Summary of material non-cash transactions:

The Company had derivative financial instruments with a negative non-cash effect of \$44.3 million for the three months ended March 31, 2007.

On March 28, 2007, TDC exercised its warrants for 2.5 million shares in exchange for its \$25,000,000 Notes as settlement of fair value liability as described in Note 2 to the condensed consolidated financial statements. The Company recorded a non-cash expense of \$15.1 million and \$0.1 for the first quarter 2007 and 2006, respectively, relating to the change in the fair market value of the warrants.

See accompanying notes to condensed consolidated financial statements.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

(1) Summary of Significant Accounting Policies

(a) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Hungarian Telephone and Cable Corp. (HTCC) with its directly owned consolidated subsidiaries, Hungarotel Tavkozlesi zRt. (Hungarotel), PanTel Tavkozlesi es Kommunikacios Kft. (PanTel) and PanTel Technocom Kft. (PanTel Technocom) (together the Company) include all adjustments, consisting mainly of normal recurring accruals, necessary for a fair statement of the results of the interim periods. PanTel owns and consolidates several minor non-Hungarian subsidiaries within the Central and Eastern European region. Results for interim periods are not necessarily indicative of the results for a full year. All intercompany balances and transactions have been eliminated.

The accompanying unaudited condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles in the U.S. (U.S. GAAP). In preparing financial statements in conformity with U.S. GAAP, management is required to make estimates and assumptions. These estimates and assumptions affect reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as revenues and expenses during the reporting period. Actual results could differ from those estimates.

The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2006, including the notes thereto, set forth in the Company's Annual Report on amended Form 10-K/A filed with the United States Securities and Exchange Commission (SEC) on May 25, 2007.

(b) Restatements

For its Condensed Consolidated Financial Statements of Operations and Comprehensive Income for the period ended March 31, 2006, the Company has restated its presentation of its revenues following the guidance of Emerging Issues Task Force No. 99-19. Historically, the Company presented revenues net of cost of sales but now presents separately its gross revenues, costs of sales and resulting gross margin. This restated accounting presentation has no impact on the gross margin, previously reported as Telephone services revenues, net in the Condensed Consolidated Statements of Operations and Comprehensive Income.

For its Condensed Consolidated Financial Statements of Operations and Comprehensive Income for the period ended March 31, 2006, the Company has reclassified a Hungarian local business tax from selling, general and administrative expenses to current income tax in accordance with Statement of Financial Accounting Standard (SFAS) No. 109. Historically, the Company has recorded this tax as part of its selling, general and administrative expenses. For the period ended March 31, 2006, \$976,000 was reclassified. This restated accounting presentation has no impact on the net income or earnings per share as reported in the Condensed Consolidated Statements of Operations and Comprehensive Income.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

The Company determined that it misapplied SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities in connection with warrants that the Company issued in 1999 to purchase 2,500,000 shares of HTCC's common stock. Historically, the Company did not reflect the changes in the fair market value of the warrants (marking to market) as the fair market value of HTCC's common stock fluctuated. For its Consolidated Financial Statements of Operations and Comprehensive Income for the quarter ended March 31, 2006, the Company has recorded a loss on the change in the fair market value of the warrants of \$125,000. The amount of the restatement for years prior to 2006, a non-cash charge of \$13,050,000, has been reflected as an adjustment to accumulated deficit as of December 31, 2006 and the creation of a relevant liability.

(c) Earnings Per Share

Basic earnings per share (EPS) is computed by dividing income attributable to common stockholders by the weighted average number of common shares outstanding for the period. The computation of diluted EPS is similar to the computation of basic EPS, except that the weighted average shares outstanding are increased to include additional shares from the assumed exercise of stock options and the conversion of the convertible preferred stock, where dilutive. The number of additional shares is calculated by assuming that preferred securities were converted and that outstanding stock options were exercised and the proceeds therefrom were used to acquire shares of the Company's common stock at the average market price during the reporting period.

The following is a reconciliation from basic earnings per share to diluted earnings per share for the three month periods ended March 31, 2007 and 2006 (in thousands, except share and per share data):

	2007	2006 as restated
Net loss attributable to common stockholders (A)	\$ (54,677)	\$ (1,031)
plus: preferred stock dividends	26	26
Net loss (B)	\$ (54,651)	\$ (1,005)
Determination of shares:		
Weighted average common shares outstanding:		
Basic (C)	12,952,050	12,806,665
Diluted (D)	12,952,050	12,806,665
Net loss per common share:		
Basic (A/C)	\$ (4.22)	\$ (0.08)
Diluted (B/D)	\$ (4.22)	\$ (0.08)

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

For the three month periods ended March 31, 2007 and 2006, common stock equivalents and convertible preferred stock of 3,390,000 and 3,601,284, respectively, were excluded from the computation of diluted loss per share because the effect of their inclusion would be anti-dilutive.

(d) Foreign Currency Translation

The Company uses the Hungarian forint (HUF) as the functional currency for its Hungarian subsidiaries. The Hungarian subsidiaries' assets and liabilities are translated into U.S. dollars using the exchange rates in effect at the balance sheet date. Results of operations are translated using the average exchange rates prevailing throughout the period. The effects of exchange rate fluctuations on translating HUF assets and liabilities into U.S. dollars are accumulated as part of other comprehensive income in stockholders' equity.

The Company uses the HUF as the functional currency of PanTel's non-Hungarian subsidiaries. Accordingly, foreign currency assets and liabilities of the non-Hungarian subsidiaries are translated into HUF using the exchange rates in effect at the balance sheet date. Results of operations are translated using the average exchange rates prevailing throughout the period. The effects of exchange rate fluctuations on translating the local currency assets and liabilities of the non-Hungarian subsidiaries into HUF are accumulated as part of foreign exchange gains/(losses) in the consolidated statement of operations.

The translation of the subsidiaries' forint denominated balance sheets into U.S. dollars, as of March 31, 2007, has been affected by the strengthening of the Hungarian forint against the U.S. dollar from 191.62 as of December 31, 2006 to 186.13 as of March 31, 2007, an approximate 3% appreciation in value. The average Hungarian forint/U.S. dollar exchange rates used for the translation of the subsidiaries' forint denominated statements of operations and statements of cash flows into U.S. dollars, for the three months ended March 31, 2007 and 2006, were 192.61 and 211.53, respectively.

(e) Stock Based Compensation

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standard (SFAS) No. 123 (revised 2004), Share-Based Payment, (SFAS 123R). SFAS 123R requires the measurement and recognition of compensation expense based on the fair value of the employee stock based awards issued. Compensation expense for awards and related tax effects is recognized as these vest. The Company has adopted SFAS 123R using the modified prospective transition method. Under this transition method, compensation cost recognized effective January 1, 2006 includes: (1) compensation cost for all share based awards granted prior to, but not yet vested as of, January 1, 2006 based on the original measure of the grant date fair value method under the provisions of SFAS 123 for pro-forma disclosure, and (2) compensation cost for all share-based awards granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R. Results for prior periods have not been restated. For

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

the three months ended March 31, 2007, the Company has recognized \$170,000 of compensation expense related to SFAS 123R. For the three months ended March 31, 2006, the Company recognized \$491,000 of compensation benefit related to SFAS 123R.

The assumptions used in the Black-Scholes option-pricing model are as follows:

	For the three months ended	
	March 31	
	2007	2006
Dividend yield	0%	0%
Risk free rate	4.55%	4.46%
Expected option life (years)	10	10
Volatility	38.75%	38.0%

Upon the adoption of SFAS 123R, expected volatility was based on historical volatilities. The risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term equal to the expected option life assumed at the date of grant. The expected term was calculated based on historical experience and represents the time period options actually remain outstanding. The Company has estimated zero forfeitures based on historical experience and the limited number of option holders.

