Notes to the Consolidated Financial Statements (Unaudited)

NOTE 1 Basis of Presentation

CIGNA Corporation is a holding company and is not an insurance company. Its subsidiaries conduct various businesses, that are described in its Annual Report on Form 10-K for the year ended December 31, 2010 (“2010 Form 10-K”). As used in this document, “CIGNA” or “the Company” may refer to CIGNA Corporation itself, one or more of its subsidiaries, or CIGNA Corporation and its consolidated subsidiaries. The Consolidated Financial Statements include the accounts of CIGNA Corporation and its significant subsidiaries. Intercompany transactions and accounts have been eliminated in consolidation. These Consolidated Financial Statements were prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”).

The interim consolidated financial statements are unaudited but include all adjustments (including normal recurring adjustments) necessary, in the opinion of management, for a fair statement of financial position and results of operations for the periods reported. The interim consolidated financial statements and notes should be read in conjunction with the Consolidated Financial Statements and Notes in the Company’s 2010 Form 10-K.

The preparation of interim consolidated financial statements necessarily relies heavily on estimates. This and certain other factors, such as the seasonal nature of portions of the health care and related benefits business as well as competitive and other market conditions, call for caution in estimating full year results based on interim results of operations.

During the three months ended March 31, 2011, the Company acquired the noncontrolling interest in a majority-owned subsidiary that the Company continues to consolidate.

Certain reclassifications have been made to prior period amounts to conform to the current presentation.

NOTE 2 Recent Accounting Pronouncements

Deferred acquisition costs

In October 2010, the Financial Accounting Standards Board (“FASB”) amended guidance (ASU 2010-26) for the accounting of costs related to the acquisition or renewal of insurance contracts to require costs such as certain sales compensation or telemarketing costs that are related to unsuccessful efforts and any indirect costs to be expensed as incurred. This new guidance must be implemented on January 1, 2012 or may be implemented earlier and any changes to the Company’s Consolidated Financial Statements may be recognized prospectively for acquisition costs incurred beginning in 2012 or through retrospective adjustment of comparative prior periods. The Company’s deferred acquisition costs arise from sales and renewal activities primarily in its International segment and, to a lesser extent, the Health Care and corporate-owned life insurance businesses. Because the new requirements further restrict the types of costs that are deferrable, the Company expects more of its acquisition costs to be expensed when incurred under the new guidance. The Company continues to evaluate these new requirements to determine the timing, method and estimated effects of their implementation.

Troubled debt restructurings

In April 2011, the FASB amended guidance (ASU 2011-02) to clarify for lenders that a troubled debt restructuring occurs when a debt modification is a concession to the borrower and the borrower is experiencing financial difficulties. The amendments are effective July 1, 2011 and are to be applied retrospectively to loan restructurings occurring on or after January 1, 2011. The amendment also requires new disclosures to be provided in the third quarter 2011 addressing certain troubled debt restructurings. The Company is presently evaluating these new requirements to determine the potential effects of their implementation.

[Back to Contents](#)**NOTE 3** Earnings Per Share (“EPS”)

Basic and diluted earnings per share were computed as follows:

(Dollars in millions, except per share amounts)

Three Months Ended March 31,	Basic	Effect of Dilution	Diluted
2011			
Shareholders’ net income	\$ 429		\$ 429
Shares <i>(in thousands)</i> :			
Weighted average	270,377		270,377
Common stock equivalents		3,496	3,496
TOTAL SHARES	270,377	3,496	273,873
EPS	\$ 1.59	\$ (0.02)	\$ 1.57
2010			
Shareholders’ net income	\$ 283		\$ 283
Shares <i>(in thousands)</i> :			
Weighted average	275,688		275,688
Common stock equivalents		2,412	2,412
TOTAL SHARES	275,688	2,412	278,100
EPS	\$ 1.03	\$ (0.01)	\$ 1.02

The following outstanding employee stock options were not included in the computation of diluted earnings per share because their effect would have increased diluted earnings per share (antidilutive) as their exercise price was greater than the average share price of the Company’s common stock for the period.

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Antidilutive options	4.1	5.2

The Company held 80,240,471 shares of common stock in Treasury as of March 31, 2011, and 74,283,513 shares as of March 31, 2010.

