CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of our statements contained in this document, including matters discussed under the caption Management s Discussion and Analysis of Financial Condition and Results of Operation, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements relate to future events or our future financial performance and include statements about the competitiveness of the banking industry, potential regulatory obligations, our entrance and expansion into other markets, including through potential acquisitions, our other business strategies and other statements that are not historical facts. Forward-looking statements are not guarantees of performance or results. When we use words like may, plan, contemplate, anticipate, believe, intend, continue, expect, project, estimate, could, should, would, and similar expressions, you should consider them as identifying forward-looking statements, although we may use other phrasing. These forward-looking statements involve risks and uncertainties and are based on our beliefs and assumptions, and on the information available to us at the time that these disclosures were prepared. These forward-looking statements involve risks and uncertainties and may not be realized due to a variety of factors, including, but not limited to, the following:

- the effects of future economic conditions, including inflation or a decrease in commercial real estate and residential housing values;
- governmental monetary and fiscal policies, as well as legislative and regulatory changes;
- the impact of the Dodd-Frank financial regulatory reform act and regulations issued thereunder;
- the risks of changes in interest rates or the level and composition of deposits, loan demand and the values of loan collateral, securities and interest sensitive assets and liabilities;
- the effects of terrorism and efforts to combat it;
- credit risks;
- the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market area and elsewhere, including institutions operating regionally, nationally and internationally, together with competitors offering banking products and services by mail, telephone and the Internet;
- the effect of any mergers, acquisitions or other transactions to which we or our subsidiaries may from time to time be a party, including our ability to successfully integrate any businesses that we acquire;

- the failure of assumptions underlying the establishment of our allowance for loan losses; and
- the failure of assumptions underlying the estimates of the fair values for our covered assets, FDIC indemnification asset and FDIC claims receivable.

All written or oral forward-looking statements attributable to us are expressly qualified in their entirety by this Cautionary Note. Our actual results may differ significantly from those we discuss in these forward-looking statements. For other factors, risks and uncertainties that could cause our actual results to differ materially from estimates and projections contained in these forward-looking statements, see the Risk Factors section of our Form 10-K filed with the Securities and Exchange Commission (the SEC) on February 26, 2016.

Condensed Notes to Consolidated Financial Statements

(Unaudited)

1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Home BancShares, Inc. (the Company or HBI) is a bank holding company headquartered in Conway, Arkansas. The Company is primarily engaged in providing a full range of banking services to individual and corporate customers through its wholly-owned community bank subsidiary Centennial Bank (sometimes referred to as Centennial or the Bank). The Bank has branch locations in Arkansas, Florida and South Alabama and a loan production office in New York City. The Company is subject to competition from other financial institutions. The Company also is subject to the regulation of certain federal and state agencies and undergoes periodic examinations by those regulatory authorities.

A summary of the significant accounting policies of the Company follows:

Operating Segments

Operating segments are components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Bank is the only significant subsidiary upon which management makes decisions regarding how to allocate resources and assess performance. Each of the branches of the Bank provide a group of similar community banking services, including such products and services as commercial, real estate and consumer loans, time deposits, checking and savings accounts. The individual bank branches have similar operating and economic characteristics. While the chief decision maker monitors the revenue streams of the various products, services and branch locations, operations are managed and financial performance is evaluated on a Company-wide basis. Accordingly, all of the community banking services and branch locations are considered by management to be aggregated into one reportable operating segment, community banking.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, the valuation of investment securities, the valuation of foreclosed assets, the valuations of assets acquired and liabilities assumed in business combinations, covered loans and the related indemnification asset. In connection with the determination of the allowance for loan losses and the valuation of foreclosed assets, management obtains independent appraisals for significant properties.

Principles of Consolidation

The consolidated financial statements include the accounts of HBI and its subsidiaries. Significant intercompany accounts and transactions have been eliminated in consolidation.

Reclassifications

Various items within the accompanying consolidated financial statements for previous years have been reclassified to provide more comparative information. These reclassifications had no effect on net earnings or stockholders equity.

Table of Contents

Interim financial information

The accompanying unaudited consolidated financial statements as of March 31, 2016 and 2015 have been prepared in condensed format, and therefore do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

The information furnished in these interim statements reflects all adjustments which are, in the opinion of management, necessary for a fair statement of the results for each respective period presented. Such adjustments are of a normal recurring nature. The results of operations in the interim statements are not necessarily indicative of the results that may be expected for any other quarter or for the full year. The interim financial information should be read in conjunction with the consolidated financial statements and notes thereto included in the Company s 2015 Form 10-K, filed with the Securities and Exchange Commission.

Earnings per Share

Basic earnings per share is computed based on the weighted-average number of shares outstanding during each year. Diluted earnings per share is computed using the weighted-average shares and all potential dilutive shares outstanding during the period. The following table sets forth the computation of basic and diluted earnings per share (EPS) for the following periods:

	Three Months Ended March 31,	
	2016	**2015**
	(In thousands)	
Net income	$ 41,427	$ 31,119
Average shares outstanding	70,195	67,589
Effect of common stock options	149	334
Average diluted shares outstanding	70,344	67,923
Basic earnings per share	$ 0.59	$ 0.46
Diluted earnings per share	$ 0.59	$ 0.46

2. Business Combinations

Acquisition of Florida Business BancGroup, Inc.

On October 1, 2015, the Company completed its acquisition of Florida Business BancGroup, Inc. (FBBI), parent company of Bay Cities Bank (Bay Cities). The Company paid a purchase price to the FBBI shareholders of $104.1 million for the FBBI acquisition. Under the terms of the agreement, shareholders of FBBI received 2,079,854 shares of its common stock valued at approximately $83.8 million as of October 1, 2015, plus approximately $20.3 million in cash in exchange for all outstanding shares of FBBI common stock. A portion of the cash consideration, $2.0 million, has been placed into escrow, and FBBI shareholders will have a contingent right to receive their pro-rata portions of such amount. The amount, if any, of such escrowed funds to be released to FBBI shareholders will depend upon the

amount of losses that HBI incurs in the two years following the completion of the merger related to two class action lawsuits that are pending against Bay Cities.

FBBI formerly operated six branch locations and a loan production office in the Tampa Bay area and in Sarasota, Florida. Including the effects of any purchase accounting adjustments, as of October 1, 2015, FBBI had approximately $564.5 million in total assets, $408.3 million in loans after $14.1 million of loan discounts, and $472.0 million in deposits.

See Note 2 Business Combinations in the Notes to Consolidated Financial Statements on Form 10-K for the year ended December 31, 2015 for an additional discussion regarding the acquisition of FBBI.

Table of Contents

Acquisition of Pool of National Commercial Real Estate Loans

On April 1, 2015, the Company s wholly-owned bank subsidiary, Centennial, entered into an agreement with AM PR LLC, an affiliate of J.C. Flowers & Co. (collectively, the Seller), to purchase a pool of national commercial real estate loans totaling approximately $289.1 million for a purchase price of 99% of the total principal value of the acquired loans. The purchase of the loans was completed on April 1, 2015. The acquired loans were originated by the former Doral Bank within its Doral Property Finance portfolio (DPF Portfolio) and were transferred to the Seller by Banco Popular of Puerto Rico (Popular) upon its acquisition of the assets and liabilities of Doral Bank from FDIC, as receiver for the failed Doral Bank. This pool of loans is now housed in a division of Centennial known as the Centennial Commercial Finance Group (Centennial CFG). The Centennial CFG is responsible for servicing the acquired loan pool and originating new loan production.

In connection with this acquisition of loans, we opened a loan production office on April 23, 2015 in New York City. Through the loan production office, Centennial CFG is building out a national lending platform focusing on commercial real estate plus commercial and industrial loans. As of March 31, 2016 and December 31, 2015, Centennial CFG had $851.4 and $715.7 million in total loans net of discount, respectively. Centennial CFG currently has plans to build this loan portfolio to $1.2 billion to $1.3 billion by the end of 2016. During 2016, we have plans to open a deposit-only branch location in New York City.

Acquisition of Doral Bank s Florida Panhandle operations

On February 27, 2015, the Company s banking subsidiary, Centennial, acquired all the deposits and substantially all the assets of Doral Bank s Florida Panhandle operations (Doral Florida) through an alliance agreement with Popular who was the successful lead bidder with the FDIC on the failed Doral Bank of San Juan, Puerto Rico. Including the effects of the purchase accounting adjustments, the acquisition provided the Company with loans of approximately $37.9 million net of loan discounts, deposits of approximately $467.6 million, plus a $428.2 million cash settlement to balance the transaction. There is no loss-share with the FDIC in the acquired assets.

Prior to the acquisition, Doral Florida operated five branch locations in Panama City, Panama City Beach and Pensacola, Florida plus a loan production office in Tallahassee, Florida. At the time of acquisition, Centennial operated 29 branch locations in the Florida Panhandle. As a result, the Company closed all five branch locations during the July 2015 systems conversion and returned the facilities back to the FDIC.

See Note 2 Business Combinations in the Notes to Consolidated Financial Statements on Form 10-K for the year ended December 31, 2015 for an additional discussion regarding the acquisition of Doral Florida.

3. Investment Securities

The amortized cost and estimated fair value of investment securities that are classified as available-for-sale and held-to-maturity are as follows:

	March 31, 2016			
	Available-for-Sale			
	Amortized Cost	Gross Unrealized	Gross Unrealized	Estimated Fair Value

		Gains	(Losses)	
		(In thousands)

Assets, principally investment securities, having a carrying value of approximately $1.19 billion and $1.25 billion at March 31, 2016 and December 31, 2015, respectively, were pledged to secure public deposits and for other purposes required or permitted by law. Also, investment securities pledged as collateral for repurchase agreements totaled approximately $121.9 million and $128.4 million at March 31, 2016 and December 31, 2015, respectively.

The amortized cost and estimated fair value of securities classified as available-for-sale and held-to-maturity at March 31, 2016, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Available-for-Sale		Held-to-Maturity

Table of Contents

For purposes of the maturity tables, mortgage-backed securities, which are not due at a single maturity date, have been allocated over maturity groupings based on anticipated maturities. The mortgage-backed securities may mature earlier than their weighted-average contractual maturities because of principal prepayments.

During the three-month period ended March 31, 2016, approximately $1.4 million, in available-for-sale securities were sold. The gross realized gains on the sales for the three month period ended March 31, 2016 totaled approximately $10,000. The income tax expense/benefit to net security gains and losses was 39.225% of the gross amounts.

During the three-month period ended March 31, 2015, approximately $931,000, in available-for-sale securities were sold. The gross realized gains on the sales for the three month period ended March 31, 2015 totaled approximately $4,000. The income tax expense/benefit to net security gains and losses was 39.225% of the gross amounts.

The Company evaluates all securities quarterly to determine if any unrealized losses are deemed to be other than temporary. In completing these evaluations the Company follows the requirements of FASB ASC 320, *Investments - Debt and Equity Securities.* Certain investment securities are valued less than their historical cost. These declines are primarily the result of the rate for these investments yielding less than current market rates. Based on evaluation of available evidence, management believes the declines in fair value for these securities are temporary. The Company does not intend to sell or believe it will be required to sell these investments before recovery of their amortized cost bases, which may be maturity. Should the impairment of any of these securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period the other-than-temporary impairment is identified.

