SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934
For the Quarterly Period Ended September 30, 2007

or

Transition Report Pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934
For the Transition Period From _____ to _____

Commission File Number: 1-652

UNIVERSAL CORPORATION

(Exact name of registrant as specified in its charter)

Virginia
(State or other jurisdiction of
incorporation or organization)

1501 North Hamilton Street,
Richmond, Virginia

54-0414210
(I.R.S. Employer
Identification Number)

23230

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

(Address of principal executive offices)

804-359-9311

(Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act). Yes No

As of November 1, 2007, the total number of shares of common stock outstanding was 27,374,956.

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, with its subsidiaries (Universal or the Company), is one of the world's leading leaf tobacco merchants and processors. The Company previously had operations in lumber and building products and in agri-products. The lumber and building products businesses, along with a portion of the agri-products operations, were sold on September 1, 2006. In December 2006, the Company adopted a plan to sell the remaining agri-products operations. One of those agri-products businesses was sold in January 2007, another was sold in May 2007, and the assets of the remaining business were sold in October 2007. The lumber and building products operations and the agri-products operations are reported as discontinued operations for all periods in the accompanying financial statements.

Because of the seasonal nature of the Company's business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2007.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Universal adopted Financial Accounting Standards Board (FASB) Interpretation 48, Accounting for Uncertainty in Income Taxes (FIN 48), effective April 1, 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 requires that positions taken or expected to be taken in tax returns meet a more-likely-than-not threshold in order to be recognized in the financial statements. It also provides guidance on measuring the amount of a tax position that meets the more-likely-than-not criterion. As a result of adopting FIN 48, the Company recognized a net increase of approximately \$10.9 million in its liability related to uncertain tax positions, which was accounted for as a decrease in the April 1, 2007, balance of retained earnings. Additional disclosures related to the adoption of FIN 48 are included in Note 11.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157), which establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 is applicable for fiscal years beginning after November 15, 2007. The Company does not expect that SFAS 157 will have a material effect on its financial statements.

NOTE 3. GUARANTEES AND OTHER CONTINGENT LIABILITIES

Guarantees and Other Contingent Liabilities

Guarantees of bank loans to growers for crop financing and construction of curing barns or other tobacco producing assets are industry practice in Brazil and support the farmers' production of tobacco

Table of Contents

there. At September 30, 2007, the Company's total exposure under guarantees issued by its operating subsidiary in Brazil for banking facilities of farmers in that country was approximately \$200 million. About 60% of these guarantees expire within one year, and nearly all of the remainder expire within five years. The subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover their obligations to third-party banks could result in a liability for the subsidiary under the related guarantee; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make is the face amount, \$200 million, and any unpaid accrued interest. The fair value liability recorded for the guarantees was approximately \$10 million and \$9 million at September 30, 2007 and 2006, respectively, and approximately \$10 million at March 31, 2007. In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$48 million, including amounts related to the unsecured portion of a bank guarantee for European Commission fines in Italy and to other legal matters, as discussed below.

European Commission Fines and Other Legal Matters

European Commission Fines in Spain

In October 2004, the European Commission (the Commission) imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million (approximately \$29 million) for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of the Company's subsidiaries, Tabacos Espanoles S.A. (TAES), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. (Deltafina), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and 11.88 million (approximately \$17 million) on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. The Company recorded a charge of approximately \$14.9 million in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against the Company's subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. The appeal process is likely to take several years to complete, and the ultimate outcome is uncertain. The Company has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity.

Table of Contents

Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling 30 million (about \$43 million) on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

The Company does not believe that the decision can be reconciled with facts and the Commission's Statement of Objections. The Company and Deltafina each have appealed the decision to the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, the Company believes it is probable that it will prevail in the appeals process and has not accrued a charge for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine in order to stay execution during the appeal process. A cash deposit of 8 million (about \$12 million) secures a portion of the bank guarantee and is classified as a non-current asset.

U.S. Foreign Corrupt Practices Act

As a result of a posting to the Company's Ethics Complaint hotline alleging improper activities that involved or related to certain of the Company's tobacco subsidiaries, the Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. Those payments approximated \$1 million over a five-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but the Company believes those activities did not violate U.S. antitrust laws. The Company voluntarily reported these activities to the appropriate U.S. authorities. On June 6, 2006, the Securities and Exchange Commission notified the Company that a formal order of investigation has been issued.

If the U.S. authorities determine that there have been violations of the Foreign Corrupt Practices Act, or if the U.S. authorities or the authorities in foreign jurisdictions determine there have been violations of other laws, they may seek to impose sanctions on the Company or its subsidiaries that may include injunctive relief, disgorgement, fines, penalties, and modifications to business practices. It is not possible to predict at this time whether the authorities will determine that violations have occurred, and if they do, what sanctions they might seek to impose. It is also not possible to predict how the government's investigation or any resulting sanctions may impact the Company's business, financial condition, results of operations, or financial performance, although such sanctions, if imposed, could be material to its results of operations in any quarter. The Company will continue to cooperate with the authorities in these matters.

Other Legal Matters

In addition to the above-mentioned matters, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending the claims and does not currently expect that any of them will have a material adverse effect on the Company's financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Table of Contents

NOTE 4. DISCONTINUED OPERATIONS

During fiscal years 2007 and 2008, Universal implemented the following actions to divest all of its non-tobacco operations:

In the quarter ended September 30, 2006, the sale of the Company's lumber and building products segment and a portion of its agri-products segment (the Deli Operations) was approved, contractually agreed to with the buyer, and completed.

On December 12, 2006, a plan to sell the remaining businesses in the agri-products segment was approved. These businesses were classified as held for sale as of that date. The sale of one of the agri-products businesses was completed in January 2007, the sale of another was completed in May 2007, and the assets of the remaining business were sold in October 2007.