NOTE 4 Health Care Medical Claims Payable

Medical claims payable for the Health Care segment reflects estimates of the ultimate cost of claims that have been incurred but not yet reported, those which have been reported but not yet paid (reported claims in process) and other medical expense payable, which primarily comprises accruals for incentives and other amounts payable to health care professionals and facilities. Incurred but not yet reported comprises the majority of the reserve balance as follows:

<i>(In millions)</i>	March 31, 2011	December 31, 2010
Incurred but not yet reported	\$ 1,050	\$ 1,067
Reported claims in process	182	164
Other medical expense payable	16	15
MEDICAL CLAIMS PAYABLE	\$ 1,248	\$ 1,246

CIGNA CORPORATION – *Form 10-Q* – 6

[Back to Contents](#)

Activity in medical claims payable was as follows:

<i>(In millions)</i>	For the period ended	
	March 31, 2011	December 31, 2010
Balance at January 1,	\$ 1,246	\$ 921
Less: Reinsurance and other amounts recoverable	236	206
Balance at January 1, net	1,010	715
Incurred claims related to:		
Current year	2,151	8,663
Prior years	(74)	(93)
Total incurred	2,077	8,570
Paid claims related to:		
Current year	1,325	7,682
Prior years	736	593
Total paid	2,061	8,275
Ending Balance, net	1,026	1,010
Add: Reinsurance and other amounts recoverable	222	236
ENDING BALANCE	\$ 1,248	\$ 1,246

Reinsurance and other amounts recoverable reflect amounts due from reinsurers and policyholders to cover incurred but not reported and pending claims for minimum premium products and certain administrative services only business where the right of offset does not exist. See Note 10 for additional information on reinsurance. For the three months ended March 31, 2011, actual experience differed from the Company's key assumptions resulting in favorable incurred claims related to prior years' medical claims payable of \$74 million, or 0.9% of the current year incurred claims as reported for the year ended December 31, 2010. Actual completion factors resulted in a reduction in medical claims payable of \$54 million, or 0.7% of the current year incurred claims as reported for the year ended December 31, 2010 for the insured book of business. Actual medical cost trend resulted in a reduction in medical claims payable of \$20 million, or 0.2% of the current year incurred claims as reported for the year ended December 31, 2010 for the insured book of business.

For the year ended December 31, 2010, actual experience differed from the Company's key assumptions, resulting in favorable incurred claims related to prior years' medical claims payable of \$93 million, or 1.3% of the current year incurred claims as reported for the year ended December 31, 2009. Actual completion factors resulted in a reduction of the medical claims payable of \$51 million, or 0.7% of the current year incurred claims as reported for the year ended December 31, 2009 for the insured book of business. Actual medical cost trend resulted in a reduction of the medical claims payable of \$42 million, or 0.6% of the current year incurred claims as reported for the year ended December 31, 2009 for the insured book of business.

The favorable impacts in 2011 and 2010 relating to completion factors and medical cost trend variances are primarily due to the release of the provision for moderately adverse conditions, which is a component of the assumptions for both completion factors and medical cost trend, established for claims incurred related to prior years. This release was substantially offset by the provision for moderately adverse conditions established for claims incurred related to the current year.

The corresponding impact of prior year development on shareholders' net income was \$22 million for the three months ended March 31, 2011 and not material for the three months ended March 31, 2010. The favorable effect of prior year development on net income in 2011 primarily reflects continued low utilization of medical services. The change in the amount of the incurred claims related to prior years in the medical claims payable liability does not directly correspond to an increase or decrease in the Company's shareholders' net income recognized for the following reasons:

CIGNA CORPORATION – *Form 10-Q* – 7

[Back to Contents](#)

First, the Company consistently recognizes the actuarial best estimate of the ultimate liability within a level of confidence, as required by actuarial standards of practice, which require that the liabilities be adequate under moderately adverse conditions. As the Company establishes the liability for each incurrence year, the Company ensures that its assumptions appropriately consider moderately adverse conditions. When a portion of the development related to the prior year incurred claims is offset by an increase determined appropriate to address moderately adverse conditions for the current year incurred claims, the Company does not consider that offset amount as having any impact on shareholders' net income.

Second, changes in reserves for the Company's retrospectively experience-rated business do not always impact shareholders' net income. For the Company's retrospectively experience-rated business only adjustments to medical claims payable on accounts in deficit affect shareholders' net income. An increase or decrease to medical claims payable on accounts in deficit, in effect, accrues to the Company and directly impacts shareholders' net income. An account is in deficit when the accumulated medical costs and administrative charges, including profit charges, exceed the accumulated premium received. Adjustments to medical claims payable on accounts in surplus accrue directly to the policyholder with no impact on the Company's shareholders' net income. An account is in surplus when the accumulated premium received exceeds the accumulated medical costs and administrative charges, including profit charges.