(f) Recently Issued Accounting Pronouncements

On January 1, 2007, the Company adopted the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109, Accounting for Income Taxes (FIN 48), which clarifies the accounting for uncertainty in income taxes. FIN 48 establishes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that the Company recognize in the financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods and disclosure. The adoption of FIN 48 has had no significant impact on its consolidated results of operations and financial position or cash flows.

As disclosed in the Company 10-K filing as of December 31, 2006, we are engaged in legal proceedings in connection with the payment of local business tax to Hungarian municipalities. Although management does not expect a significant change to our previously recognized tax benefits, it is possible that the result of these proceedings could reasonably change within the next 12 months and impact this position.

HTCC files income tax returns in the U.S. while its directly owned subsidiaries file income tax returns in Hungary. The U.S. Internal Revenue Service (IRS) has never performed an audit of the U.S. company s tax returns; the year 2003 and the

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

following years remain open for examination and assessment by the IRS. The Hungarian tax authority has audited the income tax returns of PanTel and PanTel Technocom through 2004 and Hungarotel through 2003. PanTel, PanTel Technocom and Hungarotel are no longer subject to income tax audits for years prior to these tax audits. The Company also files returns in six other Central and Eastern European countries where it has established subsidiaries. The Company is not aware of any outstanding issue or claim that is likely to be material to our financial position, cash flows or results of operations in any of the jurisdictions in which it operates. The Company currently does not have any provisions for unrecognized tax benefits.

In February 2007, the FASB issued SFAS No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 which permits entities to choose to measure many financial instruments and certain warranty and insurance contracts at fair value on a contract-by-contract basis. The Statement applies to all reporting entities, including not-for-profit organizations, and contains financial statement presentation and disclosure requirements for assets and liabilities reported at fair value as a consequence of the election. SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted subject to certain conditions, however an early adopter must also adopt SFAS No. 157, Fair Value Measurements, at the same time. The Company is currently evaluating the effect that the adoption of SFAS 159 will have on its consolidated results of operations and financial position or cash flows.

(2) Related Parties

The amount due to related parties totalling \$3,228,000 at March 31, 2007, represents cumulative preferred stock dividends in arrears in the amount of \$782,000, an accrual of \$2,446,000 for the costs for various individuals employed by TDC who have performed work for the Company, including the Company's former President and Chief Executive Officer and former head of Corporate Business Development (see below), for 2005, 2006 and 2007.

On March 28, 2007, TDC exercised its warrants in exchange for notes issued by the Company and held by TDC in the principal amount of \$25 million. As of March 31, 2007, TDC owned 68% of the Company's outstanding Common Stock and 30,000 shares of preferred stock convertible into 300,000 shares of Common Stock.

Robert Dogonowski, Jesper Theill Eriksen, Carsten Dyrup Revsbech and Henrik Scheinemann, current directors, are officers of TDC. Torben V. Holm was an employee of TDC and served as the Company's President and Chief Executive Officer and was also the head of management's executive committee. Alex Wurtz, who was also an employee of TDC, served as the Company's head of Corporate Business Development and was a member of the Company's management executive committee. The Company has reached an agreement with TDC to reimburse TDC for the services of Messrs. Holm and Wurtz; however, no payment has been made.

For Mr. Holm, the Company agreed to pay TDC EUR 945,571 (approximately \$1,260,000) for Mr. Holm's services for the period from May 2005 through March 2007. The Company

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

was also responsible for paying other costs pertaining to Mr. Holm, including lodging in Budapest and for certain of Mr. Holm's travel costs back to his home in Denmark.

For Mr. Wurtz, the Company agreed to pay TDC EUR 483,707 (approximately \$645,000) for Mr. Wurtz's services for the period from June 2005 through March 2007. The Company is also responsible for paying Mr. Wurtz's lodging in Budapest.

In addition to the services of Messrs. Holm and Wurtz, three employees of TDC performed financial controlling services for the Company. The Company reached an agreement with TDC to pay approximately \$176,000 for such services. TDC also provided services for the Company in connection with certain strategic projects, including services in connection with the Company's acquisition of Invitel. For such services, the Company has agreed to reimburse TDC approximately \$365,000 through February 1, 2007.

All of the directors of the Company are covered by a directors and officers liability policy taken out by TDC. As of March 31, 2007, the Company had approximately \$82,000 in expenses for the Company's portion of the overall premium paid by TDC.

The Company has agreements in place with TDC and its subsidiaries, pursuant to which TDC and the Company transport international voice, data and Internet traffic for each other over their respective telecommunications networks. For the three months ended March 31, 2007 and 2006, TDC paid the Company a net amount of approximately \$397,000 and \$300,000, respectively, pursuant to such agreements.

(3) Short-Term Debt

Short-term debt at March 31, 2007 and December 31, 2006 consists of the following:

	2007	2006
	(in thousands)	
Current installments of long-term debt	\$	\$ 34,749
Short-term debt to related party	\$	24,657
Total short-term debt	\$	\$ 59,406

In April 2007, the Company issued Floating Rate Senior Notes (2007 Notes) due in 2013 in connection with the acquisition of Invitel. A portion of the proceeds from the 2007 Notes were used to repay the Company's now terminated Credit Facility. Since the Company's short-term obligation has been refinanced on a long-term basis, the current installments of the long-term debt of \$29.3 million have been reclassified as long-term debt at March 31, 2007. Such amount was paid off upon issuance of the 2007 Notes.

As described in Note 2, the short-term debt to a related party refers to notes issued by the Company in the principal amount of \$25 million and held by TDC. On March 28, 2007, TDC exercised its warrants in exchange for the notes.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

(4) Long-Term Debt

Long-term debt at March 31, 2007 and December 31, 2006 consists of the following:

	2007	2006
	(in thousands)	
Credit Facility	\$ 151,789	\$ 115,351

As described in Note 3 above, the Company has reclassified as long-term debt the short-term obligation of its now terminated Credit Facility for an amount of \$29.3 million.

(5) Fair Value of Derivative Instruments and Hedging Agreements

The Company engages in foreign currency and interest rate hedging activities to reduce the risk that changes in exchange rates and interest rates will adversely affect the eventual net cash flows resulting from its debt obligations. The Company does not expect to enter into financial instruments for trading or speculative purposes. Hedge contracts reduce the exposure to fluctuations in exchange rate and interest rate movements because the gains and losses associated with foreign currency balances and the interest rates payable by the Company are generally offset with gains and losses of the hedge contracts.

To limit the variability of interest rates on existing and projected debt, the Company entered into interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk. Under the terms of the interest rate swaps, the Company receives variable interest rate payments from the hedging counterparty and makes fixed interest rate payments, thereby creating the equivalent of fixed-rate debt.

To limit the impact of fluctuations between the Hungarian subsidiaries functional currency, the Hungarian forint, and the Euro, the Company has entered into currency swap agreements and forward agreements, to receive Euros and pay forints, thereby creating the equivalent of forint debt obligations.

The objective of these contracts is to neutralize the impact of exchange rate and interest rate movements on our cash flows. However, given the inherent limitations of forecasting and the anticipatory nature of the exposures intended to be hedged, there can be no assurance that such programs will offset more than a portion of the adverse financial impact resulting from unfavorable movements in either interest or foreign exchange rates. In addition, the timing of the accounting for recognition of gains and losses related to mark-to-market instruments for any given period may not coincide with the timing of gains and losses related to the underlying economic exposures and, therefore, may adversely affect our operating results and financial position.

By using derivative financial instruments to hedge exposures to changes in interest rates, the Company exposes itself to the credit risk of the counterparty. Credit risk is the failure

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

of the counterparty to perform its obligations under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates a credit risk for the Company. When the fair value of a derivative contract is negative, the Company owes the counterparty and, therefore, it does not have any credit risk. Company policy requires that counterparties to the Company's hedging activities be large and creditworthy commercial banks. The risk of counterparty non-performance associated with hedge contracts is not considered by the Company to be significant. We do not require and are not required to place collateral for these financial instruments independently of the Company's security arrangements under its loan agreements.