During the three-month period ended March 31, 2016, no securities were deemed to have other-than-temporary impairment.

For the three months ended March 31, 2016, the Company had investment securities of approximately $1.5 million in unrealized losses, which have been in continuous loss positions for more than twelve months. Excluding impairment write downs taken in prior periods, the Company s assessments indicated that the cause of the market depreciation was primarily the change in interest rates and not the issuer s financial condition, or downgrades by rating agencies. In addition, approximately 82.1% of the Company s investment portfolio matures in five years or less. As a result, the Company has the ability and intent to hold such securities until maturity.

The following shows gross unrealized losses and estimated fair value of investment securities classified as available-for-sale and held-to-maturity with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual investment securities have been in a continuous loss position as of March 31, 2016 and December 31, 2015:

	March 31, 2016

Income earned on securities for the three months ended March 31, 2016 and 2015, is as follows:

	Three Months Ended March 31,	
	2016	2015
	(In thousands)	
Taxable:		
Available-for-sale	$ 4,567	$ 4,507
Held-to-maturity	883	1,036
Non-taxable:		
Available-for-sale	1,574	1,346
Held-to-maturity	1,241	1,406
Total	$ 8,265	$ 8,295

4. Loans Receivable Not Covered by Loss Share

The various categories of loans not covered by loss share are summarized as follows:

	March 31, 2016	December 31, 2015
	(In thousands)	
Real estate:		
Commercial real estate loans		
Non-farm/non-residential	$ 2,889,735	$ 2,968,147
Construction/land development	976,098	943,095
Agricultural	75,763	75,027
Residential real estate loans		
Residential 1-4 family	1,145,080	1,130,714
Multifamily residential	437,721	429,872

Total real estate	5,524,397	5,546,855
Consumer	50,090	52,258
Commercial and industrial	1,070,139	850,357
Agricultural	63,482	67,109
Other	84,062	62,822
Loans receivable not covered by loss share	$ 6,792,170	$ 6,579,401

During the three-month periods ended March 31, 2016 and 2015, no SBA loans were sold.

Mortgage loans held for sale of approximately $30.6 million and $38.9 million at March 31, 2016 and December 31, 2015, respectively, are included in residential 1-4 family loans. Mortgage loans held for sale are carried at the lower of cost or fair value, determined using an aggregate basis. Gains and losses resulting from sales of mortgage loans are recognized when the respective loans are sold to investors. Gains and losses are determined by the difference between the selling price and the carrying amount of the loans sold, net of discounts collected or paid. The Company obtains forward commitments to sell mortgage loans to reduce market risk on mortgage loans in the process of origination and mortgage loans held for sale. The forward commitments acquired by the Company for mortgage loans in process of origination are considered mandatory forward commitments. Because these commitments are structured on a mandatory basis, the Company is required to substitute another loan or to buy back the commitment if the original loan does not fund. These commitments are derivative instruments and their fair values at March 31, 2016 and December 31, 2015 were not material.

5. Loans Receivable Covered by FDIC Loss Share

The Company evaluated loans purchased in conjunction with the acquisitions under purchase and assumption agreements with the FDIC for impairment in accordance with the provisions of FASB ASC Topic 310-30. Purchased covered loans are considered impaired if there is evidence of credit deterioration since origination and if it is probable that not all contractually required payments will be collected.

The following table reflects the carrying value of all purchased FDIC covered impaired loans as of March 31, 2016 and December 31, 2015 for the Company:

	March 31, 2016	December 31, 2015
	(In thousands)	
Real estate:		
Commercial real estate loans		
Non-farm/non-residential	$ 192	$ 188
Construction/land development	1,702	1,692
Agricultural		
Residential real estate loans		
Residential 1-4 family	57,243	59,565
Multifamily residential	379	384
Total real estate	59,516	61,829
Consumer		
Commercial and industrial	414	230
Other	112	111
Loans receivable covered by FDIC loss share	$ 60,042	$ 62,170

The acquired loans were grouped into pools based on common risk characteristics and were recorded at their estimated fair values, which incorporated estimated credit losses at the acquisition dates. These loan pools are systematically reviewed by the Company to determine material changes in cash flow estimates from those identified at the time of the acquisition. Techniques used in determining risk of loss are similar to the Centennial non-covered loan portfolio, with most focus being placed on those loan pools which include the larger loan relationships and those loan

pools which exhibit higher risk characteristics. As of March 31, 2016 and December 31, 2015, $3.1 million and $3.3 million, respectively, were accruing loans past due 90 days or more.

Table of Contents

6. Allowance for Loan Losses, Credit Quality and Other

The following table presents a summary of changes in the allowance for loan losses for the non-covered and covered loan portfolios for the three months ended March 31, 2016:

	For Loans Not Covered by Loss Share	For Loans Covered by FDIC Loss Share (In thousands)	Total
Allowance for loan losses:			
Beginning balance	$ 66,636	$ 2,588	$ 69,224
Loans charged off	(3,876)	(71)	(3,947)
Recoveries of loans previously charged off	1,343	9	1,352
Net loans recovered (charged off)	(2,533)	(62)	(2,595)
Provision for loan losses for non-covered loans	5,677		5,677
Net provision for loan losses for covered loans			
Balance, March 31, 2016	$ 69,780	$ 2,526	$ 72,306

Allowance for Loan Losses and Credit Quality for Non-Covered Loans

The following tables present the balance in the allowance for loan losses for the non-covered loan portfolio for the three months ended March 31, 2016, and the allowance for loan losses and recorded investment in loans not covered by loss share based on portfolio segment by impairment method as of March 31, 2016. Allocation of a portion of the allowance to one type of loans does not preclude its availability to absorb losses in other categories. Additionally, the Company s discounts for credit losses on non-covered loans acquired were $129.8 million, $139.5 million and $134.7 million at March 31, 2016, December 31, 2015 and March 31, 2015, respectively.

Total impaired loans	$ 99,929	$ 91,593	$ 4,371	$ 88,062	$ 2,077

Note: Purchased non-covered loans acquired with deteriorated credit quality are accounted for on a pooled basis under ASC 310-30. All of these pools are currently considered to be performing resulting in none of the purchased non-covered loans acquired with deteriorated credit quality being classified as non-covered impaired loans as of December 31, 2015.

Interest recognized on non-covered impaired loans during the three months ended March 31, 2016 and 2015 was approximately $549,000 and $494,000, respectively. The amount of interest recognized on non-covered impaired loans on the cash basis is not materially different than the accrual basis.

Credit Quality Indicators. As part of the on-going monitoring of the credit quality of the Company s loan portfolio, management tracks certain credit quality indicators including trends related to (i) the risk rating of loans, (ii) the level of classified loans, (iii) net charge-offs, (iv) non-performing loans and (v) the general economic conditions in Arkansas, Florida and Alabama.

The Company utilizes a risk rating matrix to assign a risk rating to each of its loans. Loans are rated on a scale from 1 to 8. Descriptions of the general characteristics of the 8 risk ratings are as follows:

Risk rating 1 Excellent. Loans in this category are to persons or entities of unquestionable financial strength, a highly liquid financial position, with collateral that is liquid and well margined. These borrowers have performed without question on past obligations, and the Bank expects their performance to continue. Internally generated cash flow covers current maturities of long-term debt by a substantial margin. Loans secured by bank certificates of deposit and savings accounts, with appropriate holds placed on the accounts, are to be rated in this category.

Risk rating 2 Good. These are loans to persons or entities with strong financial condition and above-average liquidity that have previously satisfactorily handled their obligations with the Bank. Collateral securing the Bank s debt is margined in accordance with policy guidelines. Internally generated cash flow covers current maturities of long-term debt more than adequately. Unsecured loans to individuals supported by strong financial statements and on which repayment is satisfactory may be included in this classification.

Risk rating 3 Satisfactory. Loans to persons or entities with an average financial condition, adequate collateral margins, adequate cash flow to service long-term debt, and net worth comprised mainly of fixed assets are included in this category. These entities are minimally profitable now, with projections indicating continued profitability into the foreseeable future. Closely held corporations or businesses where a majority of the profits are withdrawn by the owners or paid in dividends are included in this rating category. Overall, these loans are basically sound.

Risk rating 4 Watch. Borrowers who have marginal cash flow, marginal profitability or have experienced an unprofitable year and a declining financial condition characterize these loans. The borrower has in the past satisfactorily handled debts with the Bank, but in recent months has either been late, delinquent in making payments, or made sporadic payments. While the Bank continues to be adequately secured, margins have decreased or are decreasing, despite the borrower s continued satisfactory condition. Other characteristics of borrowers in this class include inadequate credit information, weakness of financial statement and repayment capacity, but with collateral that appears to limit exposure. Included in this category are loans to borrowers in industries that are experiencing elevated risk.

Risk rating 5 Other Loans Especially Mentioned (OLEM). A loan criticized as OLEM has potential weaknesses that deserve management s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution s

credit position at some future date. OLEM assets are not adversely classified and do not expose the institution to sufficient risk to warrant adverse classification.

Risk rating 6 Substandard. A loan classified as substandard is inadequately protected by the sound worth and paying capacity of the borrower or the collateral pledged. Loss potential, while existing in the aggregate amount of substandard loans, does not have to exist in individual assets.

Risk rating 7 Doubtful. A loan classified as doubtful has all the weaknesses inherent in a loan classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. These are poor quality loans in which neither the collateral, if any, nor the financial condition of the borrower presently ensure collectability in full in a reasonable period of time; in fact, there is permanent impairment in the collateral securing the loan.

Table of Contents

Risk rating 8 Loss. Assets classified as loss are considered uncollectible and of such little value that the continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather, it is not practical or desirable to defer writing off this basically worthless asset, even though partial recovery may occur in the future. This classification is based upon current facts, not probabilities. Assets classified as loss should be charged-off in the period in which they became uncollectible.

The Company s classified loans include loans in risk ratings 6, 7 and 8. The following is a presentation of classified non-covered loans (excluding loans accounted for under ASC Topic 310-30) by class as of March 31, 2016 and December 31, 2015:

	March 31, 2016

Loans may be classified, but not considered impaired, due to one of the following reasons: (1) The Company has established minimum dollar amount thresholds for loan impairment testing. All loans over $2.0 million that are rated 5 8 are individually assessed for impairment on a quarterly basis. Loans rated 5 8 that fall under the threshold amount are not individually tested for impairment and therefore are not included in impaired loans; (2) of the loans that are above the threshold amount and tested for impairment, after testing, some are considered to not be impaired and are not included in impaired loans.

