediates. Industrial Engineered Products include brominated performance products, flame retardants, fumigants and organometallics. The products are sold across the entire value chain ranging from direct sales to monomer producers, polymer manufacturers, compounders and fabricators, fine chemical manufacturers and oilfield service companies to industry distributors.

Consumer Products

Consumer Products are performance chemicals that are sold to consumers for in-home and outdoor use. Consumer Products include a variety of branded recreational water purification products sold through local dealers and large retailers to assist consumers in the maintenance of their pools and spas and branded cleaners and degreasers sold primarily through mass merchants to consumers for home cleaning.

Chemtura AgroSolutions

Chemtura AgroSolutions develops, supplies, registers and sells agricultural chemicals formulated for specific crops in various geographic regions for the purpose of enhancing quality and improving yields. The business focuses on specific target markets in six major product lines: seed treatments, fungicides, miticides, insecticides, growth regulators and herbicides. These products are sold directly to growers and to major distributors in the agricultural sector.

General Corporate Expense and Other Charges

General corporate expense includes costs and expenses that are of a general corporate nature or managed on a corporate basis. These costs (net of allocations to the business segments) primarily represent corporate stewardship and administration activities together with costs associated with legacy activities and intangible asset amortization. Functional costs are allocated between the business segments and general corporate expense. Accelerated depreciation relates to certain assets affected by our restructuring programs. Facility closures, severance and related costs are primarily for severance costs related to our cost savings initiatives. Impairment charges related to the impairment of certain intangible assets and property, plant and equipment. Change in estimates related to expected allowable claims relates to adjustments to liabilities subject to compromise (primarily legal and environmental reserves) as a result of the proofs of claim evaluation process.

A summary of business data for our reportable segments for the quarters and six months ended June 30, 2011 and 2010 are as follows:

(In millions)	Quarters ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Net Sales				
Industrial Performance Products	\$ 370	\$ 313	\$ 706	\$ 599
Industrial Engineered Products	244	187	453	347
Consumer Products	152	171	231	263
Chemtura AgroSolutions	110	96	185	161

19) GUARANTOR CONDENSED CONSOLIDATING FINANCIAL DATA

Our obligations under the Senior Notes are fully and unconditionally guaranteed on a senior unsecured basis, jointly and severally, by each current and future domestic restricted subsidiary, other than excluded subsidiaries that guarantee any indebtedness of Chemtura or our restricted subsidiaries. Our subsidiaries that do not guarantee the Senior Notes are referred to as the “Non-Guarantor Subsidiaries.” The Guarantor Condensed Consolidating Financial Data presented below presents the statements of operations, balance sheets and statements of cash flow for: (i) Chemtura Corporation (the “Parent Company”), the Guarantor Subsidiaries and the Non-Guarantor Subsidiaries on a consolidated basis (which is derived from Chemtura historical reported financial information); (ii) the Parent Company, alone (accounting for our Guarantor Subsidiaries and the Non-Guarantor Subsidiaries on an equity basis under which the investments are recorded by each entity owning a portion of another entity at cost, adjusted for the applicable share of the subsidiary's cumulative results of operations, capital contributions and distributions, and other equity changes); (iii) the Guarantor Subsidiaries alone; and (iv) the Non-Guarantor Subsidiaries alone.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our unaudited condensed consolidated financial statements included in Item 1 of this Form 10-Q.

This management's discussion and analysis of financial condition and results of operations contains forward-looking statements. See "forward-looking statements" for a discussion of certain risks, assumptions and uncertainties associated with these statements.

OUR BUSINESS

We are among the larger publicly traded specialty chemical companies in the United States. We are dedicated to delivering innovative, application-focused specialty chemical solutions and consumer products. We operate in a wide variety of end-use industries, including agriculture, automotive, building and construction, electronics, lubricants, packaging, plastics for durable and non-durable goods, pool and spa chemicals and transportation. The majority of our chemical products are sold to industrial manufacturing customers for use as additives, ingredients or intermediates that add value to their end products. Our agrochemical and consumer products are sold to dealers, distributors and major retailers. We are a leader in many of our key product lines and transact business in more than 100 countries.

The primary economic factors that influence the operations and sales of our Industrial Engineered Products and Industrial Performance Products segments are industrial production, residential and commercial construction, electronic component production and polymer production. In addition, our Chemtura AgroSolutions segment is influenced by worldwide weather, disease and pest infestation conditions. Our Consumer Products segment is also influenced by general economic conditions impacting consumer spending and weather conditions.

Other factors affecting our financial performance include industry capacity, customer demand, raw material and energy costs, and selling prices. Selling prices are influenced by the global demand and supply for the products we produce. We pursue selling prices that reflect the value our products deliver to our customers, while seeking to pass on higher costs for raw material and energy to preserve our profit margins.

EMERGENCE FROM CHAPTER 11 AND IMPLEMENTATION OF PLAN OF REORGANIZATION

On March 18, 2009, (the "Petition date") Chemtura and 26 of our U.S. affiliates (collectively the "U.S. Debtors") filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Code (the "Bankruptcy Code") in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court").

On October 21, 2010, the Bankruptcy Court entered a bench decision approving confirmation of the Debtors' plan of reorganization (the "Plan") and on November 3, 2010, the Bankruptcy Court entered an order confirming the Plan. On November 10, 2010 (the "Effective Date"), the Debtors substantially consummated their reorganization through a series of transactions contemplated by the Plan and the Plan became effective.

On June 10, 2011, we filed a closing report in Chemtura Canada's Chapter 11 case and a motion seeking a final decree closing that Chapter 11 case. On June 23, 2011, the Bankruptcy Court granted our motion and entered a final decree closing the Chapter 11 case of Chemtura Canada.

For further discussion, see Note 2 – Emergence from Chapter 11 in the Notes to our Consolidated Financial Statements.

SECOND QUARTER RESULTS

Overview

Consolidated net sales were \$876 million for the second quarter of 2011 or \$109 million higher than 2010. This increase in net sales was attributable to higher selling prices of \$55 million, increased sales volume and favorable product mix of \$38 million, and \$21 million benefit from favorable foreign currency translation, partially offset by a reduction in net sales of \$5 million due to the divestiture of the natural sodium sulfonates and oxidized petrolatum product lines in the third quarter of 2010. The higher selling prices were achieved by the Industrial Performance Products and Industrial Engineered Products segments during the second quarter of 2011. All segments, except Consumer Products, contributed to the increase in sales volume.

Gross profit for the second quarter of 2011 was \$224 million, which is an increase of \$25 million compared with the second quarter of 2010. Gross profit as a percentage of sales remained constant at 26% for the second quarter of 2011 and 2010. The increase in gross profit was primarily due to \$55 million in higher selling prices, \$11 million in higher sales volume and favorable product mix and a \$7 million benefit from favorable foreign currency translation. These improvements were partially offset by \$33 million in higher raw material and energy costs, \$6 million of unfavorable manufacturing costs, a \$4 million increase in distribution costs, a \$4 million increase in acceleration of asset retirement obligations and \$1 million of other costs.