As a result of these actions, the Company's worldwide leaf tobacco business now represents its continuing operations. The operating results and the assets and liabilities of the non-tobacco businesses are reported as discontinued operations for all periods presented in the accompanying consolidated financial statements.

Sale of Deli Operations

On September 1, 2006, Universal completed the sale of the non-tobacco businesses managed by its wholly-owned subsidiary, Deli Universal, Inc. (Deli) to NVDU Acquisition, B.V., a newly-formed entity owned by affiliates of a Netherlands-based merchant bank, a Netherlands-based private company, and managers of the businesses that were sold. As discussed above, these businesses composed the Company's entire lumber and building products segment and a portion of its agri-products segment. The total value of the transaction was approximately \$565 million. After selling and other expenses, Universal realized a net value of \$551 million, consisting of net cash proceeds of \$397 million and the buyer's assumption of \$154 million of debt with the acquired businesses. The Company recorded a net loss on the sale of \$35.0 million, consisting of a pretax loss of \$34.1 million and income tax expense of \$0.9 million primarily related to net deferred tax assets that were not realized as a result of the sale. Approximately \$33.3 million of the loss was recorded upon completion of the sale during the quarter ended September 30, 2006, and an additional \$1.7 million was recorded upon final agreement on adjustments to the sales price during the quarter ended March 31, 2007.

Sale of Remaining Agri-Products Operations

In December 2006, Universal approved a plan to sell the remaining non-tobacco agri-products businesses that were not part of the sale of the Deli Operations. A pretax impairment charge of \$11.1 million was recorded in the quarter ended December 31, 2006, to reduce the Company's aggregate net investment in two of these businesses to estimated fair value less costs to sell. Based on its consolidated income tax position, the Company does not expect to realize a tax benefit on the loss on the sale of these businesses and did not record an income tax benefit on the impairment charge. As noted above, the sale of one of the agri-products businesses was completed in January 2007 at a small gain that was not material to the results of operations or financial condition of the Company. In May 2007 and October 2007, the sales of the other agri-products businesses were completed at prices approximating their net book values after the impairments recorded in prior periods.

Table of Contents*Amounts Reported as Discontinued Operations in the Accompanying Financial Statements*

The consolidated statements of income and retained earnings reflect the following income from discontinued operations, net of income taxes, for the three and six months ended September 30, 2007 and 2006:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2007	2006	2007	2006
Operating results of discontinued operations, net of income taxes	\$ (675)	\$ (874)	\$ (191)	\$ 10,505
Gain (loss) on sale of businesses, net of income taxes (a)		(33,285)	46	(33,285)
Loss from discontinued operations, net of income taxes	\$ (675)	\$ (34,159)	\$ (145)	\$ (22,780)

(a) The loss on sale of businesses during the quarter and six months ended September 30, 2006, reflects the sale of the Deli operations. The loss on the sale of businesses during the six months ended September 30, 2007, primarily reflects the completion of the sales of certain of the Company's other agri-products businesses, final agreement on sales price adjustments for those transactions, and final payment of selling expenses.

The operating results for the Company's discontinued non-tobacco operations for the three and six months ended September 30, 2007 and 2006, were as follows:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2007 (b)	2006	2007 (b)	2006

Operating results of discontinued operations, net of income taxes	\$ (675)	\$ (874)	\$ (191)	\$ 10,505

(b) Deli Operations were sold in September 2006, and businesses (or the assets thereof) composing the remaining agri-products operations were sold in January 2007, May 2007 and October 2007. Results for the three months ended September 30, 2007 reflect only the agri-products business sold in October 2007 for the full period. Results for the six months ended September 30, 2007, reflect the agri-products businesses sold in May 2007 for two months and October 2007 for the full period. Results for the three months ended September 30, 2006, reflect the Deli operations for two months and the other agri-products businesses for the full period. Results for the six months ended September 30, 2006, reflect the Deli Operations for five months and the other agri-products businesses for the full period.

As permitted under the accounting standards, the Company has allocated interest expense to the discontinued operations for all periods based on the ratio of the net assets of those operations to consolidated net assets. Total interest allocated in addition to direct third-party interest incurred was \$0.1 million and \$0.3 million for the three and six months ended September 30, 2007, respectively, and \$2.6 million and \$6.1 million for the three and six months ended September 30, 2006, respectively.

The assets and liabilities of the discontinued non-tobacco operations reflected in the accompanying consolidated balance sheets were composed of the following:

Table of Contents

(in thousands of dollars)	September 30, 2007	September 30, 2006	March 31, 2007
Assets			
Cash and cash equivalents	\$ 1,358	\$ 1,912	\$ 240
Accounts receivable, net	2,134	40,648	16,656

Other current assets	392	5,664	621
Total current assets	4,564	95,080	40,016
Property, plant and equipment, net		3,997	1,850
Goodwill and other intangibles		369	
Other noncurrent assets		636	571
Total noncurrent assets		5,002	2,421
Total assets	\$ 4,564	\$ 100,082	\$ 42,437
Liabilities			
Notes payable and overdrafts	\$	\$ 530	\$ 492
Accounts payable	1,527	16,353	11,712
Other current liabilities		948	843
Total current liabilities	1,527	17,831	13,047
Other long-term liabilities	115	314	267
Total noncurrent liabilities	115	314	267
Total liabilities	\$ 1,642	\$ 18,145	\$ 13,314

Since the Deli Operations were sold on September 1, 2006, the balance sheet information for each period shown above reflects only the agri-products businesses that were not part of the Deli Operations. These businesses were classified as held for sale at March 31, 2007, and September 30, 2007. Accordingly, balances were reported as current assets or current liabilities in the consolidated balance sheets for those dates.