Table of Contents

Changes in the carrying amount of the accretable yield for purchased credit impaired loans acquired were as follows for the three-month period ended March 31, 2016 for the Company s covered and non-covered acquisitions:

	Accretable Yield	Carrying Amount of Loans
	(In thousands)	
Balance at beginning of period	$ 43,900	$ 253,991
Reforecasted future interest payments for loan pools	4,429	
Accretion recorded to interest income	(7,453)	7,453
Adjustment to yield	4,319	
Transfers to foreclosed assets held for sale		(846)
Payments received, net		(15,409)
Balance at end of period	$ 45,195	$ 245,189

The loan pools were evaluated by the Company and are currently forecasted to have a slower run-off than originally expected. As a result, the Company has reforecast the total accretable yield expectations for those loan pools by $4.4 million. This updated forecast does not change the expected weighted average yields on the loan pools.

During the 2016 impairment tests on the estimated cash flows of non-loss-share loans, we established that several non-covered loan pools were determined to have a materially projected credit improvement. As a result of this improvement, we will recognize approximately $4.3 million as an additional adjustment to yield over the weighted average life of the loans.

7. Goodwill and Core Deposits and Other Intangibles

On January 1, 2015, Centennial Insurance Agency sold the insurance book of business of the former Town and Country Insurance to Stephens Insurance, LLC of Little Rock. This disposal was completed at the Company s book value with no gain or loss. The net profit on this book of business was immaterial.

Changes in the carrying amount and accumulated amortization of the Company s goodwill and core deposits and other intangibles at March 31, 2016 and December 31, 2015, were as follows:

	March 31, 2016	December 31, 2015
	(In thousands)	
Goodwill		
Balance, beginning of period	$ 377,983	$ 325,423
Acquisitions		55,255
Sale of insurance book of business		(2,695)
Balance, end of period	$ 377,983	$ 377,983

	March 31, 2016	December 31, 2015
	(In thousands)	
Core Deposit and Other Intangibles		
Balance, beginning of period	$ 21,443	$ 20,925
Acquisition		1,363
Sale of insurance book of business		(243)
Amortization expense	(845)	(1,129)
Balance, March 31	$ 20,598	20,916
Acquisitions		3,477
Amortization expense		(2,950)
Balance, end of year		$ 21,443

The carrying basis and accumulated amortization of core deposits and other intangibles at March 31, 2016 and December 31, 2015 were:

	March 31, 2016	December 31, 2015
	(In thousands)	
Gross carrying basis	$ 51,378	$ 51,378
Accumulated amortization	(30,780)	(29,935)
Net carrying amount	$ 20,598	$ 21,443

Core deposit and other intangible amortization expense was approximately $845,000 and $1.1 million for the three-months ended March 31, 2016 and 2015, respectively. Including all of the mergers completed as of March 31, 2016, HBI s estimated amortization expense of core deposits and other intangibles for each of the years 2016 through 2020 is approximately: 2016 $3.1 million; 2017 $3.0 million; 2018 $2.9 million; 2019 $2.8 million; 2020 $2.3 million.

The carrying amount of the Company s goodwill was $378.0 million at both March 31, 2016 and December 31, 2015. Goodwill is tested annually for impairment during the fourth quarter. If the implied fair value of goodwill is lower than its carrying amount, goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the consolidated financial statements.

8. Other Assets

Other assets consists primarily of FDIC claims receivable, equity securities without a readily determinable fair value and other miscellaneous assets. As of March 31, 2016 and December 31, 2015 other assets were $123.5 million and $117.9 million, respectively.

An indemnification asset was created when the Company acquired FDIC covered loans. The indemnification asset represents the carrying amount of the right to receive payments from the FDIC for losses incurred on specified assets acquired from failed insured depository institutions or otherwise purchased from the FDIC that are covered by loss sharing agreements with the FDIC. When the Company experiences a loss on the covered loans and subsequently requests reimbursement of the loss from the FDIC, the indemnification asset is reduced by the FDIC reimbursable amount. A corresponding claim receivable is consequently recorded in other assets until the cash is received from the FDIC. The FDIC claims receivable was $1.6 million and $3.2 million at March 31, 2016 and December 31, 2015, respectively.

The Company has equity securities without readily determinable fair values. These equity securities are outside the scope of ASC Topic 320, *Investments-Debt and Equity Securities*. They include items such as stock holdings in Federal Home Loan Bank, Federal Reserve Bank, Bankers Bank and other miscellaneous holdings. The equity securities without a readily determinable fair value were $101.6 million and $97.5 million at March 31, 2016 and December 31, 2015, respectively, and are accounted for at cost.

9. Deposits

The aggregate amount of time deposits with a minimum denomination of $250,000 was $549.3 million and $503.3 million at March 31, 2016 and December 31, 2015, respectively. The aggregate amount of time deposits with a minimum denomination of $100,000 was $874.9 million and $885.3 million at March 31, 2016 and December 31, 2015, respectively. Interest expense applicable to certificates in excess of $100,000 totaled $1.4 million and $1.3 million for the three months ended March 31, 2016 and 2015, respectively. As of March 31, 2016 and December 31, 2015, brokered deposits were $335.9 million and $199.3 million, respectively.

Deposits totaling approximately $1.13 billion and $1.25 billion at March 31, 2016 and December 31, 2015, respectively, were public funds obtained primarily from state and political subdivisions in the United States.

10. Securities Sold Under Agreements to Repurchase

At March 31, 2016 and December 31, 2015, securities sold under agreements to repurchase totaled $121.9 million and $128.4 million, respectively. For the three-month periods ended March 31, 2016 and 2015, securities sold under agreements to repurchase daily weighted-average totaled $128.9 million and $179.6 million, respectively.

The gross amount of recognized liabilities for securities sold under agreements to repurchase was $121.9 million and $128.4 million at March 31, 2016 and December 31, 2015, respectively. The remaining contractual maturity of securities sold under agreements to repurchase in the consolidated balance sheets as of March 31, 2016 and December 31, 2015 is presented in the following tables:

	March 31, 2016				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(In thousands)				
Securities sold under agreements to repurchase:					
U.S. government-sponsored enterprises	$ 4,825	$	$	$	$ 4,825
Mortgage-backed securities	51,123				51,123
State and political subdivisions	65,128				65,128
Other securities	830				830
Total borrowings	$ 121,906	$	$	$	$ 121,906

	December 31, 2015				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(In thousands)				
Securities sold under agreements to repurchase:					
U.S. government-sponsored enterprises	$ 7,216	$	$	$	$ 7,216
Mortgage-backed securities	54,512				54,512
State and political subdivisions	65,294				65,294
Other securities	1,367				1,367
Total borrowings	$ 128,389	$	$	$	$ 128,389

11. FHLB Borrowed Funds

The Company s Federal Home Loan Bank (FHLB) borrowed funds were $1.33 billion and $1.41 billion at March 31, 2016 and December 31, 2015, respectively. At March 31, 2016 and December 31, 2015, all $1.33 billion and $1.41 billion, respectively of the outstanding balance were issued as long-term advances. The FHLB advances mature from the current year to 2025 with fixed interest rates ranging from 0.29% to 5.96% and are secured by loans and investments securities. Maturities of borrowings as of March 31, 2016 include: 2016 $15.9 million; 2017 $735.5 million; 2018 $319.3 million; 2019 $128.2 million; 2020 $131.4 million; after 2020 $484,000. Expected maturities will differ from contractual maturities because FHLB may have the right to call or HBI the right to prepay certain

obligations.

Additionally, the Company had $261.2 million and $261.1 million at March 31, 2016 and December 31, 2015, respectively, in letters of credit under a FHLB blanket borrowing line of credit, which are used to collateralize public deposits at March 31, 2016 and December 31, 2015, respectively.

12. Other Borrowings

The Company had $5.5 million related to other borrowings at March 31, 2016. Additionally, the Company took out a $20.0 million line of credit for general corporate purposes during 2015. The balance on this line of credit at March 31, 2016 and December 31, 2015 was zero.

13. Subordinated Debentures

Subordinated debentures at March 31, 2016 and December 31, 2015 consisted of guaranteed payments on trust preferred securities with the following components:

	As of March 31, 2016	As of December 31, 2015
	(In thousands)	
Subordinated debentures, issued in 2006, due 2036, fixed rate of 6.75% during the first five years and at a floating rate of 1.85% above the three-month LIBOR rate, reset quarterly, thereafter, currently callable without penalty	$ 3,093	$ 3,093
Subordinated debentures, issued in 2004, due 2034, fixed rate of 6.00% during the first five years and at a floating rate of 2.00% above the three-month LIBOR rate, reset quarterly, thereafter, currently callable without penalty	15,464	15,464
Subordinated debentures, issued in 2005, due 2035, fixed rate of 5.84% during the first five years and at a floating rate of 1.45% above the three-month LIBOR rate, reset quarterly, thereafter, currently callable without penalty	25,774	25,774
Subordinated debentures, issued in 2004, due 2034, fixed rate of 4.29% during the first five years and at a floating rate of 2.50% above the three-month LIBOR rate, reset quarterly, thereafter, currently callable without penalty	16,495	16,495
Total	$ 60,826	$ 60,826

The Company holds $60.8 million of trust preferred securities which are currently callable without penalty based on the terms of the specific agreements. The trust preferred securities are tax-advantaged issues that qualify for Tier 1 capital treatment subject to certain limitations. Distributions on these securities are included in interest expense. Each of the trusts is a statutory business trust organized for the sole purpose of issuing trust securities and investing the proceeds in the Company s subordinated debentures, the sole asset of each trust. The trust preferred securities of each trust represent preferred beneficial interests in the assets of the respective trusts and are subject to mandatory redemption upon payment of the subordinated debentures held by the trust. The Company wholly owns the common securities of each trust. Each trust s ability to pay amounts due on the trust preferred securities is solely dependent upon the Company making payment on the related subordinated debentures. The Company s obligations under the subordinated securities and other relevant trust agreements, in aggregate, constitute a full and unconditional guarantee by the Company of each respective trust s obligations under the trust securities issued by each respective trust.

14. Income Taxes

The following is a summary of the components of the provision (benefit) for income taxes for the three-month periods ended March 31, 2016 and 2015:

	Three Months Ended March 31,	
	2016	2015
	(In thousands)	
Current:		
Federal	$ 20,205	$ 12,074
State	4,013	2,398
Total current	24,218	14,472
Deferred:		
Federal	437	3,045
State	87	605
Total deferred	524	3,650
Income tax expense	$ 24,742	$ 18,122

Table of Contents

The reconciliation between the statutory federal income tax rate and effective income tax rate is as follows for the three-month periods ended March 31, 2016 and 2015:

	Three Months Ended March 31,	
	2016	**2015**
Statutory federal income tax rate	35.00%	35.00%
Effect of nontaxable interest income	(1.62)	(2.04)
Cash value of life insurance	(0.21)	(0.22)
State income taxes, net of federal benefit	4.07	4.01
Other	0.15	0.05
Effective income tax rate	37.39%	36.80%

The types of temporary differences between the tax basis of assets and liabilities and their financial reporting amounts that give rise to deferred income tax assets and liabilities, and their approximate tax effects, are as follows:

	March 31, 2016	**December 31, 2015**
	(In thousands)	
Deferred tax assets:		
Allowance for loan losses	$ 28,362	$ 27,153
Deferred compensation	1,794	3,505
Stock options	880	1,800
Real estate owned	2,275	1,988
Loan discounts	19,970	21,298
Tax basis premium/discount on acquisitions	15,779	15,772
Investments	2,750	2,637
Other	13,151	13,667
Gross deferred tax assets	84,961	87,820
Deferred tax liabilities:		
Accelerated depreciation on premises and equipment	1,773	3,946
Unrealized gain on securities available-for-sale	4,173	2,696
Core deposit intangibles	5,745	5,930
Indemnification asset	601	678
FHLB dividends	1,753	1,689
Other	1,352	1,316
Gross deferred tax liabilities	15,397	16,255
Net deferred tax assets	$ 69,564	$ 71,565

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and the states of Arkansas, Alabama, Florida and New York. The Company is no longer subject to U.S. federal and state tax examinations by tax authorities for years before 2011.