Selling, general and administrative (“SG&A”) expense of \$92 million was \$21 million higher than the second quarter of 2010. The increase in SG&A was due primarily to higher stock compensation expense of \$7 million (including expense related to grants under the emergence incentive plans approved by the Bankruptcy Court), increased selling costs of \$5 million to support our increase in net sales, and an increase in allowance for doubtful accounts debt expense of \$5 million, primarily related to Chemtura AgroSolutions operations in regions with higher credit risk, \$3 million of increase in functional spending and \$1 million of other costs.

Depreciation and amortization expense of \$34 million was \$11 million lower than the second quarter of 2010, primarily due to the decrease in accelerated depreciation related to the El Dorado, Arkansas facility restructuring activities.

Research and development expense (“R&D”) of \$11 million was consistent with the second quarter of 2010.

Impairment charges of \$1 million for the second quarter of 2011 included the impairment of property, plant and equipment related to the El Dorado, Arkansas facility restructuring activities.

Changes in estimates related to expected allowable claims were \$1 million of expense for the second quarter of 2011, compared with income of \$49 million for the second quarter of 2010. These charges included adjustments to liabilities subject to compromise (primarily legal and environmental reserves) identified in the claim evaluation and settlement processes. The decrease in activity is due to the diminishing number of claims remaining to be resolved under the disputed claims reserves.

Interest expense of \$16 million during the second quarter of 2011 was \$101 million lower than the second quarter of 2010. In 2010, we determined that it was probable that obligations for interest on unsecured claims would ultimately be paid based on the estimated claim recoveries reflected in the Plan filed during the second quarter of 2010. As such, interest that had not previously been recorded since the Petition Date was recorded in the second quarter of 2010. Thus, the decrease from 2010 to 2011 is due to the post-petition interest recorded during the second quarter of 2010 of \$108 million, partially offset by increased interest expense in 2011 associated with the Senior Notes and Term Loan issued in August 2010 and the ABL Facility secured in November 2010 compared with interest expense on the borrowings in 2010 under the Amended DIP Credit Facility.

Other expense, net of \$1 million in the second quarter of 2011 decreased \$7 million compared with other expense, net of \$8 million for the second quarter of 2010. The decrease in expense primarily reflected improved foreign currency exchange impacts.

Reorganization items, net of \$6 million in the second quarter of 2011 was \$20 million lower than the second quarter of 2010. The expense in both periods primarily comprised professional fees directly associated with the Chapter 11 reorganization. The decrease reflects our emergence from Chapter 11 in November 2010.

The income tax benefit from continuing operations in the second quarter of 2011 was \$6 million compared with an income tax provision from continuing operations of \$11 million in the second quarter of 2010. The tax benefit

reported in the second quarter of 2011 included a decrease in deferred foreign income taxes of approximately \$17 million that had been recorded in an international jurisdiction in prior years. The tax benefit was recorded after receiving approval from the international jurisdiction to change our filing position. We have offset our current year-to-date U.S. income with net operating loss carryforwards and reduced the associated valuation allowance. In the second quarter of 2010, we provided a full valuation allowance against the tax benefit associated with our U.S. net operating loss.

Net earnings from continuing operations attributable to Chemtura for the second quarter of 2011 was \$69 million, or \$0.69 per share, as compared with a net loss from continuing operations attributable to Chemtura of \$41 million, or \$0.16 per share for the second quarter of 2010.

Earnings from discontinued operations, net of tax, for the second quarter of 2010 was \$1 million. The loss from sale of discontinued operations, net of tax, for the second quarter of 2010 was \$9 million, or \$0.04 per share. Discontinued operations related to the polyvinyl chloride ("PVC") additives business, which was sold in April 2010.

The following is a discussion of the results of our segments for the second quarter ended June 30, 2011.

Industrial Performance Products

Net sales for the Industrial Performance Products segment increased by \$57 million to \$370 million in the second quarter of 2011. Operating profit increased by \$1 million in the second quarter of 2011 to \$39 million compared with \$38 million in the second quarter of 2010.

The \$57 million increase in net sales was driven by increased sales volume of \$36 million, higher selling prices of \$19 million, and a \$7 million benefit from favorable foreign currency translation, partially offset by a decrease of \$5 million due to the divestitures of the natural sodium sulfonates and oxidized petrolatum product lines in 2010. The increase in sales volume in the second quarter of 2011 was driven by demand growth for all our major product lines in the segment. The higher selling prices were in response to increasing raw material costs.

Operating profit increased \$1 million to \$39 million, primarily due to \$19 million of increased selling prices, a \$12 million benefit from increased sales volume and favorable product mix and a \$1 million benefit from favorable foreign currency translation, partially offset by \$16 million in higher raw material costs, a \$6 million increase in manufacturing costs, \$6 million in higher SG&A and R&D (collectively "SGA&R") expenses, \$1 million in higher distribution costs, a \$1 million reduction in profit from the divestitures of the natural sodium sulfonates and oxidized petrolatum product lines in 2010, and \$1 million in higher other expenses.

As previously disclosed, the U.S. regulatory approvals of our new liquid antioxidant product, Weston 705 are progressing slower than we anticipated. The U.S. food and drug administration (the "FDA") has advised us that we need to submit additional test data in order for them to determine if the product can be approved. Given the time required for such testing and review, we are unlikely to know the final status before year end. In Europe, however, the European Food Safety Authority recently approved the use of Weston 705 for use in all polymers subject to meeting minimum migration criteria. We believe this approval will allow polymers containing Weston 705 to be used in a wide variety of applications.

Industrial Engineered Products

Net sales for the Industrial Engineered Products segment increased by \$57 million to \$244 million for the second quarter of 2011. The \$42 million of operating profit for the second quarter of 2011 reflected an improvement of \$35 million compared with operating profit of \$7 million in the second quarter of 2010.

The \$57 million increase in net sales reflected \$41 million of higher selling prices, an increase in volume of \$9 million, and a \$7 million benefit from favorable foreign currency translation. Substantial price increases have been implemented across all major product lines in response to higher raw material costs and to support significant ongoing investment to ensure sustainable and reliable supply as demand for bromine and its derivatives continues to grow globally. Demand remained strong across our customers in the electronics, fine chemicals, oilfield, pharmaceutical, insulation and furniture foam applications due in large part to improved global macroeconomic conditions.

Operating profit increased \$35 million primarily due to \$41 million of increased selling prices, \$9 million reduction in accelerated depreciation, a \$4 million benefit from favorable foreign currency translation, a \$1 million benefit from higher sales volume and product mix, and a \$1 million increase in equity income, and other cost reductions of \$1 million. These items were partially offset by a \$14 million increase in raw material costs, \$3 million in higher SGA&R expense, \$2 million in higher asset retirement obligations, \$2 million increase in manufacturing costs and \$1 million in higher distribution costs.