NOTE 5. RESTRUCTURING AND IMPAIRMENT COSTS*Restructuring Costs and Restructuring Liability*

During the quarter ended June 30, 2007, the Company recorded restructuring costs totaling \$3.3 million, representing one-time and special termination benefits associated with actions taken in certain areas of its worldwide operations. Approximately \$1.1 million of the costs related to a restructuring and downsizing of the Company's operations in Canada in response to declining tobacco production in that country. Last year's decision to exit certain flue-cured growing projects in Africa accounted for approximately \$1.7 million of costs, as actions to release farm managers and workers were implemented during the quarter. The remaining \$0.5 million of the charge related to reorganizations in several smaller locations. The restructuring costs reflect termination benefits paid, or to be paid, to 40 management and administrative employees, plus small remuneration payments to approximately 10,500 seasonal workers released from the growing projects in Africa.

Previously, during the second half of the fiscal year ended March 31, 2006, the Company recorded restructuring and impairment costs associated with decisions to close a leaf tobacco processing facility in Danville, Virginia, and to reduce costs through voluntary and involuntary staff reductions in the United States and the closure of two administrative offices overseas. The restructuring costs totaled approximately \$7.1 million and consisted of approximately \$6.4 million in one-time and special termination benefits and approximately \$700 thousand in lease costs on vacated office space and employee relocation costs. The termination benefits related to 353 employees whose positions were

Table of Contents

involuntarily eliminated and 31 employees who accepted voluntary separation offers. Some of the restructuring costs were paid in fiscal year 2006, and additional payments were made in fiscal years 2007 and 2008.

The activity in the Company's liability for restructuring costs for fiscal year 2007 and the first six months of fiscal year 2008 was as follows:

(in thousands of dollars)	One-Time and Special Termination Benefits	Other Costs	Total
Balance at March 31, 2006	\$ 4,611	\$ 435	\$ 5,046
Payments during fiscal year 2007:			
Quarter ended June 30, 2006	(1,769)	(61)	(1,830)
Quarter ended September 30, 2006	(657)	(61)	(718)
Quarter ended December 31, 2006	(333)	(62)	(395)
Quarter ended March 31, 2007	(521)	(61)	(582)
Balance at March 31, 2007	1,331	190	1,521
Costs and payments during fiscal year 2008:			
Costs charged to expense during quarter ended June 30, 2007	3,304		3,304
Payments during fiscal year 2008:			
Quarter ended June 30, 2007	(786)	(52)	(838)
Quarter ended September 30, 2007	(2,359)	(35)	(2,394)
Balance at September 30, 2007	\$ 1,490	\$ 103	\$ 1,593

The termination benefits to employees affected by the restructuring activities in the quarter ended June 30, 2007, were paid during the quarters ended June 30, 2007, and September 30, 2007. The termination benefits to employees affected by the restructuring initiatives in fiscal year 2006 were largely paid in either fiscal year 2006 or 2007; however, a small number of employees who accepted voluntary separation offers are continuing to receive payments. During the six months ended September 30, 2007, those payments were made to 21 employees. Substantially all of the restructuring liability remaining at September 30, 2007, will be paid by March 31, 2008.

Impairment Charge on Flue-Cured Tobacco Growing Projects in Zambia

Beginning in fiscal year 2002, Universal made investments in various tobacco growing projects in several African countries. Some of the projects involved the establishment and operational start-up of medium- or large-scale farms. The primary objective of the projects was to replace a portion of the volumes lost in recent years from the significant decline in production of flue-cured tobacco in Zimbabwe and thus continue to meet customer demand for African-origin flue-cured tobacco. During the quarter ended June 30, 2006, the Company began to assess certain of the growing projects to determine whether they could be expected to consistently meet planned production levels and financial targets. In connection with this review, the Company reduced its estimates of expected longer-term crop yields and related future cash flows for certain growing projects in Zambia. Carrying values of the related long-lived assets were also reviewed for potential impairment, resulting in a \$12.3 million charge to reduce the carrying values to estimated fair value. Based on the Company's outlook on its overall tax position, no income tax benefit was recorded on the charge, and therefore, it reduced income from continuing operations and net income by \$12.3 million, or \$0.48 per share, for the six months ended September 30, 2006. Also as a result of this review, the Company recorded a valuation allowance in the quarter ended June 30, 2006, for deferred

Table of Contents

income tax assets related to prior year operating losses in Zambia that reduced income from continuing operations and net income by an additional \$4.9 million, or \$0.19 per share, for the six months ended September 30, 2006.

During the fourth quarter of fiscal year 2007, based on further evaluation of the flue-cured growing projects in Africa, the Company made the decision to end its direct involvement in those projects at the completion of the 2006-2007 crop cycle and pursue the sale of the projects to third-party farmers who would be expected to continue growing tobacco on all or a portion of the land. As a result of this decision, the Company recorded additional impairment charges to further adjust the carrying values of growing project assets in Zambia and Malawi to estimated fair value. These impairment charges are discussed in more detail in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2007. No material impairment charges were recorded during the quarter or six months ended September 30, 2007. Zambia, Malawi, and other African countries remain important sources of flue-cured tobacco, and Universal expects to continue procuring tobacco grown by farmers in those origins.

NOTE 6. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans under which officers, employees, and outside directors of the Company may receive grants and awards of common stock, restricted stock, restricted stock units (RSUs), stock appreciation rights (SARs), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly-scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors in the fiscal year. Awards of restricted stock, RSUs, SARs, and non-qualified stock options are currently outstanding under the Plans. The non-qualified stock options and SARs have an exercise price equal to the market price of a share of common stock on the grant date. All stock options currently outstanding are fully vested and exercisable, and they expire ten years after the grant date. The SARs are settled in shares of common stock, vest in equal one-third tranches one, two, and three years after the grant date, and expire ten years after the grant date, except that SARs granted after fiscal year 2007 expire on the earlier of three years after the grantee's retirement date or ten years after the grant date. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The Company's outside directors automatically receive shares of restricted stock following each annual meeting of shareholders. These shares vest upon the individual's retirement from service as a director.