15. Common Stock and Compensation Plans

Stock Compensation Plans

The Company has a stock option and performance incentive plan known as the Amended and Restated 2006 Stock Option and Performance Incentive Plan (the Plan). The purpose of the Plan is to attract and retain highly qualified officers, directors, key employees, and other persons, and to motivate those persons to improve the Company s business results. The Plan provides for the granting of incentive and non-qualified stock options to and other equity awards, including the issuance of restricted shares. As of March 31, 2016, the maximum total number of shares of the Company s common stock available for grants under the Plan was 4,644,000. At March 31, 2016, the Company had approximately 403,000 shares of common stock remaining available for future grants and approximately 1,561,000 shares of common stock reserved for issuance under the Plan.

The intrinsic value of the stock options outstanding and stock options vested at March 31, 2016 was $13.6 million and $7.7 million, respectively. Total unrecognized compensation cost, net of income tax benefit, related to non-vested stock option awards, which are expected to be recognized over the vesting periods, was approximately $6.8 million as of March 31, 2016. For the first three months of 2016, the Company has expensed approximately $315,000 for the non-vested awards.

The table below summarizes the stock option transactions under the Plan at March 31, 2016 and December 31, 2015 and changes during the three-month period and year then ended:

	For the Three Months Ended March 31, 2016		For the Year Ended December 31, 2015	
	Shares (000)	Weighted-Average Exercisable Price	Shares (000)	Weighted-Average Exercisable Price
Outstanding, beginning of year	1,397	$ 25.42	905	$ 11.80
Granted			743	36.30
Forfeited/Expired	(7)	34.56	(20)	40.31
Exercised	(232)	6.38	(231)	5.80
Outstanding, end of period	1,158	29.17	1,397	25.42
Exercisable, end of period	293	$ 14.71	480	$ 10.26

Stock-based compensation expense for stock-based compensation awards granted is based on the grant-date fair value. For stock option awards, the fair value is estimated at the date of grant using the Black-Scholes option-pricing model. This model requires the input of highly subjective assumptions, changes to which can materially affect the fair value estimate. Additionally, there may be other factors that would otherwise have a significant effect on the value of employee stock options granted but are not considered by the model. Accordingly, while management believes that the Black-Scholes option-pricing model provides a reasonable estimate of fair value, the model does not necessarily provide the best single measure of fair value for the Company s employee stock options. No options were granted during the three months ended March 31, 2016. The weighted-average fair value of options granted during the year ended December 31, 2015 was $8.56 per share. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model based on the weighted-average assumptions for expected dividend yield, expected stock price volatility, risk-free interest rate, and expected life of options granted.

	For the Three Months Ended March 31, 2016	For the Year Ended December 31, 2015
Expected dividend yield	Not applicable	1.60%
Expected stock price volatility	Not applicable	25.91%
Risk-free interest rate	Not applicable	1.74%
Expected life of options	Not applicable	6.5 years

Table of Contents

The following is a summary of currently outstanding and exercisable options at March 31, 2016:

	Options Outstanding			Options Exercisable	
Exercise Prices	Options Outstanding Shares (000)	Weighted-Average Remaining Contractual Life (in years)	Weighted-Average Exercise Price	Options Exercisable Shares (000)	Weighted-Average Exercise Price
$3.92 to $5.33	23	2.26	$ 4.97	23	$ 4.97
$8.54 to $9.31	58	1.75	8.63	58	8.63
$10.16 to $13.12	125	3.71	11.89	107	11.68
$17.25 to $19.08	142	6.93	18.18	66	17.92
$29.42 to $33.72	135	8.49	32.05	27	32.05
$34.25 to $34.80	110	8.69	34.38	11	34.77
$36.91 to $36.91	525	9.40	36.91		
$40.31 to $41.15	40	9.52	40.73		
	1,158			292	

The table below summarized the activity for the Company s restricted stock issued and outstanding at March 31, 2016 and December 31, 2015 and changes during the period and year then ended:

	As of March 31, 2016	As of December 31, 2015
	(In thousands)	
Beginning of year	488	257
Issued	78	352
Vested	(23)	(102)
Forfeited		(19)
End of period	543	488
Amount of expense for three months and twelve months ended, respectively	$ 1,021	$ 2,511

On January 25, 2016, the Company granted a total of 78,367 shares of the Company s restricted common stock to the Company s Chairman, a group of the Company s non-employee directors and an employee of the Company s bank subsidiary. The restricted stock issued will cliff vest on January 25, 2019.

On January 25, 2016, the Company granted a total of 5,000 shares of the Company s unrestricted common stock to the Company s Chairman in lieu of a cash bonus.

During the first three months of 2016, the Company utilized a portion of its previously approved stock repurchase program. This program authorized the repurchase of 2,376,000 shares of the Company s common stock. During first quarter of 2016, the Company repurchased a total of 230,900 shares with a weighted-average stock price of $38.30 per share. The 2016 earnings were used to fund the repurchases during the year. Shares repurchased to date under the program total 1,809,128 shares. The remaining balance available for repurchase is 566,872 shares at March 31, 2016.

Table of Contents

16. Non-Interest Expense

The table below shows the components of non-interest expense for the three months ended March 31, 2016 and 2015:

	Three Months Ended March 31,	
	2016	2015
	(In thousands)	
Salaries and employee benefits	$ 23,958	$ 19,390
Occupancy and equipment	6,671	6,049
Data processing expense	2,664	2,419
Other operating expenses:		
Advertising	823	779
Merger and acquisition expenses		1,417
Amortization of intangibles	845	1,129
Electronic banking expense	1,456	1,232
Directors fees	275	295
Due from bank service charges	305	215
FDIC and state assessment	1,446	1,396
Insurance	533	666
Legal and accounting	523	447
Other professional fees	925	488
Operating supplies	436	434
Postage	286	309
Telephone	487	504
Other expense	4,015	3,544
Total other operating expenses	12,355	12,855
Total non-interest expense	$ 45,648	$ 40,713

17. Concentration of Credit Risks

The Company s primary market areas are in Arkansas, Florida and South Alabama. The Company primarily grants loans to customers located within these geographical areas unless the borrower has an established relationship with the Company.

The diversity of the Company s economic base tends to provide a stable lending environment. Although the Company has a loan portfolio that is diversified in both industry and geographic area, a substantial portion of its debtors ability to honor their contracts is dependent upon real estate values, tourism demand and the economic conditions prevailing in its market areas.

18. Significant Estimates and Concentrations

Accounting principles generally accepted in the United States of America require disclosure of certain significant estimates and current vulnerabilities due to certain concentrations. Estimates related to the allowance for loan losses and certain concentrations of credit risk are reflected in Note 6, while deposit concentrations are reflected in Note 9.

Although the Company has a diversified loan portfolio, at March 31, 2016 and December 31, 2015, non-covered commercial real estate loans represented 58.0% and 60.6% of non-covered loans, respectively, and 321.0% and 332.3% of total stockholders equity, respectively. Non-covered residential real estate loans represented 23.3% and 23.7% of non-covered loans and 128.9% and 130.1% of total stockholders equity at March 31, 2016 and December 31, 2015, respectively.

Approximately 86.5% of the Company s loans as of March 31, 2016, are to borrowers whose collateral is located in Alabama, Arkansas and Florida, the three states in which the Company has its branch locations. Additionally, the Company has 81.5% of its loans as real estate loans primarily in Arkansas, Florida and South Alabama.

Although general economic conditions in our market areas have improved, both nationally and locally, over the past three years and have shown signs of continued improvement, financial institutions still face circumstances and challenges which, in some cases, have resulted and could potentially result, in large declines in the fair values of investments and other assets, constraints on liquidity and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans. The financial statements have been prepared using values and information currently available to the Company.

Any future volatility in the economy could cause the values of assets and liabilities recorded in the financial statements to change rapidly, resulting in material future adjustments in asset values, the allowance for loan losses and capital that could negatively impact the Company s ability to meet regulatory capital requirements and maintain sufficient liquidity.

19. Commitments and Contingencies

In the ordinary course of business, the Company makes various commitments and incurs certain contingent liabilities to fulfill the financing needs of their customers. These commitments and contingent liabilities include lines of credit and commitments to extend credit and issue standby letters of credit. The Company applies the same credit policies and standards as they do in the lending process when making these commitments. The collateral obtained is based on the assessed creditworthiness of the borrower.

At March 31, 2016 and December 31, 2015, commitments to extend credit of $1.66 billion and $1.43 billion, respectively, were outstanding. A percentage of these balances are participated out to other banks; therefore, the Company can call on the participating banks to fund future draws. Since some of these commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements.

Outstanding standby letters of credit are contingent commitments issued by the Company, generally to guarantee the performance of a customer in third-party borrowing arrangements. The term of the guarantee is dependent upon the creditworthiness of the borrower, some of which are long-term. The amount of collateral obtained, if deemed necessary, is based on management s credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, commercial real estate and residential real estate. Management uses the same credit policies in granting lines of credit as it does for on-balance-sheet instruments. The maximum amount of future payments the Company could be required to make under these guarantees at March 31, 2016 and December 31, 2015, is $24.7 million and $24.3 million, respectively.

The Company and/or its bank subsidiary have various unrelated legal proceedings, most of which involve loan foreclosure activity pending, which, in the aggregate, are not expected to have a material adverse effect on the financial position or results of operations or cash flows of the Company and its subsidiary.

20. Regulatory Matters

The Bank is subject to a legal limitation on dividends that can be paid to the parent company without prior approval of the applicable regulatory agencies. Arkansas bank regulators have specified that the maximum dividend limit state banks may pay to the parent company without prior approval is 75% of the current year earnings plus 75% of the retained net earnings of the preceding year. Since the Bank is also under supervision of the Federal Reserve, it is further limited if the total of all dividends declared in any calendar year by the Bank exceeds the Bank s net profits to date for that year combined with its retained net profits for the preceding two years. During the first three months of 2016, the Company requested approximately $10.0 million in regular dividends from its banking subsidiary. This dividend is equal to approximately 23.1% of the Company s banking subsidiary s first three months earnings.