Following the fourth quarter 2010 launch of three new innovative flame retardants under our EMERALD™ series in May 2011 we continued the introduction of new products with the launch of EMERALD™ 3000, an innovative brominated polymeric flame retardant for expanded polystyrene foam (EPS) and extruded polystyrene foam (XPS) insulation.

Consumer Products

Net sales for the Consumer Products segment decreased by \$19 million to \$152 million in the second quarter of 2011. Operating profit decreased \$16 million in the second quarter of 2011 to a \$22 million operating profit compared with \$38 million of operating profit in the second quarter of 2010.

The \$19 million decrease in net sales was driven by an \$18 million reduction in sales volume and \$5 million in lower selling prices, partially offset by a \$4 million benefit from favorable foreign currency translation. Sales volume reflected mixed weather compared to the second quarter of 2010 and lower demand in the mass market channel where inventories are being managed by our customers at lower levels than the prior year and the loss of a customer for this season who accounted for 4% of net sales in the calendar year of 2010. Net sales were also impacted by lower selling prices this season in the mass market channel than in the 2010 season. European sales volume increased this quarter compared to the second quarter of 2010.

Operating profit decreased \$16 million primarily due to a \$9 million decrease in sales volume and unfavorable product mix, \$5 million in lower selling prices due to the pricing pressures noted above, a \$3 million increase in manufacturing costs and a \$1 million increase in raw material costs, partially offset by a \$2 million benefit from favorable foreign currency translation.

Chemtura AgroSolutions

Net sales for the Chemtura AgroSolutions segment increased by \$14 million to \$110 million for the second quarter of 2011. Operating profit in the second quarter of 2011 totaled \$12 million compared to operating profit of \$7 million in the second quarter in 2010.

The increase in net sales reflected a \$10 million increase in sales volume, a \$3 million benefit from favorable foreign currency translation and a \$1 million increase in selling prices. Sales recovered strongly in Europe, where sales this quarter improved compared to the second quarter of 2010 by 41% and the quarter also benefitted from continued good performance in North America despite a wet start to the season. There was also positive early season momentum in Latin America. In Asia Pacific we continued to work to strengthen our distribution channels.

Operating profit increased primarily due to a \$7 million benefit from higher sales volume and favorable product mix, a \$5 million decrease in manufacturing costs due to higher volumes, and \$1 million increase in selling prices. These favorable items were partially offset by a \$4 million increase in SGA&R expense primarily due to an increase in allowance for doubtful accounts, a \$1 million increase in distribution costs, a \$1 million increase in raw material costs, a \$1 million decrease in equity income and \$1 million in higher other expenses.

General Corporate

General corporate expenses include costs and expenses that are of a general nature or managed on a corporate basis. These costs (net of allocations to the business segments) primarily represent corporate stewardship and administration activities together with costs associated with legacy activities and intangible asset amortization. Functional costs are allocated between the business segments and general corporate expense.

Corporate expense was \$26 million in the second quarter of 2011, which included \$9 million of amortization expense related to intangible assets. In comparison, corporate expense was \$16 million in the second quarter of 2010, which included \$9 million of amortization expense related to intangible assets.

The \$10 million increase in corporate expense was primarily due to an increase in stock compensation expense, which included expense related to grants under the emergence incentive plans approved by the Bankruptcy Court.

YEAR-TO-DATE RESULTS

Overview

Consolidated net sales were \$1.6 billion for the six month period ended June 30, 2011 or \$205 million higher than the same period of 2010. This increase in net sales was attributable to \$97 million of higher sales volume, \$96 million from higher selling prices, and a \$23 million benefit from favorable foreign currency translation, partially offset by lower sales of \$11 million due to the divestiture of the natural sodium sulfonates and oxidized petrolatum product lines in the third quarter of 2010.

Gross profit for the six month period ended June 30, 2011 was \$385 million, an increase of \$52 million compared with the same period of 2010. Gross profit as a percentage of sales remained constant at 24% for the six month period

ended June 30, 2011 and 2010. The increase in gross profit was primarily due to \$96 million from higher selling prices, \$30 million favorable increase in sales volume and favorable product mix, \$8 million from favorable foreign currency translation, and \$1 million reduction in accelerated recognition of asset retirement obligations. These improvements were partially offset by \$53 million in higher raw material and energy costs, \$8 million from unfavorable manufacturing costs, an \$8 million increase in distribution costs, \$3 million due to the divestiture of the natural sodium sulfonates and oxidized petrolatum product lines, a \$2 million increase in stock compensation expense, a \$1 million increase in environmental reserves and \$8 million of other costs.

SG&A expense of \$171 million was \$24 million higher than the six month period ended June 30, 2010. The increase in SG&A was primarily due to higher stock compensation expense of \$13 million (including expense related to grants under the emergence incentive plans approved by the Bankruptcy Court), increased selling costs of \$6 million to support our increase in net sales, and an increase in bad debt expense of \$5 million, primarily related to Chemtura AgroSolutions operations in regions with higher credit risk and unfavorable foreign currency translation.

Depreciation and amortization expense of \$71 million was \$23 million lower than the six month period ended June 30, 2010, primarily due to the decrease in accelerated depreciation related to the El Dorado, Arkansas facility restructuring activities.

R&D expense of \$22 million was \$2 million higher than the six month period ended June 30, 2010 as a result of increased investments.

Impairment charges of \$3 million for the six month period ended June 30, 2011 included the impairment of intangible assets with no future use and property, plant and equipment related to the El Dorado, Arkansas facility restructuring activities.

Changes in estimates related to expected allowable claims were \$1 million for the six month period ended June 30, 2011, compared with \$73 million for the same period of 2010. These charges included adjustments to liabilities subject to compromise (primarily legal and environmental reserves) identified in the claim evaluation and settlement processes. The decrease in activity is due to the diminishing number of claims remaining to be resolved under the disputed claims reserves.

Interest expense of \$32 million during the six month period ended June 30, 2011 was \$97 million lower than the same period of 2010. In 2010, we determined that it was probable that obligations for interest on unsecured claims would ultimately be paid based on the estimated claim recoveries reflected in the Plan filed during the second quarter of 2010. As such, interest that had not previously been recorded since the Petition Date was recorded in the second quarter of 2010. Thus, the decrease from 2010 to 2011 is due to the post-petition interest recorded during the second quarter of 2010 of \$108 million, partially offset by increased interest expense in 2011 associated with the Senior Notes and Term Loan issued in August 2010 and the ABL Facility secured in November 2010 compared with interest expense on the borrowings in 2010 under the Amended DIP Credit Facility.

Other expense, net for the six month period ended June 30, 2011 was negligible compared with other expense, net of \$10 million for the same period of 2010. The decrease in expense primarily reflected improved foreign currency exchange impacts.

Reorganization items, net of \$13 million in the six month period ended June 30, 2011 was \$34 million lower than the same period of 2010. The expense in both periods primarily comprised professional fees directly associated with the Chapter 11 reorganization. The decrease reflects our emergence from Chapter 11 in November 2010.

