The accompanying notes are an integral part of these condensed consolidated financial statements.

Table of Contents**REPLIGEN CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****1. Basis of Presentation**

The consolidated financial statements included herein have been prepared by Repligen Corporation (the Company, Repligen or we) in accordance with generally accepted accounting principles in the United States (U.S. GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC), for Quarterly Reports on Form 10-Q and Article 10 of Regulation S-X and do not include all of the information and footnote disclosures required by U.S. GAAP. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

In the opinion of management, the accompanying unaudited consolidated financial statements include all adjustments, consisting of only normal, recurring adjustments necessary for a fair presentation of the financial position, results of operations and cash flows. The results of operations for the interim periods presented are not necessarily indicative of results to be expected for the entire year.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. Acquisitions, Goodwill and Other Intangible Assets*Acquisitions**Novozymes Biopharma Sweden AB*

On December 20, 2011, pursuant to the terms of the Asset Transfer Agreement, dated as of October 27, 2011 (the Asset Transfer Agreement), by and among the Company, Repligen Sweden AB, a company organized under the laws of Sweden and a wholly-owned subsidiary of the Company (Repligen Sweden), Novozymes Biopharma DK A/S, a company organized under the laws of Denmark (Novozymes Denmark), and Novozymes Biopharma Sweden AB, a company organized under the laws of Sweden and a wholly-owned subsidiary of Novozymes Denmark (Novozymes Sweden and, together with Novozymes Denmark, Novozymes), the Company acquired Novozymes' business headquartered at Novozymes Sweden's facility in Lund, Sweden and all related operations, including the manufacture and supply of cell culture ingredients and Protein A affinity ligands for use in industrial cell culture, stem and therapeutic cell culture and biopharmaceutical manufacturing (the Novozymes Biopharma Business). Pursuant to the Asset Transfer Agreement, Repligen Sweden (a) purchased all of the assets related to the Novozymes Biopharma Business and assumed certain specified liabilities related to the Novozymes Biopharma Business from Novozymes Sweden and (b) purchased contract rights and licenses used in the Novozymes Biopharma Business and other specified assets from Novozymes Denmark (collectively, the Transferred Business and the acquisition of the Transferred Business, the Novozymes Acquisition). The Novozymes Biopharma Business now operates as Repligen Sweden. The Company paid a total purchase price of 20,310,000 Euros (~\$26,400,000) to Novozymes for the Transferred Business. In addition, Novozymes has the right to contingent payments of up to 4,000,000 Euros (~\$5,200,000) consisting of: (i) an earn-out of 1,000,000 Euros (~\$1,300,000) if the Transferred Business achieves sales of a minimum quantity of a Novozymes product between January 1, 2012 and December 31, 2012 (the Company made this 1,000,000 Euro payment in March 2013); (ii) two milestone payments of 1,000,000 Euros (~\$1,300,000) each if sales of certain Novozymes products achieve agreed levels for the combined calendar years 2012 and 2013 and for calendar year 2014, respectively; and (iii) technology transfer payments totaling 1,000,000 Euros (~\$1,300,000) following the successful transfer of certain Novozymes manufacturing technology. The probability-weighted fair value of the remaining contingent consideration was \$1,028,000 and \$2,353,000 at June 30, 2013 and at December 31, 2012, respectively.

The Company accounted for the Novozymes Acquisition as the purchase of a business under U.S. GAAP. Under the acquisition method of accounting, the assets of the Novozymes Biopharma Business were recorded as of the acquisition date, at their respective fair values, and consolidated with those of Repligen. The fair value of the net assets acquired was approximately \$28,922,000, which exceeded the total consideration transferred of \$28,495,000. Accordingly, the Company recognized the excess of the fair value of the net assets over the purchase price of approximately \$427,000 as a gain on bargain purchase. In the six months ended June 30, 2012, the Company recognized an additional

Edgar Filing: REPLIGEN CORP - Form 10-Q

gain on bargain purchase of \$314,000 due to net working capital adjustments. The Company finalized its fixed asset valuation analysis in the quarter ended September 30, 2012 and the purchase price allocation is now considered final.

Table of Contents*Goodwill*

Goodwill is not amortized and is reviewed for impairment at least annually. There was no evidence of impairment to goodwill at June 30, 2013. There were no goodwill impairment charges during the three or six-month periods ended June 30, 2013.

Other Intangible Assets

Intangible assets are amortized over their useful lives using the estimated economic benefit method, as applicable, and the amortization expense is recorded within selling, general and administrative expense in the Company's statements of comprehensive income (loss). Intangible assets and their related useful lives are reviewed at least annually to determine if any adverse conditions exist that would indicate the carrying value of these assets may not be recoverable. More frequent impairment assessments are conducted if certain conditions exist, including a change in the competitive landscape, any internal decisions to pursue new or different technology strategies, a loss of a significant customer, or a significant change in the marketplace, including changes in the prices paid for our products or changes in the size of the market for our products. An impairment results if the carrying value of the asset exceeds the estimated fair value of the asset. If the estimate of an intangible asset's remaining useful life is changed, the remaining carrying amount of the intangible asset is amortized prospectively over the revised remaining useful life. The Company continues to believe that its intangible assets are recoverable at June 30, 2013.

Other intangible assets consisted of the following at June 30, 2013:

| | Gross Carrying Amount | Accumulated Amortization | Weighted Average Useful Life (in years) |
|-------------------------------|--------------------------------------|-------------------------------------|--|
| Technology developed | \$ 1,431,975 | \$ (445,130) | 8 |
| Patents | 240,000 | (102,500) | 8 |
| Customer relationships | 6,679,367 | (1,304,722) | 8 |
| Total other intangible assets | \$ 8,351,342 | \$ (1,852,352) | 8 |

Other intangible assets consisted of the following at December 31, 2012:

| | Gross Carrying Amount | Accumulated Amortization | Weighted Average Useful Life (in years) |
|-------------------------------|--------------------------------------|-------------------------------------|--|
| Technology developed | \$ 1,452,729 | \$ (360,748) | 8 |
| Patents | 240,000 | (87,500) | 8 |
| Customer relationships | 6,872,383 | (934,852) | 8 |
| Total other intangible assets | \$ 8,565,112 | \$ (1,383,100) | 8 |

Amortization expense for amortized intangible assets was approximately \$469,000 for the six months ended June 30, 2013. The Company expects to record amortization expense of approximately \$1,000,000 in each of the next five years.

3. Revenue Recognition*Product Sales*

The Company generates revenue from the sale of products, licensing transactions and research and development collaborations. The Company's product revenues are from the sale of bioprocessing products to customers in the life science and biopharmaceutical industries. Revenue related

Edgar Filing: REPLIGEN CORP - Form 10-Q

to product sales is recognized upon delivery of the product to the customer as long as there is persuasive evidence of an arrangement, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Determination of whether these criteria have been met are based on management's judgments primarily regarding the fixed nature of the fee charged for the product delivered and the collectability of those fees. The Company has a few longstanding customers who comprise the majority of revenue and have excellent payment histories and therefore the Company does not require collateral. The Company has had no significant write-offs of uncollectible invoices in the periods presented.

At the time of sale, the Company also evaluates the need to accrue for warranty and sales returns. The supply agreements the Company has with its customers and the related purchase orders identify the terms and conditions of each sale and the price of the goods ordered. Due to the nature of the sales arrangements, inventory produced for sale is tested for quality specifications prior to shipment. Since the product is manufactured to order and in compliance with required specifications prior to shipment, the likelihood of sales return, warranty or other issues is largely diminished. Sales returns and warranty issues are infrequent and have had nominal impact on the Company's financial statements historically.

