UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2010

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-32886

CONTINENTAL RESOURCES, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

Oklahoma (State or other jurisdiction of incorporation or organization)	73-0767549 (I.R.S. Employer Identification No.)
302 N. Independence, Suite 1500, Enid, Oklahoma (Address of principal executive offices)	73701 (Zip Code)
Registrant's telephone number, including area code: (580) 233-8955	

Former name, former address and former fiscal year, if changed since last report: Not applicable

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

169,967,432 shares of our \$0.01 par value common stock were outstanding on April 30, 2010.

Table of Contents

Glossary of Crude oil and Natural Gas Terms

The terms defined in this section are used throughout this report:

Bbl. One stock tank barrel, of 42 U.S. gallons liquid volume, used herein in reference to crude oil, condensate or natural gas liquids.

Bcf. One billion cubic feet of natural gas.

Boe. Barrels of crude oil equivalent, with six thousand cubic feet of natural gas being equivalent to one barrel of crude oil.

Completion. The process of treating a drilled well followed by the installation of permanent equipment for the production of natural gas or crude oil, or in the case of a dry hole, the reporting of abandonment to the appropriate agency.

DD&A. Depreciation, depletion, amortization and accretion.

Developed acreage. The number of acres that are allocated or assignable to productive wells or wells capable of production.

Dry hole. A well found to be incapable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of such production exceed production expenses and taxes.

Enhanced recovery. The recovery of crude oil and natural gas through the injection of liquids or gases into the reservoir, supplementing its natural energy. Enhanced recovery methods are often applied when production slows due to depletion of the natural pressure.

Field. An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature or stratigraphic condition. The field name refers to the surface area, although it may refer to both the surface and the underground productive formations.

FIFO. (First in/First out) A cost flow assumption where the first (oldest) costs are assumed to flow out first. This means the latest (recent) costs remain on hand.

Formation. A layer of rock which has distinct characteristics that differs from nearby rock.

Horizontal drilling. A drilling technique used in certain formations where a well is drilled vertically to a certain depth and then drilled at a right angle within a specified interval.

MBbl. One thousand barrels of crude oil, condensate or natural gas liquids.

Mcf. One thousand cubic feet of natural gas.

MBoe. One thousand Boe.

MMBoe. One million Boe.

MMBtu. One million British thermal units.

MMcf. One million cubic feet of natural gas.

MMMBtu. One billion British thermal units.

NYMEX. The New York Mercantile Exchange.

Play. A portion of the exploration and production cycle following the identification by geologists and geophysicists of areas with potential crude oil and natural gas reserves.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

Proved reserves. These quantities of crude oil and natural gas which by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible from a given date forward, from known reservoirs and under existing economic conditions, operating methods, and government regulations prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain.

Proved undeveloped reserves or PUD. Proved reserves that are expected to be recovered from new wells on undrilled acreage or from existing wells where a relatively major expenditure is required for recompletion.

Reservoir. A porous and permeable underground formation containing a natural accumulation of producible crude oil and/or natural gas that is confined by impermeable rock or water barriers and is separate from other reservoirs.

Unit. The joining of all or substantially all interests in a reservoir or field, rather than a single tract, to provide for development and operation without regard to separate property interests. Also, the area covered by a unitization agreement.

The accompanying notes are an integral part of these condensed consolidated financial statements.

Table of Contents**Continental Resources, Inc. and Subsidiary****Notes to Unaudited Condensed Consolidated Financial Statements****Note 1. Organization and Nature of Business***Description of Company*

Continental Resources, Inc.'s principal business is crude oil and natural gas exploration, development and production. Continental's operations are primarily in the North, South, and East regions of the United States.

Note 2. Basis of Presentation and Significant Accounting Policies*Basis of presentation*

This report has been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) applicable to interim financial information. Because this is an interim period filing presented using a condensed format, it does not include all of the disclosures required by accounting principles generally accepted in the United States (U.S. GAAP), although the Company believes that the disclosures are adequate to make the information not misleading. You should read this Form 10-Q along with the Company's Annual Report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K), which includes a summary of the Company's significant accounting policies and other disclosures.

The financial statements as of March 31, 2010 and for the three month periods ended March 31, 2010 and 2009 are unaudited. The Condensed Consolidated Balance Sheet as of December 31, 2009 was derived from the audited balance sheet filed in the 2009 Form 10-K. The Company has evaluated events or transactions through the date this report on Form 10-Q was filed in conjunction with its preparation of these financial statements.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The most significant of the estimates and assumptions that affect reported results is the estimate of the Company's crude oil and natural gas reserves, which is used to compute depreciation, depletion, amortization and impairment on producing crude oil and natural gas properties. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation in accordance with accounting principles generally accepted in the United States of America have been included in these unaudited interim condensed consolidated financial statements. The results of operations for any interim period are not necessarily indicative of the results of operations that may be expected for any other interim period or for the entire year.

Inventories

Inventories are stated at the lower of cost or market. Inventories consist of the following:

<i>In thousands</i>	March 31, 2010	December 31, 2009
Tubular goods and equipment	\$ 12,364	\$ 12,044
Crude oil	14,710	14,667
	\$ 27,074	\$ 26,711

As of March 31, 2010, our total crude oil inventory of 347,000 barrels valued at \$14.7 million consisted of approximately 267,000 barrels of line fill requirements and 80,000 barrels of temporarily stored crude oil. As of December 31, 2009, our total crude oil inventory of 398,000 barrels valued at \$14.7 million consisted of approximately 253,000 barrels of line fill requirements and 145,000 barrels of temporarily stored crude oil. Inventories, including line fill, are valued at the lower of cost or market using the FIFO inventory method.

Table of Contents*Earnings per common share*

Basic earnings per common share is computed by dividing net income (loss) by the weighted-average number of shares outstanding for the period. Diluted earnings per share reflects the potential dilution of non-vested restricted stock awards and dilutive stock options, which are calculated using the treasury stock method as if these awards and options were exercised. The following is the calculation of basic and diluted weighted average shares outstanding and income (loss) per share computations for the three months ended March 31, 2010 and 2009:

	Three months ended March 31,	
	2010	2009
<i>In thousands, except per share data</i>		
Income (loss) (numerator):		
Net income (loss) - basic and diluted	\$ 72,465	\$ (26,613)
Weighted average shares (denominator):		
Weighted average shares - basic	168,855	168,467
Restricted shares	662	
Employee stock options	303	
Weighted average shares - diluted	169,820	168,467
Income (loss) per share:		
Basic	\$ 0.43	\$ (0.16)
Diluted	\$ 0.43	\$ (0.16)

The potential dilutive effect of 316,000 weighted average restricted shares and 420,000 weighted average stock options were not considered in diluted income (loss) per share for the three months ended March 31, 2009, because to do so would have been anti-dilutive.

New accounting standards

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements*, which requires new disclosures and clarifies existing disclosure requirements related to fair value measurements. The new standard requires additional disclosures related to (i) the amounts of significant transfers between Level 1 and Level 2 fair value measurements and the reasons for the transfers, (ii) the reasons for any transfers in or out of Level 3 measurements, and (iii) the presentation of information in the rollforward of recurring Level 3 measurements about purchases, sales, issuances, and settlements on a gross basis. The new standard is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosure requirements related to the gross presentation of purchases, sales, issuances, and settlements in the Level 3 rollforward. Those disclosures are effective for fiscal years beginning after December 15, 2010. The Company adopted the applicable provisions of this new standard on January 1, 2010 and has included the required disclosures in *Note 5 Fair Value Measurements*.

Reclassifications

Certain prior year amounts have been reclassified on the condensed consolidated financial statements to conform to the 2010 presentation. On the condensed consolidated balance sheets as of December 31, 2009, the line item *Derivatives* was included in *Joint interest and other, net* and has been shown separately in this report to conform to the 2010 presentation.

Note 3. Supplemental Cash Flow Information

Net cash provided by operating activities reflects cash interest payments of \$2.3 million for the three months ended March 31, 2010 and \$4.5 million for the three months ended March 31, 2009. During the three months ended March 31, 2010, the Company received cash payments of \$1.3 million for refunds of income taxes paid. During the three months ended March 31, 2009, the Company received cash payments of \$1.9 million for refunds of income taxes paid. Non-cash investing activities include asset retirement obligations of \$0.5 million and \$0.4 million for the three months ended March 31, 2010 and 2009, respectively.