The income tax benefit from continuing operations in the six month period ended June 30, 2011 was \$3 million, compared with an income tax provision from continuing operations of \$16 million in the six month period of 2010. The tax benefit reported in the six month period ended June 30, 2011 included a decrease in deferred foreign income taxes of approximately \$17 million that had been recorded in an international jurisdiction in prior years. The tax benefit was recorded after receiving approval from the international jurisdiction to change our filing position. We have offset our current year-to-date U.S income with net operating loss carry forwards and reduced the associated valuation allowance. In the six month period of 2010, we provided a full valuation allowance against the tax benefit associated with our U.S. net operating loss.

Net earnings from continuing operations attributable to Chemtura for the six month period ended June 30, 2011 was \$76 million, or \$0.76 per share as compared with a net loss from continuing operations attributable to Chemtura of \$218 million, or \$0.90 per share for the six month period of 2010.

The loss from discontinued operations, net of tax, for the six month period ended June 30, 2010 was \$1 million. The loss from sale of discontinued operations, net of tax, for the six month period ended June 30, 2010 was \$9 million, or \$0.04 per share. Discontinued operations related to the PVC additives business, which was sold in April 2010.

The following is a discussion of the results of our segments for the six month period ended June 30, 2011.

Industrial Performance Products

Net sales for the Industrial Performance Products segment increased by \$107 million to \$706 million in the six month period ended June 30, 2011. Operating profit increased by \$6 million in the six month period ended June 30, 2011 to \$69 million compared with \$63 million in the six month period of 2010.

The \$107 million increase in net sales was driven by increased sales volume of \$80 million, higher selling prices of \$31 million, and a benefit from favorable foreign currency translation of \$7 million, partially offset by a decrease of \$11 million due to the divestitures of the natural sodium sulfonates and oxidized petrolatum product lines in 2010. The increase in sales volume was driven by demand growth for all our major product lines in the segment. The higher prices were in response to increasing raw material costs.

Operating profit increased \$6 million, primarily due to \$31 million of increased selling prices, \$27 million benefit from increased sales volume and favorable product mix, and a \$1 million benefit from favorable foreign currency translation, partially offset by \$28 million in higher raw material costs, an \$8 million increase in manufacturing costs, \$8 million in higher SGA&R expense, \$4 million in higher distribution costs, a \$3 million reduction in profit from the divestitures of the natural sodium sulfonates and oxidized petrolatum product lines in 2010, and \$2 million of other cost increases.

As previously disclosed, the U.S. regulatory approvals of our new liquid antioxidant product, Weston 705 are progressing slower than we anticipated. The FDA has advised us that we need to submit additional test data in order for them to determine if the product can be approved. Given the time required for such testing and review, we are unlikely to know the final status before year end. In Europe, however, the European Food Safety Authority recently approved the use of Weston 705 for use in all polymers subject to meeting minimum migration criteria. We believe this approval will allow polymers containing Weston 705 to be used in a wide variety of applications.

Industrial Engineered Products

Net sales for the Industrial Engineered Products segment increased by \$106 million to \$453 million for the six month period ended June 30, 2011. The \$75 million operating profit for the six month period ended June 30, 2011 reflected an improvement of \$71 million compared with operating profit of \$4 million in the six month period of 2010.

The \$106 million increase in net sales reflected \$71 million of higher selling prices, an increase in net sales volume of \$28 million, and a \$7 million benefit from favorable foreign currency translation. Substantial price increases have been implemented across all major product lines in response to higher raw material costs and to support significant ongoing investment to ensure sustainable and reliable supply as demand for bromine and its derivatives continues to grow globally. Demand remains strong across our customers in the electronics, fine chemicals, oilfield, pharmaceutical, insulation and furniture foam applications due in large part to improved global macroeconomic conditions.

Operating profit increased \$71 million primarily due to \$71 million of increased selling prices, a \$17 million reduction in accelerated depreciation, a \$6 million benefit from higher sales volume and favorable product mix, a \$4 million benefit from favorable foreign currency translation, a \$3 million decrease in accelerated recognition of asset retirement obligations, and a \$1 million increase in equity income, and other cost reductions of \$2 million. These items were partially offset by a \$24 million increase in raw material costs, \$7 million in higher SGA&R expense, and \$2 million in higher distribution costs.

Following the fourth quarter 2010 launch of three new innovative flame retardants under our EMERALD™ series in May 2011 we continued the introduction of new products with the launch of EMERALD™ 3000 an innovative brominated polymeric flame retardant for expanded polystyrene foam (EPS) and extruded polystyrene foam (XPS) insulation.

Consumer Products

Net sales for the Consumer Products segment decreased by \$32 million to \$231 million in the six month period ended June 30, 2011. Operating profit decreased \$25 million in the six month period ended June 30, 2011 to operating profit of \$19 million compared to operating profit of \$44 million for the six month period of 2010.

The \$32 million decrease in net sales was driven by a \$30 million decrease in net sales volume, and \$7 million of lower selling prices, which was partially offset by a \$5 million benefit from favorable foreign currency translation. Sales volume reflected mixed weather compared to 2010 and lower demand in the mass market channel where inventories are being managed by our customers at lower levels than the prior year. Net sales were also impacted by lower selling prices this season in the mass market channel than in the 2010 season.

Operating profit decreased \$25 million primarily due to a \$14 million decrease in sales volume and unfavorable product mix, \$7 million in lower selling prices due to pricing pressures in the market place during the season's product line reviews, \$3 million increase in manufacturing costs, a \$2 million increase in raw material costs, \$2 million in higher SGA&R expense, \$1 million of higher accelerated recognition of asset retirement obligations and an increase of \$1 million in other costs, partially offset by a \$2 million in favorable foreign currency translation, \$2 million reduction in accelerated depreciation and \$1 million in lower distribution costs.

Chemtura AgroSolutions

Net sales for the Chemtura AgroSolutions segment increased by \$24 million to \$185 million for the six month period ended June 30, 2011. Operating profit in the six month period ended June 30, 2011 was \$14 million compared with operating profit of \$6 million in the six month period of 2010.

The increase in net sales reflected a \$20 million increase in sales volume and a \$4 million benefit from favorable foreign currency translation. This was primarily driven by the ongoing recovery in sales of our products in Europe.

Operating profit increased primarily due to an \$11 million benefit from higher sales volume and product mix, and \$4 million decrease in manufacturing costs due to improved volumes. These items were partially offset by \$3 million in higher distribution costs, a \$1 million decrease in equity income and other costs of \$3 million.

General Corporate

General corporate expenses include costs and expenses that are of a general nature or managed on a corporate basis. These costs (net of allocations to the business segments) primarily represent corporate stewardship and administration activities together with costs associated with legacy activities and intangible asset amortization. Functional costs are allocated between the business segments and general corporate expense.