During the six months ended September 30, 2007 and 2006, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

Table of Contents

	Six Months Ended September 30,	
	2007	2006
SARs:		
Number granted	272,800	265,500
Exercise price	\$ 62.66	\$ 36.03
Grant date fair value	\$ 14.64	\$ 8.11
RSUs:		
Number granted	68,200	66,400
Grant date fair value	\$ 62.66	\$ 36.03
Restricted Shares:		
Number granted	11,500	20,000
Grant date fair value	\$ 49.78	\$ 35.26

The grant date fair value of the SARs was estimated using the Black-Scholes pricing model and the following assumptions:

	2007	2006
Expected term	5.0 years	6.0 years
Expected volatility	26.1%	31.6%
Expected dividend yield	2.81%	4.77%
Risk-free interest rate	5.00%	4.67%

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of the award is recognized as expense at the date of grant. As a result, Universal incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded than in the other three quarters. Expense is also increasing from year to year at the present time due to the inclusion of multiple years awards to employees who are not yet retirement eligible. For the three months ended September 30, 2007 and 2006, the Company recorded total stock-based compensation expense of approximately \$1.0 million and \$0.5 million, respectively. For the six months ended September 30, 2007 and 2006, the Company recorded total stock-based compensation expense of approximately \$5.6 million and \$3.2 million, respectively. The Company expects to recognize stock-based compensation expense of approximately \$2 million during the remaining six months of fiscal year 2008.

NOTE 7. COMPREHENSIVE INCOME

Comprehensive income for each period presented in the consolidated statements of income and retained earnings was as follows:

Table of Contents

(in thousands of dollars all amounts net of income taxes)	Three Months Ended		Six Months Ended	
	September 30, 2007	September 30, 2006	September 30, 2007	September 30, 2006

Diluted Earnings (Loss) Per Share				
Numerator for diluted earnings (loss) per share				
From continuing operations:				
Earnings available to common shareholders from continuing operations	\$ 36,761	\$ 33,525	\$ 51,226	\$ 16,251
Add: Dividends on convertible perpetual preferred stock (if conversion assumed)	3,712	3,713	7,425	
Earnings available to common shareholders from continuing operations for calculation of diluted earnings (loss) per share	40,473	37,238	58,651	16,251
From discontinued operations:				
Earnings (loss) available to common shareholders from discontinued operations	(675)	(34,159)	(145)	(22,780)
Net income (loss) available to common shareholders	\$ 39,798	\$ 3,079	\$ 58,506	\$ (6,529)
Denominator for diluted earnings (loss) per share:				
Weighted average shares outstanding	27,370	25,760	27,249	25,754
Effect of dilutive securities (if conversion or exercise assumed)				
Convertible perpetual preferred stock	4,710	4,709	4,710	
Employee share-based awards	350	146	391	131
Denominator for diluted earnings (loss) per share	32,430	30,615	32,350	25,885
Diluted earnings (loss) per share:				

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

From continuing operations	\$ 1.25	\$ 1.21	\$ 1.81	\$ 0.63
From discontinued operations	(0.02)	(1.12)	(0.01)	(0.88)
Net income (loss) per share	\$ 1.23	\$ 0.09	\$ 1.80	\$ (0.25)

For the six months ended September 30, 2006, conversion of the Company's outstanding Series B 6.75% Convertible Perpetual Preferred Stock was not assumed since the effect was antidilutive to earnings per share from continuing operations.

Table of Contents**NOTE 9. OPERATING SEGMENTS**

The principal approach used by management to evaluate the Company's performance is by geographic region, although some components of the business are evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in pretax earnings of unconsolidated affiliates.

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income and retained earnings were as follows:

(in thousands of dollars)	Three Months Ended September 30,		Six Months Ended September 30,	
	2007	2006	2007	2006
SALES AND OTHER OPERATING REVENUES				
Flue-cured and burley leaf tobacco operations:				
North America	\$ 53,921	\$ 48,647	\$ 88,685	\$ 130,012
Other regions (1)	541,001	445,543	885,111	756,486
Subtotal	594,922	494,190	973,796	886,498
Other tobacco operations (2)	60,408	49,974	131,751	104,583
Consolidated sales and other operating revenues	\$ 655,330	\$ 544,164	\$ 1,105,547	\$ 991,081
OPERATING INCOME (LOSS)				
Flue-cured and burley leaf tobacco operations:				
North America	\$ 4,154	\$ 7,163	\$ (1,031)	\$ 7,405
Other regions (1)	63,654	47,412	95,912	60,580
Subtotal	67,808	54,575	94,881	67,985
Other tobacco operations (2)	5,950	6,231	13,081	8,256
Segment operating income	73,758	60,806	107,962	76,241
Less:				
Equity in pretax earnings (loss) of unconsolidated affiliates (3)	(2,389)	(728)	(1,246)	(4,268)
Restructuring and impairment costs (4)			3,304	12,289
Consolidated operating income	\$ 76,147	\$ 61,534	\$ 105,904	\$ 68,220

(1) Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.

(2) Includes Dark Air-Cured, Special Services and Oriental, as well as inter-company eliminations. Sales and other operating revenues for this reportable segment include limited amounts for Oriental because its financial results consist principally of equity in the pretax earnings of an unconsolidated affiliate.

(3) Item is included in segment operating income, but not included in consolidated operating income.

(4) Item is not included in segment operating income, but is included in consolidated operating income.

Table of Contents**NOTE 10. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS**

The Company has several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also provides postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels.