Note 4. Derivative Contracts

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

The Company is required to recognize all derivative instruments on the balance sheet as either assets or liabilities measured at fair value. The Company elected not to designate its derivatives as cash flow hedges and as a result marked its derivative instruments to fair value and recognized the realized and unrealized change in fair value on derivative instruments in the statements of operations under the caption Gain on mark-to-market derivative instruments.

We have utilized swap and collar derivative contracts to hedge against the variability in cash flows associated with the forecasted sale of our future crude oil and natural gas production. While the use of these derivative instruments limits the downside risk of adverse price movements, their use also may limit future revenues from favorable price movements.

During the three months ended March 31, 2010, we entered into several new swap and collar derivative contracts covering a portion of our crude oil and natural gas production for 2010 and 2011. The new contracts were entered into in the normal course of business and we expect to enter into additional similar contracts during the year. None of the new contracts have been designated for hedge accounting.

With respect to a fixed price swap contract, the counterparty is required to make a payment to us if the settlement price for any settlement period is less than the swap price, and we are required to make payment to the counterparty if the settlement price for any settlement period is greater than the swap price. For a basis swap contract, which guarantees a price differential between the NYMEX posted prices and those of our physical pricing points, we receive a payment from the counterparty if the settled price differential is greater than the stated terms of the contract and we pay the counterparty if the settled price differential is less than the stated terms of the contract. For a collar contract, the counterparty is required to make a payment to us if the settlement price for any settlement period is below the floor price, we are required to make payment to the counterparty if the settlement price for any settlement period is above the ceiling price and neither party is required to make a payment to the other party if the settlement price for any settlement period is equal to or greater than the floor price and equal to or less than the ceiling price.

Table of Contents

All of our derivative contracts are carried at their fair value on our consolidated balance sheets under the captions Receivables, Derivatives, Noncurrent derivatives receivable and Accrued liabilities and other. Derivative assets and liabilities with the same counterparty and subject to contractual terms which provide for net settlement are reported on a net basis on our consolidated balance sheets. Substantially all of our crude oil and natural gas derivative contracts are settled based upon reported prices on the NYMEX. The estimated fair value of these contracts is based upon various factors, including closing exchange prices on the NYMEX, over-the-counter quotations, and, in the case of collars, volatility and the time value of options. The calculation of the fair value of collars requires the use of an option-pricing model. See *Note 5. Fair Value Measurements*.

At March 31, 2010, we had outstanding contracts with respect to our future production as set forth in the tables below that include the new swap and collar contracts entered into during the first quarter of 2010.

Crude Oil

Period and Type of Contract	Volume in MBbls	Swaps Weighted Average	Collars		Weighted Average

Table of Contents*Derivative Fair Value Gain (Loss)*

The following table presents information about the components of derivative fair value gain (loss) for the following periods presented. The Company did not have any derivative contracts at March 31, 2009 or for the three months ended March 31, 2009.

<i>In thousands</i>	Three months ended March 31, 2010	
Realized gain (loss) on derivatives:		
Crude oil fixed price swaps	\$	2,531
Natural gas fixed price swaps		2,722
Natural gas basis swaps		(961)
Unrealized gain (loss) on derivatives:		
Crude oil fixed price swaps		(6,762)
Natural gas fixed price swaps		28,326
Natural gas basis swaps		488
Gain on mark-to-market derivative instruments	\$	26,344

The table below provides data about the fair value of derivatives that are not accounted for using hedge accounting. Our derivative contracts are carried at their fair value on our consolidated balance sheets under the captions Receivables, Derivatives, Noncurrent derivatives receivable and Accrued liabilities and other.

<i>In thousands</i>	March 31, 2010			December 31, 2009		
	Assets	(Liabilities)	Net	Assets	(Liabilities)	Net
	Fair Value	Fair Value	Fair Value	Fair Value	Fair Value	Fair Value
Commodity swaps and collars	\$ 20,507	\$ (544)	\$ 19,963	\$ 2,218	\$ (4,307)	\$ (2,089)

Note 5. Fair Value Measurements

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements*, which requires new disclosures and clarifies existing disclosure requirements related to fair value measurements. The Company adopted the applicable provisions of this new standard on January 1, 2010 and has included the required disclosures below, as applicable.

The Company is required to calculate fair value based on a hierarchy which prioritizes the input to valuation techniques used to measure fair value into three levels. The fair value hierarchy gives the highest priority to quoted market prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Level 2 inputs are inputs, other than quoted prices included within Level 1, which are observable for the asset or liability, either directly or indirectly. As Level 1 inputs generally provide the most reliable evidence of fair value, the Company uses Level 1 inputs when available.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Certain assets and liabilities are reported at fair value on a recurring basis. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of the fair value of our assets and liabilities and their placement within the fair value hierarchy levels. In determining the fair value of our fixed price and basis swaps, due to the unavailability of relevant comparable market data for our exact contracts, a discounted cash flow method is used. The discounted cash flow method estimates future cash flows based on quoted market prices for future commodity prices, observable inputs relating to basis differentials and a risk-adjusted discount rate. The fair value of fixed price and basis swap derivatives is calculated using mainly significant observable inputs (Level 2). The calculation of the fair value of our collar contracts requires the use of an option-pricing model with significant unobservable inputs (Level 3). The valuation models for derivative contracts are primarily industry-standard models that consider various inputs including: (a) quoted forward prices for commodities, (b) time value, (c) volatility factors, and (d) current market and contractual prices for the underlying instruments, as well as other relevant economic measures. The Company's calculation for each position is then compared to the counterparty valuation for reasonableness.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

The following table summarizes the valuation of financial instruments by pricing levels that were accounted for at fair value on a recurring basis as of March 31, 2010. There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the three months ended March 31, 2010. Further, there were no transfers in and/or out of Level 3 of the fair value hierarchy during the three months ended March 31, 2010.

Table of Contents

Description <i>In thousands</i>	Fair value measurements at March 31, 2010 using			Total
	Level 1	Level 2	Level 3	
Derivative assets (liabilities):				
Fixed price swaps	\$	\$ 29,894	\$	\$ 29,894
Basis swaps		(2,107)		(2,107)
Collars			(7,824)	(7,824)
Total	\$	\$ 27,787	\$ (7,824)	\$ 19,963

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as Level 3 in the fair value hierarchy for the indicated period:

<i>In thousands</i>	2010
Balance at December 31, 2009	\$ (3,275)
Total realized or unrealized gains (losses):	
Included in earnings	(4,549)
Included in other comprehensive income (loss)	
Purchases, sales, issuances and settlements, net	
Transfers into Level 3	
Transfers out of Level 3	

Balance at March 31, 2010 \$ (7,824)

Change in unrealized gains (losses) relating to derivatives still held at March 31, 2010 \$ (4,549)

Gains and losses (realized and unrealized) included in earnings for the three months ended March 31, 2010 attributable to the change in unrealized gains and losses relating to derivatives held at March 31, 2010 are reported in revenues.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are reported at fair value on a nonrecurring basis in the condensed consolidated financial statements. The following methods and assumptions were used to estimate the fair values.

Asset Impairments Proved crude oil and natural gas properties are reviewed for impairment when events and circumstances indicate a possible decline in the recoverability of the carrying value of such property. The estimated future cash flows expected in connection with the property are compared to the carrying amount of the property to determine if the carrying amount is recoverable. If the carrying amount of the property exceeds its estimated undiscounted future cash flows, the carrying amount of the property is reduced to its estimated fair value. Due to the unavailability of relevant comparable market data, a discounted cash flow method is used. The discounted cash flow method estimates future cash flows based on management's expectations for the future and includes estimates of future crude oil and natural gas production, commodity prices based on commodity futures price strips, operating and development costs, and a risk-adjusted discount rate. The fair value of crude oil and natural gas properties is calculated using significant unobservable inputs (Level 3). Higher amortization of lease costs in our existing fields, capital constraints, and amortization of new fields resulted in impairment of non-producing properties of \$14.2 million and \$9.4 million for the three months ended March 31, 2010 and 2009, respectively.

As a result of changes in reserves and the forward futures price strip, developed crude oil and natural gas properties were reviewed for impairment at March 31, 2010 and 2009 and the Company determined that the carrying amount of certain fields were not recoverable from future cash flows and, therefore, were impaired. The affected fields had no fair value at March 31, 2010, resulting in \$1.0 million of developed property impairments for the three months ended March 31, 2010, which are recorded under the caption Property impairments in the condensed consolidated statements of operations. The affected fields at March 31, 2009, had fair value of \$13.1 million, resulting in \$26.0 million of developed property impairments for the first quarter of 2009.