Corporate expense was \$54 million in the six month period ended June 30, 2011, which included \$20 million of amortization expense related to intangible assets. In comparison, corporate expense was \$43 million in the six month period ended June 30, 2010 which included \$18 million of amortization expense related to intangible assets.

The \$11 million increase in corporate expense was primarily due to an increase in stock compensation expense, which included expense related to grants under the emergence incentive plans approved by the Bankruptcy Court.

LIQUIDITY AND CAPITAL RESOURCES

Financing Facilities

In order to emerge from Chapter 11 and provide for future capital needs, we obtained approximately \$1 billion in financing in 2010. On August 27, 2010, we completed a private placement offering under Rule 144A of \$455 million aggregate principal amount of 7.875% senior notes due 2018 (the "Senior Notes") at an issue price of 99.269% in reliance on an exemption pursuant to Section 4(2) of the Securities Act of 1933. We also entered into a senior secured term facility credit agreement due 2016 (the "Term Loan") with Bank of America, N.A., as administrative agent, and other lenders party thereto for an aggregate principal amount of \$295 million with an original issue discount of 1%. The Term Loan permits us to increase the size of the facility by up to \$125 million. On the Effective Date, we entered into a five-year ABL Facility for an amount up to \$275 million, subject to availability under a borrowing base (with a \$125 million letter of credit sub-facility) due 2015. The ABL Facility permits us to increase the size of the facility by up to \$125 million subject to obtaining lender commitments to provide such increase.

Senior Notes

Our Senior Notes contain covenants that limit our ability to enter into certain transactions, such as incurring additional indebtedness, creating liens, paying dividends, and entering into acquisitions, dispositions and joint ventures. As of June 30, 2011, we were in compliance with the covenant requirements of the Senior Notes.

Our Senior Notes are subject to certain events of default, including, among others, breach of other agreements in the Indenture; any guarantee of the Senior Notes by a significant subsidiary ceasing to be in full force and effect; a default by us or our restricted subsidiaries under any bonds, debentures, notes or other evidences of indebtedness of a certain amount, resulting in its acceleration; the rendering of judgments to pay certain amounts of money against us or our significant subsidiaries which remains outstanding for 60 days; and certain events of bankruptcy or insolvency.

In connection with the Senior Notes, in June 2011, we consummated an exchange offer registered with the Securities and Exchange Commission to exchange registered Senior Notes for unregistered Senior Notes originally issued in the private placement offering. The terms of the registered Senior Notes are substantially identical to the unregistered Senior Notes, except that transfer restrictions, registration rights and additional interest provisions relating to the unregistered Senior Notes do not apply to the registered Senior Notes.

Term Loan

The Term Loan is secured by a first priority lien on substantially all of our U.S. tangible and intangible assets (excluding accounts receivable, inventory, deposit accounts and certain other related assets), including, without limitation, real property, equipment and intellectual property, together with a pledge of the equity interests of our first tier subsidiaries and the guarantors of the Term Loan, and a second priority lien on substantially all of our U.S. accounts receivable and inventory.

We may, at our option, prepay the outstanding aggregate principal amount on the Term Loan advances in whole or ratably in part along with accrued and unpaid interest on the date of the prepayment. If the prepayment is made prior to the first anniversary of the closing date of the Term Loan agreement, we will pay an additional premium of 1% of the aggregate principal amount of prepaid advances.

Our obligations as borrower under the Term Loan are guaranteed by certain of our U.S. subsidiaries.

The Term Loan contains covenants that limit our ability to enter into certain transactions, such as creating liens, incurring additional indebtedness or repaying certain indebtedness, making investments, paying dividends, and entering into acquisitions, dispositions and joint ventures.

Additionally, the Term Loan requires that we meet certain financial maintenance covenants including a maximum Secured Leverage Ratio (as defined in the agreement) of 2.5:1.0 and a minimum Consolidated Interest Coverage Ratio (as defined in the agreement) of 3.0:1.0. As of June 30, 2011, we were in compliance with the covenant requirements of the Term Loan.

The Term Loan is subject to certain events of default applicable to Chemtura, the guarantors and their respective subsidiaries, including, nonpayment of principal, interest, fees or other amounts, violation of covenants, material inaccuracy of representations and warranties (including the existence of a material adverse event as defined in the agreement), cross-default to material indebtedness, certain events of bankruptcy and insolvency, material judgments, certain ERISA events, a change in control, and actual or asserted invalidity of liens or guarantees or any collateral document, in certain cases subject to the threshold amounts and grace periods set forth in the Term Loan agreement.

ABL Facility

Our obligations (and the obligations of the other borrowing subsidiaries) under the ABL Facility are guaranteed on a secured basis by all the guarantors (as defined in the agreement) that are not borrowers, and by certain of our future direct and indirect domestic subsidiaries. The obligations and guarantees under the ABL Facility are secured by (i) a first-priority security interest in the borrowers' and the guarantors' existing and future inventory and accounts receivable, together with general intangibles relating to inventory and accounts receivable, contract rights under agreements relating to inventory and accounts receivable, documents relating to inventory, supporting obligations and letter-of-credit rights relating to inventory and accounts receivable, instruments evidencing payment for inventory and accounts receivable; money, cash, cash equivalents, securities and other property held by the administrative agent or any lender under the ABL Facility; deposit accounts, credits and balances with any financial institution with which any borrower or any guarantor maintains deposits and which contain proceeds of, or collections on, inventory and accounts receivable; books, records and other property related to or referring to any of the foregoing and proceeds of any of the foregoing (the "Senior Asset Based Priority Collateral"); and (ii) a second-priority security interest in substantially all of the borrowers' and the guarantors' other assets, including (a) 100% of the capital stock of borrowers' and the guarantors' direct domestic subsidiaries held by the borrowers and the guarantors and 100% of the non-voting capital stock of the borrowers' and the guarantors' direct foreign subsidiaries held by the borrowers and the guarantors,

and (b) 65% of the voting capital stock of the borrowers' and the guarantors' direct foreign subsidiaries (to the extent held by the borrowers and the guarantors), in each case subject to certain exceptions set forth in the ABL Facility agreement and the related loan documentation.

If, at the end of any business day, the amount of unrestricted cash and cash equivalents held by the borrowers and guarantors (excluding amounts in certain exempt accounts) exceeds \$20 million in the aggregate, mandatory prepayments of the loans under the ABL Facility (and cash collateralization of outstanding letters of credit) are required on the following business day in an amount necessary to eliminate such excess (net of our known cash uses on the date of such prepayment and for the two business days thereafter).