To ensure the adequacy and effectiveness of our interest rate and foreign exchange hedge positions, we continually monitor, from an accounting and economic perspective, our interest rate swap positions and foreign exchange forward and option positions, when applicable, both on a stand-alone basis and in conjunction with our underlying interest rate and foreign currency exposures.

During the first quarter 2007, in order to reduce the exposure to the value of the Hungarian currency and the level of interest rates that would arise upon the completion of the acquisition of Invitel, the Company hedged (i) the 2007 Notes that were issued by one of its subsidiaries, in part, to finance the Invitel transaction and (ii) the Invitel Debt that the Company assumed upon closing. In January 2007, the Company entered into six foreign currency and interest rate hedges, all of which, except one, were contingent upon the completion of the Acquisition.

The following table summarizes the notional amounts and respective fair values of the Company's financial instruments, which mature at varying dates, as at March 31, 2007 (in thousands):

Asset (Liability)	Notional Amount	Fair Market Value	Changes in Fair Market Value
Cross currency interest rate swaps	\$ 368,155	(\$ 24,921)	(\$ 24,921)
Cross currency swaps	189,002	(15,590)	(15,590)
Forward rate agreement	49,247	(2,873)	(2,873)
Interest rate swaps	49,247	(676)	(676)
Interest rate swaps on credit facility	151,700	1,495	(1,460)
	\$ 807,351	(\$ 42,565)	(\$ 45,520)

The notional principal amount provides one measure of the transaction volume outstanding as of the end of the period, and does not represent the amount of our exposure to market loss. The estimated fair values are based on market prices provided by the counterparty to the derivatives and represent the estimated amounts that the Company would pay or receive to terminate the contracts as of March 31, 2007. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

These derivative instruments are not designated as hedges under SFAS 133 for accounting purposes and, as such, are referred to as undesignated hedges. Changes in the fair value of undesignated hedges are recorded in current period earnings as a gain or loss on derivative instruments.

(6) Losses from Fair Value Changes on Warrants

In May 1999, the Company issued notes (the Notes) that were issued in an aggregate amount of \$25 million with detachable warrants (the Warrants) to purchase 2,500,000 shares of common stock of the Company at a price of \$10 per share. The Notes accrued interest at the USD LIBOR rate applicable for the six months interest period plus 3.5%. The Notes matured in March 2007 and were exercised by TDC on March 28, 2007.

In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, the Company has recorded a non-cash expense of \$15.1 million for the first quarter 2007 relating to the change in the fair value of the Company's stock reflected in the change in the fair value of the Warrants. The fair market value was determined under the Black-Scholes option pricing formula as of the exercise date of the Warrants. Upon exercise, the fair market value of the Warrants of \$53.1 million was recorded to the Company's Additional Paid-In Capital.

(7) Stock Based Compensation

In May 2004 the Company's stockholders approved the Company's 2004 Long-Term Incentive Plan (the 2004 Plan) which provided for the issuance of an aggregate 1,000,000 shares. Upon adoption of the 2004 Plan, the Company agreed not to issue any more options from either the stock option plan originally established in 1992 (the 1992 Plan) or the director stock option plan (the Directors Plan). As a result, in May 2004, 424,410 shares reserved under the 1992 Plan and 88,716 shares under the Directors Plan, are transferred to the 2004 Plan. Shares reserved for outstanding awards but unused under the 1992 Plan and the Directors Plan are transferred to the 2004 Plan. As of March 31, 2007, 745,590 gross shares were issued upon option exercises and options to purchase 80,000 shares were still outstanding from the 1992 Plan. As of March 31, 2007, 10,000 shares were issued upon option exercises and options to purchase 120,000 shares were still outstanding from the Directors Plan.

During March 2007, a director and former officer of the Company exercised options to purchase 100,000 shares of common stock at \$4.72 per share and 100,000 shares of common stock at \$7.46 per share. The officers exercised the options using the net share settlement feature (see below) of the Plan. As a result, the officer remitted 24,494 and 34,299 shares, respectively to the Company to settle the option exercise price and related taxes and the officer received 75,506 and 65,701 shares of common stock, respectively. During January 2006, officers of the Company exercised options to purchase 25,000 shares of common stock at \$4.86 per share. The officers exercised the options using the net share settlement feature (see below) of the Plan. As a result, the officers remitted 14,796 shares to the Company to settle the option exercise price and related taxes and the officers received 10,204 shares of common stock.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

Effective October 1, 2004, the Company's Board of Directors amended the 1992 Plan and the Directors' Plan to allow the remaining options outstanding under such plans to be governed by terms similar to those contained in the 2004 Plan with respect to the exercise of options, tax withholding and the period in which option holders no longer associated with the Company could exercise their options. Holders of options under the 2004 Plan may exercise their outstanding options and pay the exercise price, in whole or in part, pursuant to a net share settlement feature. This feature allows the option holder to elect to have shares of stock withheld upon exercise to pay the option exercise price. Option holders may also elect to have a portion of such shares issuable upon exercise withheld for the payment of taxes attributable to the option exercise. As a result of such amendments, effective October 1, 2004, the Company accounted for all of its outstanding options under the variable method of accounting. The variable method of accounting required the Company to accrue an expense or benefit as the market price of the Company's common stock changed. Upon the adoption of SFAS 123R, the Company has ceased utilizing the variable method of accounting.

The Company issued a total of 7,500 shares of common stock to four directors of the Board of Directors for their service for the 2006/2007 Board term under the terms of the 2004 Plan in May 2006. 1,500 of those shares were subsequently cancelled due to a resignation in September 2006.

For the three months ended March 31, 2007 and 2006, the Company has recognized an expense of \$24,000 and \$26,000, respectively, as a result of certain stock grants from the 2004 Plan to members of the Board of Directors.

The following is a summary of stock options under the Plans, referred to above, which were granted, were exercised and have expired for the three months ended March 31, 2007:

	Outstanding	Weighted Average Exercise Price
	Options	
December 31, 2006	801,284	\$ 9.01
Granted	20,000	\$ 14.64
Exercised	(200,000)	\$ 6.09
Cancelled	(31,284)	\$ 7.55
March 31, 2007	590,000	\$ 10.27

All options granted during the period were fully vested upon issuance.

The following table summarizes information about shares subject to outstanding options as of March 31, 2007 which were issued to current or former employees or directors pursuant to the Plan, Directors' Plan or the 2004 Plan.

175,000	\$10.89-\$13.01	\$12.77	7.57	175,000	\$12.77	\$12.77
75,000	\$14.64-\$15.62	\$15.36	9.02	75,000	\$15.36	\$15.36
590,000	\$4.72-\$15.62	\$10.27	6.42	590,000	\$10.27	\$10.27

The aggregate intrinsic value, which represents the amount by which the fair value of the Company's common stock exceeds the option exercise prices, was \$4,905,000 and \$6,464,000 as of December 31, 2006 and March 31, 2007, respectively.

The weighted-average estimated fair value of stock options granted during the three months ended March 31, 2007 was \$8.48 per share. The weighted-average estimated fair value of stock options granted during the three months ended March 31, 2006 was \$8.93 per share. The total intrinsic value of stock options exercised during the three months ended March 31, 2007 was \$3,028,000. The total intrinsic value of stock options exercised during the three ended March 31, 2006 was \$267,000. Compensation expense related to granted stock options has been recorded in selling, general and administrative expenses.

(8) Segment Disclosures

The Company operates in a single segment, wireline telecommunications. The Company manages its business based on three markets: Corporate Market; Wholesale Market; and Mass Market. The Company's chief operating decision maker monitors the revenue streams of these categories and operations are managed and financial performance is evaluated based on the delivery of services to customers over an integrated network. Therefore, although the Company has various revenue streams, it is managed as a single segment.