Asset Retirement Obligations The fair value of asset retirement obligations (AROs) is estimated based on discounted cash flow projections using numerous estimates, assumptions and judgments regarding such factors as the existence of a legal obligation for an ARO; estimated probabilities, amounts and timing of settlements; the credit-adjusted risk-free rate to be used; and inflation rates. The fair value of ARO additions for the three months ended March 31, 2010 was \$0.4 million, which is reflected in the caption Asset retirement obligation, net of current portion in the condensed consolidated balance sheets. The fair values of AROs are calculated using significant unobservable inputs

(Level 3).

Financial Instruments Not Recorded at Fair Value

The following table sets forth the fair value of financial instruments that are not recorded at fair value in our condensed consolidated financial statements.

Table of Contents

<i>In thousands</i>	March 31, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt				
Revolving credit facility	\$ 198,000	\$ 198,000	\$ 226,000	\$ 226,000
8 1/4 % Senior Notes due 2019	297,565	318,870	297,524	315,750
Total	\$ 495,565	\$ 516,870	\$ 523,524	\$ 541,750

The fair value of the revolving credit facility approximates its carrying value based on the borrowing rates currently available to the Company for bank loans with similar terms and maturities. The fair value of the 8 1/4% Senior Notes due 2019 is based on quoted market prices.

The carrying values of all classes of cash and cash equivalents, trade receivables, and trade payables are considered to be representative of their respective fair values due to the short term maturities of these instruments.

Note 6. Long-term Debt

Long-term debt consists of the following:

<i>In thousands</i>	March 31, 2010	December 31, 2009
Revolving credit facility	\$ 198,000	\$ 226,000
8 1/4 % Senior Notes due 2019 ⁽¹⁾	297,565	297,524
Total long-term debt	\$ 495,565	\$ 523,524

(1) This amount is net of discounts on long-term debt of (\$2.4) million and (\$2.5) million at March 31, 2010 and December 31, 2009, respectively.

Revolving credit facility The Company had \$198.0 million and \$226.0 million in long-term debt outstanding at March 31, 2010 and December 31, 2009, respectively, on its revolving credit facility due April 11, 2011. Borrowings under the facility bear interest, payable quarterly, at a rate per annum equal to the London Interbank Offered Rate (LIBOR) for one, two, three or six months, as elected by the Company, plus a margin ranging from 175 to 250 basis points, depending on the percentage of its borrowing base utilized, or the lead bank's reference rate (prime). The revolving credit facility has a maximum facility amount of \$750.0 million and a borrowing base of \$1.0 billion, subject to semi-annual re-determination. The commitment level was increased from \$672.5 million to \$750.0 million in June 2009. Under the terms of the revolving credit facility, the commitment level can be increased up to the lesser of the borrowing base or the note amount subject to bank agreement. The Company's weighted average interest rate on this debt was 2.15% at March 31, 2010.

The Company had \$551.1 million of unused commitments under the revolving credit facility at March 31, 2010 and incurs commitment fees of 0.25% to 0.375% of the daily average excess of the commitment amount over the outstanding credit balance. The revolving credit facility contains certain covenants including that the Company maintain a Current Ratio of not less than 1.0 to 1.0 (inclusive of availability under the revolving credit facility) and a Total Funded Debt to EBITDAX, as such terms are defined in the credit agreement, of no greater than 3.75 to 1.0. The Company was in compliance with these covenants at March 31, 2010.

8 1/4% Senior Subordinated Notes due 2019 On September 23, 2009, the Company issued Senior Notes due 2019 (the Notes), which carry a coupon rate of 8.25% and were sold at a discount (99.16% of par), which equates to an effective yield to maturity of approximately 8.375%. The Company received net proceeds of approximately \$289.7 million after deducting the underwriters' discounts and offering expenses. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility.

The Notes will mature on October 1, 2019, and interest is payable on the Notes on each April 1 and October 1, beginning April 1, 2010. The Company has the option to redeem all or a portion of the Notes at any time on or after October 1, 2014 at the redemption price specified in the Indenture dated September 23, 2009 (the Indenture) plus accrued and unpaid interest. The Company may also redeem the Notes, in whole or in part, at a make-whole redemption price specified in the Indenture, plus accrued and unpaid interest, at any time prior to October 1, 2014. In addition, the Company may redeem up to 35% of the Notes prior to October 1, 2012 under certain circumstances with the net cash proceeds

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

from certain equity offerings. The Indenture contains certain restrictions on our ability to incur additional debt, pay dividends on our common stock, make investments, create liens on our assets, engage in transactions with our affiliates, transfer or sell assets, consolidate or merge, or sell substantially all of our assets. These covenants are subject to a number of important exceptions and qualifications. The Company was in compliance with these covenants as of March 31, 2010. The Notes are not subject to any sinking fund requirements. Our subsidiary, which currently has no independent assets or operations, fully and unconditionally guarantees this debt.

Table of Contents**Note 7. Commitments and Contingencies**

Drilling Commitments. As of March 31, 2010, the Company had one drilling contract that expires in August 2011. This commitment is not recorded in the accompanying consolidated balance sheets. Future commitments as of March 31, 2010 are \$12.3 million.

Employee retirement plan. The Company maintains a defined contribution retirement plan for its employees and makes discretionary contributions to the plan based on a percentage of each eligible employee's compensation. During the three months ended March 31, 2010 and the year ended December 31, 2009, contributions to the plan were 5% of eligible employees' compensation, excluding bonuses. Expense for the three months ended March 31, 2010 and 2009 was \$0.3 million.

Employee health claims. The Company self insures employee health claims up to the first \$125,000 per employee. The Company self insures employee workers' compensation claims up to the first \$250,000 per employee. Any amounts paid above these are reinsured through third-party providers. The Company accrues for claims that have been incurred but not yet reported based on a review of claims filed versus expected claims based on claims history. At March 31, 2010 and December 31, 2009, the accrued liability for health and workers' compensation claims was \$1.2 million and \$1.3 million, respectively.

Litigation. The Company is involved in various legal proceedings in the normal course of business, none of which, in the opinion of management, will individually or collectively have a material adverse effect on the financial position or results of operations of the Company. As of March 31, 2010 and December 31, 2009, the Company has provided a reserve of \$2.7 million for various matters, none of which are believed to be individually significant.

Environmental Risk. Due to the nature of the crude oil and natural gas business, the Company is exposed to possible environmental risks. The Company is not aware of any material environmental issues or claims.

Note 8. Stock-Based Compensation

The Company has granted stock options and restricted stock to employees and directors pursuant to the Continental Resources, Inc. 2000 Stock Option Plan (2000 Plan) and the Continental Resources, Inc. 2005 Long-Term Incentive Plan (2005 Plan) as discussed below. The Company's associated compensation expense included in general and administrative expense was \$2.9 million for the three months ended March 31, 2010 and \$2.7 million for the three months ended March 31, 2009.

Stock Options

Effective October 1, 2000, the Company adopted the 2000 Plan and granted options to certain eligible employees. These grants consisted of either incentive stock options, nonqualified stock options or a combination of both. The granted stock options vest ratably over either a three or five-year period commencing on the first anniversary of the grant date and expire ten years from date of grant. On November 10, 2005, the 2000 Plan was terminated. As of March 31, 2010, options covering 2,005,973 shares had been exercised and 478,496 had been cancelled.

The Company's stock option activity under the 2000 Plan for the three months ended March 31, 2010 was as follows:

	Outstanding		Exercisable	
	Number	Weighted	Number	Weighted
	of options	average	of options	average
		exercise		exercise
		price		price
Outstanding December 31, 2009	312,190	\$ 1.06	312,190	\$ 1.06
Exercised	(4,500)	0.71	(4,500)	0.71
Outstanding March 31, 2010	307,690	1.06	307,690	1.06

The intrinsic value of a stock option is the amount by which the value of the underlying stock exceeds the exercise price of the option at its exercise date. The total intrinsic value of options exercised during the three months ended March 31, 2010 was approximately \$0.2 million. At March 31, 2010, all options were exercisable and had a weighted average remaining life of 1.1 years with an aggregate intrinsic value of \$12.8 million.

Restricted Stock

On October 3, 2005, the Company adopted the 2005 Plan and reserved a maximum of 5,500,000 shares of common stock that may be issued pursuant to the 2005 Plan. As of March 31, 2010, the Company had 3,291,560 shares of restricted stock available to grant to directors, officers and key employees under the 2005 Plan. Restricted stock is awarded in the name of the recipient and except for the right of disposal, constitutes issued and outstanding shares of the Company's common stock for all corporate purposes during the period of restriction including the right to receive dividends, subject to forfeiture. Restricted stock grants vest over periods ranging from one to three years.