The ABL Facility agreement contains certain affirmative and negative covenants (applicable to us, the other borrowing subsidiaries, the guarantors and their respective subsidiaries), including, without limitation, covenants requiring financial reporting and notices of certain events, and covenants imposing limitations on incurrence of indebtedness and guarantees; liens; loans and investments; asset dispositions; dividends, redemptions, and repurchases of stock and prepayments, redemptions and repurchases of certain indebtedness; mergers, consolidations, acquisitions, joint ventures or creation of subsidiaries; material changes in business; transactions with affiliates; restrictions on distributions from subsidiaries and granting of negative pledges; changes in accounting and reporting; sale leasebacks; and speculative transactions, and a springing financial covenant requiring a minimum trailing 12-month fixed charge coverage ratio (as defined in the agreement) of 1.1 to 1.0 at all times during any period from the date when the amount available for borrowings under the ABL Facility falls below the greater of (i) \$34 million and (ii) 12.5% of the aggregate commitments to the date such available amount has been equal to or greater than the greater of (i) \$34 million and (ii) 12.5% of the aggregate commitments for 45 consecutive days. As of June 30, 2011, we were in compliance with the covenant requirements of the ABL Facility.

The ABL Facility agreement contains certain events of default (applicable to us, the other borrowing subsidiaries, the guarantors and their respective subsidiaries), including nonpayment of principal, interest, fees or other amounts, violation of covenants, material inaccuracy of representations and warranties (including the existence of a material adverse event as defined in the agreement), cross-default to material indebtedness, certain events of bankruptcy and insolvency, material judgments, certain ERISA events, a change in control, and actual or asserted invalidity of liens or guarantees or any collateral document, in certain cases subject to the threshold amounts and grace periods set forth in the ABL Facility agreement.

On March 22, 2011 we entered into Amendment No. 1 to the ABL Facility which permits us to amend the Term Loan (and refinance those facilities in connection with such an amendment) to provide for principal amortization not exceeding 1% of the total principal amount of the Term Loan (such percentage calculated as of the date of any such amendment to the Term Loan). Amendment No. 1 also clarifies that we may, in connection with an otherwise permitted amendment to the Term Loan that refinances those facilities, increase the Term Loan up to the maximum amount permitted under the debt incurrence covenant contained in the ABL Facility.

At June 30, 2011, we had \$91 million of borrowings under the ABL Facility and \$14 million of outstanding letters of credit (primarily related to liabilities for insurance obligations and vendor deposits), which utilizes available capacity under the facility. At December 31, 2010, we had no borrowings under the ABL and \$12 million of outstanding letters of credit. At June 30, 2011 and December 31, 2010, we had approximately \$170 million and \$185 million, respectively, of undrawn availability under the ABL Facility.

Restructuring and Strategic Initiatives

In 2009, we initiated a comprehensive review process to strengthen our core businesses and improve our financial health, a process that continued throughout 2010 and into 2011. This review included a determination of whether to continue in, consolidate, reorganize, exit or expand our businesses, operations and product lines. As a result of our review process, we identified certain assets for potential sale. In other cases, we determined investing in innovative and regional growth, restructuring or consolidating our operations or changing the way we do business or bring our products to market would further our business goals.

On January 25, 2010, our Board of Directors approved an initiative involving the consolidation and idling of certain assets within the Great Lakes Solutions business operations in El Dorado, Arkansas, which was approved by the Bankruptcy Court on February 23, 2010 and was expected to be substantially completed by the first half of 2012. As a result of this restructuring plan, we recorded costs of approximately \$30 million in 2010. During 2010, the demand for brominated products used in electronic applications grew significantly and is expected to remain robust. With the evidence that demand has now started to recover for our products used in oil and gas applications in the Gulf of Mexico as well as insulation and furniture foam applications, and recognizing the emerging demand for mercury removal applications, it became evident that we needed to produce larger quantities of bromine than were projected when we formulated our consolidation plan. In addition, our partner has informed us that they will exercise their right to purchase our interest in a joint venture in the Middle East that supplies a brominated flame retardant to us. While under the terms of the joint venture agreement, the purchaser is obligated to continue to supply the current volumes of the brominated flame retardant to us for two years following the acquisition, we need to plan for the ultimate production of this product. Under the terms of the joint venture agreement, we expect to receive payment for our interest in the joint venture, which will assist in defraying the cost of any capacity additions that we may be required to make. Our analysis has indicated that the most cost effective source of the additional bromine we require is to continue to operate many of the bromine assets we had planned to idle and to invest to improve their operating efficiency. In light of this analysis, on April 20, 2011, our Board of Directors confirmed that we should defer a portion of the El Dorado restructuring plan and continue to operate certain of the bromine and brine assets that were planned to be idled.

The following items are the result of our newly implemented and proposed initiatives for the first half of 2011:

- On January 26, 2011, we announced the formation of ISEM S.r.l. (“ISEM”), a strategic research and development alliance with Isagro S.p.A., which will provide us access to two commercialized products and accelerate the development and commercialization of new active ingredients and molecules related to our Chemtura AgroSolutions segment. ISEM is a 50/50 joint venture between us and Isagro S.p.A. and is being accounted for as an equity method investment. Our investment in the joint venture was €20 million (\$28 million), which was made in January 2011. In addition, we and Isagro S.p.A. have agreed to jointly fund discovery and development efforts for ISEM, which is expected to amount to approximately \$2 million per year from each partner for five years. We will fund our contributions in part by a reduction in our planned direct research and development spending.

- On February 1, 2011, we announced the formation of DayStar Materials, LLC, a joint venture with UP Chemical Co. Ltd. that will manufacture and sell high purity metal organic precursors for the rapidly growing LED market in our Industrial Engineered Products segment. The joint venture will begin supplying high purity metal organic precursors in the second quarter of 2011. DayStar Materials, LLC is a 50/50 joint venture and is being accounted for as an equity method investment. We made cash contributions of \$2 million in February 2011 and \$3 million in May 2011, and we expect to make additional contributions of approximately \$2 million in the second half of 2011 in accordance with the agreement.
- On May 23, 2011, we announced the signing of a letter of intent with Archean Group to establish a strategic alliance in bromine and brominated derivatives in India. This alliance would strengthen the brominated performance products business of our Industrial Engineered Products segment by providing it with a strong position to respond to customer demand from a cost-competitive and consistent Indian supply.
- On June 6, 2011, we announced our intent to build a new multi-purpose manufacturing facility in Nantong, China to support our growth strategy for the Asia-Pacific region. This new manufacturing capacity will initially serve the petroleum additives and urethanes businesses included in our Industrial Performance Products segment, and will allow us to continue to grow our most advanced product lines.
- On July 28, 2011, we announced our plan to establish a European manufacturing capability for our Synton® line of high-viscosity polyalphaolefin (HVPAO) synthetic basestocks. This increased capacity will support our ability to meet the increasing global demand for these products by locating production capacity in a region of significant demand growth, and will enhance our service levels to continue to meet our customer commitments. Engineering work has commenced to enable production of the Synton® 40 and Synton® 100 HVPAO brands at our facility in Ankerweg, Amsterdam, The Netherlands by 2013.

