Item 7.01. Regulation FD Disclosure.

As reported on January 13, 2014, the Company expects a retroactive rate reduction at its Washington health plan to reduce the Company's pre-tax income for the fourth quarter of 2013 by approximately \$15 million. The Company expects that this retroactive rate reduction will reduce net income per share for the quarter and the year ended December 31, 2013 by approximately \$0.20.

For the year ended December 31, 2013, the Company now expects its net income per diluted share from continuing operations to be approximately \$0.95. The Company had previously reported that, for the year ended December 31, 2013, it expected net income per diluted share from continuing operations to be approximately \$1.15.

Unaudited Non-GAAP¹ Financial Measure

For the year ended December 31, 2013, the Company now expects adjusted net income per diluted share, continuing operations to be approximately \$3.11. The Company had previously reported that, for the year ended December 31, 2013, it expected adjusted net income per diluted share, continuing operations to be approximately \$3.20.

The Company uses adjusted net income per diluted share, continuing operations, as a supplemental metric in evaluating its financial performance, making financing and business decisions, and forecasting and planning for future periods. Management believes this measure is a useful supplemental measure to investors in evaluating the Company's performance, and when comparing the Company's performance with the performance of other public companies in the health care industry. This non-GAAP financial measure should be considered as a supplement to, and not as substitute for or superior to, GAAP measures.

The following table reconciles estimated net income per diluted share, continuing operations, which the Company believes to be the most comparable GAAP measure, to estimated adjusted net income per diluted share, continuing operations. All amounts in the following table are unaudited estimates.

	Year Ended December 31, 2013
Net income per diluted share, continuing operations	\$ 0.95
Adjustments, net of tax:	
Depreciation, and amortization of capitalized software	0.98
Stock-based compensation	0.52
Amortization of convertible senior notes and lease financing obligations	0.31
Amortization of intangible assets	0.28
Change in fair value of derivatives	0.07
Adjusted net income per diluted share, continuing operations	\$ 3.11

¹ GAAP stands for Generally Accepted Accounting Principles.