Corporate Market

Corporate Market telephone services, marketed to all businesses, including small offices/home offices (SoHo), are similar to those provided to the Mass Market customers but also include leased line and other infrastructure rental services such as dark fiber, Internet and data transmission services which is comprised of fixed monthly rental fees based on the capacity/bandwidth of the service and the distance between the endpoints of the customers.

Wholesale Market

The Wholesale Market comprises the transportation of voice, data and Internet traffic, as well as the provision of leased lines, for other telecommunications service providers, cable television operators and Internet service providers. The Company provides these services both domestically and internationally, using a combination of owned and leased line capacity.

Mass Market

Mass Market services are offered to residential customers and comprise voice, data and Internet services as well as other value added services.

The revenues generated by these three markets for the periods ended March 31 were as follows (in thousands):

	2007	2006 (as restated)
Revenues		
Corporate Market	\$ 17,542	\$ 17,500
Wholesale Market	23,571	20,564
Mass Market	8,025	7,394
Total revenues	\$ 49,138	\$ 45,458
Cost of Sales		
Corporate Market	\$ 5,841	\$ 4,699
Wholesale market	13,340	12,083
Mass market	1,534	1,305
Total cost of sales	\$ 20,715	\$ 18,087
Gross Margin		
Corporate Market	\$ 11,701	\$ 12,801
Wholesale Market	10,231	8,481
Mass Market	6,491	6,089
Total gross margin	\$ 28,423	\$ 27,371

Products and Services

Telephone Services local dial tone and switched products and services that provide incoming and outgoing calls both domestically and internationally for residential and business customers. Wholesale voice revenues are earned through carrying other operators' traffic on the Company's network. This category includes reciprocal compensation revenues and expenses (i.e. interconnect).

Network Services point-to-point dedicated services that provide a private transmission channel for the Company's customers' exclusive use between two or more locations, both in local and long distance applications. Point-to-point dedicated services include data transmission, virtual private networks (VPN), hosting and managed leased lines.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(unaudited)

Other Service and Product Revenues Internet services such as broadband DSL Internet access and dial-up Internet access, PBX hardware sales and service revenues, as well as miscellaneous other telephone service revenues are included here.

The revenues generated by these products and services for the periods ended March 31 were as follows:

(in thousands)	2007	2006
Telephone services	\$ 27,544	\$ 26,579
Network services	\$ 15,884	\$ 15,437
Other service and product revenues	\$ 5,710	\$ 3,442
	\$ 49,138	\$ 45,458

(9) Subsequent Events

On April 27, 2007, pursuant to a Sale and Purchase Agreement dated January 8, 2007, the Company completed its acquisition of 100% of the issued ordinary shares of Matel Holdings N.V. (the "Acquisition") which indirectly owns 99.98% of the outstanding shares of Invitel. Invitel was one of the Company's significant competitors.

The Acquisition has been financed by: (i) the issuance in April 2007 of Floating Rate Senior Notes, due 2013, for an amount of EUR 200 million, which proceeds were used to pay part of the Acquisition consideration and to refinance the Company's existing credit facility, and (ii) the issuance of 962,298 shares of the Company's common stock to certain members of Invitel's management team.

As part of the Invitel Acquisition, the Company also assumed an estimated net indebtedness on closing of EUR 387 million (approximately \$523 million, the "Assumed Debt"). The Assumed Debt consists primarily of (i) EUR 133 million in aggregate principal amount and accrued interest of Floating Rate Senior PIK Notes due 2013 (the "2006 PIK Notes"), (ii) EUR 142 million in aggregate principal amount of 10% Senior Notes due 2012 (the "2004 Notes"), and a Facilities Agreement, which was amended and restated in connection with the Invitel Acquisition (the "Amended Facilities Agreement"). The outstanding balance on the Amended Facilities Agreement is EUR 115.4 million. In order to clarify the rights of the creditors under the various debt instruments, Holdco II, Matel Holdings and various creditors and certain other parties also entered into an amended and restated Intercreditor Agreement (the "Intercreditor Agreement"). Summaries of the terms and conditions of the 2007 Notes, the 2006 PIK Notes, the 2004 Notes, the Amended Facilities Agreement and the Intercreditor Agreement are set forth in the Company's 8-K filing which was filed with the SEC on May 3, 2007.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Concerning Forward-Looking Statements

This quarterly report of Hungarian Telephone Cable Corp. (together with its subsidiaries, the Company or we) on Form 10-Q contains forward-looking statements. Statements that are not historical facts are forward-looking statements made pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. These statements are based on our estimates and assumptions and are subject to risks and uncertainties, which could cause actual results to differ materially from those expressed or implied in the statements. Words such as believes, anticipates, estimates, expects and similar expressions are intended to identify forward-looking statements. Forward-looking statements (including oral representations) are only predictions or statements of current plans, which we review continuously. For all forward-looking statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those factors discussed elsewhere in this Quarterly Report on Form 10-Q and in our other reports filed with the Securities and Exchange Commission, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

Changes in the growth rate of the overall Hungarian, European Union and Central and Eastern European economies such that inflation, interest rates, currency exchange rates, business investment and consumer spending are impacted;

Materially adverse changes in economic conditions in Hungary and Central Europe;

Changes in the currency exchange markets particularly in the Hungarian forint-euro exchange rate, the Hungarian forint-U.S. dollar exchange rate and the euro-U.S. dollar exchange rate which affect our financial statements and our ability to repay our debt;

Our ability to effectively manage and otherwise monitor our operations, costs, regulatory compliance and service quality;

Our ability to effectively manage our operating expenses, capital expenses and reduce or refinance our debt;

Our dependence on cash flow from our Hungarian subsidiaries and certain restrictions on their ability to pay dividends to the parent company;

The overall effect of competition from wireless service providers, other wireline carriers, cable television operators, ISPs and others in the markets that we currently compete in and in the markets that we may enter into;

The effects of greater than anticipated competition requiring new pricing, marketing strategies or new product offerings and the risk that we will not respond on a timely or profitable basis;

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

The timing and profitability of our entry into new markets;

Our ability to successfully introduce new product offerings including our ability to offer bundled service packages on terms that are both profitable to us and appealing to our customers, and our ability to sell enhanced and data services in order to offset declines in revenue from local wireline service;

Material changes in available technology and the effects of such changes including product substitutions and deployment costs;

Our ability to retain key employees;

The effect of Hungarian regulatory and legislative initiatives and proceedings including those relating to the terms of interconnection, access charges, universal service, unbundled networks, resale rates and the continued liberalization of the Hungarian telecommunications marketplace;

Changes in European Union laws and regulations, which may require Hungary and other countries to revise their telecommunications laws;

Political changes in Hungary;

The final outcome of certain legal proceedings affecting us;

Our ability to comply with Section 404 of the Sarbanes-Oxley Act of 2002, which requires management to assess its internal control systems and disclose whether the internal control systems are effective, and the identification of any material weaknesses in our internal control over financial reporting;

Changes in our accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on our financial results;

The performance of our IT Systems;

Our ability to integrate Invitel's operations into our business and achieve revenue enhancements and costs savings from our acquisition of Invitel;

Our ability to successfully complete the integration of any businesses or companies that we may acquire into our operations; and

Edgar Filing: HUNGARIAN TELEPHONE & CABLE CORP - Form 10-Q

Our relationship with our controlling stockholder.

You should consider these important factors in evaluating any statements in this Quarterly Report on Form 10-Q or otherwise made by us or on our behalf. We have no obligation to update or revise these forward-looking statements.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Overview

We provide telecommunications services in Hungary through our three Hungarian operating subsidiaries: Hungarotel; PanTel; and PanTel Technocom.

Hungarotel principally provides wireline voice, data and Internet services to residential customers (the Mass Market) within 3 defined regions of Hungary (the Hungarotel Operating Areas) where it is the incumbent provider of telecommunication services.