The determination of liabilities for Health Care medical claims payable required the Company to make critical accounting estimates. See Note 2(N) to the Consolidated Financial Statements in the Company's 2010 Form 10-K.

NOTE 5 Guaranteed Minimum Death Benefit Contracts

The Company had future policy benefit reserves for guaranteed minimum death benefit ("GMDB") contracts of \$1.1 billion as of March 31, 2011 and December 31, 2010. The determination of liabilities for GMDB requires the Company to make critical accounting estimates. The Company estimates its liabilities for GMDB exposures using a complex internal model run using many scenarios and based on assumptions regarding lapse, future partial surrenders, claim mortality (deaths that result in claims), interest rates (mean investment performance and discount rate) and volatility. These assumptions are based on the Company's experience and future expectations over the long-term period, consistent with the long-term nature of this product. The Company regularly evaluates these assumptions and changes its estimates if actual experience or other evidence suggests that assumptions should be revised. If actual experience differs from the assumptions used in estimating these liabilities, the result could have a material adverse effect on the Company's consolidated results of operations, and in certain situations, could have a material adverse effect on the Company's financial condition.

In 2000, the Company determined that the GMDB reinsurance business was premium deficient because the recorded future policy benefit reserve was less than the expected present value of future claims and expenses less the expected present value of future premiums and investment income using revised assumptions based on actual and expected experience. The Company tests for premium deficiency by reviewing its reserve each quarter using current market conditions and its long-term assumptions. Under premium deficiency accounting, if the recorded reserve is determined insufficient, an increase to the reserve is reflected as a charge to current period income. Consistent with GAAP, the Company does not recognize gains on premium deficient long duration products.

See Note 8 for further information on the Company's recently expanded dynamic hedge programs that are used to reduce certain equity and interest rate exposures associated with this business.

Since December 31, 2010, the Company updated its long-term assumption for assumed mean investment performance ("growth interest rate") of the underlying equity mutual funds to use the market-observable LIBOR swap curve for the

portion of the liability that is covered by the Company's newly implemented growth interest rate hedge program. The mean investment performance for the remaining liability has not changed since December 31, 2010.

During 2010, the Company performed its periodic review of assumptions and recorded a charge in the third quarter of \$52 million pre-tax (\$34 million after-tax) to strengthen GMDB reserves. During 2010, current short-term interest rates had declined from the level anticipated at December 31, 2009, leading the Company to increase reserves. Interest rate risk was not covered by the GMDB equity hedge program discussed above. The Company also updated the lapse assumption for policies that have already taken or may take a significant partial withdrawal, which had a lesser reserve impact.

[Back to Contents](#)

Activity in future policy benefit reserves for the GMDB business was as follows:

<i>(In millions)</i>	For the period ended	
	March 31, 2011	December 31, 2010
Balance at January 1	\$ 1,138	\$ 1,285
Add: Unpaid Claims	37	36
Less: Reinsurance and other amounts recoverable	51	53
Balance at January 1, net	1,124	1,268
Add: Incurred benefits	(20)	(20)
Less: Paid benefits	30	124
Ending balance, net	1,074	1,124
Less: Unpaid Claims	35	37
Add: Reinsurance and other amounts recoverable	47	51
ENDING BALANCE	\$ 1,086	\$ 1,138

Benefits paid and incurred are net of ceded amounts. Incurred benefits reflect the favorable or unfavorable impact of a rising or falling equity market on the liability, and include the 2010 charge discussed above.

The aggregate value of the underlying mutual fund investments was \$16.8 billion as of March 31, 2011 and \$16.6 billion as of December 31, 2010. The death benefit coverage in force was \$4.6 billion as of March 31, 2011 and \$5.2 billion as of December 31, 2010. The death benefit coverage in force represents the excess of the guaranteed benefit amount over the value of the underlying mutual fund investments for all contractholders (approximately 520,000 as of March 31, 2011 and 530,000 as of December 31, 2010).

The Company has also written reinsurance contracts with issuers of variable annuity contracts that provide annuitants with certain guarantees related to minimum income benefits ("GMIB"). All reinsured GMIB policies also have a GMDB benefit reinsured by the Company. See Note 6 for further information.