The components of the Company's net periodic benefit cost for its continuing operations were as follows:

(in thousands of dollars)	Pension		Other Postretirement	
	Benefits		Benefits	
	Three Months Ended September 30,		Three Months Ended September 30,	
	2007	2006	2007	2006
Service cost	\$ 1,430	\$ 1,484	\$ 270	\$ 307
Interest cost	3,255	3,173	715	868
Expected return on plan assets	(3,044)	(2,711)	(40)	(44)
Settlement cost		365		
Net amortization and deferral	884	665	(12)	168
Net periodic benefit cost	\$ 2,525	\$ 2,976	\$ 933	\$ 1,299

(in thousands of dollars)	Pension		Other Postretirement	
	Benefits		Benefits	
	Six Months Ended September 30,		Six Months Ended September 30,	
	2007	2006	2007	2006
Service cost	\$ 2,858	\$ 3,007	\$ 541	\$ 613
Interest cost	6,494	6,328	1,523	1,735
Expected return on plan assets	(6,088)	(5,404)	(81)	(87)
Settlement cost		1,345		
Net amortization and deferral	1,695	1,718	(24)	336
Net periodic benefit cost	\$ 4,959	\$ 6,994	\$ 1,959	\$ 2,597

During the six months ended September 30, 2007, the Company made contributions of \$2.6 million to its pension plans. Additional contributions of approximately \$7 million are expected during the remaining six months of the fiscal year.

NOTE 11. INCOME TAXES

The Company's consolidated effective income tax rates on pretax earnings from continuing operations for the quarter and six months ended September 30, 2007, were approximately 36% and 37%, respectively. The rates were higher than the 35% U.S. federal statutory rate primarily due to excess foreign taxes recorded in countries where the tax rates exceed the U.S. rate, as well as state taxes on income earned in the U.S.

Table of Contents

For the quarter and six months ended September 30, 2006, the effective income tax rates were approximately 30% and 52%, respectively. The rate for the quarter was less than the U.S. federal statutory rate due to a reduction in the valuation allowance on deferred tax assets resulting from the combined effect of the Company's overall U.S. tax position and the method of attributing income taxes to discontinued operations under the applicable accounting guidance. The higher effective tax rate for the six-month period was primarily due to changes in the Company's tax position in Zambia. As a result of those changes, no income tax benefit was recorded on the \$12.3 million impairment charge on flue-cured tobacco growing projects in that country and a valuation allowance of \$4.9 million was provided on deferred tax assets related to prior year operating losses there. Without these items, the Company's effective income tax rate for the quarter and six months ended September 30, 2006, would have been approximately 38.5%.

Universal adopted Financial Accounting Standards Board Interpretation 48, Accounting for Uncertainty in Income Taxes (FIN 48), effective April 1, 2007, and recorded a cumulative effect adjustment of \$10.9 million, increasing its liability for unrecognized tax benefits, interest, and penalties and reducing the balance of retained earnings. At April 1, 2007, the Company had \$14.3 million of unrecognized tax benefits, of which \$7.4 million could have an effect on the effective tax rate if recognized. The Company recognizes accrued interest related to unrecognized tax benefits as interest expense, and it recognizes penalties as a component of income tax expense. At April 1, 2007, \$2.4 million was accrued for the potential payment of interest, and \$3.7 million was accrued for the potential payment of penalties. If all or part of the amount accrued for potential payment of penalties is not ultimately incurred, the reversal would have an effect on the effective tax rate.

During the quarter ended September 30, 2007, the Company reached a favorable resolution with respect to an uncertain tax position in one of its foreign tax jurisdictions, which reduced its liability for unrecognized tax positions by approximately \$0.9 million and the amounts accrued for the potential payment of interest by approximately \$1.2 million. These amounts were recorded as income tax expense and interest expense prior to the adoption of FIN 48. At September 30, 2007, the Company had \$13.3 million of unrecognized tax benefits, of which \$6.7 million could have an effect on the effective tax rate if recognized. The balance of unrecognized tax benefits includes \$0.7 million related to tax positions for which it is reasonably possible that the total amounts could change significantly within the following twelve months. This amount reflects a possible decrease in unrecognized tax benefits that could result from the completion and resolution of tax audits and expiration of open tax years in various tax jurisdictions.

Universal and its subsidiaries file a U.S. federal income tax return, as well as returns in several U.S. states and a number of foreign jurisdictions. As of April 1, 2007, the Company's earliest open tax year for U.S. federal income tax purposes was its fiscal year ended March 31, 2004. Open tax years in state and foreign jurisdictions generally range from three to six years.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q and the following Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company's financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we expect, believe, anticipate, could, should, may, plan, will, predict, estimate, and similar expressions or words of similar import. These forward-looking statements are based upon management's current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include: anticipated levels of demand for and supply of its products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; changes in exchange rates; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, Risk Factors of our Annual Report on Form 10-K for the fiscal year ended March 31, 2007. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2007.

Liquidity and Capital Resources

Overview

The first half of the fiscal year is generally a period of significant working capital investment in both South America and Africa as farmers bring crops to market. In fiscal year 2008, requirements were lower, primarily because of the smaller burley crops in Africa, and we funded them using cash on hand and operating cash flows. Additional funding sources during the six months included \$27 million in combined cash flow and proceeds from the sale of a small agri-products business, \$16 million from the issuance of common stock on the exercise of employee stock options, and \$16 million in other asset sales.

Our liquidity and capital resource requirements are predominantly short term in nature and primarily relate to working capital required for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements. The marketing

Table of Contents

of the crop in each geographic area is heavily influenced by weather conditions and follows the cycle of buying, processing, and shipping of the tobacco crop. The timing of individual customer shipping requirements may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a relatively large portion of our total debt as long-term to reduce liquidity risk.