Table of Contents*Orencia Royalty*

In April 2008, the Company settled its outstanding litigation with Bristol-Myers Squibb Company (Bristol) and began recognizing royalty revenue in fiscal year 2009 for Bristol's net sales in the United States of Orencia[®] which is used in the treatment of rheumatoid arthritis. Pursuant to the settlement with Bristol (Bristol Settlement), the Company recognized royalty revenue of approximately \$4,285,000 and \$3,580,000 for the three months ended June 30, 2013 and 2012, respectively. For the six months ended June 30, 2013 and 2012, the Company recognized Bristol royalty revenue of approximately \$8,131,000 and \$6,660,000, respectively. Revenue earned from Bristol royalties is recorded in the periods when it is earned based on royalty reports sent by Bristol to the Company. The Company has no continuing obligations to Bristol as a result of this settlement. The royalty agreement with Bristol provides that the Company will receive such royalty payments on sales of Orencia[®] by Bristol through December 31, 2013.

Pursuant to the Bristol Settlement, Repligen must remit to the University of Michigan 15% of all royalty revenue received from Bristol. Royalty expense for the three months ended June 30, 2013 and 2012 was approximately \$643,000 and \$537,000, respectively. For the six months ended June 30, 2013 and 2012, the Company incurred royalty expense of approximately \$1,220,000 and \$999,000, respectively. This operating expense has been included in the Company's statements of comprehensive income (loss) under the line item Cost of royalty revenue.

Pfizer License Agreement

In December 2012, the Company entered into an exclusive worldwide licensing agreement (the License Agreement) with Pfizer Inc. (Pfizer) to advance the spinal muscular atrophy program, or SMA program, which is led by RG3039, a small molecule drug candidate in clinical development for SMA, and also includes backup compounds and enabling technologies. Under the terms of the License Agreement, the Company received \$5 million from Pfizer as an upfront payment on January 22, 2013 and is eligible to receive up to \$65 million in potential future milestone payments, a portion of which may be owed to third parties. These potential payments are approximately equally divided between milestones related to clinical development and initial commercial sales in specific geographies. In addition, the Company is eligible to receive royalties on any future sales of RG3039 or any SMA compounds developed under the License Agreement. The royalty rates are tiered and begin in the high single-digits for RG3039 or lesser amounts for any backup compounds developed under the License Agreement. Repligen's receipt of these royalties is subject to an obligation under an existing in-license agreement and other customary offsets and deductions. There are no refund provisions in this agreement. The Company recognized \$4,876,000 of revenue related to the value of the license in the year ended December 31, 2012. For the three and six-month periods ended June 30, 2013, the Company recognized \$68,000 and \$124,000 of revenue, respectively, from the upfront payment under the License Agreement as the Company performed clinical and transition services under the agreement.

Research and Development Agreements

For the three months ended June 30, 2013 and 2012, the Company recognized approximately \$142,000 and \$285,000 of revenue, respectively, from sponsored research and development projects under agreements with the National Institutes of Health / Scripps Research Institute and the Friedreich's Ataxia Research Alliance. For the six months ended June 30, 2013 and 2012, the Company recognized approximately \$762,000 and \$686,000 of revenue, respectively, from sponsored research and development projects under agreements with the National Institutes of Health / Scripps Research Institute, Go Friedreich's Ataxia Research, and the Friedreich's Ataxia Research Alliance.

Research revenue is recognized when the expense has been incurred and services have been performed. Determination of which incurred costs qualify for reimbursement under the terms of the Company's contractual agreements and the timing of when such costs were incurred involves the judgment of management. The Company's calculations are based on the agreed-upon terms as stated in the arrangements. However, should the estimated calculations change or be challenged by other parties to the agreements, research revenue may be adjusted in subsequent periods. The calculations have not historically changed or been challenged, and the Company does not anticipate any significant subsequent change in its revenue related to sponsored research and development projects.

4. Accumulated Other Comprehensive Income (Loss)

The following table summarizes the changes in accumulated other comprehensive income (loss) by component:

| (In thousands) | Unrealized gain (loss) on investments | Foreign currency translation gain (loss) | Total |

Table of Contents**5. Earnings Per Share**

The Company reports earnings per share in accordance with Accounting Standards Codification Topic 260, Earnings Per Share, which establishes standards for computing and presenting earnings per share. Basic earnings per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares and dilutive common share equivalents then outstanding. Potential common share equivalents consist of restricted stock awards and the incremental common shares issuable upon the exercise of stock options and warrants. Under the treasury stock method, unexercised in-the-money stock options and warrants are assumed to be exercised at the beginning of the period or at issuance, if later. The assumed proceeds are then used to purchase common shares at the average market price during the period. Share-based payment awards that entitle their holders to receive non-forfeitable dividends before vesting are considered participating securities and are considered in the calculation of basic and diluted earnings per share.

Basic and diluted weighted average shares outstanding were as follows:

| | Three months ended June 30, | | Six months ended June 30, | |
|---|--------------------------------|------------|------------------------------|------------|
| | 2013 | 2012 | 2013 | 2012 |
| Weighted average common shares | 31,643,695 | 30,845,137 | 31,443,264 | 30,787,399 |
| Dilutive common stock options | 673,461 | 303,953 | 672,255 | 285,046 |
| Weighted average common shares, assuming dilution | 32,317,156 | 31,149,090 | 32,115,519 | 31,072,445 |

At June 30, 2013, there were outstanding options to purchase 1,795,588 shares of the Company's common stock at a weighted average exercise price of \$4.53 per share. For the three and six-month periods ended June 30, 2013, 520,552 and 540,552 shares of the Company's common stock, respectively, were excluded from the calculation of diluted earnings per share because the exercise prices of the stock options were greater than or equal to the average price of the common shares, and were therefore anti-dilutive.

At June 30, 2012, there were outstanding options to purchase 2,629,490 shares of the Company's common stock at a weighted average exercise price of \$4.08 per share. For the three and six-month periods ended June 30, 2012, 1,451,500 and 1,539,300 shares of the Company's common stock, respectively, were excluded from the calculation of diluted earnings per share because the exercise prices of the stock options were greater than or equal to the average price of the common shares, and were therefore anti-dilutive.

6. Stock-Based Compensation

For the three months ended June 30, 2013 and 2012, the Company recorded stock-based compensation expense of \$312,691 and \$214,797, respectively, for share-based awards granted under the Second Amended and Restated 2001 Repligen Corporation Stock Plan (the 2001 Plan) and the Repligen Corporation 2012 Stock Option and Incentive Plan (the 2012 Plan, and collectively with the 2001 Plan and the 1992 Repligen Corporation Stock Option Plan, the Plans). The Company recorded stock-based compensation expense of \$562,762 and \$455,669 for the six-month periods ended June 30, 2013 and 2012, respectively, for share-based awards granted under the Plans.

The following table presents stock-based compensation expense included in the Company's consolidated statements of comprehensive income (loss):

| | Three months ended June 30, | | Six months ended June 30, | |
|-------------------------------------|--------------------------------|------------|------------------------------|------------|
| | 2013 | 2012 | 2013 | 2012 |
| Cost of product revenue | \$ 11,428 | \$ 13,368 | \$ 23,093 | \$ 22,774 |
| Research and development | 36,081 | 64,489 | 43,721 | 116,825 |
| Selling, general and administrative | 265,182 | 136,940 | 495,948 | 316,070 |
| Total | \$ 312,691 | \$ 214,797 | \$ 562,762 | \$ 455,669 |

Edgar Filing: REPLIGEN CORP - Form 10-Q

The 2012 Plan allows for the granting of incentive and nonqualified options to purchase shares of common stock, restricted stock and other equity awards. Incentive options granted to employees under the Plans generally vest over a four to five-year period, with 20%-25% vesting on the first anniversary of the date of grant and the remainder vesting in equal yearly installments thereafter. Nonqualified options issued to non-employee directors and consultants under the Plans generally vest over one year. Options granted under the Plans have a maximum term of ten years from the date of grant and generally, the exercise price of the stock options equals the fair market value of the Company's common stock on the date of grant. At June 30, 2013, options to purchase 1,795,588 shares were outstanding under the Plans. At June 30, 2013, 1,160,016 shares were available for future grant under the Plans.