PanTel owns a nationwide fiber optic network in Hungary and competes primarily with Magyar Telekom, the former national monopoly, in the provision of voice, data and Internet services to businesses throughout Hungary (the Corporate Market). PanTel uses its network capacity to transport voice, data, and Internet traffic on a wholesale basis for other telecommunications service providers, Internet Service Providers, and cable television operators in Hungary (the Wholesale Market). PanTel also uses its network to service the Mass Market outside the Hungarotel Operating Areas. PanTel's network also extends into other countries in the Central and Eastern European region. PanTel has interconnection arrangements in place with several major international telecommunications service operators which provide for interconnection at international telecommunications hubs, including hubs in Frankfurt, London and Vienna.

PanTel Technocom provides telecommunications service to MOL (the Hungarian oil company) and operates and maintains various parts of MOL's telecommunications network.

As of March 31, 2007, Hungarotel had approximately 110,000 telephone lines connected to its network within the Hungarotel Operating Areas to service the Mass Market and PanTel had approximately 39,000 telephone lines through local loop unbundling (LLU), carrier pre-selection (CPS), and carrier selection (CS) to service the Mass Market outside the Hungarotel Operating Areas, compared to March 31, 2006 when Hungarotel had approximately 123,000 telephone lines in service within the Hungarotel Operating Areas to service the Mass Market, and PanTel had approximately 17,000 telephone lines to service the Mass Market through indirect access outside the Hungarotel Operating Areas. In total we had a 6.4% increase in the telephone lines in the Mass Market from approximately 140,000 lines to approximately 149,000 lines. In the Corporate Market we had approximately 82,000 telephone lines in service (including approximately 21,000 serviced through CPS and LLU) as of March 31, 2007 compared to approximately 72,000 telephone lines in service (including approximately 12,000 serviced through CPS and LLU) as of March 31, 2006. In order to take advantage of PanTel's experience in competing throughout Hungary, the Non-Hungarotel Operating Area Mass Market customers were transferred from Hungarotel to PanTel as of April 1, 2006. During the past year the Company has focused on the acquisition of CPS customers. These CPS customers generate less Average Revenue Per User (ARPU) than our customers in the Hungarotel Operating Areas but generate higher ARPU than CS customers. The number of broadband DSL connections has increased significantly, from approximately 6,000 as of March 31, 2006 to approximately 17,000 as of March 31, 2007.

Our goal is to provide a broad array of telecommunications services with exceptional quality and service at reasonable prices by becoming a highly efficient full service telecommunications provider in Central and Eastern Europe. Our primary risk is our ability to

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

retain existing customers and attract new customers in a highly competitive market that is constantly in flux due to a challenging regulatory environment, new competitive fixed line telephony entrants, high wireless telephony penetration and macroeconomic factors. Our success depends upon our operating and marketing strategies, as well as market acceptance of telecommunications services within Hungary and the Central and Eastern European region.

On April 27, 2007, pursuant to a Sale and Purchase Agreement dated January 8, 2007, the Company completed its acquisition (the Acquisition) of 100% of the issued ordinary shares of Matel Holdings N.V. (Matel Holdings) which indirectly owns 99.98% of the outstanding shares of Invitel. Invitel was one of our significant competitors.

The Acquisition strengthens our position as the second largest fixed line telecommunications services provider and as the number one alternative fixed line operator in Hungary. The larger customer base and more extensive backbone network enables us to benefit from Invitel's and Hungarotel's combined 14 geographically clustered historical concession areas. The Acquisition also provides us with a more substantial platform from which to take advantage of key potential service development opportunities and any further market consolidation.

We will continue to explore other strategic merger, acquisition or alliance opportunities. We are also continuing to explore wireless service solutions and possibilities so that we can be a full service provider in Hungary, providing both wireline and wireless voice, data and Internet services for residential and business customers.

Comparison of Three Months Ended March 31, 2007 and Three Months Ended March 31, 2006

The functional currency of our Hungarian subsidiaries is the Hungarian forint. The average Hungarian forint/U.S. dollar exchange rate for the three months ended March 31, 2007 was 192.61, as compared to an average Hungarian forint/U.S. dollar exchange rate for the three months ended March 31, 2006 of 211.53. When comparing the three months ended March 31, 2007 to the three months ended March 31, 2006, you should note that all U.S. dollar reported amounts have been affected by this 10% appreciation in the Hungarian forint against the U.S. dollar. Certain 2006 amounts have been restated. See Note 1(b) Restatements in Notes to Condensed Consolidated Financial Statements.

Gross Revenues

USD (000 \$)	2007	2006 (as restated)	% change
Corporate Market	\$ 17,542	\$ 17,500	0 %
Wholesale Market	23,571	20,564	15 %
Mass Market	8,025	7,394	9 %
Total Operating Revenues	49,138	45,458	8 %
Cost of Sales	(20,715)	(18,087)	(15)%
Gross Margin	\$ 28,423	\$ 27,371	4 %
Gross Margin %	57.84%	60.21%	

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Our operating revenues increased in US dollar terms by \$3.7 million, or 8%, between the three months ended March 31, 2006 and the three months ended March 31, 2007. In functional currency terms revenues decreased by 2%. The decrease, in functional currency terms, is attributable to the following:

Corporate Market Revenues

Our Corporate Market revenues decreased in functional currency terms by approximately 9%, due mainly to the following effects:

A government contract was not renewed and we experienced a price reduction on two significant contract renewals between the two periods that resulted in lost recurring revenues of \$1.48 million;

Higher than forecasted price erosion combined with the effects of the substitution of wireline for wireless telephony services at a faster pace than expected.

We have focused on offering more attractive products in terms of voice, data and convergence with IT solutions. We are also promoting higher margin products such as broadband DSL Internet service and Internet connections to customers, which have continued to grow significantly between the two periods. We expect the number of broadband DSL connections to continue to grow in the future.

Wholesale Market Revenues

Our Wholesale Market revenues increased in functional currency terms by approximately 4%, and in U.S. dollar terms by 15% from \$20.6 million for the period ended March 31, 2006 to \$23.6 million for the period ended March 31, 2007.

The increase results from wholesale voice service revenues which represent slightly over half of total Wholesale Market gross revenues. Wholesale voice revenues, continue to be a relatively low margin, high volume business. However, this service remains attractive to PanTel's customers since it complements other business products such as leased lines and Internet bandwidth when bundling services for business customers. We also experienced a slight increase in the provision of network services and wholesale DSL services.

As a result of the commoditization of the major Central European telecommunications backbone routes, the Company's Wholesale business faces intense price competition that continues to erode revenues and margins. The Company is focusing on rationalizing costs by replacing international access costs on a capacity basis with rented fixed cost fiber infrastructure. Fiber infrastructure is more scalable in terms of capacity and therefore our ability to manage our cost structure is greater.

Competition has increased significantly for basic backbone services in our Wholesale business throughout Hungary and neighboring countries. We have had to expand our offering by providing a larger amount of capacity to a larger number of customers. While this generally

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

requires more upfront sales work, the Company should experience fewer losses of customers going forward from this customer base.

Mass Market Revenues

Our Mass Market revenues for the three months ended March 31, 2007 were \$8.0 million compared to \$7.4 million for the three months ended March 31, 2006. In functional currency terms revenues decreased by approximately 1%. The primary reason for the decrease is due to increased competition from other telecommunications service providers offering CS and CPS services within the Hungarotel Operating Areas.

We had an approximate 6% increase in total residential lines in service from approximately 140,000 for the three months ended March 31, 2006, to approximately 149,000 for the three months ended March 31, 2007. This increase is due to two major offsetting factors that influenced the line count of the Company:

We experienced a significant increase in the usage of our CS and CPS services that we launched during the second quarter of 2005 to challenge the incumbent local telephone operators (ILTO s) on service and price in the Mass Market. During April 2006, we introduced additional CS and CPS packages which should provide us with higher revenue than the original packages introduced last year. The initial sales results of these newly introduced packages have exceeded our expectations. As of March 31, 2007, we had approximately 39,000 indirect access lines (including active CS and CPS lines, and LLU connections) compared to approximately 17,000 lines as of March 31, 2006.