Cash Flows from Operating Activities

Net cash used in operating activities was \$70 million for the six months ended June 30, 2011 compared to net cash used in operating activities of \$79 million in the comparable period for 2010. Changes in key working capital accounts are summarized below:

Favorable (unfavorable) (In millions)	Six months ended June 30, 2011	Six months ended June 30, 2010
Accounts receivable	\$ (110)	\$ (165)
Inventories	(57)	(23)
Restricted cash	30	-
Accounts payable	11	34
Pension and post-retirement health care liabilities	(66)	(6)
Liabilities subject to compromise	-	(2)

During the six months ended June 30, 2011, accounts receivable increased by \$110 million driven by increased volume principally within the Industrial Performance Products and Industrial Engineered Products segments. With available liquidity in 2011, we were able to resume our historic practice of building inventory ahead of the higher seasonal demand for some of our products in the summer and, as such, inventory increased \$57 million during the six months ended June 30, 2011. Restricted cash decreased by \$30 million as a result of settlements of disputed claims. Accounts payable increased by \$11 million in the six months ended June 30, 2011 primarily a result of growth in raw material and capital purchases and improving vendor credit terms. Pension and post-retirement health care liabilities decreased due to the funding of benefit obligations. Pension and post-retirement contributions amounted to \$72 million in 2011, which included \$15 million for domestic plans and \$57 million for international

plans.

Cash flows from operating activities in 2011 were adjusted by the impact of certain non-cash and other charges, which primarily included depreciation and amortization expense of \$71 million, stock-based compensation expense of \$16 million and impairment charges of \$3 million.

41

During the six months ended June 30, 2010, accounts receivable increased by \$165 million and inventory increased \$23 million reflecting seasonal demand. Accounts payable increased by \$34 million in the six months ended June 30, 2010 due to the timing of purchases and vendor payments. Pension and post-retirement health care liabilities decreased due to the timing of our funding of benefit payments. Liabilities subject to compromise were impacted by payments of \$2 million against pre-petition liabilities that were approved by the Bankruptcy Court.

Net cash used in operating activities in the six months ended June 30, 2010 also reflected the impact of certain non-cash charges, including \$108 million for post-petition interest accruals, \$94 million of depreciation and amortization expense, \$73 million for changes in estimates related to expected allowable claims, \$13 million for a loss on early extinguishment of debt, \$9 million loss on sale of discontinued operation and \$2 million of reorganization items, net.

Cash Flows from Investing and Financing Activities

Investing Activities

Net cash used in investing activities was \$88 million for the six months ended 2011. Investing activities were primarily related to payments for joint ventures of \$33 million, which included \$28 million for ISEM and \$5 million for DayStar Materials, LLC, and \$55 million in capital expenditures for U.S. and international facilities, environmental and other compliance requirements.

Net cash used in investing activities was \$17 million for the six months ended June 30, 2010. Investing activities were primarily related to capital expenditures for U.S. and international facilities and environmental and other compliance requirements, partially offset by proceeds received from the sale of certain business assets.

Financing Activities

Net cash provided by financing activities was \$96 million for the six months ended of 2011, which included proceeds from the ABL Facility of \$91 million, proceeds from short term borrowings of \$4 million and proceeds from the exercise of stock options of \$1 million.

Net cash provided by financing activities was \$50 million for the six months ended 2010, which included proceeds of \$299 million from the Amended DIP Credit Facility, and proceeds of \$17 million from the 2007 Credit Facility resulting from the draw down of certain letters of credit issued under the facility, partially offset by the extinguishment \$250 million under the DIP Credit Facility of and \$16 million in fees associated with the refinancing of the Amended DIP Credit Facility.

Other Sources and Uses of Cash

In 2011, we expect to finance our continuing operations and capital spending requirements for 2011 with cash flows provided by operating activities, available cash and cash equivalents, borrowings under our ABL Facility and other sources. Cash and cash equivalents as of June 30, 2011 were \$143 million.

Contractual Obligations and Other Cash Requirements

During the six months ended June 30, 2011, we made aggregate contributions of \$72 million to our U.S. and international pension and post-retirement benefit plans. Our funding assumptions for the U.S. pension plans assume no significant change with regard to demographics, legislation, plan provisions, or actuarial assumptions or methods to determine the estimated funding requirements.

As previously disclosed, on December 22, 2010, the UK Pensions Regulator issued a “warning notice” to us, stating their intent to request authority to issue a “financial support direction” against us for the support of the benefit obligations under one of our UK pension plans. Our UK subsidiary that is responsible for this plan has entered into definitive agreements with the trustees of that plan over the terms of a “recovery plan” which will provide for additional cash contributions to be made to reduce its underfunding over time and the UK Pensions Regulator has withdrawn the “warning notice.” The agreements provide, among other things, for our UK subsidiary to make cash contributions of £60 million (approximately \$95 million) in just over a three year period starting with an initial contribution of £30 million (\$49 million) that we made in the second quarter of 2011. The agreements also provide for the granting of both a security interest and a guarantee to support certain of the liabilities under this pension plan. There is also an evaluation being undertaken as to whether an additional funding liability exists in connection with the equalization of certain benefits under the UK Pension Plan that occurred in the early 1990s. If such an additional liability exists, additional cash contributions may be required starting in 2013.

We had net liabilities related to unrecognized tax benefits of \$47 million at June 30, 2011. We believe it is reasonably possible that our unrecognized tax benefits may decrease by approximately \$14 million within the next 12 months.

Guarantees

In addition to \$14 million in outstanding letters of credit at June 30, 2011, we have guarantees that have been provided to various financial institutions. At June 30, 2011, we had \$5 million of outstanding guarantees primarily related to vendor deposits. The letters of credit and guarantees were primarily related to liabilities for insurance obligations, vendor deposits and European value added tax ("VAT") obligations.

CRITICAL ACCOUNTING ESTIMATES

Our Consolidated Financial Statements have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP"), which require management to make estimates and assumptions that affect the amounts and disclosures reported in our Consolidated Financial Statements and accompanying notes. Our estimates are based on historical experience and currently available information. Management's Discussion and Analysis of Financial Condition and Results of Operations and the Accounting Policies footnote in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 describe the critical accounting estimates and accounting policies used in the preparation of our Consolidated Financial Statements. Actual results could differ from management's estimates and assumptions. There have been no significant changes in our critical accounting estimates during the six month period ended June 30, 2011.

Carrying Value of Goodwill and Long-Lived Assets

We have elected to perform our annual goodwill impairment procedures for all of our reporting units in accordance with ASC Subtopic 350-20, Intangibles – Goodwill and Other - Goodwill ("ASC 350-20") as of July 31, or sooner, if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We estimate the fair value of our reporting units utilizing income and market approaches through the application of discounted cash flow and market comparable methods (Level 3 inputs as described in Note 14 – Financial Instruments and Fair Value Measurements). The assessment is required to be performed in two steps: step one to test for a potential impairment of goodwill and, if potential impairments are identified, step two to measure the impairment loss through a full fair value allocation of the assets and liabilities of the reporting unit utilizing the acquisition method of accounting.