NOTE 6 Fair Value Measurements

The Company carries certain financial instruments at fair value in the financial statements including fixed maturities, equity securities, short-term investments and derivatives. Other financial instruments are measured at fair value under certain conditions, such as when impaired.

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. A liability's fair value is defined as the amount that would be paid to transfer the liability to a market participant, not the amount that would be paid to settle the liability with the creditor.

Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment by the Company which becomes significant with increasingly complex instruments or pricing models.

The Company's financial assets and liabilities carried at fair value have been classified based upon a hierarchy defined by GAAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level of input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

[Back to Contents](#)

The Company performs ongoing analyses of prices used to value the Company's invested assets to determine that they represent appropriate estimates of fair value. This process involves quantitative and qualitative analysis including reviews of pricing methodologies, judgments of valuation inputs, the significance of any unobservable inputs, pricing statistics and trends. The Company also performs sample testing of sales values to confirm the accuracy of prior fair value estimates.

Financial Assets and Financial Liabilities Carried at Fair Value

The following tables provide information as of March 31, 2011 and December 31, 2010 about the Company's financial assets and liabilities carried at fair value. Similar disclosures for separate account assets, which are also recorded at fair value on the Company's Consolidated Balance Sheets, are provided separately as gains and losses related to these assets generally accrue directly to policyholders.

(1) Fixed maturities includes \$443 million of net appreciation required to adjust future policy benefits for the run-off settlement annuity business including \$74 million of appreciation for securities classified in Level 3.

(2) The GMIB assets represent retrocessional contracts in place from two external reinsurers which cover 55% of the exposures on these contracts.

(3) Other derivative assets include \$16 million of interest rate and foreign currency swaps qualifying as cash flow hedges and \$3 million of interest rate swaps not designated as

accounting hedges. Other derivative liabilities reflect foreign currency and interest rate swaps qualifying as cash flow hedges. See Note 8 for additional information.

Level 1 Financial Assets

Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets.

Assets in Level 1 include actively-traded U.S. government bonds and exchange-listed equity securities. Given the narrow definition of Level 1 and the Company's investment asset strategy to maximize investment returns, a relatively small portion of the Company's investment assets are classified in this category.

Level 2 Financial Assets and Financial Liabilities

Inputs for instruments classified in Level 2 include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant.

[Back to Contents](#)

Fixed maturities and equity securities. Approximately 93% of the Company's investments in fixed maturities and equity securities are classified in Level 2 including most public and private corporate debt and equity securities, federal agency and municipal bonds, non-government mortgage-backed securities and preferred stocks. Because many fixed maturities and preferred stocks do not trade daily, fair values are often derived using recent trades of securities with similar features and characteristics. When recent trades are not available, pricing models are used to determine these prices. These models calculate fair values by discounting future cash flows at estimated market interest rates. Such market rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities, based on the credit quality, industry and structure of the asset. Typical inputs and assumptions to pricing models include, but are not limited to, a combination of benchmark yields, reported trades, issuer spreads, liquidity, benchmark securities, bids, offers, reference data, and industry and economic events. For mortgage-backed securities, inputs and assumptions may also include characteristics of the issuer, collateral attributes, prepayment speeds and credit rating.

Nearly all of these instruments are valued using recent trades or pricing models. Less than 1% of the fair value of investments classified in Level 2 represents foreign bonds that are valued, consistent with local market practice, using a single unadjusted market-observable input derived by averaging multiple broker-dealer quotes.

Short-term investments are carried at fair value, which approximates cost. On a regular basis the Company compares market prices for these securities to recorded amounts to validate that current carrying amounts approximate exit prices. The short-term nature of the investments and corroboration of the reported amounts over the holding period support their classification in Level 2.

Other derivatives classified in Level 2 represent over-the-counter instruments such as interest rate and foreign currency swap contracts. Fair values for these instruments are determined using market observable inputs including forward currency and interest rate curves and widely published market observable indices. Credit risk related to the counterparty and the Company is considered when estimating the fair values of these derivatives. However, the Company is largely protected by collateral arrangements with counterparties, and determined that no adjustment for credit risk was required as of March 31, 2011 or December 31, 2010. The nature and use of these other derivatives are described in Note 8.

Level 3 Financial Assets and Financial Liabilities

Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company classifies certain newly issued, privately placed, complex or illiquid securities, as well as assets and liabilities relating to GMIB, in Level 3.