Operations

Operating activities provided \$44 million of cash flow during the six months ended September 30, 2007. Tobacco inventory increased, reflecting our normal seasonal pattern. However, the amount of this increase, about \$42 million since March 31, 2007, is less than normal seasonal increases during this period. Tobacco inventory levels were \$118 million below the September 30, 2006 levels, primarily due to smaller burley crops in Africa caused in part by wet weather, the reduction in Canadian crop sizes, lower inventories held for customers by the Special Services group, and the reduction of South American inventories. Inventory is usually financed with a mix of cash, notes payable, and customer deposits, depending on our borrowing capabilities, interest rates, and exchange rates, as well as those of our customers. During the six months, accounts receivable fell by about \$31 million as customer payments were received against year-end balances. In the same period, advances to suppliers were reduced by \$13 million, as crops were delivered in payment of the balances, primarily in Africa. Accounts receivable from unconsolidated affiliates increased by \$14 million as we continued to fund purchasing and processing in Zimbabwe, where our operations have been deconsolidated.

We generally do not purchase material quantities of tobacco on a speculative basis. At September 30, 2007, our uncommitted inventories were \$78 million, or about 12% of total tobacco inventory, compared to \$120 million, or about 20% of our March 31, 2007, inventory, and \$138 million, or about 18% of our September 30, 2006, inventory. The effect of decreased volumes of uncommitted inventories was partially offset by increased costs due to the effect of the weak U.S. dollar.

Investment

During the six months ended September 30, 2007, we invested about \$13 million in fixed assets, which was \$8 million less than our depreciation expense of \$21 million. Our intent is to limit routine capital spending to a level below depreciation expense in order to maintain strong cash flow. Through the second quarter last year, capital spending was about \$15 million.

The balance of property, plant, and equipment, net of accumulated depreciation, decreased by about \$48 million relative to September 30, 2006, because of depreciation in excess of capital spending, last year's impairment charges related to our growing operations in Zambia and Malawi, and sales of aircraft.

Table of Contents

Financing

Total debt and customer advances decreased by about \$48 million to \$780 million during the six months ended September 30, 2007, despite seasonal working capital requirements, as we used cash on hand to fund our operating needs and repay a \$10 million medium term note that matured during the period. Total debt and customer advances as a percentage of capitalization (including total debt, customer advances, minority interests, and shareholders' equity) was approximately 42% at September 30, 2007, down from approximately 44% at March 31, 2007, and 53% last year. Net of cash and cash equivalents, total debt and customer advances has decreased by about \$71 million since March 31, 2007, and decreased by about \$373 million since September 30, 2006, as we used part of the proceeds from the sale of our non-tobacco businesses to retire debt and held the remainder as cash pending its use to fund operations and retire maturing debt.

In August 2007, we entered into a new five-year revolving bank credit agreement and terminated an existing five-year revolving credit facility. The new agreement provides for a revolving credit facility of \$400 million, which matures in August 2012. The covenants under the new facility require that we maintain a minimum level of tangible net worth and observe limits on debt levels. As of September 30, 2007, we were in compliance with the covenants of our debt agreements. Our short-term debt and current maturities of long-term debt totaled \$271 million. We had \$400 million available under our new committed revolving credit facility and \$381 million in cash. In addition, we had about \$500 million in unused, uncommitted credit lines. On November 7, 2007, we announced that our Board of Directors had approved the purchase of up to \$150 million of our common stock. The purchases will be carried out from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. The purchases are expected to be funded primarily from our operating cash flow. We currently have approximately 27.4 million common shares outstanding. We believe that our liquidity and capital resources at September 30, 2007, remained adequate to support our foreseeable operating needs.

Results of Operations

Income from continuing operations for the second quarter of fiscal year 2008, which ended on September 30, 2007, increased by 9% to \$40.5 million, or \$1.25 per diluted share. Last year, continuing operations earned \$37.2 million, or \$1.21 per diluted share, in the same quarter. The quarter's results reflected improvements primarily in Africa due to lower provisions for farmer receivables and lower inventory valuation adjustments, which in aggregate declined by \$27 million in that region. That improvement was offset in part by lower margins due to smaller crops that caused higher purchase prices for leaf and higher unit processing and agronomic costs. Earnings also benefited from significantly lower net interest expense. Net income for the quarter, including results from discontinued operations, was \$39.8 million, or \$1.23 per diluted share, compared to \$3.1 million, or \$0.09 per diluted share last year.

For the first half of fiscal year 2008, we earned \$58.7 million from continuing operations, or \$1.81 per diluted share, compared to \$23.5 million, or \$0.63 per diluted share last year. The

Table of Contents

significant improvement in the six-month results was caused by lower restructuring and impairment charges, lower provisions for farmer receivables, lower inventory valuation adjustments, shipment timing differences, operational improvements, net interest expense savings, and a lower effective tax rate. These gains were offset in part by lower carryover sales, the absence of last year's one-time sales by the North America segment, and lower margins in Africa. Net income for the six months, including results from discontinued operations, was \$58.5 million, or \$1.80 per diluted share, compared to \$700 thousand, which was a loss of \$0.25 per diluted share last year due to the effect of our issuance of convertible preferred stock.

Sales and other operating revenues were up 20% to \$655 million in the quarter and up 11.5% to \$1.1 billion for the six months. In both periods, the growth was principally due to higher volumes and leaf prices in Brazil, where currency changes were an important factor, higher volumes of African tobacco, and higher African prices due to short crops in Malawi and Mozambique where demand was strong.

The North America segment of the flue-cured and burley operations reported income of \$4.2 million for the quarter as operations moved into full swing for the season. Results were \$3 million lower than last year. Key factors in this year's decline were the effects of drought conditions on the U.S. flue-cured crop and last year's \$3 million gain on the sale of assets of closed facilities. Revenues for the quarter also reflected those reductions, but they were more than offset by earlier Canadian sales, and increased volumes in the smaller origins. For the six months, the segment reported a loss of \$1 million compared to earnings of \$7.4 million in the prior year. The reduction reflected the same factors as the quarter, as well as lower carry-over sales this year and several one-time sales, particularly old crop burley, in the first quarter of the prior year as well as the significant reduction of the Canadian crop. Those factors also caused revenues for this segment to fall by \$41 million, to \$89 million, compared to last year.