Table of Contents

The Company began issuing shares of restricted common stock to employees and non-employee directors in October 2005. A summary of changes in the non-vested shares of restricted stock for the three months ended March 31, 2010, is presented below:

	Number of non-vested shares	Weighted average grant-date fair value
Non-vested restricted shares at December 31, 2009	1,126,821	\$ 26.55
Granted	21,723	38.21
Vested	(21,006)	25.40
Forfeited	(19,407)	28.28
Non-vested restricted shares at March 31, 2010	1,108,131	26.77

The fair value of the restricted shares that vested during the three months ended March 31, 2010 at their vesting date was \$0.9 million. As of March 31, 2010, there was \$16.9 million of unrecognized compensation expense related to non-vested restricted shares. The expense is expected to be recognized over a weighted average period of 1.4 years.

Note 9. Subsequent Event

On April 5, 2010, the Company issued \$200 million of 7 ³/₈% Senior Notes due 2020 (the 2020 Notes). The 2020 Notes, which carry a coupon rate of 7.375%, were sold at a discount (99.105% of par), which equates to an effective yield to maturity of approximately 7.5%. The Company received net proceeds of approximately \$194.2 million after deducting the initial purchasers' discounts of approximately \$1.8 million and initial purchasers' fees of approximately \$4.0 million. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility.

The 2020 Notes will mature on October 1, 2020, and interest is payable on the 2020 Notes semi-annually on April 1 and October 1 of each year, commencing on October 1, 2010. The Company has the option to redeem all or a portion of the 2020 Notes at any time on or after October 1, 2015 at the redemption prices specified in the Indenture dated April 5, 2010 (the 2010 Indenture) plus accrued and unpaid interest. The Company may also redeem the 2020 Notes, in whole or in part, at a make-whole redemption price specified in the 2010 Indenture, plus accrued and unpaid interest, at any time prior to October 1, 2015. In addition, the Company may redeem up to 35% of the 2020 Notes prior to October 1, 2013 under certain circumstances with the net cash proceeds from certain equity offerings.

The 2010 Indenture contains certain restrictions on our ability to incur additional debt, pay dividends on our common stock, make certain investments, create certain liens on our assets, engage in certain transactions with our affiliates, transfer or sell certain assets, consolidate or merge, or sell substantially all of our assets. These covenants are subject to a number of important exceptions and qualifications. The 2020 Notes are not subject to any sinking fund requirements. Our sole subsidiary, which currently has no independent assets or operations, fully and unconditionally guarantees this debt.

Cautionary Statement Regarding Forward-Looking Statements

Certain statements and information in this report may constitute forward-looking statements within the meaning of the Private Securities Litigation Act of 1995. All statements, other than statements of historical fact included in this report, regarding our strategy, future operations, financial position, estimated revenues and losses, projected costs, prospects, plans and objectives of management are forward-looking statements. When used in this report, the words could, believe, anticipate, intend, estimate, expect, project and similar expressions are to identify forward-looking statements, although not all forward-looking statements contain such identifying words. These forward-looking statements are based on our current expectations and assumptions about future events and are based on currently available information as to the outcome and timing of future events. When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements described under the heading Risk Factors included in our Annual Report on Form 10-K for the year ended December 31, 2009.

These forward-looking statements are based on management's current belief, based on currently available information, as to the outcome and timing of future events. Without limiting the generality of the foregoing, certain statements incorporated by reference or included in this report constitute forward-looking statements.

Forward-looking statements may include statements about our:

business strategy;

reserves;

technology;

financial strategy;

crude oil and natural gas prices;

timing and amount of future production of crude oil and natural gas;

the amount, nature and timing of capital expenditures;

drilling of wells;

competition and government regulations;

marketing of crude oil and natural gas;

exploitation or property acquisitions;

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

costs of exploiting and developing our properties and conducting other operations;

general economic conditions;

credit markets;

liquidity and access to capital;

uncertainty regarding our future operating results; and

plans, objectives, expectations and intentions contained in this report that are not historical.

We caution you that these forward-looking statements are subject to all of the risks and uncertainties, most of which are difficult to predict and many of which are beyond our control, incident to the exploration for and development, production, and sale of crude oil and natural gas. These risks include, but are not limited to, commodity price volatility, inflation, lack of availability of drilling and production equipment and services, environmental risks, drilling and other operating risks, regulatory changes, the uncertainty inherent in estimating crude oil and natural gas reserves and in projecting future rates of production, cash flows and access to capital, the timing of development expenditures, and the other risks described under "Risk Factors" in this report, our Annual Report on Form 10-K for the year ended December 31, 2009, registration statements filed from time to time with the SEC, and other announcements we make from time to time.

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. Should one or more of the risks or uncertainties described in this report occur, or should underlying assumptions prove incorrect, our actual results and plans could differ materially from those expressed in any forward-looking statements. All forward-looking statements are expressly qualified in their entirety by this cautionary statement. This cautionary statement should also be considered in connection with any subsequent written or oral forward-looking statements that we or persons acting on our behalf may issue.

Except as otherwise required by applicable law, we disclaim any duty to update any forward-looking statements, all of which are expressly qualified by the statements in this section, to reflect events or circumstances after the date of this report.

Table of Contents**ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis should be read in conjunction with our historical consolidated financial statements and the notes included in our Annual Report on Form 10-K for the year ended December 31, 2009. Our operating results for the periods discussed may not be indicative of future performance. Statements concerning future results are forward-looking statements.

Overview

We are engaged in crude oil and natural gas exploration, exploitation and production activities in the North, South and East regions of the United States. We focus our exploration activities in large new or developing plays that provide us the opportunity to acquire undeveloped acreage positions for future drilling operations. We have been successful in targeting large repeatable resource plays where horizontal drilling, advanced fracture stimulation and enhanced recovery technologies provide the means to economically develop and produce crude oil and natural gas reserves from unconventional formations. We derive the majority of our operating income and cash flows from the sale of crude oil and natural gas. We expect that growth in our operating income and revenues will primarily depend on product prices and our ability to increase our crude oil and natural gas production. In recent months and years, there has been significant volatility in crude oil and natural gas prices due to a variety of factors we cannot control or predict, including political and economic events, weather conditions, and competition from other energy sources. These factors impact supply and demand for crude oil and natural gas, which affects crude oil and natural gas prices. In addition, the prices we realize for our crude oil and natural gas production are affected by location differences in market prices.

For the first three months of 2010, our crude oil and natural gas production increased to 3,459 MBoe (38,428 Boe per day), up 146 MBoe, or 4% from the first three months of 2009. The increase in 2010 production was primarily driven by an increase in production from our Bakken field. Our crude oil and natural gas revenues for the first three months of 2010 increased 134% to \$217.1 million due to a 108% increase in commodity prices compared to the same period in 2009. Our realized price per Boe increased \$32.17 to \$62.07 for the three months ended March 31, 2010 compared to the three months ended March 31, 2009. We experienced increases in production expense and production tax and other expenses of a combined total of \$9.4 million, or 32%, due to an increase in production taxes as a result of increased commodity prices and an increase in workover expense. At various times, we have stored crude oil due to pipeline line fill requirements or because of low prices or we have sold crude oil from inventory. These actions result in differences between our produced and sold crude oil volumes. For the three months ended March 31, 2010, crude oil sales volumes were 40 MBbls more than crude oil production, and crude oil sales volumes were 216 MBbls less than crude oil production for the same period in 2009. Our cash flows from operating activities for the three months ended March 31, 2010, were \$190.7 million, an increase of \$150.6 million from \$40.1 million provided by our operating activities during the comparable 2009 period. The increase in operating cash flows was primarily due to the increases in commodity prices. During the three months ended March 31, 2010, we invested \$187.1 million (excluding increased accruals of \$23.2 million and including \$1.0 million seismic costs) in our capital program concentrating mainly in the North Dakota Bakken field, the Arkoma and Anadarko Woodford plays, and the Red River units.

Our 2010 capital expenditures budget of \$850.0 million will primarily focus on increased development in the North Dakota Bakken, the Arkoma and Anadarko Woodford shale natural gas plays in Oklahoma and the Red River units, with total operated drilling rigs increasing to as many as 23 by mid-year 2010. We expect our cash flows from operations and the availability under our revolving credit facility will be sufficient to meet our capital expenditure needs. Continued strength in commodity prices may result in an increase in our actual capital expenditures during 2010; conversely, a significant decline in product prices could result in a decrease in our capital expenditures.