The Company s banking subsidiary is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company s consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company s assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company s capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Furthermore, the Company s regulators could require adjustments to regulatory capital not reflected in the consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios of total, common Tier 1 equity and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes that, as of March 31, 2016, the Company meets all capital adequacy requirements to which it is subject.

The Federal Reserve Board s risk-based capital guidelines include the definitions for (1) a well-capitalized institution, (2) an adequately-capitalized institution, and (3) an undercapitalized institution. Under Basel III, the criteria for a well-capitalized institution are now: a 6.5% common equity Tier 1 risk-based capital ratio, a 5% Tier 1 leverage capital ratio, an 8% Tier 1 risk-based capital ratio, and a 10% total risk-based capital ratio. As of March 31, 2016, the Bank met the capital standards for a well-capitalized institution. The Company s common equity Tier 1 risk-based capital ratio, Tier 1 leverage capital ratio, Tier 1 risk-based capital ratio, and total risk-based capital ratio were 10.41%, 9.96%, 11.14%, and 12.05%, respectively, as of March 31, 2016.

21. Additional Cash Flow Information

The following is a summary of the Company s additional cash flow information during the three-month periods ended:

	March 31,	
	2016	**2015**
	(In thousands)	
Interest paid	$ 7,140	$ 4,873
Income taxes paid	1,010	3,100
Assets acquired by foreclosure	4,219	6,580

22. Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. There is a hierarchy of three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities

Level 2	Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities

Available-for-sale securities are the only material instruments valued on a recurring basis which are held by the Company at fair value. The Company does not have any Level 1 securities. Primarily all of the Company s securities are considered to be Level 2 securities. These Level 2 securities consist primarily of U.S. government-sponsored enterprises, mortgage-backed securities plus state and political subdivisions. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things. As of March 31, 2016 and December 31, 2015, Level 3 securities were immaterial. In addition, there were no material transfers between hierarchy levels during 2016 and 2015.

The Corporation reviews the prices supplied by the independent pricing service, as well as their underlying pricing methodologies, for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In general, the Company does not purchase investment portfolio securities with complicated structures. Pricing for the Company s investment securities is fairly generic and is easily obtained.

Impaired loans that are collateral dependent are the only material financial assets valued on a non-recurring basis which are held by the Company at fair value. Loan impairment is reported when full payment under the loan terms is not expected. Impaired loans are carried at the net realizable value of the collateral if the loan is collateral dependent. A portion of the allowance for loan losses is allocated to impaired loans if the value of such loans is deemed to be less than the unpaid balance. If these allocations cause the allowance for loan losses to require an increase, such increase is reported as a component of the provision for loan losses. The fair value of loans with specific allocated losses was $84.4 million and $87.2 million as of March 31, 2016 and December 31, 2015, respectively. This valuation is considered Level 3, consisting of appraisals of underlying collateral. The Company reversed approximately $68,000 and $51,000 of accrued interest receivable when non-covered impaired loans were put on non-accrual status during the three months ended March 31, 2016 and 2015, respectively.

Foreclosed assets held for sale are the only material non-financial assets valued on a non-recurring basis which are held by the Company at fair value, less estimated costs to sell. At foreclosure, if the fair value, less estimated costs to sell, of the real estate acquired is less than the Company s recorded investment in the related loan, a write-down is recognized through a charge to the allowance for loan losses. Additionally, valuations are periodically performed by management and any subsequent reduction in value is recognized by a charge to income. The fair value of foreclosed assets held for sale is estimated using Level 3 inputs based on appraisals of underlying collateral. As of March 31, 2016 and December 31, 2015, the fair value of foreclosed assets held for sale not covered by loss share, less estimated costs to sell, was $19.7 million and $18.5 million, respectively.

Foreclosed assets held for sale with a carrying value of approximately $349,000 were remeasured during the three months ended March 31, 2016, resulting in write-downs of approximately $157,000.

Regulatory guidelines require us to reevaluate the fair value of foreclosed assets held for sale on at least an annual basis. Our policy is to comply with the regulatory guidelines.

The significant unobservable (Level 3) inputs used in the fair value measurement of collateral for collateral-dependent impaired loans and foreclosed assets primarily relate to customized discounting criteria applied to the customer s reported amount of collateral. The amount of the collateral discount depends upon the condition and marketability of the underlying collateral. As the Company s primary objective in the event of default would be to monetize the collateral to settle the outstanding balance of the loan, less marketable collateral would receive a larger discount. During the reported periods, collateral discounts ranged from 20% to 50% for commercial and residential real estate collateral.

37

Fair Values of Financial Instruments

The following methods and assumptions were used by the Company in estimating fair values of financial instruments as disclosed in these notes:

Cash and cash equivalents and federal funds sold For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities held-to-maturity These securities consist primarily of mortgage-backed securities plus state and political subdivisions. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond s terms and conditions, among other things.

Loans receivable not covered by loss share, net of non-covered impaired loans and allowance For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are assumed to approximate the carrying amounts. The fair values for fixed-rate loans are estimated using discounted cash flow analysis, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Loan fair value estimates include judgments regarding future expected loss experience and risk characteristics.

Loans receivable covered by FDIC loss share, net of allowance Fair values for loans are based on a discounted cash flow methodology that considers factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of loan, current discount rates and whether or not the loan is amortizing. Loans are grouped together according to similar characteristics and are treated in the aggregate when applying various valuation techniques. The discount rates used for loans are based on current market rates for new originations of comparable loans and include adjustments for liquidity concerns. The discount rate does not include a factor for credit losses as that has been included in the estimated cash flows.

FDIC indemnification asset Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement.

Accrued interest receivable The carrying amount of accrued interest receivable approximates its fair value.

Deposits and securities sold under agreements to repurchase The fair values of demand deposits, savings deposits and securities sold under agreements to repurchase are, by definition, equal to the amount payable on demand and, therefore, approximate their carrying amounts. The fair values for time deposits are estimated using a discounted cash flow calculation that utilizes interest rates currently being offered on time deposits with similar contractual maturities.

FHLB and other borrowed funds For short-term instruments, the carrying amount is a reasonable estimate of fair value. The fair value of long-term debt is estimated based on the current rates available to the Company for debt with similar terms and remaining maturities.

Accrued interest payable The carrying amount of accrued interest payable approximates its fair value.

Subordinated debentures The fair value of subordinated debentures is estimated using the rates that would be charged for subordinated debentures of similar remaining maturities.

38

Table of Contents

Commitments to extend credit, letters of credit and lines of credit The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair values of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date. The fair value of these commitments is not material.

The following table presents the estimated fair values of the Company s financial instruments. The fair values of certain of these instruments were calculated by discounting expected cash flows, which involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

23. Recent Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 provides guidance that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. In August 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers (Topic 606)*, which defers the effective date of this standard to annual and interim periods beginning after December 15, 2017; however, early adoption is permitted for annual and interim reporting periods beginning after December 15, 2016. The Company is currently evaluating the impact, if any, ASU 2014-09 will have on its financial position, results of operations, and its financial statement disclosures.

In June 2014, the FASB issued ASU No. 2014-12, *Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period,* impacting FASB ASC 860, *Transfers and Servicing*. Generally, an award with a performance target requires an employee also render service once the performance target is achieved. In some cases, however, the terms of an award may provide that the performance target could be achieved after an employee completes the requisite service period. The amendments in this update require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. An entity should apply this guidance as it relates to awards with performance conditions that affect vesting to account for such awards. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period for which the service has already been rendered. The amendments in this update became

effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. The Company has adopted the new guidance on the consolidated financial statements, which has made no impact to the Company s financial statements.

In February 2015, the FASB issued ASU 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis,* which amends the consolidation requirements of ASU 810 by changing the consolidation analysis required under GAAP. The revised guidance amends the consolidation analysis based on certain fee arrangements or relationships to the reporting entity and, for limited partnerships, requires entities to consider the limited partner s rights relative to the general partner. ASU 2015-02 became effective for annual and interim periods beginning after December 15, 2015. ASU 2015-02 did not have an impact on the Company s financial position, results of operations, or its financial statement disclosures.

In September 2015, the FASB issued ASU 2015-16, *Simplifying the Accounting for Measurement-Period Adjustments*. ASU 2015-16 requires entities to recognize measurement period adjustments during the reporting period in which the adjustments are determined. The income effects, if any, of a measurement period adjustment are cumulative and are to be reported in the period in which the adjustment to a provisional amount is determined. Also, ASU 2015-16 requires presentation on the face of the income statement or in the notes, the effect of the measurement period adjustment as if the adjustment had been recognized at acquisition date. ASU 2015-16 is effective for fiscal periods beginning after December 15, 2015 for public business entities and should be applied prospectively to measurement period adjustments that occur after the effective date. Adoption of ASU 2015-16 did not have an impact on the Company s financial position, results of operations or its financial statement disclosures.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. Changes to the current GAAP model primarily affect the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. In addition, ASU 2016-01 clarifies guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale securities. The new guidance is effective for annual reporting period and interim reporting periods within those annual periods, beginning after December 15, 2017. Management is currently evaluating the impact of the adoption of this guidance to the Company s financial statements.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842).* ASU 2016-02 introduces a lessee model that brings most leases on the balance sheet and aligns many of the underlying principles of the new lessor model with those in ASU 2014-09, the FASB s new revenue recognition standard. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application of the amendments in the ASU is permitted for all entities. Management is currently evaluating the impact of the adoption of this guidance to the Company s financial statements.

In March 2016, the FASB issued ASU 2016-09, *Compensation Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*, which simplifies several aspects of the accounting for employee share-based payment transactions for both public and nonpublic entities, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The ASU is effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted in any interim or annual period. Management is currently evaluating the impact of the adoption of this guidance to the Company s financial statements.

Presently, the Company is not aware of any changes from the Financial Accounting Standards Board that will have a material impact on the Company s present or future financial statements.

Table of Contents

24. Subsequent Events

On April 21, 2016 at the Annual Meeting of Shareholders of the Company, the shareholders approved, as proposed in the Proxy Statement, an amendment to the Company s Restated Articles of Incorporation to increase the number of authorized shares of common stock from 100,000,000 to 200,000,000 and an amendment to the Home BancShares, Inc. Amended and Restated 2006 Stock Option Performance Incentive Plan to increase the maximum aggregate number of shares available for awards from 4,644,000 to 5,644,000.

On April 21, 2016, the Board of Directors of the Company (the Board) declared a regular $0.175 per share quarterly cash dividend payable June 1, 2016, to shareholders of record May 11, 2016. In addition, the Board of Directors declared a two-for-one stock split of its common stock payable in the form of a 100% stock dividend. The two-for-one stock split is payable June 8, 2016, to shareholders of record May 18, 2016.

Report of Independent Registered Public Accounting Firm

Audit Committee, Board of Directors and Stockholders

Home BancShares, Inc.