Table of Contents

The Company uses the Black-Scholes option pricing model to calculate the fair value of share-based awards on the grant date. The Company measures stock-based compensation cost at the grant date based on the estimated fair value of the award, and recognizes it as expense over the employee's requisite service period on a straight-line basis. The Company records the expense for share-based awards subject to performance-based milestone vesting over the remaining service period when management determines that achievement of the milestone is probable. Management evaluates whether the achievement of a performance-based milestone is probable as of the reporting date. The Company has no awards that are subject to market conditions. The Company recognizes stock-based compensation expense for options that are ultimately expected to vest, and accordingly, such compensation expense has been adjusted for estimated forfeitures.

Information regarding option activity for the six months ended June 30, 2013 under the Plans is summarized below:

| | Options Outstanding | Weighted- Average Exercise Price Per Share | Weighted- Average Remaining Contractual Term (in years) | Aggregate Intrinsic Value |
|--|------------------------|--|--|---------------------------------|
| Options outstanding at January 1, 2013 | 2,315,090 | \$ 4.20 | | |
| Granted | 388,052 | 5.86 | | |
| Exercised | (786,254) | 4.28 | | |
| Forfeited/Cancelled | (121,300) | 4.28 | | |
| Options outstanding at June 30, 2013 | 1,795,588 | \$ 4.53 | 7.14 | \$ 6,689,614 |
| Options exercisable at June 30, 2013 | 865,636 | \$ 4.31 | 5.36 | \$ 3,405,885 |
| Vested and expected to vest at June 30, 2013 (1) | 1,694,909 | \$ 4.48 | 7.07 | \$ 6,388,888 |

- (1) This represents the number of vested options as of June 30, 2013 plus the number of unvested options expected to vest as of June 30, 2013 based on the unvested outstanding options at June 30, 2013 adjusted for estimated forfeiture rates of 8% for awards granted to non-executive level employees and 3% for awards granted to executive level employees.

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the closing price of the common stock on June 30, 2013 of \$8.24 and the exercise price of each in-the-money option) that would have been received by the option holders had all option holders exercised their options on June 30, 2013.

The weighted average grant date fair value of options granted during the six months ended June 30, 2013 and 2012 was \$3.84 and \$3.62, respectively. The total fair value of stock options that vested during the six months ended June 30, 2013 and 2012 was approximately \$695,795 and \$502,180, respectively.

As of June 30, 2013, there was \$2,215,407 of total unrecognized compensation cost related to unvested share-based awards. This cost is expected to be recognized over a weighted average remaining requisite service period of 3.01 years. The Company expects 829,273 unvested options to vest over the next five years.

7. Cash, Cash Equivalents and Marketable Securities

At June 30, 2013 and December 31, 2012, the Company's investments included money market funds as well as short-term and long-term marketable securities. These marketable securities are classified as available-for-sale. Marketable securities are investments with original maturities of greater than 90 days. Long-term marketable securities are securities with maturities of greater than one year. The average remaining contractual maturity of marketable securities at June 30, 2013 is approximately 7.83 months.

Edgar Filing: REPLIGEN CORP - Form 10-Q

Management reviewed the Company's investments as of June 30, 2013 and December 31, 2012 and concluded that there are no securities with other than temporary impairments in the investment portfolio. The Company does not intend to sell any investments in an unrealized loss position and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases.

Table of Contents

Investments in debt securities consisted of the following at June 30, 2013:

| | June 30, 2013 | | | |
|---|----------------------|-----------------------------|-----------------------------|----------------------|
| | Amortized Cost | Gross Unrealized Gain | Gross Unrealized Loss | Fair Value |
| Marketable securities: | | | | |
| U.S. Government and agency securities | \$ 1,539,779 | \$ 111 | \$ (37) | \$ 1,539,853 |
| Corporate and other debt securities | 19,265,821 | 11,851 | (3,692) | 19,273,980 |
| | 20,805,600 | 11,962 | (3,729) | 20,813,833 |
| Long-term marketable securities: | | | | |
| U.S. Government and agency securities | 4,037,566 | 854 | (1,186) | 4,037,234 |
| Corporate and other debt securities | 608,447 | 49 | (442) | 608,054 |
| | 4,646,013 | 903 | (1,628) | 4,645,288 |
| Total | \$ 25,451,613 | \$ 12,865 | \$ (5,357) | \$ 25,459,121 |

At June 30, 2013, the Company's investments included twenty-three debt securities in unrealized loss positions with a total unrealized loss of approximately \$5,000 and a total fair market value of approximately \$7,201,000. All investments with gross unrealized losses have been in unrealized loss positions for less than 12 months. The unrealized losses were caused primarily by current economic and market conditions. There was no change in the credit risk of the securities. There were no realized gains or losses on the investments for the six months ended June 30, 2013 or the year ended December 31, 2012.

Investments in debt securities consisted of the following at December 31, 2012:

| | December 31, 2012 | | | |
|---|----------------------|-----------------------------|-----------------------------|----------------------|
| | Amortized Cost | Gross Unrealized Gain | Gross Unrealized Loss | Fair Value |
| Marketable securities: | | | | |
| U.S. Government and agency securities | \$ 2,000,897 | \$ 353 | \$ (7) | \$ 2,001,243 |
| Corporate and other debt securities | 8,835,098 | 8,854 | | 8,843,952 |
| | 10,835,995 | 9,207 | (7) | 10,845,195 |
| Long-term marketable securities: | | | | |
| U.S. Government and agency securities | 5,198,264 | 2,747 | | 5,201,011 |
| Corporate and other debt securities | 4,711,679 | 3,525 | (1,360) | 4,713,844 |
| | 9,909,943 | 6,272 | (1,360) | 9,914,855 |
| Total | \$ 20,745,938 | \$ 15,479 | \$ (1,367) | \$ 20,760,050 |

The contractual maturities of debt securities at June 30, 2013 were as follows:

| | Amortized Cost | Fair Value |
|-----------------------|-------------------|---------------|
| Due in 1 year or less | \$ 20,805,600 | \$ 20,813,833 |

Edgar Filing: REPLIGEN CORP - Form 10-Q

| | | |
|---------------------|---------------|---------------|
| Due in 1 to 2 years | 4,646,013 | 4,645,288 |
| | \$ 25,451,613 | \$ 25,459,121 |

8. Fair Value Measurement

In determining the fair value of its assets and liabilities, the Company uses various valuation approaches. The Company employs a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the inputs that market participants would use in pricing the asset or liability and are developed based on the best information available in the circumstances. The fair value hierarchy is broken down into three levels based on the source of inputs as follows:

- Level 1 Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access
- Level 2 Valuations based on quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active and models for which all significant inputs are observable, either directly or indirectly
- Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement

Table of Contents

The availability of observable inputs can vary among the various types of financial assets and liabilities. To the extent that the valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for financial statement disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is categorized is based on the lowest level input that is significant to the overall fair value measurement.

The Company's fixed income investments are comprised of obligations of U.S. government agencies, corporate debt securities and other interest bearing securities. These investments have been initially valued at the transaction price and subsequently valued, at the end of each reporting period, utilizing third party pricing services or other market observable data. The pricing services utilize industry standard valuation models, including both income and market based approaches and observable market inputs to determine value. These observable market inputs include reportable trades, benchmark yields, credit spreads, broker/dealer quotes, bids, offers, current spot rates and other industry and economic events. The Company validates the prices provided by third party pricing services by reviewing their pricing methods and matrices, obtaining market values from other pricing sources, analyzing pricing data in certain instances and confirming that the relevant markets are active. After completing its validation procedures, the Company did not adjust or override any fair value measurements provided by the pricing services as of June 30, 2013.