In the Hungarotel Operating Areas we have experienced a decrease in line count of approximately 13,000 lines, from 123,000 as of March 31, 2006 to 110,000 as of March 31, 2007 that is due to the following factors: (i) continued intense competition from wireless telephone providers; (ii) competition from other service providers, such as cable television operators providing voice services; and (iii) economic conditions that resulted in some customers not being able to afford telephone services in general or choosing to receive voice services from just their wireless service provider, and not us, in order to reduce their monthly telecommunication expenses. Although we increased our overall line count, ARPU has declined since CS and CPS customers generate significantly less ARPU than our customers in the Hungarotel Operating Areas. This shift in the customer mix between the loss in the Hungarotel Operating Areas with higher ARPU and the gain in the customers with lower ARPU outside the Hungarotel Operating Areas has resulted in an approximately 8% ARPU decrease between 2006 and 2007. Our main effort is to increase the ARPU and expand our customer base at the same time. Therefore, we have focused on increasing the broadband DSL Internet service penetration rate, both inside and outside of the Hungarotel Operating Areas. We have also started to increase the number and value of our LLU customers by adding value added services.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Cost of Sales

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As Restated
Cost of sales	\$ 20.7	\$ 18.1

Cost of Sales (interconnect costs) totalled \$20.7 million and \$18.1 million during three months ended March 31, 2007 and 2006, respectively, an increase of 14%. In functional currency terms we had an increase of only 4% compared to the 14% in U.S. dollar terms.

80% of Hungarotel's total cost of sales comes from the interconnect costs paid for terminating calls on other operators' networks. We pay interconnection fees to other wireline and wireless operators to terminate calls from our customers (outgoing). The interconnect prices used between the incumbent operators (including the wireless carriers) are set by the regulatory authorities.

Pantel is not an incumbent operator, so the interconnect prices between PanTel and other operators are based on negotiations. In addition to traditional voice termination interconnect costs, a significant portion of PanTel's cost of sales is related to wholesale voice activity which is a high volume, low margin business that generates significant cost of sales. Pantel also pays access costs related to leased lines.

Gross Margin

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As Restated
Gross margin	\$ 28.4	\$ 27.4

Our gross margin percentage decreased from 60.2% in 2006 to 57.8% in 2007, a decrease of 4.0%. There was an increase in the Wholesale Market gross margin percentage of 2.2%, offset in part by a small decrease in the Mass Market of 1.5% due to the shift in the customer mix from higher ARPU customers in the Hungarotel Operating Areas to lower ARPU customers outside the Hungarotel Operating Areas. The majority of the decrease resulted from a 6% decrease in the Corporate Market due mainly to price erosion on contract renewals.

Selling, General and Administrative

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As Restated
Selling, general and administrative	\$ 14.3	\$ 12.8

Our Selling, General and Administrative expenses increased by 12% for the three months ended March 31, 2007 as compared to the three months ended March 31, 2006. This 12%

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

increase is mainly due to (i) the strengthening of the Hungarian forint as compared to the U.S. dollar, (ii) an additional \$0.9 million expense related to certain strategic projects, which were (iii) offset in part by a decrease of \$0.6 million in stock based compensation charges between the periods.

Depreciation and Amortization

(dollars in millions)	Quarter ended March 31,	
	2007	2006
Depreciation and amortization	\$ 7.4	\$ 6.3

Depreciation and amortization charges increased \$1.1 million, or 17%. This increase is due primarily to strengthening of the Hungarian forint as compared to the U.S. dollar and the increased asset level due to the capital expenditures during 2006.

Income from Operations

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As Restated
Income from operations	\$ 6.7	\$ 8.3

Income from operations decreased by 19% for the three months ended March 31, 2007 as compared to the three months ended March 31, 2006. Contributing to the decrease were the higher selling, general and administrative expenses and higher depreciation and amortization expenses.

Foreign Exchange Gains (Losses), Net

(dollars in millions)	Quarter ended March 31,	
	2007	2006
Foreign exchange gains (losses), net	\$ 3.0	\$ (7.3)

Our foreign exchange gains for the three months ended March 31, 2007 resulted primarily from: (i) the strengthening of the Hungarian forint against the EUR on the Company's average EUR 114 million denominated debt outstanding in the quarter ended March 31, 2007. At March 31, 2007, the Hungarian forint had strengthened by approximately 2% against the EUR as compared to December 31, 2006 levels. The Company's foreign exchange losses for the three months ended March 31, 2006 resulted primarily from the weakening of the Hungarian forint against the EUR on the Company's average EUR 132.5 million denominated debt outstanding during the period. When the non-Hungarian forint debt of our subsidiaries is re-measured into Hungarian forints, the Company reports foreign exchange gains/losses in its consolidated financial statements as the Hungarian forint appreciates/devalues against such non-forint currencies. See the Inflation and Foreign Currency and Market Risk Exposure sections below.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Interest Expense

(dollars in millions)	Quarter ended March 31,	
	2007	2006
Interest expense	\$ 3.8	\$ 3.4

Interest expense increased by 12% for the three months ended March 31, 2007 as compared to the three months ended March 31, 2006. This is due to the strengthening of the Hungarian forint as compared to the U.S. dollar between the periods. See Liquidity and Capital Resources section below.

Interest Income

(dollars in millions)	Quarter ended March 31,	
	2007	2006
Interest income	\$ 0.5	\$ 0.2

Interest income increased by \$0.3 million for the three months ended March 31, 2007 as compared to the three months ended March 31, 2006 primarily due to higher Hungarian forint interest bearing deposit levels and the appreciation of the Hungarian forint over the prior year.

(Losses) gains from fair value changes on derivative financial instruments

(dollars in millions)	Quarter ended March 31,	
	2007	2006
Fair value changes on derivatives	\$ (44.3)	\$ 2.0

The \$44.3 million loss for the three months ended March 31, 2007 is primarily due to changes in the unrealized fair value of the hedges entered into in connection with the Invitel acquisition. As described in Note 5 to the financial statements, the Company entered into six foreign currency and interest rate hedges, all of which, except one, were contingent upon the completion of the acquisition. These items are non-cash items until they either mature or are unwound. Offsetting this loss is a \$1.2 million realized gain due to the termination of an interest rate swap on our existing credit facility.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Losses from Fair Value Changes on Warrants

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As restated
Fair value changes on Warrants	\$ (15.1)	\$ (0.1)

In May 1999, the Company issued notes (the Notes) that were issued in an aggregate amount of \$25 million with detachable warrants (the Warrants) to purchase 2,500,000 shares of common stock of the Company at a price of \$10 per share. The Notes accrued interest at the USD LIBOR rate applicable for the six months interest period plus 3.5%. The Notes matured in March 2007 and were exercised by TDC on March 28, 2007.

In accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, the Company has recorded a non-cash expense of \$15.1 million and \$0.1 million for the first quarter 2007 and 2006, respectively, relating to the change in the fair value of the Warrants primarily driven by the change in the Company's stock price during the period. The fair market value was determined under the Black-Scholes option pricing formula as of the exercise date of the Warrants. The cumulative adjustment to the fair market value of the Warrants was reflected in the Company's Additional Paid-In Capital upon exercise of the Warrants.