How We Evaluate Our Operations

We use a variety of financial and operational measures to assess our performance. Among these measures are:

volumes of crude oil and natural gas produced,

crude oil and natural gas prices realized,

per unit operating and administrative costs, and

EBITDAX.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

The following table contains financial and operational highlights for the periods presented.

Table of Contents

	Three Months ended March 31,	
	2010	2009
Average daily production:		
Crude oil (Bopd)	29,121	26,578
Natural gas (Mcf)	55,839	61,382
Crude oil equivalents (Boepd)	38,428	36,808
Average prices: ⁽¹⁾		
Crude oil (\$/Bbl)	\$ 71.41	\$ 34.99
Natural gas (\$/Mcf)	5.40	2.98
Crude oil equivalents (\$/Boe)	62.07	29.90
Production expense (\$/Boe) ⁽¹⁾	6.46	7.24
General and administrative expense (\$/Boe) ⁽¹⁾	3.39	3.32
EBITDAX (in thousands) ⁽²⁾	177,959	57,673
Net income (loss) (in thousands)	72,465	(26,613)
Diluted net income (loss) per share	0.43	(0.16)

- (1) At various times, we have stored crude oil due to pipeline line fill requirements or because of low prices or we have sold crude oil from inventory. These actions result in differences between our produced and sold crude oil volumes. Crude oil sales volumes were 40 MBbls more than crude oil production for the three months ended March 31, 2010 and 216 MBbls less than crude oil production for the three months ended March 31, 2009. Average prices and per unit expenses have been calculated using sales volumes and excluding any effect of derivative transactions.
- (2) EBITDAX represents earnings before interest expense, income taxes, depreciation, depletion, amortization and accretion, property impairments, exploration expense, unrealized derivative gains and losses and non-cash compensation expense. EBITDAX is not a measure of net income or cash flows as determined by U.S. GAAP. A reconciliation of net income to EBITDAX is provided subsequently under the header *Non-GAAP Financial Measures*.

Three months ended March 31, 2010 compared to the three months ended March 31, 2009**Results of Operations**

The following table presents selected financial and operating information for each of the periods presented.

	March 31,	
	2010	2009
<i>In thousands, except volume price data</i>		
Crude oil and natural gas sales	\$ 217,124	\$ 92,568
Gain on mark-to-market derivative instruments	26,344	
Total revenues	248,268	96,608
Operating costs and expenses	123,739	135,040
Other expense	7,654	4,440
Income (loss) before income taxes	116,875	(42,872)
Provision (benefit) for income taxes	44,410	(16,259)
Net income (loss)	\$ 72,465	\$ (26,613)
Production Volumes:		
Crude oil (MBbl)	2,621	2,392
Natural gas (MMcf)	5,026	5,524
Crude oil equivalents (MBoe)	3,459	3,313
Sales Volumes:		
Crude oil (MBbl)	2,661	2,176
Natural gas (MMcf)	5,026	5,524

Natural gas (\$/Mcf)	5.40	2.98
Crude oil equivalents (\$/Boe)	62.07	29.90

(1) Average prices have been calculated using sales volumes and excluding any effect of derivative transactions.

Table of Contents**Production**

The following tables reflect our production by product and region for the periods presented.

	Three Months Ended March 31,				Volume increase (decrease)	Percent increase (decrease)
	2010		2009			
	Volume	Percent	Volume	Percent		
Crude oil (MBbl)	2,621	76%	2,392	72%	229	10%
Natural Gas (MMcf)	5,026	24%	5,524	28%	(498)	(9)%
Total (MBoe)	3,459	100%	3,313	100%	146	4%

	Three Months Ended March 31,				Volume increase (decrease)	Percent increase (decrease)
	2010		2009			
	MBoe	Percent	MBoe	Percent		
North Region	2,707	78%	2,441	74%	266	11%
South Region	628	18%	752	23%	(124)	(16)%
East Region	124	4%	120	3%	4	3%
Total (MBoe)	3,459	100%	3,313	100%	146	4%

Crude oil production volumes increased 10% during the three months ended March 31, 2010 compared to the three months ended March 31, 2009. Production increases in the North Dakota Bakken field and the Oklahoma Woodford contributed incremental volumes in 2010 of 360 MBbls in excess of production for the first quarter of 2009. Favorable results from drilling have been the primary contributors to production growth in these areas. This increase was partially offset by decreases in other areas. Natural gas volumes decreased 498 MMcf, or 9%, during the three months ended March 31, 2010 compared to the same period in 2009. Natural gas production in the Bakken field in the North region was up 460 MMcf for the three months ended March 31, 2010 compared to the same period in 2009 due to additional natural gas being connected and sold in North Dakota. These additional sales in North Dakota were offset by a decrease in natural gas volumes of 326 MMcf in the Red River units due to the Badlands plant being down for repairs. The South region natural gas volumes decreased mostly due to natural declines in the Arkoma Woodford play.

Revenues

Crude Oil and Natural Gas Sales. Crude oil and natural gas sales for the three months ended March 31, 2010 were \$217.1 million, a 134% increase from sales of \$92.6 million for the same period in 2009. Our sales volumes increased 403 MBoe, or 13%, over the same period in 2009 due to the continuing success of our enhanced crude oil recovery and drilling programs. Our realized price per Boe increased \$32.17 to \$62.07 for the three months ended March 31, 2010 from \$29.90 for the three months ended March 31, 2009. The differential between NYMEX calendar month average crude oil prices and our realized crude oil price per barrel for the three months ended March 31, 2010 was \$7.42 compared to \$8.32 for the three months ended March 31, 2009, \$9.30 for the fourth quarter 2009, and \$8.29 for the year ended December 31, 2009. Factors contributing to the changing differentials included Canadian crude oil imports and increases in production in the North region, coupled with downstream transportation capacity and seasonal demand fluctuations for gasoline.

Derivatives. The Company is required to recognize all derivative instruments on the balance sheet as either assets or liabilities measured at fair value. We elected not to designate our derivatives as cash flow hedges. As a result, we marked our derivative instruments to fair value and recognized the realized and unrealized change in fair value on derivative instruments in the statements of operations under the caption Gain on mark-to-market derivative instruments.

During the three months ended March 31, 2010, we realized gains on natural gas derivatives of \$1.8 million and realized gains on crude oil derivatives of \$2.5 million. We reported an unrealized non-cash mark-to-market gain on natural gas derivatives of \$28.8 million and an unrealized non-cash mark-to-market loss on crude oil derivatives of \$6.8 million.

Crude Oil and Natural Gas Service Operations. Our crude oil and natural gas service operations consist primarily of the treatment and sale of lower quality crude oil, or reclaimed crude oil. Prices for reclaimed crude oil sold from our central treating units were higher for the three months ended March 31, 2010 than the comparable 2009 period. The price increased \$36.03 per barrel which increased reclaimed crude oil

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

income by \$1.8 million contributing to an overall increase in crude oil and natural gas service operations revenue of \$0.8 million for the three months ended March 31, 2010. Associated crude oil and natural gas service operations expenses increased \$1.6 million to \$4.0 million during the three months ended March 31, 2010 from \$2.4 million during the three months ended March 31, 2009 due mainly to an increase in the costs of purchasing and treating crude oil for resale compared to the same period in 2009. We sold high-pressure air from our Red River units to a third party and recorded revenues of \$0.7 million for the three months ended March 31, 2009. Beginning January 2010, we no longer sell high-pressure air to a third party.

Operating Costs and Expenses

Production Expense and Production Tax and Other Expenses. Production expense increased 1% to \$22.6 million during the three months ended March 31, 2010 from \$22.4 million during the three months ended March 31, 2009. Production expense per Boe decreased to \$6.46 for the three months ended March 31, 2010 from \$7.24 per Boe for the three months ended March 31, 2009 due to an increase in sales volumes as a result of drilling in the Bakken field.