The following fair value hierarchy table presents information about each major category of the Company's assets measured at fair value on a recurring basis as of June 30, 2013:

| | Fair value measurement at reporting date using: | | | Total |
|---------------------------------------|--|---|---|----------------------|
| | Quoted prices in active markets for identical assets (Level 1) | Significant other observable inputs (Level 2) | Significant unobservable inputs (Level 3) | |
| Assets: | | | | |
| Money market funds | \$ 8,403,979 | \$ | \$ | \$ 8,403,979 |
| U.S. Government and agency securities | 2,156,519 | 3,420,568 | | 5,577,087 |
| Corporate and other debt securities | | 19,882,034 | | 19,882,034 |
| Total | \$ 10,560,498 | \$ 23,302,602 | \$ | \$ 33,863,100 |

The Company has no other assets or liabilities for which fair value measurement is either required or has been elected to be applied, other than the liabilities for contingent consideration recorded in connection with the Novozymes Acquisition and the acquisition of the assets of BioFlash Partners, LLC (BioFlash). The contingent consideration related to Novozymes is valued using management's estimates of expected future milestone payments based upon a probability weighted analysis of amounts to be paid to Novozymes Denmark. The contingent consideration related to BioFlash is valued using management's estimates of royalties to be paid to the former shareholders of BioFlash based on sales of the acquired assets. These valuations are Level 3 valuations as the primary inputs are unobservable. Changes in the fair value of contingent consideration in the three and six-month periods ended June 30, 2013 are primarily attributable to a 1,000,000 Euro milestone payment made to Novozymes Denmark in March 2013 and a \$55,000 minimum royalty payment made to BioFlash in January 2013, which were previously accrued. The following table provides a roll forward of the fair value of the contingent consideration:

| | |
|---------------------------------|---------------------|
| Balance at December 31, 2012 | \$ 2,899,076 |
| Additions | |
| Payments | (1,341,339) |
| Changes in fair value | (18,587) |
| Balance at June 30, 2013 | \$ 1,539,150 |

There were no remeasurements to fair value during the three or six months ended June 30, 2013 of financial assets and liabilities that are not measured at fair value on a recurring basis.

Table of Contents**9. Inventories**

Inventories relate to the Company's bioprocessing business. The Company values inventory at cost or, if lower, fair market value, using the first-in, first-out method. The Company reviews its inventories at least quarterly and records a provision for excess and obsolete inventory based on its estimates of expected sales volume, production capacity and expiration dates of raw materials, work-in process and finished products. Expected sales volumes are determined based on supply forecasts provided by key customers for the next three to 12 months. The Company writes down inventory that has become obsolete, inventory that has a cost basis in excess of its expected net realizable value, and inventory in excess of expected requirements to cost of product revenue. Manufacturing of bioprocessing finished goods is done to order and tested for quality specifications prior to shipment. Reserves for excess and obsolete inventory were \$151,000 at June 30, 2013 and \$154,000 at December 31, 2012.

A change in the estimated timing or amount of demand for the Company's products could result in additional provisions for excess inventory quantities on hand. Any significant unanticipated changes in demand or unexpected quality failures could have a significant impact on the value of inventory and reported operating results. During all periods presented in the accompanying financial statements, there have been no material adjustments related to a revised estimate of inventory valuations.

Work-in-process and finished products inventories consist of material, labor, outside processing costs and manufacturing overhead. Inventories consisted of the following:

| | June 30, 2013 | December 31, 2012 |
|-------------------|--------------------------|------------------------------|
| Raw materials | \$ 4,336,937 | \$ 4,064,317 |
| Work-in-process | 3,888,994 | 4,112,478 |
| Finished products | 2,331,487 | 2,966,900 |
| Total | \$ 10,557,418 | \$ 11,143,695 |

10. Accrued Liabilities

The Company estimates accrued liabilities by identifying services performed on the Company's behalf, estimating the level of service performed and determining the associated cost incurred for such service as of each balance sheet date. For example, the Company would accrue for professional and consulting fees incurred with law firms, audit and accounting service providers and other third party consultants. These expenses are determined by either requesting those service providers to estimate unbilled services at each reporting date for services incurred or tracking costs incurred by service providers under fixed fee arrangements.

The Company has processes in place to estimate the appropriate amounts to record for accrued liabilities, which principally involve the applicable personnel reviewing the services provided. In the event that the Company does not identify certain costs that have begun to be incurred or the Company under or over-estimates the level of services performed or the costs of such services, the reported expenses for that period may be too low or too high. The date on which certain services commence, the level of services performed on or before a given date, and the cost of such services often require the exercise of judgment. The Company makes these judgments based upon the facts and circumstances known at the date of the financial statements.

Accrued liabilities consist of the following:

| | June 30, 2013 | December 31, 2012 |
|--------------------------|--------------------------|------------------------------|
| Employee compensation | \$ 3,031,594 | \$ 3,634,839 |
| Royalty and license fees | 1,499,419 | 1,459,680 |
| Contingent consideration | 1,107,977 | 1,376,877 |
| Unearned revenue | 475,120 | 599,120 |
| Professional fees | 161,420 | 418,800 |
| VAT liabilities | 131,494 | 98,162 |

Edgar Filing: REPLIGEN CORP - Form 10-Q

| | | |
|--------------------------|------------------|------------------|
| Research and development | 123,000 | 18,300 |
| Other accrued expenses | 2,207,589 | 692,212 |
| Total | 8,737,613 | 8,297,990 |

11. Income Taxes

For the three and six-month periods ended June 30, 2013, the Company had income before taxes of \$6,033,703 and \$9,655,771, respectively. The Company recorded income tax provisions of \$1,494,516 and \$2,778,348, respectively, for the three and six-month periods ended June 30, 2013. This is based on an expected effective tax rate of 25.69% for the year ending December 31, 2013 plus approximately \$298,000 of discrete items recognized in the quarter ended March 31, 2013. The effective income tax rate is based

Table of Contents

upon the estimated income for the year and the composition of the income in different jurisdictions. Effective January 1, 2013, Sweden's statutory tax rate decreased from 26.3% to 22.0%. The effective tax rate differs from the U.S. statutory tax rate primarily due to the expected utilization of prior year net operating loss carryforwards in excess of amounts previously benefitted and the lower statutory tax rate in Sweden.

For the three and six-month periods ended June 30, 2012, the Company had income before taxes of \$1,778,193 and \$3,063,572, respectively. The Company recorded income tax provisions of \$208,230 and \$267,137, respectively, for the three and six-month periods ended June 30, 2012 based on an effective tax rate of approximately 8.72%. The effective income tax rate is based upon the estimated income for the year and the composition of the income in different jurisdictions. The effective tax rate differs from the statutory tax rates primarily due to the utilization of prior year net operating loss carryforwards and credits earned in the U.S.

The Company has net operating loss carryforwards of approximately \$44,678,000 and business tax credits carryforwards of approximately \$2,160,000 available to reduce future federal income taxes, if any. The net operating loss and business tax credit carryforwards will continue to expire at various dates through December 2032. The net operating loss and business tax credits carryforwards are subject to review and possible adjustment by the Internal Revenue Service and may be limited in the event of certain changes in the ownership interest of significant stockholders.

In the fourth quarter of 2012, we entered into a cumulative pre-tax income position and concluded that it was more likely than not that we will generate sufficient taxable income in 2013 based on our 2013 projections to realize the tax benefit of a portion of our deferred tax assets. As a result, we recorded a tax benefit in the fourth quarter of 2012 that included the reversal of \$3,021,000 of the valuation allowance on our deferred tax assets.

12. Segment Reporting

The Company views its operations, makes decisions regarding how to allocate resources and manages its business as one operating segment. As a result, the financial information disclosed herein represents all of the material financial information related to the Company's principal operating segment.