Income Tax (Benefit) Expense

(dollars in millions)	Quarter ended March 31,	
	2007	2006 As restated
Current tax expense:		
Corporate tax expense	\$ 1.1	\$
Local business tax	1.4	1.0
Deferred tax benefit	(0.8)	(0.2)
Total income tax (benefit) expense	\$ 1.7	\$ 0.8

The Company recorded a deferred tax benefit of \$0.8 million for the three months ended March 31, 2007 as compared to \$0.2 million for the three months ended March 31, 2006. The deferred tax benefit of \$0.8 million for the three months ended March 31, 2007 reflects the impact of additional benefit of the increased effective tax rate on our deferred tax asset between the first quarter 2006 and the first quarter 2007. The amount of the deferred tax asset considered realizable as of March 31, 2007 could be reduced in the future if estimates of taxable income during the future periods are reduced. Management considers projected future taxable income and tax planning in making these assessments.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Net Income Attributable to Common Stockholders

(dollars in millions)	Quarter ended March 31, 2006	
	2007	As restated
Net income/(loss) attributable to common stockholders	\$ (54.7)	\$ (1.0)

As a result of the factors discussed above, the Company recorded a net loss attributable to common stockholders of \$54.7 million, or \$4.22 per basic share and on a diluted basis, for the period ended March 31, 2007 as compared to net loss attributable to common stockholders of \$0.9 million, or \$0.08 per basic share and on a diluted basis, for the period ended March 31, 2006. The loss is primarily attributable to the unrealized losses on derivative instruments (\$44.3 million) and the non-cash impact of the loss on fair value changes of Warrants (\$15.1 million) as described above.

Liquidity and Capital Resources

Net cash provided by operating activities totalled \$0.1 million during the three months ended March 31, 2007, compared to \$15.6 million generated during the three months ended March 31, 2006. This decrease is principally due to the combination of the following two factors: (i) the combined foreign exchange effect of the weakening of the Hungarian forint against the U.S. dollar in the first quarter 2006 and its strengthening against the U.S. dollar in the first quarter 2007 and (ii) the increase in the Company's effective tax rate from 16% to 28% between the two quarters.

Net cash used in investing activities was \$3.9 million for the three months ended March 31, 2007, compared to \$3.6 million for the three months ended March 31, 2006. Capital expenditures increased by 15% to \$4.2 million compared to the first quarter 2006.

Financing activities provided net cash of \$1.1 million during the three months ended March 31, 2007 compared to \$0.1 million used for the three months ended March 31, 2006. Cash flows from financing activities for the three months ended March 31, 2007 is due primarily to the unwinding of 50% of our interest rate swaps on our now terminated credit facility. Cash flow used in financing activities for the three months ended March 31, 2006 reflect principal payments made under our capital lease obligations.

As of March 31, 2007, we had repaid approximately \$44.9 million (EUR 36 million), at historical exchange rates, of the original EUR 150 million drawn down under our now terminated credit agreement.

Our major contractual cash obligations, excluding requirements arising as a result of our Invitel acquisition but including interest, as of March 31, 2007 (at March 31, 2007 exchange rates) are as follows:

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Cash Payments Due by Period

(in thousands)

Obligation	Total	1 Year or Less	2-3 Years	4-5 Years	After 5 Years
Long Term Debt	\$ 168,175				168,175
Lease Commitments to Telecommunication Providers	7,368	3,977	3,242	149	
Other Operating Leases	4,951	1,980	2,285	603	83
Capital Leases	861	423	438		
Total	\$ 181,355	6,380	5,965	752	168,258

We believe that cash provided by our operating activities and our financing activities, will provide adequate resources to satisfy our working capital requirements, scheduled principal and interest payments on debt and anticipated capital expenditure requirements.

In connection with the Invitel Acquisition, the Company's indirect subsidiary HTCC Holdco II B.V. (Holdco II) has completed the issuance of EUR 200 million aggregate principal amount of floating rate senior notes maturing in 2013 (the 2007 Notes), the proceeds of which were used to partly finance the acquisition and to refinance the credit facilities of the Company's subsidiaries Pantel and Hungarotel.

As part of the Invitel Acquisition, the Company also assumed an estimated net indebtedness on closing of EUR 387 million (approximately \$523 million, the Assumed Debt). The Assumed Debt consists primarily of (i) EUR 133 million in aggregate principal amount and accrued interest of Floating Rate Senior PIK Notes due 2013 (the 2006 PIK Notes), (ii) EUR 142 million in aggregate principal amount of 10% Senior Notes due 2012 (the 2004 Notes), and a Facilities Agreement, which was amended and restated in connection with the Invitel Acquisition (the Amended Facilities Agreement). The outstanding balance on the Amended Facilities Agreement is EUR 115.4 million. In order to clarify the rights of the creditors under the various debt instruments, Holdco II, Matel Holdings and various creditors and certain other parties also entered into an amended and restated Intercreditor Agreement (the Intercreditor Agreement). Summaries of the terms and conditions of the 2007 Notes, the 2006 PIK Notes, the 2004 Notes, the Amended Facilities Agreement and the Intercreditor Agreement are set forth in the Company's 8-K filing which was filed with the SEC on May 3, 2007.

Inflation and Foreign Currency

During the first three months of 2006, the Hungarian forint weakened against the euro and the U.S. dollar due to a decrease in Hungarian interest rates, uncertainties surrounding Hungarian parliamentary elections, and, more generally, an increase in U.S. interest rates that resulted in investors divesting from emerging markets and investing in U.S. government securities, resulting in a net foreign exchange loss of \$7.3 million for the three months ended

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

March 31, 2006. During the first three months of 2007, the Hungarian forint strengthened against the euro and the U.S. dollar, as compared to year-end 2006 levels. As the Hungarian government pursues a policy of closing the gap between the country's current economic indicators and the qualification criteria for the Euro zone, the Hungarian National Bank's interest rate has increased from 6% to 8% over the twelve months preceding March 31, 2007, providing significant support to the forint against the U.S. dollar and the euro. This resulted in the strengthening of the forint and resulted in a foreign exchange gain of \$3 million for the three months ended March 31, 2007. See Item 3 Quantitative and Qualitative Disclosures About Market Risk (Market Risk Exposure below).

Approximately 74% of our total revenues are denominated in Hungarian forints and our operating and other expenses, including capital expenditures, are predominantly in Hungarian forints but also in U.S. dollars and euros. In addition, certain items in the balance sheet accounts are denominated in currencies other than the functional currencies of the operating subsidiaries. Accordingly, when such accounts are translated into the functional currency, we are subject to foreign exchange gains and losses which are reflected as a component of earnings. When the subsidiaries financial statements are translated into U.S. dollars for financial reporting purposes, we are subject to translation adjustments, the effect of which is reflected as a component of stockholders' equity.

While we have the ability to increase some of the prices we charge for our services generally commensurate with increases in the Hungarian Consumer Price Index (CPI) pursuant to our licenses from the Hungarian government, and as regulated by the government, we may choose not to implement the full amount of the increase permitted due to competitive and other concerns. In addition, the rate of increase in the Hungarian CPI may not be sufficient to offset potential negative exchange rate movements and, as a result, we may be unable to generate cash flows to the degree necessary to meet our obligations in currencies other than the Hungarian forint. See Item 3 Quantitative and Qualitative Disclosures About Market Risk (Market Risk Exposure below).

Related Party Transactions

The amount due to related parties totalling \$3,228,000 at March 31, 2007, represents cumulative preferred stock dividends in arrears in the amount of \$782,000, an accrual of \$2,446,000 for the costs for various individuals employed by TDC who have performed work for the Company, including the Company's former President and Chief Executive Officer and former head of Corporate Business Development (see below), for 2005, 2006 and 2007.

On March 28, 2007, TDC exercised its warrants in exchange for notes issued by the Company and held by TDC in the principal amount of \$25 million. As of March 31, 2007, TDC owned 68% of the Company's outstanding Common Stock and 30,000 shares of preferred stock convertible into 300,000 shares of Common Stock.