We continually monitor and evaluate business and competitive conditions that affect our operations and reflect the impact of these factors in our financial projections. If permanent or sustained changes in business or competitive conditions occur, they can lead to revised projections that could potentially give rise to impairment charges.

During the annual review as of July 31, 2010, we identified risks inherent in our Chemtura AgroSolutions reporting unit forecast given the recent performance of this reporting unit which was below expectations. At the end of the fourth quarter of 2010, this reporting unit's performance had significantly fallen below expectations for several consecutive quarters. We concluded that it was appropriate to perform a goodwill impairment review as of December 31, 2010. We used revised forecasts to compute the estimated fair value of this reporting unit. These projections indicated that the estimated fair value of the Chemtura AgroSolutions reporting unit was less than the carrying value. Based upon our preliminary step 2 analysis, an estimated goodwill impairment charge of \$57 million was recorded (representing the remaining goodwill of this reporting unit). Due to the complexities of the analysis, which involves an allocation of the fair value, we finalized our step 2 analysis and goodwill impairment charge in the first quarter of 2011. This analysis supported our 2010 conclusion that the goodwill was fully impaired.

OUTLOOK

With a robust first half behind us, we are now focused on delivering year-on-year improvement again in the second half of the year. While we are closely monitoring our customers for indications of slower macroeconomic demand, we remain optimistic about our prospects for the second half of the year and our ability to deliver continued year-on-year improvement. Our industrial segments are performing strongly and they are expected to offset any softness in our Consumer Products business. Meanwhile, we expect improvement by Chemtura AgroSolutions to continue. We are investing in innovation and growth as evidenced by our recent announcements of investments in synthetic lubricant base-stock capacity in Europe and a multi-purpose manufacturing facility in Nantong, China. These and other investments will help us continue our improvement in profitability and margins beyond 2011.

FORWARD-LOOKING STATEMENTS

In addition to historical information, this Report contains “forward-looking statements” within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. We use words such as “believe,” “intend,” “expect,” “anticipate,” “plan,” “may,” “will,” “should,” “estimate,” “potential,” “project” and similar expressions to identify forward-looking statements. Such statements include, among others, those concerning our expected financial performance and strategic and operational plans, as well as all assumptions, expectations, predictions, intentions or beliefs about future events. You are cautioned that any such forward-looking statements are not guarantees of future performance and that a number of risks and uncertainties could cause actual results to differ materially from those anticipated in the forward-looking statements.

Such risks and uncertainties include, but are not limited to:

- The cyclical nature of the global chemicals industry;
- Increases in the price of raw materials or energy and our ability to recover cost increases through increased selling prices for our products;
 - Disruptions in the availability of raw materials or energy;
 - Our ability to implement our growth strategies in rapidly growing markets;
- Our ability to obtain the requisite regulatory and other approvals to implement the plan to build a new multi-purpose manufacturing facility in Nantong, China;
 - Declines in general economic conditions;
 - The effects of competition;
- The ability to comply with product registration requirements of regulatory authorities, including the FDA and European Union REACh legislation;
 - The effect of adverse weather conditions;
 - The ability to grow profitability in our Chemtura AgroSolutions segment;
 - Demand for Chemtura AgroSolutions segment products being affected by governmental policies;
 - Current and future litigation, governmental investigations, prosecutions and administrative claims;
 - Environmental, health and safety regulation matters;
 - Federal regulations aimed at increasing security at certain chemical production plants;
 - Significant international operations and interests;
 - Our ability to maintain adequate internal controls over financial reporting;
 - Exchange rate and other currency risks;
 - Our dependence upon a trained, dedicated sales force;
 - Operating risks at our production facilities;
 - Our ability to protect our patents or other intellectual property rights;
 - Whether our patents may provide full protection against competing manufacturers;
- Our ability to remain technologically innovative and to offer improved products and services in a cost-effective manner;
 - The risks to our joint venture investments resulting from lack of sole decision making authority;
 - Our unfunded and underfunded defined benefit pension plans and post-retirement welfare benefit plans;
 - Risks associated with possible climate change legislation, regulation and international accords;
 - The ability to support the carrying value of the goodwill and long-lived assets related to our businesses; and
- Other risks and uncertainties detailed in Item 1A. Risk Factors in our filings with the Securities and Exchange Commission.

These statements are based on our estimates and assumptions and on currently available information. The forward-looking statements include information concerning our possible or assumed future results of operations, and our actual results may differ significantly from the results discussed. Forward-looking information is intended to

reflect opinions as of the date this Form 10-Q was filed. We undertake no duty to update any forward-looking statements to conform the statements to actual results or changes in our operations.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

This Item should be read in conjunction with Item 7A, “Quantitative and Qualitative Disclosures About Market Risk” and Note 16, “Derivative Instruments and Hedging Activities” to the Consolidated Financial Statements in our 2010 Annual Report on Form 10-K. Also see Note 13, “Derivative Instruments and Hedging Activities” to the Consolidated Financial Statements (unaudited) included in this Form 10-Q.

The fair market value of long-term debt is subject to interest rate risk. Our total debt amounted to \$846 million at June 30, 2011. The fair market value of such debt as of June 30, 2011 was \$888 million, which has been determined primarily based on quoted market prices.

There have been no other significant changes in market risk during the six months ended June 30, 2011.

ITEM 4. Controls and Procedures

(a) Disclosure Controls and Procedures

As of June 30, 2011, our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), have conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) of the Exchange Act. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective as of the end of the period covered by this report.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the second fiscal quarter ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

See Note 17 – Legal Proceedings and Contingencies in the Notes to our Consolidated Financial Statements for a description of our legal proceedings.

ITEM 1A. Risk Factors

Our risk factors are described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 and in our Quarterly Report on Form 10-Q for the period ended March 31, 2011, as amended. Investors are encouraged to review those risk factors in detail before making any investment in our securities. Except as described below, there have been no significant changes in our risk factors during the quarter ended June 30, 2011.

A proposal to ban the manufacture, import and sale of products containing alkylphenols in France may affect our Catenoy, France facility.

On May 4, 2011, the French National Assembly adopted a proposal to ban the manufacture, import and sale of products containing alkylphenols. If this proposal is ultimately passed by the French Senate, the legislation could have an impact on our Catenoy, France facility, which manufactures chemicals containing alkylphenols and limit sale in France of products containing alkylphenols produced elsewhere in the group. To the extent we are unable to replace the production of our Catenoy facility in a timely manner, we may experience supply shortages and lower sales for certain of our Industrial Performance Products.

ITEM 6. Exhibits

The following documents are filed as part of this report:

Number	Description
31.1	Certification of Periodic Report by Chemtura Corporation's Chief Executive Officer (Section 302).
31.2	Certification of Periodic Report by Chemtura Corporation's Chief Financial Officer (Section 302).
32.1	Certification of Periodic Report by Chemtura Corporation's Chief Executive Officer (Section 906).
32.2	Certification of Periodic Report by Chemtura Corporation's Chief Financial Officer (Section 906).