The following table represents the Company's total revenue by geographic area (based on the location of the customer):

| | Three months ended June 30, | | Six months ended June 30, | |
|----------------|--------------------------------|-------------|------------------------------|-------------|
| | 2013 | 2012 | 2013 | 2012 |
| United States | 46% | 44% | 47% | 41% |
| Sweden | 39% | 45% | 39% | 44% |
| United Kingdom | 13% | 10% | 12% | 12% |
| Other | 2% | 1% | 2% | 3% |
| Total | 100% | 100% | 100% | 100% |

Revenue from significant customers as a percentage of the Company's total revenue is as follows:

| | Three months ended June 30, | | Six months ended June 30, | |
|---------------------------------|--------------------------------|------|------------------------------|------|
| | 2013 | 2012 | 2013 | 2012 |
| Orencia® Royalties from Bristol | 25% | 23% | 24% | 23% |
| Bioprocessing Customer A | 39% | 44% | 38% | 44% |
| Bioprocessing Customer B | 15% | 11% | 14% | 13% |
| Bioprocessing Customer C | 10% | 14% | 13% | 12% |

Significant accounts receivable balances as a percentage of the Company's total trade accounts receivable and royalties and other receivables balances are as follows:

Edgar Filing: REPLIGEN CORP - Form 10-Q

| | June 30, 2013 | December 31, 2012 |
|--|--------------------------|------------------------------|
| Orencia® Royalties from Bristol | 42% | 31% |
| Bioprocessing Customer A | 29% | 21% |
| Bioprocessing Customer B | 10% | 4% |
| Tenant improvement allowance due from landlord | 10% | |
| Pfizer | | 38% |

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*****Overview***

We are a life sciences company that develops, manufactures and markets high-value, consumable bioprocessing products for life sciences companies and biopharmaceutical manufacturing companies worldwide. We are a world-leading manufacturer of both native and recombinant forms of Protein A, critical reagents used in biomanufacturing to separate and purify monoclonal antibodies, a type of biologic drug. We also supply several growth factor products used to increase cell culture productivity during the biomanufacturing process. In the burgeoning area of flexible biomanufacturing technologies, we have developed and currently market a series of OPUS (Open-Platform, User-Specified) chromatography columns for use in clinical-scale manufacturing. These pre-packed, plug-and-play columns are uniquely flexible and customizable to our customers' media and size requirements. We generally manufacture and sell Protein A and growth factors to life sciences companies under long-term supply agreements and sell our chromatography columns, as well as media and quality test kits, directly to biopharmaceutical companies or contract manufacturing organizations. We refer to these activities as our bioprocessing business.

On December, 20, 2011, we significantly increased the size of our bioprocessing business through a strategic acquisition. We acquired certain assets and assumed certain liabilities of Novozymes Biopharma Sweden, AB (Novozymes) in Lund, Sweden, including the manufacture and supply of cell culture ingredients and Protein A affinity ligands for use in industrial cell culture, stem and therapeutic cell culture and biopharmaceutical manufacturing (the Novozymes Biopharma Business) and the acquisition of the Novozymes Biopharma Business, the Novozymes Acquisition) for a total upfront cash payment of 20.65 million Euros (~\$26.9 million). As a result of the Novozymes Acquisition, we nearly doubled the size of our bioprocessing business.

We have out-licensed certain intellectual property to Bristol-Myers Squibb Company, or Bristol, from which we receive royalties on Bristol's net sales in the United States of their product Orencia®. On April 7, 2008, we entered into a settlement agreement with Bristol in connection with a patent infringement lawsuit we filed against Bristol. Under the terms of the agreement, Bristol is obligated to pay us royalties on its U.S. net sales of Orencia® for any clinical indication at a rate of 1.8% for the first \$500,000,000 of annual sales, 2.0% for the next \$500,000,000 of annual sales and 4% of annual sales in excess of \$1 billion. Under the terms of the agreement, we will not receive any future royalties on Bristol's sales of Orencia® made after December 31, 2013. We expect that the upcoming loss of these royalty payments will materially and adversely affect our revenue and operating results.

Historically, Repligen also conducted activities aimed at developing proprietary therapeutic drug candidates, often with a potential of entering into a collaboration with a larger commercial stage pharmaceutical or biotechnology company in respect of these programs. As part of our strategic decision in 2012 to focus our efforts on our core bioprocessing business, we scaled back our efforts on our clinical development programs and increased our efforts to find collaboration partners to pursue the development and, if successful, the commercialization of these drug programs. The current status of our development portfolio is:

On December 28, 2012, we out-licensed our spinal muscular atrophy program, or SMA program, led by RG3039, a small molecule drug candidate in clinical development for SMA, to Pfizer Inc., or Pfizer. Pursuant to the license agreement, Pfizer will assume the majority of the costs associated with completing the required clinical trials for this program as well as obtaining U.S. Food and Drug Administration (FDA) approval of the respective new drug application (NDA). Under the license agreement, we are obligated to conduct additional activities in support of this program, which includes completing the second cohort of the current Phase I trial for RG3039 and supporting the transition of the program to Pfizer. We completed this second cohort during the quarter ended March 31, 2013 and substantially all of our remaining obligations during the quarter ended June 30, 2013.

The most advanced product candidate in our development portfolio is RG1068, a synthetic human hormone being developed as a novel imaging agent for the improved detection of pancreatic duct abnormalities in combination with magnetic resonance imaging in patients with pancreatitis and potentially other pancreatic diseases. We submitted an NDA to the FDA and a marketing authorization application to the European Medicines Agency in the first quarter of 2012. In the second quarter of 2012, we received a complete response letter from the FDA, indicating the need for additional clinical efficacy and safety trial data. We have also received from the FDA the requirements for an additional registration study. We believe this information may be an important factor in the decision by third-parties that may wish to pursue a development or commercialization agreement with us for RG1068. We expect that any additional development activities that we may pursue in the future will be largely supported by sponsors or collaborators.

Edgar Filing: REPLIGEN CORP - Form 10-Q

Our third clinical development program was targeted at Friedrich's Ataxia and led by RG2833, a class I histone deacetylase (HDAC) inhibitor. RG2833 has received Orphan Drug designation from the FDA and European Commission. We initiated a single, ascending dose Phase 1 study of RG2833 in Friedreich's Ataxia (FA) patients in Italy in the fourth quarter of 2012 and completed the patient dosing in the quarter ended March 31, 2013. The results of the study support the use of an oral HDAC inhibitor in the treatment of FA, demonstrating a dose-dependent improvement in the expression of a disease biomarker. While RG2833 was shown to be well tolerated and no adverse events were

Table of Contents

reported, the generation of potentially toxic metabolites was observed. We believe that other compounds in our HDAC inhibitor portfolio may be more suitable than RG2833 for clinical development, and in alignment with our focus on bioprocessing; we continue to seek non-profit and biopharmaceutical development partners to support future development of this program.

Critical Accounting Policies and Estimates

A critical accounting policy is one which is both important to the portrayal of the Company's financial condition and results and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. For additional information, please see the discussion of our critical accounting policies in Management's Discussion and Analysis and our significant accounting policies in Note 2 to the Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no changes to our critical accounting policies since December 31, 2012.

Results of Operations

Three months ended June 30, 2013 vs. June 30, 2012

Revenues

Total revenues for the three-month periods ended June 30, 2013 and 2012 were comprised of the following:

| | Three months ended June 30, | | % Change |
|-------------------------------|------------------------------------|------------------|---------------|
| | 2013 | 2012 | 2013 vs. 2012 |
| | (in thousands, except percentages) | | |
| Bioprocessing product revenue | \$ 13,014 | \$ 11,659 | 12% |
| Royalty and other revenue | 4,495 | 3,865 | 16% |
| Total revenue | \$ 17,509 | \$ 15,524 | 13% |

Sales of bioprocessing products for the three months ended June 30, 2013 and 2012 were \$13,014,000 and \$11,659,000, respectively, an increase of \$1,355,000, or 12%. This increase was primarily due to increases in orders from our key bioprocessing customers. Sales of our bioprocessing products can be impacted by the timing of orders, development efforts at our customers or end-users and regulatory approvals for biologics that incorporate our products, which may result in significant quarterly fluctuations. Such quarterly fluctuations are expected but they may not be predictive of future revenue or otherwise indicate a trend.

Pursuant to the settlement with Bristol, we recognized royalty revenue of \$4,285,000 and \$3,580,000 for the three months ended June 30, 2013 and 2012, respectively. We expect to receive these royalty payments for Bristol's sales through December 31, 2013. We expect that the upcoming loss of these royalty payments will materially and adversely affect our revenue and operating results.