Table of Contents

Production tax and other expenses increased \$9.2 million, or 135%, during the three months ended March 31, 2010 compared to the three months ended March 31, 2009 as a result of higher revenues resulting from increased sales prices and the expiration of various tax incentives. Production tax and other expenses on the unaudited condensed consolidated statements of operations includes other charges for marketing, gathering, dehydration and compression fees primarily related to natural gas sales in the Arkoma area of \$1.1 million and \$1.3 million for the three months ended March 31, 2010 and 2009, respectively. Production tax, excluding other charges, as a percentage of crude oil and natural gas sales was 7.0% for the three months ended March 31, 2010 compared to 6.1% for the three months ended March 31, 2009. Production taxes are based on the wellhead values of production and vary by state. Additionally, some states offer exemptions or reduced production tax rates for wells that produce less than a certain quantity of crude oil or natural gas and to encourage certain activities, such as horizontal drilling and enhanced recovery projects. In Montana, North Dakota and Oklahoma, new horizontal wells qualify for a tax incentive and are taxed at a lower rate during their initial months of production. After the incentive period expires, the tax rate increases to the statutory rates. Our overall production tax rate is expected to increase as incentives we currently receive for horizontal wells reach the end of their incentive period.

On a unit of sales basis, production expense and production tax and other expenses were as follows:

<i>\$/Boe</i>	Three Months Ended March 31,		Increase (Decrease)
	2010	2009	
Production expense	\$ 6.46	\$ 7.24	(11)%
Production tax and other expenses	4.58	2.20	108%
Production expense, production tax and other expenses	\$ 11.04	\$ 9.44	17%

Exploration Expense. Exploration expense consists primarily of dry hole costs and exploratory geological and geophysical costs that are expensed as incurred. Exploration expense decreased \$5.3 million in the three months ended March 31, 2010 to \$1.8 million due primarily to a decrease in dry hole expense of \$4.7 million and geological research expense of \$0.6 million.

Depreciation, Depletion, Amortization and Accretion (DD&A). Total DD&A increased \$1.9 million, or 4% in the first quarter of 2010 compared to the first quarter of 2009, primarily due to the increase in production. The following table shows the components of our DD&A rate per Boe.

<i>\$/Boe</i>	Three Months Ended March 31,	
	2010	2009
Crude oil and natural gas	\$ 14.62	\$ 15.95
Other equipment	0.23	0.25
Asset retirement obligation accretion	0.18	0.18

Depreciation, depletion, amortization and accretion \$ 15.03 \$ 16.38

Property Impairments. Property impairments, non-producing and developed, decreased in the three months ended March 31, 2010 by \$20.2 million to \$15.2 million compared to \$35.4 million during the three months ended March 31, 2009. Impairment of non-producing properties increased \$4.8 million during the three months ended March 31, 2010 to \$14.2 million compared to \$9.4 million for the three months ended March 31, 2009 reflecting higher amortization of lease costs in our existing fields resulting from further defining likely drilling locations, capital constraints, and amortization of new fields. Non-producing properties consist of undeveloped leasehold costs and costs associated with the purchase of certain proved undeveloped reserves. Non-producing properties are amortized on a composite method based on our estimated experience of successful drilling and the average holding period.

Impairment provisions for developed crude oil and natural gas properties were approximately \$1.0 million for the three months ended March 31, 2010 compared to approximately \$26.0 million for the three months ended March 31, 2009, a decrease of \$25.0 million, or 96%. We evaluate our developed crude oil and natural gas properties for impairment by comparing their cost basis to the estimated future cash flows on a field basis. If the cost basis is in excess of estimated future cash flows, then we impair it based on an estimate of fair market value based on discounted cash flows. Impairments in 2010 reflect uneconomic operating results in a non-Bakken Montana field in the North region, which resulted in impairments of \$1.0 million for the three months ended March 31, 2010. Impairments in 2009 reflect uneconomic drilling results in two single well fields completed in the first quarter of 2009 in our South region which resulted in impairments of \$14.1 million. The remaining impairments were the result of decreases in reserves and prices.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

General and Administrative Expense. General and administrative expense increased \$1.5 million to \$11.8 million during the three months ended March 31, 2010 from \$10.3 million during the comparable period in 2009. The majority of the increase was in personnel and office expenses. General and administrative expense includes non-cash charges for stock-based compensation of \$2.9 million and \$2.7 million for the three months ended March 31, 2010 and 2009, respectively. General and administrative expense excluding stock-based compensation increased \$1.3 million for the three months ended March 31, 2010 compared to the same period in 2009. On a volumetric basis, general and administrative expense increased \$0.07 to \$3.39 per Boe for the three months ended March 31, 2010 compared to \$3.32 per Boe for the three months ended March 31, 2009.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

Interest Expense. Interest expense increased 82%, or \$3.8 million, for the three months ended March 31, 2010 compared to the three months ended March 31, 2009, due to increased interest rates and debt balances in 2010. On September 23, 2009, we issued \$300.0 million of 8 1/4% Senior Notes due 2019 (the Notes). The Notes, which carry a coupon rate of 8.25%, were sold at a discount (99.16% of par), which equates to an effective yield to maturity of approximately 8.375%. We recorded \$6.1 million in interest on the Notes for the three months ended March 31, 2010. Including the effect of the Notes, our weighted average interest rate for the three months ended March 31, 2010 was 6.05% while at March 31, 2009 our weighted average rate was 5.90%.

Table of Contents

Our average revolving credit facility balance decreased to \$211.7 million for the three months ended March 31, 2010 compared to \$473.5 million for the three months ended March 31, 2009, and the weighted average interest rate on our revolving credit facility was lower at 2.75% for the three months ended March 31, 2010 compared to 3.52% for the same period in 2009. At March 31, 2010 our outstanding revolving credit facility balance was \$198.0 million with a weighted average interest rate of 2.15%.

Income Taxes. We recorded income tax expense for the three months ended March 31, 2010 of \$44.4 million compared to an income tax benefit of \$16.3 million for the three months ended March 31, 2009. We provide taxes at a combined federal and state tax rate of approximately 38% after taking into account permanent taxable differences.

Liquidity and Capital Resources

Our primary sources of liquidity have been cash flows generated from operating activities, financing provided by our revolving credit facility, and the issuance of the Notes in September 2009. During the second quarter of 2009, we began to see increases in crude oil prices to levels double the first quarter 2009 lows; however, natural gas prices remained depressed. Crude oil prices have continued to increase in 2010, while natural gas prices lag behind. Since crude oil accounts for more than 70% of our production, the price increase resulted in improved cash flows from operations and better liquidity.

Our current revolving credit facility is backed by a syndicate of 15 banks. The banks reaffirmed our borrowing base of \$1.0 billion in December 2009 and our commitment level is \$750.0 million. We believe that our current syndicate of banks has the capability to fund up to our commitment. If one or more banks should not be able to fund up to our commitment, we may not have the full availability of the \$750.0 million commitment. On September 23, 2009, we issued \$300.0 million of the Notes and received net proceeds of approximately \$289.7 million after deducting underwriters' discounts and other expenses and after giving effect to the discount at which the Notes were issued. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility. As of March 31, 2010, we had \$551.1 million available under our revolving credit facility. On April 5, 2010, we issued \$200.0 million of 7 ³/₈ % Senior Notes due 2020 and received net proceeds of approximately \$194.2 million after deducting the initial purchasers' discounts and fees. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility. As of April 30, 2010, we had \$709.5 million available under our revolving credit facility. We currently only have one rig committed through August 2011. Our current plan is to expand capital expenditures without long-term rig commitments. This will allow us to adapt rapidly to commodity price changes or other external factors.

We believe that funds from operating cash flows and our revolving credit facility should be sufficient to meet our cash requirements inclusive of, but not limited to, normal operating needs, debt service obligations, planned capital expenditures, and commitments and contingencies for the next 12 months.

We currently anticipate that we will be able to generate or obtain funds sufficient to meet our long-term cash requirements. We intend to finance our future capital expenditures primarily through cash flows from operations and through borrowings under our revolving credit facility; however, our financing needs may require us to alter or increase our capitalization substantially through the issuance of debt or equity securities or the sale of assets. Furthermore, the issuance of additional debt may require that a portion of our cash flows from operations be used for the payment of interest and principal on our debt, thereby reducing our ability to use cash flows to fund working capital, capital expenditures and acquisitions. The issuance of additional equity securities could have a dilutive effect on the value of our common stock.

In the future, we may not be able to access adequate funding under our revolving credit facility as a result of (i) a decrease in our borrowing base due to the outcome of a subsequent borrowing base redetermination, or (ii) an unwillingness or inability on the part of our lending counterparties to meet their funding obligations. Declines in commodity prices could result in a determination to lower the borrowing base in the future and, in such case, we could be required to repay any indebtedness in excess of the borrowing base.

If we are unable to access funding when needed on acceptable terms, we may not be able to fully implement our business plans, complete new property acquisitions to replace our reserves, take advantage of business opportunities, respond to competitive pressures, or refinance our debt obligations as they come due, any of which could have a material adverse effect on our operations and financial results.