Conway, Arkansas

We have reviewed the accompanying condensed consolidated balance sheet of Home BancShares, Inc. (the Company) as of March 31, 2016, and the related condensed consolidated statements of income, comprehensive income, stockholder s equity and cash flows for the three-month periods ended March 31, 2016 and 2015. These interim financial statements are the responsibility of the Company s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2015, and the related consolidated statements of income, comprehensive income, stockholders equity and cash flows for the year then ended (not presented herein); and in our report dated February 26, 2016, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2015, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2: MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Form 10-K, filed with the Securities and Exchange Commission on February 26, 2016, which includes the audited financial statements for the year ended December 31, 2015. *Unless the context requires otherwise, the terms Company , us , we , and our refer to Home BancShares, Inc. on a consolidated basis.*

General

We are a bank holding company headquartered in Conway, Arkansas, offering a broad array of financial services through our wholly-owned bank subsidiary, Centennial Bank (sometimes referred to as Centennial or the Bank). As of March 31, 2016, we had, on a consolidated basis, total assets of $9.40 billion, loans receivable, net of $6.78 billion, total deposits of $6.58 billion, and stockholders equity of $1.23 billion.

We generate most of our revenue from interest on loans and investments, service charges, and mortgage banking income. Deposits and FHLB and other borrowed funds are our primary source of funding. Our largest expenses are interest on our funding sources, salaries and related employee benefits and occupancy and equipment. We measure our performance by calculating our return on average common equity, return on average assets and net interest margin. We also measure our performance by our efficiency ratio, which is calculated by dividing non-interest expense less amortization of core deposit intangibles by the sum of net interest income on a tax equivalent basis and non-interest income.

Table 1: Key Financial Measures

	As of or for the Three Months Ended March 31,	
	2016	2015
	(Dollars in thousands, except per share data)	
Total assets	$ 9,397,451	$ 7,513,974
Loans receivable not covered by loss share	6,792,170	4,929,989

Overview

Credit Improvement in Purchased Credit Impaired Loan Pools

Impairment testing on the estimated cash flows of the purchased credit impaired loan pools is performed each quarter. Because the economy has improved since the impaired loans were acquired, quite often the impairment test has revealed a projected credit improvement in certain loan pools. As a result of these improvements, we are recognizing additional adjustments to yield over the weighted-average life of the loans. When there are improvements in credit quality for covered loans, it decreases the basis in the related indemnification asset and increases our FDIC true-up liability. These positive events are reducing the indemnification asset and increasing our FDIC true-up liability. The indemnification asset reduction is being amortized over the weighted-average life of the shared-loss agreements. This amortization is being shown as a reduction to FDIC indemnification non-interest income. The true-up liability is being expensed over the remaining true-up measurement date as other non-interest expense.

Tables 2 and 3 summarize the recognition of these positive events and the financial impact to the three-month period ended March 31, 2016 and 2015:

Table 2: Overall Estimated Impact to Financial Statements Initially Reported

	Additional Adjustment to Yield	Reduction of Indemnification Asset	Increase of FDIC True-up Liability
		(In thousands)	
Periods Tested:			
Prior to 2015	$ 83,278	$ 58,535	$ 6,764
March 31, 2015			
June 30, 2015			
September 30, 2015	28,522		
December 31, 2015			
March 31, 2016	4,319		
Total	$ 116,119	$ 58,535	$ 6,764

Table 3: Financial Impact for the Three Months Ended March 31, 2016 and 2015

	Yield Accretion Income	Amortization of Indemnification Asset	FDIC True-up Expense
		(In thousands)	
Three Months Ended:			
March 31, 2015	$ 4,509	$ (3,956)	$ (383)
March 31, 2016	5,266	(362)	
Additional income/expense	$ 757	$ 3,594	$ (383)

Results of Operations for Three Months Ended March 31, 2016 and 2015

Our net income increased $10.3 million, or 33.1%, to $41.4 million for the three-month period ended March 31, 2016, from $31.1 million for the same period in 2015. On a diluted earnings per share basis, our earnings were $0.59 per share and $0.46 per share for the three-month periods ended March 31, 2016 and 2015, respectively. The $10.3 million increase in net income is primarily associated with additional net interest income largely resulting from our acquisitions and our organic loan growth plus the reduced amortization of the indemnification asset when compared to the same period in 2015. These improvements were partially offset by an increase in provision for loan losses in first quarter of 2016 and a modest increase in the costs associated with the asset growth when compared to the same period in 2015.

Our GAAP net interest margin for the quarter just ended decreased from 4.94% for the three-month period ended March 31, 2015 to 4.81% for the three-month period ended March 31, 2016. For the three months ended March 31, 2016 and 2015, we recognized $10.7 million and $10.4 million, respectively in total net accretion for acquired loans and deposits. The non-GAAP margin excluding accretion income was, relatively flat at 4.22% and 4.19% for the three months ended March 31, 2016 and 2015, respectively. Additionally, the non-GAAP yield on loans excluding accretion income was also relatively flat at 5.07% and 5.04% for the three months ended March 31, 2016 and 2015, respectively. Consequently, with a growth of average loan balance of $1.66 billion we experienced a decline in the GAAP net interest margin because the organic loan growth was approximately at our core margin levels.

The effective yield on non-covered loans for the three months ended March 31, 2016 and 2015 was 5.77% and 5.65%, respectively. The effective yield on covered loans for the three months ended March 31, 2016 and 2015 was 9.84% and 14.65%, respectively.

Our efficiency ratio was 37.50% for the three months ended March 31, 2016, compared to 41.41% for the same period in 2015. For the first quarter of 2016, our core efficiency ratio was 36.92% which is improved from the 40.84% reported for first quarter of 2015. The improvement in the core efficiency ratio is primarily associated with additional net interest income resulting from our organic loan growth and acquisitions plus the realized cost savings from these acquisitions combined with the reduced costs from our recent branch closures. Core efficiency ratio is calculated by dividing non-interest expense less amortization of core deposit intangibles by the sum of net interest income on a tax equivalent basis and non-interest income excluding non-fundamental items such as merger expenses and/or gains and losses.

Our annualized return on average assets was 1.79% for the three months ended March 31, 2016, compared to 1.67% for the same period in 2015. Our annualized return on average common equity was 13.77% for the three months ended March 31, 2016, compared to 12.33% for the same period in 2015. As noted in the previous paragraph, we have been making notable progress in improving the performance of our legacy and acquired franchises. There was an improvement in our return on average assets and return on average common equity from 2015 to 2016.

Financial Condition as of and for the Period Ended March 31, 2016 and December 31, 2015

Our total assets as of March 31, 2016 increased $108.3 million to $9.40 billion from the $9.29 billion reported as of December 31, 2015. Our loan portfolio not covered by loss share increased $212.8 million to $6.79 billion as of March 31, 2016, from $6.58 billion as of December 31, 2015. This increase is a result of $212.8 million of organic loan growth since December 31, 2015. Our loan portfolio covered by loss share decreased $2.2 million to $60.0 million as of March 31, 2016, from $62.2 million as of December 31, 2015. This decrease is primarily associated with normal pay-downs and payoffs. Stockholders equity increased $28.0 million to $1.23 billion as of March 31, 2016, compared to $1.20 billion as of December 31, 2015. The annualized improvement in stockholders equity for the first three months of 2016 was 9.4%. The increase in stockholders equity is primarily associated with the $30.9 million increase in retained earnings plus the $2.3 million of comprehensive income offset by the $5.2 million of decrease in capital surplus as a result of the $8.8 million repurchase of common stock net of activity related to stock based compensation during the quarter.

As of March 31, 2016, our non-performing non-covered loans decreased to $55.4 million, or 0.82%, of total non-covered loans from $60.2 million, or 0.92%, of total non-covered loans as of December 31, 2015. The allowance for loan losses for non-covered loans as a percent of non-performing non-covered loans increased to 125.92% as of March 31, 2016, compared to 110.66% as of December 31, 2015. Non-performing non-covered loans from our Arkansas franchise were $27.4 million at March 31, 2016 compared to $28.3 million as of December 31, 2015. Non-performing non-covered loans from our Florida franchise were $28.0 million at March 31, 2016 compared to

$31.8 million as of December 31, 2015. Non-performing non-covered loans from our Alabama franchise were $25,000 at March 31, 2016 compared to $132,000 as of December 31, 2015. There were no non-performing non-covered loans from our Centennial CFG franchise.

As of March 31, 2016, our non-performing non-covered assets decreased to $75.1 million, or 0.80%, of total non-covered assets from $78.8 million, or 0.85%, of total non-covered assets as of December 31, 2015. Non-performing non-covered assets from our Arkansas franchise were $41.7 million at March 31, 2016 compared to $40.3 million as of December 31, 2015. Non-performing non-covered assets from our Florida franchise were $32.8 million at March 31, 2016 compared to $37.5 million as of December 31, 2015. Non-performing non-covered assets from our Alabama franchise were $626,000 at March 31, 2016 compared to $892,000 as of December 31, 2015. There were no non-performing non-covered assets from our Centennial CFG franchise.

Critical Accounting Policies

Overview. We prepare our consolidated financial statements based on the selection of certain accounting policies, generally accepted accounting principles and customary practices in the banking industry. These policies, in certain areas, require us to make significant estimates and assumptions. Our accounting policies are described in detail in the notes to our consolidated financial statements included as part of this document.

We consider a policy critical if (i) the accounting estimate requires assumptions about matters that are highly uncertain at the time of the accounting estimate; and (ii) different estimates that could reasonably have been used in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on our financial statements. Using these criteria, we believe that the accounting policies most critical to us are those associated with our lending practices, including the accounting for the allowance for loan losses, foreclosed assets, investments, intangible assets, income taxes and stock options.

Investments Available-for-sale. Securities available-for-sale are reported at fair value with unrealized holding gains and losses reported as a separate component of stockholders equity and other comprehensive income (loss), net of taxes. Securities that are held as available-for-sale are used as a part of our asset/liability management strategy. Securities that may be sold in response to interest rate changes, changes in prepayment risk, the need to increase regulatory capital, and other similar factors are classified as available-for-sale.

Investments Held-to-Maturity. Securities held-to-maturity, which include any security for which we have the positive intent and ability to hold until maturity, are reported at historical cost adjusted for amortization of premiums and accretion of discounts. Premiums and discounts are amortized and accreted, respectively, to interest income using the constant yield method over the period to maturity.

Loans Receivable Not Covered by Loss Share and Allowance for Loan Losses. Except for loans acquired during our acquisitions, substantially all of our loans receivable not covered by loss share are reported at their outstanding principal balance adjusted for any charge-offs, as it is management s intent to hold them for the foreseeable future or until maturity or payoff, except for mortgage loans held for sale. Interest income on loans is accrued over the term of the loans based on the principal balance outstanding.