For the three months ended June 30, 2013 and 2012, we recognized \$142,000 and \$285,000, respectively, of revenue from sponsored research and development projects under agreements with the National Institutes of Health / Scripps Research Institute and the Friedreich's Ataxia Research Alliance.

We recognized \$68,000 of revenue from the upfront payment under the Pfizer License Agreement in the three months ended June 30, 2013. We may receive all, or a portion of, the first clinical milestone of \$2 million in 2013 depending upon the development path chosen by Pfizer. If we receive a portion of this milestone, we expect to receive the balance of it by the end of 2014.

Costs and operating expenses

Total costs and operating expenses for the three-month periods ended June 30, 2013 and 2012 were comprised of the following:

% Change

Edgar Filing: REPLIGEN CORP - Form 10-Q

| | Three months ended | | |
|---|------------------------------------|-----------|---------------|
| | June 30, | | |
| | 2013 | 2012 | 2013 vs. 2012 |
| | (in thousands, except percentages) | | |
| Cost of product revenue | \$ 5,298 | \$ 7,345 | -28% |
| Cost of royalty revenue | 643 | 537 | 20% |
| Research and development | 2,306 | 2,906 | -21% |
| Selling, general and administrative | 3,124 | 3,418 | -9% |
| Contingent consideration fair value adjustments | 35 | | 100% |
| Total costs and operating expenses | \$ 11,406 | \$ 14,206 | -20% |

Table of Contents

Cost of product revenue was approximately \$5,298,000 and \$7,345,000 for the three-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$2,047,000 or 28%. This decrease is primarily due to operational efficiencies implemented during 2012 at Repligen Sweden offset by higher overall costs associated with increased bioprocessing product revenue in the second quarter of 2013 as compared to the second quarter of 2012. Gross margins may decline slightly over the remainder of the year based on expected production volume and shipments, product mix and the sale of higher cost inventory that was produced at a higher cost level in 2012.

Pursuant to the settlement with Bristol, we must remit 15% of royalty revenue received through the expiration of the settlement agreement in December 2013 to the University of Michigan. For the three-month periods ended June 30, 2013 and 2012, the cost of royalty revenue was approximately \$643,000 and \$537,000, respectively. This increase is directly related to the increase in Bristol royalty revenue noted above.

Research and development expenses were approximately \$2,306,000 and \$2,906,000 for the three-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$600,000 or 21%. This decrease is primarily attributed to a reduction in therapeutics related research and development expenses partially offset by an increase in bioprocessing research and development expense. For the three-month period ended June 30, 2013, approximately \$1,200,000 of our total research and development expenses was incurred on bioprocessing research and development activities.

Significant fluctuations in research and development expenses may occur from period to period depending on the nature, timing, and extent of development activities over any given period of time. Many resources including personnel, supplies and equipment are shared by all of the development programs. As a result, and due to the significant risks and uncertainties in drug development, we are not able to provide cumulative spending to date or predict total development costs for any particular program. In August 2012, we announced a strategic focus on our Bioprocessing business and a simultaneous effort to find partners, out-licensing opportunities or other funding arrangements with external parties to reduce or eliminate the net expenditures on research and development activities for our therapeutic programs. For each of the remaining quarters in 2013, we expect total research and development expenses to be lower than the quarter ended June 30, 2013. We expect that any research and development activities that we undertake in the future with respect to our therapeutic drug candidates will be limited to those which could support the transition of development and commercialization activities for these programs to potential collaborators. We intend to focus the majority of our future research and development efforts on developing new bioprocessing products.

Selling, general and administrative expenses were approximately \$3,124,000 and \$3,418,000 for the three-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$294,000 or 9%. This decrease is primarily attributable to a reduction in outside professional services expenses of approximately \$365,000, a reduction in spending on sales and marketing related to therapeutics programs of approximately \$150,000 offset by higher employee related expenses of approximately \$260,000. Selling, general and administrative expenses in the second quarter of 2012 included non-recurring legal and accounting costs related to complying with reporting requirements with respect to the combined entity after the completion of the Novozymes acquisition, and other business development and corporate activities. For each of the remaining quarters in 2013, we expect similar levels of selling, general and administrative expenses to those incurred in the quarter ended June 30, 2013.

Investment income

Investment income includes income earned on invested cash balances. Investment income was approximately \$66,000 and \$30,000 for the three-month periods ended June 30, 2013 and 2012, respectively. This increase of \$36,000, or 120%, is primarily attributable to slightly higher interest rates and slightly higher average invested cash balances.

Other (expense) income

Other (expense) income was approximately (\$122,000) and \$458,000 for the three-month periods ended June 30, 2013 and 2012, respectively, and are primarily attributable to foreign currency gains (losses) related to our Sweden operations.

Provision for income taxes

For the three months ended June 30, 2013, we had income before taxes of \$6,033,703 and a tax provision of \$1,494,516 based on an effective tax rate of 25.69%. The effective income tax rate is based upon the estimated income for the year and the composition of the income in different tax jurisdictions. Effective January 1, 2013, Sweden's statutory tax rate decreased from 26.3% to 22.0%. The effective tax rate differs from the U.S. statutory tax rate primarily due to the expected utilization of prior year net operating loss carryforwards in excess of amounts previously benefitted and the lower statutory tax rate in Sweden.

Edgar Filing: REPLIGEN CORP - Form 10-Q

For the three months ended June 30, 2012, we had income before taxes of \$1,778,193 and a tax provision of \$208,230 based on an effective tax rate of 8.72%. The effective income tax rate is based upon the estimated income for the year and the composition of the income in different jurisdictions. The effective tax rate differs from the statutory tax rate primarily due to the utilization of prior year net operating loss carryforwards and credits.

Table of Contents

Six months ended June 30, 2013 vs. June 30, 2012

Revenues

Total revenues for the six-month periods ended June 30, 2013 and 2012 were comprised of the following:

| | Six months ended June 30, | | % Change 2013 vs. 2012 |
|-------------------------------|------------------------------------|------------------|---------------------------|
| | 2013 | 2012 | |
| | (in thousands, except percentages) | | |
| Bioprocessing product revenue | \$ 24,948 | \$ 21,002 | 19% |
| Royalty and other revenue | 9,017 | 7,346 | 23% |
| Total revenue | \$ 33,965 | \$ 28,348 | 20% |

Sales of bioprocessing products for the six-month periods ended June 30, 2013 and 2012 were \$24,948,000 and \$21,002,000, respectively, an increase of \$3,946,000, or 19%. This increase was primarily due to increases in orders from our key bioprocessing customers. Sales of our bioprocessing products can be impacted by the timing of orders, development efforts at our customers or end-users and regulatory approvals for biologics that incorporate our products, which may result in significant quarterly fluctuations. Such quarterly fluctuations are expected but they may not be predictive of future revenue or otherwise indicate a trend.

Pursuant to the settlement with Bristol, we recognized royalty revenue of \$8,131,000 and \$6,660,000 for the six-month periods ended June 30, 2013 and 2012, respectively. We expect to receive these royalty payments for Bristol's sales through December 31, 2013. We expect that the upcoming loss of these royalty payments will materially and adversely affect our revenue and operating results.

For the six months ended June 30, 2013 and 2012, we recognized \$763,000 and \$686,000, respectively, of revenue from sponsored research and development projects under agreements with the National Institutes of Health / Scripps Research Institute, Go Friedrich's Ataxia Research, and the Friedrich's Ataxia Research Alliance.

We recognized \$124,000 of revenue from the upfront payment under the Pfizer License Agreement in the six months ended June 30, 2013.