Cash Flows from Operating Activities

Our net cash provided by operating activities was \$190.7 million and \$40.1 million for the three months ended March 31, 2010 and 2009, respectively. The increase in operating cash flows was mainly due to increases in revenue as a result of higher commodity prices as explained above.

Cash Flows from Investing Activities

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

During the three months ended March 31, 2010 and 2009 we had cash flows used in investing activities (excluding asset sales) of \$163.0 million and \$207.1 million, respectively, related to our capital program, inclusive of dry hole costs. The decrease in our cash flows used in investing activities was primarily due to cash flows used in investing activities in the first quarter of 2009 included amounts paid related to expenditures that were incurred prior to January 1, 2009.

Cash Flows from Financing Activities

Net cash used in financing activities of \$28.3 million for the three months ended March 31, 2010 was mainly the result of amounts repaid under our revolving credit facility. Net cash provided by financing activities of \$166.3 million for the three months ended March 31,

Table of Contents

2009 was mainly the result of amounts borrowed under our revolving credit facility to fund capital expenditures. On April 5, 2010, we issued \$200.0 million of 7 ³/₈% Senior Notes due 2020 and received net proceeds of approximately \$194.2 million, which were used to repay a portion of the borrowings outstanding under our revolving credit facility as discussed further below.

Revolving Credit Facility

We had \$198.0 million and \$226.0 million outstanding under our revolving credit facility at March 31, 2010 and December 31, 2009, respectively. We used the net proceeds of \$194.2 million from our April 5, 2010 issuance of 7 ³/₈% Senior Notes to repay a portion of our outstanding revolving credit facility borrowings. As of April 30, 2010, we had \$39.0 million of outstanding borrowings under our revolving credit facility. The revolving credit facility currently has a borrowing base of \$1.0 billion, which is subject to semi-annual redetermination. We expect the next redetermination to occur in the second quarter of 2010. The terms of the revolving credit facility provide for the commitment level to be increased up to the lesser of the borrowing base or note amount subject to bank agreement. The commitment level was increased in June 2009 to \$750.0 million from \$672.5 million, which equals the maximum note amount. We anticipate that we will negotiate a new revolving credit facility during the second quarter of 2010 as our current revolving credit facility matures in April 2011.

8 ¹/₄% Senior Subordinated Notes due 2019

On September 23, 2009, the Company issued \$300 million of the Notes. The Notes, which carry a coupon rate of 8.25%, were sold at a discount (99.16% of par), which equates to an effective yield to maturity of approximately 8.375%. The Company received net proceeds of approximately \$289.7 million after deducting the underwriters' discounts and offering expenses. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility.

The Notes will mature on October 1, 2019, and interest is payable on the Notes on each April 1 and October 1, commencing April 1, 2010. The Company has the option to redeem all or a portion of the Notes at any time on or after October 1, 2014 at the redemption price specified in the Indenture dated September 23, 2009 (the "Indenture") plus accrued and unpaid interest. The Company may also redeem the Notes, in whole or in part, at a "make-whole" redemption price specified in the Indenture, plus accrued and unpaid interest, at any time prior to October 1, 2014. In addition, the Company may redeem up to 35% of the Notes prior to October 1, 2012 under certain circumstances with the net cash proceeds from certain equity offerings. The Indenture contains certain restrictions on our ability to incur additional debt, pay dividends on our common stock, make investments, create liens on our assets, engage in transactions with our affiliates, transfer or sell assets, consolidate or merge, or sell substantially all of our assets. These covenants are subject to a number of important exceptions and qualifications. The Company was in compliance with these covenants as of March 31, 2010. The Notes are not subject to any sinking fund requirements. Our subsidiary, which currently has no independent assets or operations, fully and unconditionally guarantees this debt.

7 ³/₈% Senior Subordinated Notes due 2020

On April 5, 2010, the Company issued \$200 million of 7 ³/₈% Senior Notes due 2020 (the "2020 Notes"). The 2020 Notes, which carry a coupon rate of 7.375%, were sold at a discount (99.105% of par), which equates to an effective yield to maturity of approximately 7.5%. The Company received net proceeds of approximately \$194.2 million, after deducting the initial purchasers' discounts and fees. The net proceeds were used to repay a portion of the borrowings outstanding under our revolving credit facility.

The 2020 Notes will mature on October 1, 2020, and interest is payable on the 2020 Notes semi-annually on April 1 and October 1 of each year, commencing on October 1, 2010. The Company has the option to redeem all or a portion of the 2020 Notes at any time on or after October 1, 2015 at the redemption prices specified in the Indenture dated April 5, 2010 (the "2010 Indenture") plus accrued and unpaid interest. The Company may also redeem the 2020 Notes, in whole or in part, at a "make-whole" redemption price specified in the 2010 Indenture, plus accrued and unpaid interest, at any time prior to October 1, 2015. In addition, the Company may redeem up to 35% of the 2020 Notes prior to October 1, 2013 under certain circumstances with the net cash proceeds from certain equity offerings.

The 2010 Indenture contains certain restrictions on our ability to incur additional debt, pay dividends on our common stock, make certain investments, create certain liens on our assets, engage in certain transactions with our affiliates, transfer or sell certain assets, consolidate or merge, or sell substantially all of our assets. These covenants are subject to a number of important exceptions and qualifications. The 2020 Notes are not subject to any sinking fund requirements. Our sole subsidiary, which currently has no independent assets or operations, fully and unconditionally guarantees this debt.

Capital Expenditures and Commitments

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

We evaluate opportunities to purchase or sell crude oil and natural gas properties in the marketplace and could participate as a buyer or seller of properties at various times. We seek acquisitions that utilize our technical expertise or offer opportunities to expand our existing core areas. Acquisition expenditures are not budgeted.

Table of Contents

During the first three months of 2010, we participated in the completion of 52 gross (21.7 net) wells and invested a total of \$187.1 million (excluding increases in accruals of \$23.2 million and including seismic) for capital expenditures.

<i>in millions</i>	Amount
Exploration and development drilling	\$ 108.8
Dry holes	
Acquisition of producing properties	0.1
Capital facilities, workovers and re-completions	7.1
Land costs	63.8
Seismic	1.0
Vehicles, computers and other equipment	6.3
Total	\$ 187.1

We plan to increase the number of operated drilling rigs deployed by mid-2010 to 23. The 2010 capital expenditures budget of \$850 million will primarily focus on increased development in the North Dakota Bakken, the Arkoma and Anadarko Woodford shale natural gas plays in Oklahoma and the Red River Units.

Although we cannot provide any assurance, assuming successful implementation of our strategy, including the future development of our proved reserves and realization of our cash flows as anticipated, we believe that our remaining cash balance, cash flows from operations and borrowings available under our revolving credit facility will be sufficient to fund our current 2010 capital budget. The actual amount and timing of our capital expenditures may differ materially from our estimates as a result of, among other things, available cash flows, actual drilling results, the availability of drilling rigs and other services and equipment, and regulatory, technological and competitive developments.

Recent Accounting Pronouncements Not Yet Adopted

For a description of the accounting standards that we adopted during the three months ended March 31, 2010, please see *Note 2 Basis of Presentation and Significant Accounting Policies - New Accounting Standards*.

In January 2009, the SEC issued Release No. 33-9002, *Interactive Data to Improve Financial Reporting*. This final rule requires registrants to provide their financial statements and financial statement schedules to the SEC and on their corporate websites in interactive data format using the eXtensible Business Reporting Language (XBRL). The rule was adopted by the SEC to improve the ability of financial statement users to access and analyze financial data. The SEC adopted a phase-in schedule indicating when registrants must furnish interactive data. Under this schedule, we will be required to submit filings with financial statement information using XBRL commencing with our June 30, 2010 quarterly report on Form 10-Q. We are currently evaluating the impact of XBRL reporting on our financial reporting process.

Critical Accounting Policies

There has been no change in our critical accounting policies from those disclosed in our Form 10-K for the year ended December 31, 2009.