The allowance for loan losses is established through a provision for loan losses charged against income. The allowance represents an amount that, in management s judgment, will be adequate to absorb probable credit losses on identifiable loans that may become uncollectible and probable credit losses inherent in the remainder of the loan portfolio. The amounts of provisions for loan losses are based on management s analysis and evaluation of the loan portfolio for identification of problem credits, internal and external factors that may affect collectability, relevant credit exposure, particular risks inherent in different kinds of lending, current collateral values and other relevant factors.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows, collateral value or observable market price of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical charge-off experience and expected loss given default derived from the Bank s internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

Loans considered impaired, under FASB ASC 310-10-35, are loans for which, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. We apply this policy even if delays or shortfalls in payment are expected to be insignificant. The aggregate amount of impairment of loans is utilized in evaluating the adequacy of the allowance for loan losses and amount of provisions thereto. Losses on impaired loans are charged against the allowance for loan losses when in the process of collection it appears likely that such losses will be realized. The accrual of interest on impaired loans is discontinued when, in management s opinion the collection of interest is doubtful, or generally when loans are 90 days or more past due. When accrual of interest is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received in excess of principal due. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Groups of loans with similar risk characteristics are collectively evaluated for impairment based on the group s historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans.

Loans are placed on non-accrual status when management believes that the borrower s financial condition, after giving consideration to economic and business conditions and collection efforts, is such that collection of interest is doubtful, or generally when loans are 90 days or more past due. Loans are charged against the allowance for loan losses when management believes that the collectability of the principal is unlikely. Accrued interest related to non-accrual loans is generally charged against the allowance for loan losses when accrued in prior years and reversed from interest income if accrued in the current year. Interest income on non-accrual loans may be recognized to the extent cash payments are received, although the majority of payments received are usually applied to principal. Non-accrual loans are generally returned to accrual status when principal and interest payments are less than 90 days past due, the customer has made required payments for at least six months, and we reasonably expect to collect all principal and interest.

Acquisition Accounting, Acquired Loans and Related Indemnification Asset. We account for its acquisitions under FASB ASC Topic 805, *Business Combinations*, which requires the use of the acquisition method of accounting. All identifiable assets acquired, including loans, are recorded at fair value. No allowance for loan losses related to the acquired loans is recorded on the acquisition date as the fair value of the loans acquired incorporates assumptions regarding credit risk. All loans acquired are recorded at fair value in accordance with the fair value methodology prescribed in FASB ASC Topic 820, *Fair Value Measurements*. For covered acquired loans fair value is exclusive of the shared-loss agreements with the Federal Deposit Insurance Corporation (FDIC). The fair value estimates associated with the loans include estimates related to expected prepayments and the amount and timing of undiscounted expected principal, interest and other cash flows.

Over the life of the purchased credit impaired loans acquired, we continue to estimate cash flows expected to be collected on pools of loans sharing common risk characteristics, which are treated in the aggregate when applying various valuation techniques. We evaluate at each balance sheet date whether the present value of its pools of loans determined using the effective interest rates has decreased and if so, recognize a provision for loan loss in its consolidated statement of income. For any increases in cash flows expected to be collected, we adjust the amount of accretable yield recognized on a prospective basis over the pool s remaining life.

Because the FDIC will reimburse us for certain acquired loans should we experience a loss, an indemnification asset is recorded at fair value at the acquisition date. The indemnification asset is recognized at the same time as the indemnified loans, and measured on the same basis, subject to collectability or contractual limitations. The shared-loss agreements on the acquisition date reflect the reimbursements expected to be received from the FDIC, using an appropriate discount rate, which reflects counterparty credit risk and other uncertainties.

For our FDIC-assisted transactions, shared-loss agreements continue to be measured on the same basis as the related indemnified loans. Because the acquired loans are subject to the accounting prescribed by FASB ASC Topic 310, *Receivables*, subsequent changes to the basis of the shared-loss agreements also follow that model. Deterioration in the credit quality of the loans (immediately recorded as an adjustment to the allowance for loan losses) would immediately increase the basis of the shared-loss agreements, with the offset recorded through the consolidated statement of income as a reduction of the provision for loan losses. Increases in the credit quality or cash flows of loans (reflected as an adjustment to yield and accreted into income over the weighted-average remaining life of the loans) decrease the basis of the shared-loss agreements, with such decrease being amortized into income over 1) the same period or 2) the life of the shared-loss agreements, whichever is shorter. Loss assumptions used in the basis of the indemnified loans are consistent with the loss assumptions used to measure the indemnification asset. Fair value accounting incorporates into the fair value of the indemnification asset an element of the time value of money, which is accreted back into income over the life of the shared-loss agreements.

Upon the determination of an incurred loss, the indemnification asset will be reduced by the amount owed by the FDIC. A corresponding claim receivable is recorded until cash is received from the FDIC.

Foreclosed Assets Held for Sale. Real estate and personal properties acquired through or in lieu of loan foreclosure are to be sold and are initially recorded at fair value at the date of foreclosure, establishing a new cost basis. Valuations are periodically performed by management, and the real estate and personal properties are carried at fair value less costs to sell. Gains and losses from the sale of other real estate and personal properties are recorded in non-interest income, and expenses used to maintain the properties are included in non-interest expenses.

Intangible Assets. Intangible assets consist of goodwill and core deposit intangibles. Goodwill represents the excess purchase price over the fair value of net assets acquired in business acquisitions. The core deposit intangible represents the excess intangible value of acquired deposit customer relationships as determined by valuation specialists. The core deposit intangibles are being amortized over 48 to 121 months on a straight-line basis. Goodwill is not amortized but rather is evaluated for impairment on at least an annual basis. We perform an annual impairment test of goodwill and core deposit intangibles as required by FASB ASC 350, *Intangibles - Goodwill and Other,* in the fourth quarter.

Income Taxes. We account for income taxes in accordance with income tax accounting guidance (ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. We determine deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to the management s judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset

will not be realized.

Both we and our subsidiary file consolidated tax returns. Our subsidiary provides for income taxes on a separate return basis, and remits to us amounts determined to be currently payable.

Stock Options. In accordance with FASB ASC 718, *Compensation - Stock Compensation,* and FASB ASC 505-50, *Equity-Based Payments to Non-Employees*, the fair value of each option award is estimated on the date of grant. We recognize compensation expense for the grant-date fair value of the option award over the vesting period of the award.

Table of Contents

Acquisitions

Acquisition of Florida Business BancGroup, Inc.

On October 1, 2015, we completed our acquisition of Florida Business BancGroup, Inc. (FBBI), parent company of Bay Cities Bank (Bay Cities). We paid a purchase price to the FBBI shareholders of $104.1 million for the FBBI acquisition. Under the terms of the agreement, shareholders of FBBI received 2,079,854 shares of our common stock valued at approximately $83.8 million as of October 1, 2015, plus approximately $20.3 million in cash in exchange for all outstanding shares of FBBI common stock. A portion of the cash consideration, $2.0 million, has been placed into escrow, and FBBI shareholders will have a contingent right to receive their pro-rata portions of such amount. The amount, if any, of such escrowed funds to be released to FBBI shareholders will depend upon the amount of losses that HBI incurs in the two years following the completion of the merger related to two class action lawsuits that are pending against Bay Cities.

FBBI formerly operated six branch locations and a loan production office in the Tampa Bay area and in Sarasota, Florida. Including the effects of any purchase accounting adjustments, as of October 1, 2015, FBBI had approximately $564.5 million in total assets, $408.3 million in loans after $14.1 million of loan discounts, and $472.0 million in deposits.

See Note 2 Business Combinations in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 for an additional discussion regarding the acquisition of FBBI.

Acquisition of Pool of National Commercial Real Estate Loans

On April 1, 2015, our wholly-owned bank subsidiary, Centennial, acquired a pool of national commercial real estate loans from AM PR LLC, an affiliate of J.C. Flowers & Co., totaling approximately $289.1 million for a purchase price of 99% of the total principal value of the acquired loans. The acquired loans were originated by the former Doral Bank within its Doral Property Finance portfolio (DPF Portfolio) and were transferred to the Seller by Banco Popular of Puerto Rico (Popular) upon its acquisition of the assets and liabilities of Doral Bank from the FDIC, as receiver for the failed Doral Bank. This pool of loans is now housed in a division of Centennial known as the Centennial Commercial Finance Group (Centennial CFG). The Centennial CFG is responsible for servicing the acquired loan pool and originating new loan production.

In connection with this acquisition of loans, we opened a loan production office on April 23, 2015 in New York City. Through the loan production office, Centennial CFG is building out a national lending platform focusing on commercial real estate plus commercial and industrial loans. As of March 31, 2016 and December 31, 2015, Centennial CFG had $851.4 and $715.7 million in total loans net of discount, respectively. Centennial CFG currently has plans to build this loan portfolio to $1.2 billion to $1.3 billion by the end of 2016. During 2016, we have plans to open a deposit-only branch location in New York City.

Acquisition of Doral Bank s Florida Panhandle operations

On February 27, 2015, our bank subsidiary, Centennial, acquired all the deposits and substantially all the assets of Doral Florida through an alliance agreement with Popular who was the successful lead bidder with the FDIC on the failed Doral Bank of San Juan, Puerto Rico. Including the effects of the purchase accounting adjustments, the acquisition provided us with loans of approximately $37.9 million net of loan discounts, deposits of approximately $467.6 million, plus a $428.2 million cash settlement to balance the transaction. There is no loss-share with the FDIC in the acquired assets.

Prior to the acquisition, Doral Florida operated five branch locations in Panama City, Panama City Beach and Pensacola, Florida plus a loan production office in Tallahassee, Florida. At the time of acquisition, Centennial operated 29 branch locations in the Florida Panhandle. As a result, we closed all five branch locations during the July 2015 systems conversion and returned the facilities back to the FDIC.

See Note 2 Business Combinations in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 for an additional discussion regarding the acquisition of Doral Florida.

Acquisition of Broward Financial Holdings, Inc.

On October 23, 2014, we completed our acquisition of all of the issued and outstanding shares of common stock of Broward Financial Holdings, Inc. (Broward), parent company of Broward Bank, and merged Broward Bank into Centennial Bank. At acquisition, we agreed to pay the Broward shareholders at an undetermined date up to approximately $751,000 in additional consideration. The amount and timing of the additional payment, if any, was contingent upon future payments received or losses incurred by Centennial Bank from certain current Broward Bank loans. During the first quarter of 2016, we reached an agreement with the Broward shareholders and determined no additional consideration need be paid.

See Note 2 Business Combinations in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2015 for an additional discussion regarding the acquisition of Broward.

FDIC Indemnification Asset

In conjunction with certain FDIC-assisted transactions, we entered into loss share agreements with the FDIC. These agreements cover realized losses on loans, foreclosed real estate and certain other assets. These loss share assets are measured separately from the loan portfolios because they are not contractually embedded in the loans and are not transferable with the loans should we choose to dispose of them. Fair values at the acquisition dates were estimated based on projected cash flows available for loss-share based on the credit adjustments estimated for each loan pool and the loss share percentages. The loss share assets are also separately measured from the related loans and foreclosed real estate and recorded as FDIC indemnification assets on the Consolidated Balance Sheets. Subsequent to the acquisition date, reimbursements received from the FDIC for actual incurred losses will reduce the loss share assets. Reductions to expected credit losses, to the extent such reductions to expected credit losses are the result of an improvement to the actual or expected cash flows from the covered assets, will also reduce the loss share assets. Increases in expected credit losses will require an increase to the allowance for loan losses and a corresponding increase to the loss share assets. As the ten-year loss-share agreements approach their expiration dates, there could be unexpected volatility as future expected loan losses might become projected to occur outside of the loss-share coverage reimbursement window.