Costs and operating expenses

Total costs and operating expenses for the six-month periods ended June 30, 2013 and 2012 were comprised of the following:

| | Six months ended June 30, | | % Change 2013 vs. 2012 |
|---|------------------------------------|------------------|---------------------------|
| | 2013 | 2012 | |
| | (in thousands, except percentages) | | |
| Cost of product revenue | \$ 12,194 | \$ 12,618 | -3% |
| Cost of royalty revenue | 1,220 | 999 | 22% |
| Research and development | 4,490 | 5,714 | -21% |
| Selling, general and administrative | 6,432 | 6,846 | -6% |
| Contingent consideration fair value adjustments | (19) | | -100% |
| Gain on bargain purchase | | (314) | 100% |
| Total costs and operating expenses | \$ 24,317 | \$ 25,863 | -6% |

Cost of product revenue was approximately \$12,194,000 and \$12,618,000 for the six-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$424,000 or 3%. This decrease is primarily due to operational efficiencies implemented during 2012 at Repligen Sweden offset by higher overall costs associated with increased bioprocessing product revenue in the first six months of 2013 as compared to the first six months of 2012. Gross margins may decline slightly in the second half of the year based on expected production volume and shipments, product mix and

Edgar Filing: REPLIGEN CORP - Form 10-Q

the sale of higher cost inventory that was produced in 2012.

Pursuant to the settlement with Bristol, we must remit 15% of royalty revenue received through the expiration of the settlement agreement in December 2013 to the University of Michigan. For the six-month periods ended June 30, 2013 and 2012, the cost of royalty revenue was approximately \$1,220,000 and \$999,000, respectively. This increase is directly related to the increase in Bristol royalty revenue noted above.

Table of Contents

Research and development expenses were approximately \$4,490,000 and \$5,714,000 for the six-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$1,224,000 or 21%. This decrease is primarily attributed to a reduction in therapeutics related research and development expenses partially offset by an increase in bioprocessing research and development expense. For the six-month period ended June 30, 2013, approximately \$2,300,000 of our total research and development expenses was incurred on bioprocessing research and development activities.

Significant fluctuations in research and development expenses may occur from period to period depending on the nature, timing, and extent of development activities over any given period of time. Many resources including personnel, supplies and equipment are shared by all of the development programs. As a result, and due to the significant risks and uncertainties in drug development, we are not able to provide cumulative spending to date or predict total development costs for any particular program. In August 2012, we announced a strategic focus on our Bioprocessing business and a simultaneous effort to find partners, out-licensing opportunities or other funding arrangements with external parties to reduce or eliminate the net expenditures on research and development activities for our therapeutic programs. We expect total research and development expenses to be lower in the second half of 2013 than in the first half of the year. We expect that any research and development activities that we undertake in the future with respect to our therapeutic drug candidates will be limited to those which could support the transition of development and commercialization activities for these programs to potential collaborators. We intend to focus the majority of our future research and development efforts on developing new bioprocessing products.

Selling, general and administrative expenses were approximately \$6,432,000 and \$6,846,000 for the six-month periods ended June 30, 2013 and 2012, respectively, a decrease of \$414,000 or 6%. This decrease is primarily attributable to a reduction in outside professional services expenses of approximately \$600,000, a reduction in spending on sales and marketing related to therapeutics programs of approximately \$300,000 offset by higher employee related expenses of approximately \$492,000. Selling, general and administrative expenses in the second quarter of 2012 included non-recurring legal and accounting costs related to complying with reporting requirements with respect to the combined entity after the completion of the Novozymes acquisition, and other business development and corporate activities. For each of the remaining quarters in 2013, we expect similar levels of selling, general and administrative expenses to those incurred in the quarter ended June 30, 2013.

For the six months ended June 30, 2012, we recorded a \$314,000 gain on bargain purchase associated with a working capital adjustment related to the Novozymes Acquisition.

Investment income

Investment income includes income earned on invested cash balances. Investment income was approximately \$127,000 and \$61,000 for the six-month periods ended June 30, 2013 and 2012, respectively. This increase of \$66,000, or 108%, is primarily attributable to slightly higher interest rates and slightly higher average invested cash balances.

Other (expense) income

Other (expense) income was approximately (\$93,000) and \$568,000 for the six-month periods ended June 30, 2013 and 2012, respectively, and are primarily attributable to foreign currency gains (losses) related to our Sweden operations.

Provision for income taxes

For the six months ended June 30, 2013, we had income before taxes of \$9,655,771 and a tax provision of \$2,778,348 for an effective tax rate of approximately 28.77%. This is based on an expected effective tax rate of 25.69% for the year ending December 31, 2013 plus approximately \$298,000 of discrete items recognized in the quarter ended March 31, 2013. The effective income tax rate is based upon the estimated income for the year and the composition of the income in different tax jurisdictions. Effective January 1, 2013, Sweden's statutory tax rate decreased from 26.3% to 22.0%. The effective tax rate differs from the statutory tax rate primarily due to the utilization of prior year net operating loss carryforwards and credits.

For the six-month period ended June 30, 2012, we had income before taxes of approximately \$3,063,572 and a tax provision of \$267,137, based on an effective tax rate of 8.72%. The effective income tax rate is based upon the estimated income for the year and the composition of the income in different jurisdictions. The effective tax rate differs from the statutory tax rate primarily due to the utilization of prior year net operating loss carryforwards and credits.

Liquidity and capital resources

Edgar Filing: REPLIGEN CORP - Form 10-Q

We have financed our operations primarily through sales of equity securities, revenues derived from product sales, and research grants, as well as proceeds and royalties from license arrangements and a litigation settlement. Given the uncertainties related to pharmaceutical product development, we are currently unable to reliably estimate when, if ever, our therapeutic product candidates will generate revenue and cash flows. Our revenue for the foreseeable future will be limited to our bioprocessing product revenue, royalties from Bristol's sales of Orencia through December 31, 2013, research and development grants, and potential milestones earned under our collaboration agreement with Pfizer or under other potential out-licensing arrangements that may occur. We will not receive royalty payments for Bristol's sales of Orencia after December 31, 2013 and, as a result, we may need to use our existing capital resources to fund a portion of our operating activities. If we are unable to replace these royalty payments with an alternative source of revenue and related income, our revenue and operating results will be materially and adversely affected.

Table of Contents

At June 30, 2013, we had cash and marketable securities of \$62,791,000 compared to \$49,970,000 at December 31, 2012. A deposit for leased office space of \$200,000 is classified as restricted cash and is not included in cash and marketable securities totals for June 30, 2013 or December 31, 2012.

Operating activities

For the six-month period ended June 30, 2013, our operating activities provided cash of \$12,391,000 reflecting net income of \$6,877,000 and non-cash charges totaling \$3,065,000 including depreciation, amortization, stock-based compensation charges and deferred tax expense. The remaining cash flow provided by operations resulted from favorable changes in various working capital accounts, in particular the collection of \$5 million due from Pfizer pursuant to our collaboration agreement.

For the six-month period ended June 30, 2012, our operating activities provided cash of \$3,739,000 reflecting net income of \$2,796,000 and non-cash charges totaling \$1,900,000 including depreciation, amortization, stock-based compensation charges and the gain on bargain purchase. The remaining cash flow used in operations resulted from unfavorable changes in various working capital accounts.

Investing activities

We place our marketable security investments in high quality credit instruments as specified in our investment policy guidelines. Our investing activities consumed \$5,811,000 for the six-month period ended June 30, 2013, primarily due to net purchases of marketable debt securities as well as \$1,105,000 used for fixed asset additions. For the six-month period ended June 30, 2012, our investing activities provided \$993,000, primarily due to net redemptions of marketable debt securities offset by \$514,000 used for fixed asset additions.

Financing activities

Exercises of stock options provided cash proceeds of \$2,035,000 in the six-month-period ended June 30, 2013. In the six months ended June 30, 2012, exercises of stock options provided \$135,000 of cash.

We do not currently use derivative financial instruments.

Working capital increased by approximately \$15,239,000 to \$70,696,000 at June 30, 2013 from \$55,457,000 at December 31, 2012 due to the various changes noted above.