Non-GAAP Financial Measures

EBITDAX represents earnings before interest expense, income taxes, depreciation, depletion, amortization and accretion, property impairments, exploration expense, unrealized derivative gains and losses, and non-cash equity compensation expense. EBITDAX is not a measure of net income or cash flows as determined by U.S. GAAP. Management believes EBITDAX is useful because it allows them to more effectively evaluate our operating performance and compare the results of its operations from period to period without regard to its financing methods or capital structure. We exclude the items listed above from net income in arriving at EBITDAX because these amounts can vary substantially from company to company within its industry depending upon accounting methods and book values of assets, capital structures and the method by which the assets were acquired. EBITDAX should not be considered as an alternative to, or more meaningful than, net income or cash flows as determined in accordance with GAAP or as an indicator of a company's operating performance or liquidity. Certain items excluded from EBITDAX are significant components in understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure, as well as the historic costs of depreciable assets, none of which are components of EBITDAX. Our computations of EBITDAX may not be comparable to other similarly titled measures of other companies. We believe that EBITDAX is a widely followed measure of operating performance and may also be used by investors to measure our ability to meet future debt service requirements, if any. Our revolving credit facility requires that we maintain a total debt to EBITDAX ratio of no greater than 3.75 to 1 on a rolling four-quarter basis. We were in

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

compliance with this covenant at March 31, 2010. A violation of this covenant in the future could result in a default under our revolving credit facility. In the event of such default, the lenders under our revolving credit facility could elect to terminate their commitments thereunder, cease making further loans, and could declare all outstanding amounts, together with accrued interest, to be due and payable. If the indebtedness under our revolving credit facility were to

Table of Contents

be accelerated, our assets may not be sufficient to repay in full such indebtedness. Our revolving credit facility defines EBITDAX consistently with the definition of EBITDAX utilized and presented by us. The following table is a reconciliation of our net income to EBITDAX.

<i>in thousands</i>	Three months ended March 31,	
	2010	2009
Net income (loss)	\$ 72,465	\$ (26,613)
Interest expense	8,360	4,587
Provision (benefit) for income taxes	44,410	(16,259)
Depreciation, depletion, amortization and accretion	52,587	50,697
Property impairments	15,175	35,425
Exploration expense	1,786	7,119
Unrealized derivative gain	(19,676)	
Equity compensation	2,852	2,717
EBITDAX	\$ 177,959	\$ 57,673

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk*General*

We are exposed to a variety of market risks including credit risk, commodity price risk and interest rate risk. We address these risks through a program of risk management which may include the use of derivative instruments.

Commodity Price Risk. Our primary market risk exposure is in the pricing applicable to our crude oil and natural gas production. Realized pricing is primarily driven by the prevailing worldwide price for crude oil and spot market prices applicable to our U.S. natural gas production. Pricing for natural gas and crude oil production has been volatile and unpredictable for several years, and we expect this volatility to continue in the future. The prices we receive for production depend on many factors outside of our control including volatility in the differences between product prices at sales points and the applicable index price. Based on our average daily production for the three months ended March 31, 2010, our annual revenue would increase or decrease by approximately \$106.3 million for each \$10.00 per barrel change in crude oil prices and \$20.4 million for each \$1.00 per MMBtu change in natural gas prices.

To partially reduce price risk caused by these market fluctuations, we periodically hedge crude oil and natural gas prices through the utilization of derivatives, including zero-cost collars and fixed price contracts.

During the three months ended March 31, 2010, we entered into several new swap and collar derivative contracts covering a portion of our crude oil and natural gas production for 2010 and 2011. The new contracts were entered into in the normal course of business and we expect to enter into additional similar contracts during the year. None of the new contracts have been designated for hedge accounting. See *Part I, Item 1. Financial Statements, Note 4 - Derivative Contracts* for additional information regarding our swap and collar derivative contracts.

Credit Risk. We monitor our risk of loss due to non-performance by counterparties of their contractual obligations. Our principal exposure to credit risk is through the sale of our crude oil and natural gas production, which we market to energy marketing companies, refineries and affiliates (\$154.7 million in receivables at March 31, 2010) and joint interest receivables (\$89.8 million at March 31, 2010). We monitor our exposure to counterparties on crude oil and natural gas sales primarily by reviewing credit ratings, financial statements and payment history. We extend credit terms based on our evaluation of each counterparties' credit worthiness. We have not generally required our counterparties to provide collateral to support crude oil and natural gas sales receivables owed to us.

Joint interest receivables arise from billing entities who own partial interest in the wells we operate. These entities participate in our wells primarily based on their ownership in leases on which we wish to drill. We can do very little to choose who participates in our wells. In order to minimize our exposure to credit risk we request prepayment of drilling costs where it is allowed by contract or state law. For such prepayments, a liability is recorded and subsequently reduced as the associated work is performed. In this manner, we reduce credit risk. We also have the right to place a lien on our co-owners interest in the well to redirect production proceeds in order to secure payment or, if necessary, foreclose on the interest. Historically, our credit losses on joint interest receivables have been immaterial.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

Interest Rate Risk. Our exposure to changes in interest rates relates primarily to long-term debt obligations. We manage our interest rate exposure by limiting our variable-rate debt to a certain percentage of total capitalization and by monitoring the effects of market changes in interest rates. We may utilize interest rate derivatives to alter interest rate exposure in an attempt to reduce interest rate expense related to existing debt issues. Interest rate derivatives are used solely to modify interest rate exposure and not to modify the overall leverage of the debt portfolio. We are exposed to changes in interest rates as a result of our credit facility. We had revolving credit facility debt of \$39.0 million outstanding under our revolving credit facility at April 30, 2010. The impact of a 1% increase in interest rates on this amount of debt would increase interest expense by approximately \$0.4 million per year. Our revolving credit facility debt matures in April 2011 and the weighted-average interest rate at April 30, 2010 was 2.17%.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on management's evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (which are defined in rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended, (the Exchange Act)) were effective as of March 31, 2010. Disclosure controls and procedures include, without limitation, controls and procedures designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, to allow timely decisions regarding required disclosures and is recorded, processed, summarized and reported within the time period in the rules and forms of the SEC.

Changes in Internal Control over Financial Reporting

During the quarter ended March 31, 2010, there were no changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that had materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Controls and Procedures

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Accordingly, even an effective system of internal control will provide only reasonable assurance that the objectives of the internal control system are met.

Table of Contents**PART II. Other Information****ITEM 1. Legal Proceedings**

From time to time, we are a party to litigation or other legal proceedings that we consider to be a part of the ordinary course of our business. We are currently involved in various legal proceedings which we do not expect to have, individually or in the aggregate, a material adverse effect on our financial condition or results of operations. See *Note 7. Commitments and Contingencies* in *Notes to Unaudited Condensed Consolidated Financial Statements*.

ITEM 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009.

In addition to the other information set forth in this Form 10-Q, you should carefully consider the factors discussed in *Part I, Item 1A. Risk Factors* in our 2009 Form 10-K, which could materially affect our business, financial condition or future results. The risks described in this Form 10-Q and in our 2009 Form 10-K are not the only risks facing our company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable.

(b) Not applicable.

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the quarter ended March 31, 2010:

Period	(a) Total number of shares purchased ⁽¹⁾	(b) Average price paid per share ⁽²⁾	(c) Total number of shares purchased as part of publicly announced plans or programs	(d) Maximum number of shares that may yet be purchased under the plans or program ⁽³⁾
January 1, 2010 to January 31, 2010	1,287	\$ 46.18		
February 1, 2010 to February 28, 2010	0	\$ 0.00		
March 1, 2010 to March 31, 2010	1,403	\$ 38.15		
Total	2,690	\$ 41.99		

(1) In connection with stock option exercises or restricted stock grants under our 2000 Plan and our 2005 Plan, we adopted a policy that enables employees to surrender shares to cover their tax liability. See *Note 8. Stock Compensation* in *Notes to Unaudited Condensed Consolidated Financial Statements*. The 2000 Plan was adopted in October 2000 and was terminated in November 2005. The 2005 Plan was adopted in October 2005 and expires in October 2015. All shares purchased above represent shares surrendered to cover tax liabilities.

Edgar Filing: CONTINENTAL RESOURCES INC - Form 10-Q

We paid the associated taxes to the Internal Revenue Service.

- (2) The price paid per share was the closing price of our common stock on the date of exercise or the date the restrictions lapsed on such shares, as applicable.
- (3) We are unable to determine at this time the total amount of securities or approximate dollar value of those securities that could potentially be surrendered to us pursuant to our policy that enables employees to surrender shares to cover their tax liability associated with the exercise of options or vesting of restrictions on shares under the 2000 Plan and 2005 Plan.

ITEM 3. Defaults Upon Senior Securities

Not applicable.

ITEM 4. (Removed and Reserved)

ITEM 5. Other Information

Not applicable.

ITEM 6. Exhibits

The exhibits required to be filed pursuant to Item 601 of Regulation S-K are set forth in the Index to Exhibits accompanying this report and are incorporated herein by reference.