Table 4 summarizes the activity in our FDIC indemnification asset during the periods indicated:

Table 4: Changes in FDIC Indemnification Asset

	Three Months Ended March 31,	
	2016	**2015**
	(Dollars in thousands)	
Beginning balance	$ 9,284	$ 28,409
Incurred claims for FDIC covered credit losses	(266)	(5,862)
FDIC indemnification accretion/(amortization)	(362)	(3,956)
Reduction in provision for loan losses:		
Benefit attributable to FDIC loss share agreements		844
Ending balance	$ 8,656	$ 19,435

FDIC-Assisted Acquisitions True-up

Our purchase and assumption agreements in connection with certain of our FDIC-assisted acquisitions allow the FDIC to recover a portion of the loss share funds previously paid out under the indemnification agreements in the event losses fail to reach the expected loss under a claw back provision. Should the markets associated with any of the banks we acquired through FDIC-assisted transactions perform better than initially projected, the Bank is required to pay this clawback (or true-up) payment to the FDIC on a specified date following the tenth anniversary of such acquisition (the True-Up Measurement Date).

Specifically, in connection with the Old Southern and Key West acquisitions, such true-up payments would be equal to 50% of the excess, if any, of (i) 20% of a stated threshold of $110.0 million in the case of Old Southern and $23.0 million in the case of Key West, less (ii) the sum of (A) 25% of the asset premium (discount) plus (B) 25% of the Cumulative Shared Loss Payments (defined as the aggregate of all of the payments made or payable to Centennial Bank minus the aggregate of all of the payments made or payable to the FDIC) plus (C) the Period Servicing Amounts for any twelve-month period prior to and ending on the True-Up Measurement Date (defined as the product of the simple average of the principal amount of shared loss loans and shared loss assets (other than shared loss securities) at the beginning and end of such period times 1%).

In connection with the Coastal-Bayside, Wakulla and Gulf State acquisitions, the true-up payments would be equal to 50% of the excess, if any, of (i) 20% of an intrinsic loss estimate of $121.0 million in the case of Coastal, $24.0 million in the case of Bayside, $73.0 million in the case of Wakulla and $35.0 million in the case of Gulf State, less (ii) the sum of (A) 20% of the net loss amount (the sum of all losses less the sum of all recoveries on covered assets) plus (B) 25% of the asset premium (discount) plus (C) 3.5% of the total loans subject to loss-sharing under the loss-sharing agreements as specified in the schedules to the agreements.

The amount of FDIC-assisted acquisitions true-up accrued at both March 31, 2016 and December 31, 2015 was $11.4 million.

We are currently exploring the possibility of terminating the remaining loss-share agreements with the FDIC. At this point, we have not reached an agreement with the FDIC to buy out the loss share.

As of March 31, 2016, we have an indemnification asset of $8.7 million remaining for the acquired loss-share loans. If this transaction with the FDIC were to occur, it would create a one-time acceleration of the indemnification asset plus the negotiated settlement for the true-up liability. While there is no guarantee we can reach an agreement with the FDIC, if we were to reach an agreement with the FDIC during 2016 to buy out the loss share agreements, it is anticipated this transaction will create a negative financial impact to 2016 earnings.

If we are able to reach an agreement with the FDIC during 2016, it will create a positive financial impact to earnings of approximately $1.5 million annually on a pre-tax basis through the year 2020 as a result of the one-time acceleration of the indemnification asset amortization.

Branches

As opportunities arise, we will continue to open new (commonly referred to as *de novo*) branches in our current markets and in other attractive market areas. During the second quarter of 2016, we have plans to open a deposit-only branch location in New York City.

During 2014, we initiated a branch efficiency study. Since that time, we have gathered data and evaluated over 40 branch locations across our footprint. The branch efficiency study considers many variables, such as proximity to other branches, deposits, transactions, market share and profitability. As a result of the study, we closed two Arkansas and two Florida locations during the first quarter of 2016. During the remainder of 2016, it is expected we will announce additional strategic consolidations where it improves efficiency in certain markets.

We currently have 77 branches in Arkansas, 58 branches in Florida, 6 branches in Alabama and a loan production office in New York City.

Results of Operations

For Three Months Ended March 31, 2016 and 2015

Our net income increased $10.3 million, or 33.1%, to $41.4 million for the three-month period ended March 31, 2016, from $31.1 million for the same period in 2015. On a diluted earnings per share basis, our earnings were $0.59 per share and $0.46 per share for the three-month periods ended March 31, 2016 and 2015, respectively. The $10.3 million increase in net income is primarily associated with additional net interest income largely resulting from our acquisitions and our organic loan growth plus the reduced amortization of the indemnification asset when compared to the same period in 2015. These improvements were partially offset by an increase in provision for loan losses in first quarter of 2016 and a modest increase in the costs associated with the asset growth when compared to the same period in 2015.

Net Interest Income

Net interest income, our principal source of earnings, is the difference between the interest income generated by earning assets and the total interest cost of the deposits and borrowings obtained to fund those assets. Factors affecting the level of net interest income include the volume of earning assets and interest-bearing liabilities, yields earned on loans and investments, rates paid on deposits and other borrowings, the level of non-performing loans and the amount of non-interest-bearing liabilities supporting earning assets. Net interest income is analyzed in the discussion and tables below on a fully taxable equivalent basis. The adjustment to convert certain income to a fully taxable equivalent basis consists of dividing tax-exempt income by one minus the combined federal and state income tax rate (39.225% for the three-month periods ended March 31, 2016 and 2015).

The Federal Reserve Board sets various benchmark rates, including the Federal Funds rate, and thereby influences the general market rates of interest, including the deposit and loan rates offered by financial institutions. The Federal Funds rate, which is the cost to banks of immediately available overnight funds, was lowered on December 16, 2008 to a historic low of 0.25% to 0% where it remained until December 16, 2015 when the rate was increased slightly to 0.50% to 0.25%.

Our GAAP net interest margin for the quarter just ended decreased from 4.94% for the three-month period ended March 31, 2015 to 4.81% for the three-month period ended March 31, 2016. For the three months ended March 31, 2016 and 2015, we recognized $10.7 million and $10.4 million, respectively in total net accretion for acquired loans and deposits. The non-GAAP margin excluding accretion income was, relatively flat at 4.22% and 4.19% for the three months ended March 31, 2016 and 2015, respectively. Additionally, the non-GAAP yield on loans excluding accretion income was also relatively flat at 5.07% and 5.04% for the three months ended March 31, 2016 and 2015, respectively. Consequently, with a growth of average loan balance of $1.66 billion we experienced a decline in the GAAP net interest margin because the organic loan growth was approximately at our core margin levels.

The effective yield on non-covered loans for the three months ended March 31, 2016 and 2015 was 5.77% and 5.65%, respectively. The effective yield on covered loans for the three months ended March 31, 2016 and 2015 was 9.84% and 14.65%, respectively.

Net interest income on a fully taxable equivalent basis increased $19.1 million, or 23.6%, to $100.0 million for the three-month period ended March 31, 2016, from $80.9 million for the same period in 2015. This increase in net interest income was the result of a $21.5 million increase in interest income offset by a $2.4 million increase in interest expense. The $21.5 million increase in interest income was primarily the result of a higher level of earning assets offset by lower yields on our loans. The $2.4 million increase in interest expense for the three-month period

ended March 31, 2016, is primarily the result of an increase in higher level of our interest bearing liabilities combined with our interest bearing liabilities repricing in a slightly higher interest rate environment. The higher level of our interest bearing liabilities resulted in an increase in interest expense of approximately $1.8 million. The repricing of our interest bearing liabilities in a slightly higher interest rate environment resulted in a $575,000 increase in interest expense.

Net interest margin, on a fully taxable equivalent basis, was 4.81% for the three months ended March 31, 2016, respectively, compared to 4.94% for the same period in 2015.

Table of Contents

Additional information and analysis for our net interest margin can be found in Tables 23 through 25 of our Non-GAAP Financial Measurements section of the Management Discussion and Analysis.

Tables 5 and 6 reflect an analysis of net interest income on a fully taxable equivalent basis for the three-month periods ended March 31, 2016 and 2015, as well as changes in fully taxable equivalent net interest margin for the three-month period ended March 31, 2016, compared to the same period in 2015.

Table 5: Analysis of Net Interest Income

	Three Months Ended March 31,	
	2016	**2015**
	(Dollars in thousands)	
Interest income	$ 105,284	$ 83,881
Fully taxable equivalent adjustment	1,973	1,855
Interest income fully taxable equivalent	107,257	85,736
Interest expense	7,227	4,810
Net interest income fully taxable equivalent	$ 100,030	$ 80,926
Yield on earning assets fully taxable equivalent	5.16%	5.23%
Cost of interest-bearing liabilities	0.44	0.37
Net interest spread fully taxable equivalent	4.72	4.86
Net interest margin fully taxable equivalent	4.81	4.94

Table 6: Changes in Fully Taxable Equivalent Net Interest Margin

	Three Months Ended March 31, 2016 vs. 2015 (In thousands)
Increase (decrease) in interest income due to change in earning assets	$ 24,616
Increase (decrease) in interest income due to change in earning asset yields	(3,095)
(Increase) decrease in interest expense due to change in interest-bearing liabilities	(1,842)
(Increase) decrease in interest expense due to change in interest rates paid on interest-bearing liabilities	(575)
Increase (decrease) in net interest income	$ 19,104

Table of Contents

Table 7 shows, for each major category of earning assets and interest-bearing liabilities, the average amount outstanding, the interest income or expense on that amount and the average rate earned or expensed for the three-month periods ended March 31, 2016 and 2015, respectively. The table also shows the average rate earned on all earning assets, the average rate expensed on all interest-bearing liabilities, the net interest spread and the net interest margin for the same periods. The analysis is presented on a fully taxable equivalent basis. Non-accrual loans were included in average loans for the purpose of calculating the rate earned on total loans.

Table 7: Average Balance Sheets and Net Interest Income Analysis

	Three Months Ended March 31,					
	2016			2015		
	Average Balance	Income / Expense	Yield / Rate	Average Balance	Income / Expense	Yield / Rate

Total liabilities	8,120,355			6,518,327		
Stockholders equity	1,210,267			1,023,481		
Total liabilities and stockholders equity	$ 9,330,622			$ 7,541,808		
Net interest spread			4.72%			4.86%
Net interest income and margin		$ 100,030	4.81%		$ 80,926	4.94%

Table 8 shows changes in interest income and interest expense resulting from changes in volume and changes in interest rates for the three-month period ended March 31, 2016 compared to the same period in 2015, on a fully taxable basis. The changes in interest rate and volume have been allocated to changes in average volume and changes in average rates, in proportion to the relationship of absolute dollar amounts of the changes in rates and volume.