Our future capital requirements will depend on many factors, including the following:

the expansion of our bioprocessing business;

the ability to sustain sales and profits of our bioprocessing products;

the resources required to continue the integration of the Novozymes Biopharma Business and recognize expected synergies;

our ability to establish one or more partnerships for development and commercialization of RG1068 or RG2833;

the scope of and progress made in our research and development activities;

our ability to acquire additional bioprocessing products or product candidates;

the extent of any share repurchase activity;

the success of any proposed financing efforts; and

the amount of royalty revenues we receive from Bristol through December 31, 2013.

Absent acquisitions of additional products, product candidates or intellectual property, we believe our current cash balances are adequate to meet our cash needs for at least the next 24 months. We expect operating expenses in the year ending December 31, 2013 to decrease as we invest less in therapeutic drug development and simultaneously improve gross margins through greater optimization of our two production facilities and other process improvements we have developed internally. We expect to incur continued spending related to the development and expansion of our bioprocessing product lines for the foreseeable future. Our future capital requirements may include, but are not limited to, expansion of our Waltham facility and other purchases of property, plant and equipment, the acquisition of additional bioprocessing products and technologies to complement our existing manufacturing capabilities, and continued investment in our intellectual property portfolio.

Table of Contents

We plan to continue to invest in our bioprocessing business and in key research and development activities associated with our efforts to identify and consummate development and commercialization partnerships. We actively evaluate various strategic transactions on an ongoing basis, including monetizing existing assets and licensing or acquiring complementary products, technologies or businesses that would complement our existing portfolio of development programs. We continue to seek to acquire such potential assets that may offer us the best opportunity to create value for our shareholders. In order to acquire such assets, we may need to seek additional financing to fund these investments. This may require the issuance or sale of additional equity or debt securities. The sale of additional equity may result in additional dilution to our stockholders. Should we need to secure additional financing to acquire a product, fund future investment in research and development, or meet our future liquidity requirements, we may not be able to secure such financing, or obtain such financing on favorable terms because of the volatile nature of the biotechnology marketplace.

Off-Balance Sheet Arrangements

We do not have any special purpose entities or off-balance sheet financing arrangements as of June 30, 2013.

Contractual obligations

As of June 30, 2013, we have the following fixed obligations and commitments:

| (In thousands) | Total | Payments Due by Period | | | |
|------------------------------|-----------|------------------------|-------------|-------------|-------------------|
| | | Less than 1 Year | 1 - 3 Years | 3 - 5 Years | More than 5 Years |
| Operating lease obligations | \$ 14,305 | \$ 2,186 | \$ 4,373 | \$ 2,722 | \$ 5,024 |
| Purchase obligations (1) | 5,739 | 5,739 | | | |
| Contingent consideration (2) | 1,539 | 1,105 | 201 | 233 | |
| Total | \$ 21,583 | \$ 9,030 | \$ 4,574 | \$ 2,955 | \$ 5,024 |

(1) Primarily represents purchase orders for the procurement of raw material for manufacturing.

(2) Represents the current estimated fair value of contingent consideration amounts relating to acquisitions. These amounts are recorded in accrued expenses and long term liabilities on our consolidated balance sheets.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements which are made pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). The forward-looking statements in this Quarterly Report on Form 10-Q do not constitute guarantees of future performance. Investors are cautioned that statements in this Quarterly Report on Form 10-Q which are not strictly historical statements, including, without limitation, express or implied statements or guidance regarding current or future financial performance and position, our strategic decision to focus on the growth of our bioprocessing business, management's strategy, plans and objectives for future operations or acquisitions, clinical trials and results, litigation strategy, product candidate research, development and regulatory approval, selling, general and administrative expenditures, intellectual property, development and manufacturing plans, availability of materials and product and adequacy of capital resources and financing plans constitute forward-looking statements. Such forward-looking statements are subject to a number of risks and uncertainties that could cause actual results to differ materially from those anticipated, including, without limitation, risks associated with: the success of current and future collaborative or supply relationships, including our agreement with Pfizer, our ability to successfully negotiate and consummate development and commercialization partnerships for our portfolio of therapeutic and diagnostic assets on acceptable terms, if at all, our ability to successfully grow our bioprocessing business, including as a result of acquisition, commercialization or partnership opportunities, the success of our clinical trials and our ability to develop and commercialize products, our ability to obtain required regulatory approvals, our compliance with all Food and Drug Administration regulations, our ability to obtain, maintain and protect intellectual property rights for our products, the risk of litigation regarding our patent and other intellectual property rights, the risk of litigation with collaborative partners, our limited sales and marketing experience and capabilities, our limited manufacturing capabilities and our dependence on third-party manufacturers and value-added resellers, our ability to hire and retain skilled personnel, the market acceptance of our products, reduced demand for our products that adversely impacts our future revenues, cash flows, results of operations and financial condition, our ability to compete with larger, better financed pharmaceutical and biotechnology companies that may develop new approaches to the treatment of our targeted diseases, our history of losses and expectation

Edgar Filing: REPLIGEN CORP - Form 10-Q

of incurring continued losses, our ability to generate future revenues, our ability to successfully integrate Repligen Sweden, including achieving manufacturing efficiencies at Repligen Sweden, our ability to raise additional capital to continue our drug development programs, our volatile stock price, the effects of our anti-takeover provisions, and the impact of the expiration of Bristol-Meyers Squibb royalty payments based on its U.S. sales of Orencia®. Further information on potential risk factors that could affect our financial results are included in the filings made by us from time to time with the Securities and Exchange Commission including under the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2012.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk

We have investments in commercial paper, U.S. Government and agency securities as well as corporate bonds and other debt securities. As a result, we are exposed to potential loss from market risks that may occur as a result of changes in interest rates, changes in credit quality of the issuer or otherwise.

We generally place our marketable security investments in high quality credit instruments, as specified in our investment policy guidelines. A hypothetical 100 basis point decrease in interest rates would result in an approximate \$166,000 decrease in the fair value of our investments as of June 30, 2013. We believe, however, that the conservative nature of our investments mitigates our interest rate exposure, and our investment policy limits the amount of our credit exposure to any one issue, issuer (with the exception of U.S. agency obligations) and type of instrument. We do not expect any material loss from our marketable security investments and therefore believe that our potential interest rate exposure is limited.

Foreign Exchange Risk

Transactions by our subsidiary, Repligen Sweden, may be denominated in Swedish kronor, British pound sterling, U.S. dollars, or in Euros while the entity's functional currency is the Swedish krona. Exchange gains or losses resulting from the translation between the transactional currency and the functional currency of Repligen Sweden are included in our consolidated statements of comprehensive income (loss). The functional currency of the Company is U.S. dollars. Fluctuations in exchange rates may adversely affect our results of operations, financial position and cash flows. We currently do not seek to hedge this exposure to fluctuations in exchange rates.

ITEM 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of the principal executive officer and the principal financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the principal executive officer and principal financial officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures were effective in ensuring that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, on a timely basis, and is accumulated and communicated to the Company's management, including the Company's principal executive officer and the Company's principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

There was no change in the Company's internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we may be subject to other legal proceedings and claims in the ordinary course of business. We are not currently aware of any such proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on our business, financial condition or results of operations.

ITEM 1A. RISK FACTORS

The matters discussed in this Quarterly Report on Form 10-Q include forward-looking statements that involve risks or uncertainties. These statements are neither promises nor guarantees, but are based on various assumptions by management regarding future circumstances, over many of which Repligen has little or no control. A number of important risks and uncertainties, including those identified under the caption "Risk Factors" in Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2012 and subsequent filings as well as risks and uncertainties discussed elsewhere in this Form 10-Q, could cause our actual results to differ materially from those in the forward-looking statements.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In June 2008, the Board of Directors authorized a program to repurchase up to 1.25 million shares of our common stock to be repurchased at the discretion of management from time to time in the open market or through privately negotiated transactions. The repurchase program has no set expiration date and may be suspended or discontinued at any time. We did not repurchase any shares of common stock during the three or six-month periods ended June 30, 2013. As of June 30, 2013, there are 657,173 shares remaining under this authorization.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.