Fixed maturities and equity securities. Approximately 6% of fixed maturities and equity securities are priced using significant unobservable inputs and classified in this category, including:

<i>(In millions)</i>	March 31, 2011		December 31, 2010	
Other asset and mortgage-backed securities – valued using pricing models	\$	511	\$	514
Corporate and government bonds – valued using pricing models		314		312
Corporate bonds – valued at transaction price		69		73

Equity securities – valued at transaction price	34	34
TOTAL	\$ 928	\$ 933

Fair values of mortgage and asset-backed securities and corporate bonds are determined using pricing models that incorporate the specific characteristics of each asset and related assumptions including the investment type and structure, credit quality, industry and maturity date in comparison to current market indices, spreads and liquidity of assets with similar characteristics. For mortgage and asset-backed securities, inputs and assumptions to pricing may also include collateral attributes and prepayment speeds. Recent trades in the subject security or similar securities are assessed when available, and the Company may also review published research, as well as the issuer’s financial statements, in its evaluation. Certain subordinated corporate bonds and private equity investments are valued at transaction price in the absence of market data indicating a change in the estimated fair values.

[Back to Contents](#)

Guaranteed minimum income benefit contracts. Because cash flows of the GMIB liabilities and assets are affected by equity markets and interest rates but are without significant life insurance risk and are settled in lump sum payments, the Company reports these liabilities and assets as derivatives at fair value. The Company estimates the fair value of the assets and liabilities for GMIB contracts using assumptions regarding capital markets (including market returns, interest rates and market volatilities of the underlying equity and bond mutual fund investments), future annuitant behavior (including mortality, lapse, and annuity election rates), and non-performance risk, as well as risk and profit charges. As certain assumptions used to estimate fair values for these contracts are largely unobservable (primarily related to future annuitant behavior), the Company classifies GMIB assets and liabilities in Level 3. The Company considered the following in determining the view of a hypothetical market participant:

-

that the most likely transfer of these assets and liabilities would be through a reinsurance transaction with an independent insurer having a market capitalization and credit rating similar to that of the Company; and

-

that because this block of contracts is in run-off mode, an insurer looking to acquire these contracts would have similar existing contracts with related administrative and risk management capabilities.

These GMIB assets and liabilities are estimated with a complex internal model using many scenarios to determine the present value of net amounts expected to be paid, less the present value of net future premiums expected to be received adjusted for risk and profit charges that the Company estimates a hypothetical market participant would require to assume this business. Net amounts expected to be paid include the excess of the expected value of the income benefits over the values of the annuitants' accounts at the time of annuitization. Generally, market return, interest rate and volatility assumptions are based on market observable information. Assumptions related to annuitant behavior reflect the Company's belief that a hypothetical market participant would consider the actual and expected experience of the Company as well as other relevant and available industry resources in setting policyholder behavior assumptions. The significant assumptions used to value the GMIB assets and liabilities as of March 31, 2011 were as follows:

-

The market return ("growth interest rate") and discount rate assumptions are based on the market-observable LIBOR swap curve.

-

The projected interest rate used to calculate the reinsured income benefits is indexed to the 7-year Treasury Rate at the time of annuitization (claim interest rate) based on contractual terms. That rate was 2.90% at March 31, 2011 and must be projected for future time periods. These projected rates vary by economic scenario and are determined by an interest rate model using current interest rate curves and the prices of instruments available in the market including various interest rate caps and zero-coupon bonds. For a subset of the business, there is a contractually guaranteed floor of 3% for the claim interest rate.

-

The market volatility assumptions for annuitants' underlying mutual fund investments that are modeled based on the S&P 500, Russell 2000 and NASDAQ Composite are based on the market-implied volatility for these indices for three

to seven years grading to historical volatility levels thereafter. For the remaining 53% of underlying mutual fund investments modeled based on other indices (with insufficient market-observable data), volatility is based on the average historical level for each index over the past 10 years. Using this approach, volatility ranges from 16% to 30% for equity funds, 4% to 11% for bond funds, and 1% to 2% for money market funds.

•

The mortality assumption is 70% of the 1994 Group Annuity Mortality table, with 1% annual improvement beginning January 1, 2000.

•

The annual lapse rate assumption reflects experience that differs by the company issuing the underlying variable annuity contracts, ranges from 1% to 12%, and depends on the time since contract issue and the relative value of the guarantee.