The Other Regions segment of the flue-cured and burley operations earned \$63.7 million, up 34% from the same quarter in fiscal year 2007, driven by improvement in Africa, Europe, and Asia. In South America, margins were lower because of the effect of the strong local currency in Brazil on leaf and operating costs. We entered into forward contracts related to certain customer sales contracts to hedge some of the currency effect, but because we did not elect hedge accounting, the mark-to-market gains on those contracts were recognized in the first quarter before the crop sales. In Africa, despite lower margins related to a 32% decline in crop sizes in Malawi and Mozambique, results improved due to lower provisions for farmer receivables and reduced inventory valuation write downs, which declined by \$27 million in the quarter compared to last year. Europe saw improvement in the quarter due to better product mix, and Asia's comparisons improved with additional trading volumes and the absence of last year's flood-related costs. Revenues for this segment increased by over \$95 million in this quarter.

For the six months, the Other Regions segment of the flue-cured and burley operations earned \$95.9 million compared to \$60.6 million last year. The dramatic improvement resulted from reduced charges in Africa for inventory and receivables of \$22 million this year, higher volumes in Brazil where forward exchange contracts mitigated part of the effect of the strong local currency, and higher volumes in other regions due to timing benefits. In addition,

Table of Contents

provisions for bad debts related to farmer receivables in Brazil were over \$6 million lower than last year. Those improvements were partially offset by lower margins in Africa due to higher unit costs related to short burley crops. Revenues for the Other Regions segment increased by about 17% to \$885 million.

The Other Tobacco Operations segment results were down slightly in the quarter to \$6.0 million despite higher revenues, primarily due to currency effects, timing of shipments, and mix of business. Results for dark air-cured operations declined in large measure due to currency remeasurement, higher domestic operating costs, and timing differences within current year shipments. The oriental tobacco joint venture experienced lower volumes that were partially offset by remeasurement gains during the quarter. The Special Services group realized accelerated sales volumes and improved results as part of its business is changing to be absorbed by regional operations. For the six months, this segment's performance reflected the same factors as were present in the quarter, as well as a one-time gain on the sale of investment securities. However, the adverse effect of currency remeasurement on dark operations was largely mitigated in the six months.

Selling, general and administrative expenses, which are included in segment operating results, fell by nearly \$10 million in the quarter, primarily related to a reduction of \$17 million in provisions for farmer receivables. For the six months, selling, general and administrative expenses dropped by approximately \$24 million. In addition to lower provisions for farmer receivables, which were down \$19 million for the period, \$11 million of the decline related to net foreign exchange gains. Of that total, \$6 million was associated with the aforementioned forward exchange contracts on the Brazilian currency.

We recorded higher interest income and lower interest expense as a result of funds provided by tobacco operations, the sale of our non-tobacco businesses, asset sales, and employee stock option exercises. Net interest savings were \$6.1 million for the quarter and \$11.5 million for the six months. The effective income tax rate for the six months, at 36.8%, is higher than the U.S. federal statutory income tax rate primarily because of excess foreign taxes recorded in countries where the tax rates exceed U.S. rates. In addition, the restructuring charges in the six month period provided tax benefits at a rate that was below the statutory rate, which increased the effective tax rate for the six months. For the full fiscal year, the rate is expected to be slightly below 37%. The effective tax rate last year for the six-month period was 51.9%. We did not record any tax benefit on our \$12.3 million asset impairment charge in last year's period since we believed that we would be unable to utilize the net operating loss carryforward generated by the charge. A valuation allowance of \$4.9 million on deferred tax assets associated with Zambia also increased last year's effective tax rate.

While most regions showed solid improvement in the first half of the fiscal year, challenges remain. This year we are facing very tight supply of burley tobacco, which has been exacerbated by short crops in Africa, as well as the challenge of controlling costs in the face of the weakening U.S. dollar. We have reduced our Brazilian flue-cured production to address the previous oversupply in worldwide flue-cured tobacco, and the quality of the crop is better, but the smaller burley crops in Africa and the drought effects on the U.S. flue-cured crop along with

Table of Contents

higher costs in most of the major producing areas of the world are presenting challenges. The U.S. dollar continues to be weak against many currencies and, although we work with our customers to mitigate the effect of that where we can, it remains a source of higher costs in many areas. African operations are experiencing margin difficulties on current crop production as unit costs have risen primarily due to smaller crops coupled with much higher prices to farmers, especially in Malawi and Mozambique. Inventories of African tobacco are substantially lower than they were at this time last year. That reduction reflects the crop shortfall and indicates lower shipments for the remainder of the season. In addition, as we noted last year, our North American operations benefited from the higher sales volume associated with the sale of old-crop burley tobacco, and those volumes will not recur this year, but North America also is dealing with the effects of a drought in the eastern United States. Tobacco production in Canada has fallen severely over the last few years and is forecast to decline by about one third for fiscal year 2008. We recognized restructuring costs related to that operation and our flue-cured growing operations in Africa this year. However, impairment and restructuring costs in fiscal year 2008 should be significantly below the levels that we have seen over the last two years. We believe that we have been taking the necessary actions to improve our performance for the long term. We are highly confident in our regional management teams, and we believe they have handled these challenges well in the first half of the fiscal year.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rates

Interest rate risk is limited in the tobacco business because major customers usually pre-finance purchases or pay market rates of interest for inventory purchased for their accounts. Our tobacco customers pay interest on tobacco purchased for their order. That interest is paid at rates based on current markets for variable-rate debt. If we fund our committed tobacco inventory with fixed-rate debt, we may not be able to recover interest at that fixed rate if current market interest rates were to fall. As of September 30, 2007, tobacco inventory of \$638 million included about \$560 million in inventory that was committed for sale to customers and about \$78 million that was not committed. Committed inventory, after deducting \$109 million in customer deposits, represents our net exposure of \$451 million. We maintain a portion of our debt at variable interest rates either directly or through interest rate exchange agreements in order to mitigate interest rate risk related to carrying fixed-rate debt. Debt carried at variable interest rates was about \$167 million at September 30, 2007. A hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$1.7 million, and all of that amount should be offset with changes in customer charges.