Robert Dogonowski, Jesper Theill Eriksen, Carsten Dyrup Revsbech and Henrik Scheinemann, current directors, are officers of TDC. Torben V. Holm was an employee of TDC and served as the Company's President and Chief Executive Officer and was also the head of management's executive committee. Alex Wurtz, who was also an employee of TDC, served as the Company's head of Corporate Business Development and was a member of the Company's

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

management executive committee. The Company has reached an agreement with TDC to reimburse TDC for the services of Messrs. Holm and Wurtz; however, no payment has been made.

For Mr. Holm, the Company has agreed to pay TDC EUR 945,571 (approximately \$1,260,000) for Mr. Holm's services for the period from May 2005 through March 2007. The Company was also responsible for paying other costs pertaining to Mr. Holm, including lodging in Budapest and for certain of Mr. Holm's travel costs back to his home in Denmark.

For Mr. Wurtz, the Company has agreed to pay TDC EUR 483,707 (approximately \$645,000) for Mr. Wurtz's services for the period from June 2005 through March 2007. The Company was also responsible for paying Mr. Wurtz's lodging in Budapest.

In addition to the services of Messrs. Holm and Wurtz, three employees of TDC have performed financial controlling services for the Company. The Company reached an agreement with TDC to pay approximately \$176,000 for such services. TDC also provided services for the Company in connection with certain strategic projects, including services in connection with the Company's acquisition of Invitel. For such services, the Company agreed to reimburse TDC approximately \$365,000 through February 1, 2007.

All of the directors of the Company are covered by a directors and officers liability policy taken out by TDC. As of March 31, 2007, the Company had approximately \$82,000 in expenses for the Company's portion of the overall premium paid by TDC.

The Company has agreements in place with TDC and its subsidiaries, pursuant to which TDC and the Company transport international voice, data and Internet traffic for each other over their respective telecommunications networks. For the three months ended March 31, 2007 and 2006, TDC paid the Company a net amount of approximately \$397,000 and \$300,000, respectively, pursuant to such agreements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market Risk Exposure

Currency Exchange Rate Risks

We are exposed to various types of risk in the normal course of our business, including the risk from foreign currency exchange rate fluctuations. Our operations, including approximately 74% of gross revenues and approximately 87% of operating expenses, are Hungarian forint based. Therefore, we are subject to exchange rate risk with respect to our non-Hungarian forint denominated expenses, primarily euros and U.S. dollars, due to the variability between the Hungarian forint and the euro and U.S. dollar. Due to our limited exposure with respect to non-Hungarian forint denominated expenses, we have not entered into any agreements to manage our foreign currency risks related to such expenses but we continue to monitor the exchange rate risk related to such expenses.

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

We are also exposed to exchange rate risk since we have debt obligations in euros. If the Hungarian forint weakens in the currency exchange markets versus the euro, we would have to generate more revenue in Hungarian forints to settle such debt obligations. The Hungarian forint/euro exchange rate changed from 252.3 as of December 31, 2006 to 247.83 as of March 31, 2007, an approximate 1.8% appreciation in the value of the Hungarian forint versus the euro.

Given our euro and U.S. dollar denominated debt obligations, exchange rate fluctuations can have a significant impact on our financial statements in connection with foreign exchange gains/losses and the resulting debt balances.

For example, if a 5% change in Hungarian forint/euro exchange rates were to occur, the Company's euro denominated debt, in U.S. dollar terms, would increase or decrease by \$7.6 million assuming that the U.S. dollar/forint rate did not change. A 5% change in the Hungarian forint/U.S. dollar rate along with a 5% change in Hungarian forint/euro rates would result in a \$7.2 million to \$8.0 million increase in the debt balance or a decrease of \$7.2 million to \$8.0 million.

Interest Rate Risks

We are exposed to interest rate risks because our outstanding euro denominated debt obligation accrues interest at a variable rate tied to market interest rates. The interest rate on the euro denominated obligation is based on EURIBOR. If a 1% change in EURIBOR interest rates were to occur, the Company's interest expense would increase or decrease by approximately \$0.8 million annually based upon our March 31, 2007 euro denominated debt level. We evaluate market interest rates and the costs of interest rate hedging instruments by reviewing historical variances between market rates and rates offered by lending institutions on hedging instruments, as well as market expectations of future interest rates.

As required by our now terminated credit agreement, we entered into interest rate swap agreements whereby we exchanged 50% of the variable interest rate on our euro denominated debt for a fixed rate.

Derivative Financial Instruments

During the first quarter 2007, in order to reduce the exposure to the value of the euro and the level of interest rates that would arise upon the completion of the acquisition of Invitel, the Company hedged the Floating Rate Senior Notes and the Invitel debt. In January 2007, the Company entered into six foreign currency and interest rate hedges, all of which, except one, were contingent upon the completion of the Acquisition

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

The following table summarizes the notional amounts and respective fair values of the Company's financial instruments, which mature at varying dates, as at March 31, 2007:

Asset (Liability)	Notional Amount	Fair Market Value	Changes in Fair Market Value
Cross currency interest rate swaps	\$ 368,155	(\$ 24,921)	(\$ 24,921)
Cross currency swaps	189,002	(15,590)	(15,590)
Forward rate agreement	49,247	(2,873)	(2,873)
Interest rate swaps	49,247	(676)	(676)
Interest rate swaps on credit facility	151,700	1,495	(1,460)
	\$ 807,351	(\$ 42,565)	(\$ 45,520)

The notional principal amount provides one measure of the transaction volume outstanding as of the end of the period, and does not represent the amount of our exposure to market loss. The estimated fair values are based on market prices provided by the counterparty to the derivatives and represent the estimated amounts that the Company would pay or receive to terminate the contracts as of March 31, 2007. The amounts ultimately realized upon settlement of these financial instruments, together with the gains and losses on the underlying exposures, will depend on actual market conditions during the remaining life of the instruments.

Item 4. Controls and Procedures

Our management, with the participation of our Chief Executive and Chief Financial Officers, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Securities Exchange Act of 1934, Rule 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon and as of the date of that evaluation, our Chief Executive and Chief Financial Officers concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports it files and submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as and when required.

In our 2006 10-K/A, we concluded that our internal control over financial reporting was ineffective as of December 31, 2006 because we did not have sufficient personnel with in depth knowledge relating to the accounting for and reporting of our financial statements in accordance with U.S. generally accepted accounting principles (US GAAP). This deficiency resulted in material errors in the accounting for stock warrants in accordance with US GAAP and the computation of diluted earnings per share with respect to such warrants.

Our management, during the preparation of its report for the first quarter of 2007, has taken steps to remediate these material weaknesses described above. They include:

Review of the financial statements by the recently appointed CFO who has US GAAP reporting experience in telecommunications businesses;

Part I. Financial Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Completion of an extensive US GAAP review in connection with a recent acquisition that was completed in 2007. Issues identified through that review have been weighed against the preparation of the current financial statements.

It should be noted that any system of disclosure controls and procedures, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any system of disclosure controls and procedures is based in part upon assumptions about the likelihood of future events. Due to these and other inherent limitations of any such system, there can be no assurance that any design will always succeed in achieving its stated goals under all conditions.

Apart from the items described above, there were no other changes in our internal control over financial reporting during the quarter ended March 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

HUNGARIAN TELEPHONE AND CABLE CORP. AND SUBSIDIARIES

Item 1. Legal Proceedings

None

Item 1A. Risk Factors

In our report on Form 10-K for 2006, we disclosed risk factors contingent on the closing of the Invitel acquisition. On April 27, 2007, the Company completed the Invitel acquisition and such risk factors are no longer contingent on completion of such acquisition.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

(a) None.

(b) In 1999 we issued 30,000 shares of Preferred Stock Series A with a liquidation value of \$70 per share. At the end of the first quarter 2007, the preferred shares were held by TDC A/S. Any holder of such Preferred Shares is entitled to receive cumulative cash dividends payable in arrears at the annual rate of 5%, compounded annually, on the liquidation value. As of March 31, 2007, the total arrearage on the Preferred Shares was \$782,000.