Currency

The international tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to production costs, overhead, and income taxes in the source country. Most of the operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our

Table of Contents

major countries of tobacco origin, we generally manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net investment in individual countries. In these countries, we are vulnerable to currency gains and losses to the extent that any local currency net monetary balances do not offset each other. In addition, changes in local currency exchange rates make tobacco more or less attractive in U.S. dollar terms. In some situations where customer contracts have fixed dollar pricing and forward foreign exchange markets exist, we may enter forward contracts to mitigate the risk of currency exchange rate changes.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these domestic markets are Canada, Hungary, and Poland. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies to manage and reduce the risks inherent in interest rate and currency fluctuations.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, contract, or invoice determines the amount, maturity, and other specifics of the hedge. Counterparty risk is limited to institutions with long-term debt ratings of A or better.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective. There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

European Commission Fines in Spain

In October 2004, the European Commission (the Commission) imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million (approximately \$29 million) for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of the Company's subsidiaries, Tabacos Espanoles S.A. (TAES), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. (Deltafina), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and 11.88 million (approximately \$17 million) on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. The Company recorded a charge of approximately \$14.9 million in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against the Company's subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. The appeal process is likely to take several years to complete, and the ultimate outcome is uncertain. The Company has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling 30 million (about \$43 million) on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

Table of Contents

The Company does not believe that the decision can be reconciled with facts and the Commission's Statement of Objections. The Company and Deltafina each have appealed the decision to the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, the Company believes it is probable that it will prevail in the appeals process and has not accrued a charge for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine in order to stay execution during the appeal process. A cash deposit secures a portion of the bank guarantee. A cash deposit of 8 million (about \$12 million) secures a portion of the bank guarantee and is classified as a non-current asset.

U.S. Foreign Corrupt Practices Act

As a result of a posting to the Company's Ethics Complaint hotline alleging improper activities that involved or related to certain of the Company's tobacco subsidiaries, the Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. Those payments approximated \$1 million over a five-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but the Company believes those activities did not violate U.S. antitrust laws. The Company voluntarily reported these activities to the appropriate U.S. authorities. On June 6, 2006, the Securities and Exchange Commission notified the Company that a formal order of investigation has been issued.

If the U.S. authorities determine that there have been violations of the Foreign Corrupt Practices Act, or if the U.S. authorities or the authorities in foreign jurisdictions determine there have been violations of other laws, they may seek to impose sanctions on the Company or its subsidiaries that may include injunctive relief, disgorgement, fines, penalties, and modifications to business practices. It is not possible to predict at this time whether the authorities will determine that violations have occurred, and if they do, what sanctions they might seek to impose. It is also not possible to predict how the government's investigation or any resulting sanctions may impact the Company's business, financial condition, results of operations, or financial performance, although such sanctions, if imposed, could be material to its results of operations in any quarter. The Company will continue to cooperate with the authorities in these matters.

Other Legal Matters

In addition to the above-mentioned matters, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending the claims and does not currently expect that any of them will have a material adverse effect on the Company's financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Table of Contents**ITEM 1A. RISK FACTORS**

As of the date of this report, there are no material changes to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended March 31, 2007. In evaluating the risks of the Company, readers should carefully consider the risk factors discussed in the Company's Annual Report on Form 10-K, which could materially affect the Company's business, financial condition or operating results, in addition to the other information set forth in this report and in other filings with the Securities and Exchange Commission.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Annual Meeting of Shareholders of the Company (the Meeting) was held on August 7, 2007.

At the Meeting, the shareholders elected four directors to serve three-year terms. The Company had outstanding, as of June 19, 2007, 24,700,095 shares of Common Stock, each of which was entitled to one vote. The majority of the shares entitled to vote constituted a quorum. Each of the four directors received more than a 97% majority of the outstanding shares. The voting with respect to each nominee was as follows:

Nominee	Votes	
	Votes For	Withheld
Chester A. Crocker	24,379,973	320,122
Charles H. Foster, Jr.	24,191,047	509,048
Thomas H. Johnson	24,183,059	517,036
Jeremiah J. Sheehan	24,181,903	518,192

The terms of office of the following directors continued after the Meeting: John B. Adams, Jr., Joseph C. Farrell, Allen B. King, Eddie N. Moore, Jr., Hubert R. Stallard, Walter A. Stosch, and Eugene P. Trani.

In addition, the shareholders voted for (i) the approval of the Universal Corporation 2007 Stock Incentive Plan and (ii) the approval of amendments to the Company's Amended and Restated Articles of Incorporation to (a) eliminate the requirement of a shareholder vote in those circumstances where the Virginia Stock Corporation Act otherwise permits the Board of Directors to take action without a shareholder vote; (b) revise the indemnification and limitation on liability provisions; and (c) make certain other technical amendments to the Amended Restated Articles of Incorporation. The results of the voting are set forth below.

Table of Contents

Proposal	Votes For	Votes Against	Votes Withheld	Broker Non-votes
Stock Incentive Plan	18,551,607	3,401,161	197,104	2,550,223
Shareholder Vote Amendments	17,084,701	4,849,885	215,286	2,550,223
Indemnification Amendments	19,220,232	2,741,409	188,231	2,550,223
Technical Amendments	21,802,475	158,398	188,999	2,550,223

No other matters were voted upon at the Meeting or during the quarter for which this report is filed.