•

The annual annuity election rate assumption reflects experience that differs by the company issuing the underlying variable annuity contracts and depends on the annuitant's age, the relative value of the guarantee and whether a contractholder has had a previous opportunity to elect the benefit. Immediately after the expiration of the waiting period, the assumed probability that an individual will annuitize their variable annuity contract is up to 80%. For the second and subsequent annual opportunities to elect the benefit, the assumed probability of election is up to 35%.

•

The nonperformance risk adjustment is incorporated by adding an additional spread to the discount rate in the calculation of both (1) the GMIB liability to reflect a hypothetical market participant's view of the risk of the Company not fulfilling its GMIB obligations, and (2) the GMIB asset to reflect a hypothetical market participant's view of the reinsurers' credit risk, after considering collateral. The estimated market-implied spread is company-specific for each party involved to the extent that company-specific market data is available and is based on industry averages for similarly rated companies when company-specific data is not available. The spread is impacted by the credit default swap spreads of the specific parent companies, adjusted to reflect subsidiaries' credit ratings relative to their parent company and any available collateral. The additional spread over LIBOR incorporated into the discount rate ranged from 5 to 115 basis points for the GMIB liability and from 10 to 80 basis points for the GMIB reinsurance asset for that portion of the interest rate curve most relevant to these policies.

•

The risk and profit charge assumption is based on the Company's estimate of the capital and return on capital that would be required by a hypothetical market participant.

[Back to Contents](#)

The Company regularly evaluates each of the assumptions used in establishing these assets and liabilities by considering how a hypothetical market participant would set assumptions at each valuation date. Capital markets assumptions are expected to change at each valuation date reflecting currently observable market conditions. Other assumptions may also change based on a hypothetical market participant's view of actual experience as it emerges over time or other factors that impact the net liability. If the emergence of future experience or future assumptions differs from the assumptions used in estimating these assets and liabilities, the resulting impact could be material to the Company's consolidated results of operations, and in certain situations, could be material to the Company's financial condition.

GMIB liabilities are reported in the Company's Consolidated Balance Sheets in Accounts payable, accrued expenses and other liabilities. GMIB assets associated with these contracts represent net receivables in connection with reinsurance that the Company has purchased from two external reinsurers and are reported in the Company's Consolidated Balance Sheets in Other assets, including other intangibles.

Changes in Level 3 Financial Assets and Financial Liabilities Carried at Fair Value

The following tables summarize the changes in financial assets and financial liabilities classified in Level 3 for the three months ended March 31, 2011 and 2010. These tables exclude separate account assets as changes in fair values of these assets accrue directly to policyholders. Gains and losses reported in these tables may include net changes in fair value that are attributable to both observable and unobservable inputs.

(1) Amounts do not accrue to shareholders.

[Back to Contents](#)

As noted in the tables above, total gains and losses included in shareholders' net income are reflected in the following captions in the Consolidated Statements of Income:

- Realized investment gains (losses) and net investment income for amounts related to fixed maturities and equity securities; and

- GMIB fair value (gain) loss for amounts related to GMIB assets and liabilities.

Reclassifications impacting Level 3 financial instruments are reported as transfers into or out of the Level 3 category as of the beginning of the quarter in which the transfer occurs. Therefore gains and losses in income only reflect activity for the period the instrument was classified in Level 3.

Transfers into or out of the Level 3 category occur when unobservable inputs, such as the Company's best estimate of what a market participant would use to determine a current transaction price, become more or less significant to the fair value measurement. For the three months ended March 31, 2010, transfers into Level 3 from Level 2 primarily reflect an increase in the unobservable inputs used to value certain private corporate bonds, principally related to credit risk of the issuers.

The Company provided reinsurance for other insurance companies that offer a guaranteed minimum income benefit, and then retroceded a portion of the risk to other insurance companies. These arrangements with third-party insurers are the instruments still held at the reporting date for GMIB assets and liabilities in the table above. Because these reinsurance arrangements remain in effect at the reporting date, the Company has reflected the total gain or loss for the period as the total gain or loss included in income attributable to instruments still held at the reporting date. However, the Company reduces the GMIB assets and liabilities resulting from these reinsurance arrangements when annuitants lapse, die, elect their benefit, or reach the age after which the right to elect their benefit expires.

Under FASB's guidance for fair value measurements, the Company's GMIB assets and liabilities are expected to be volatile in future periods because the underlying capital markets assumptions will be based largely on market-observable inputs at the close of each reporting period including interest rates and market-implied volatilities.

GMIB fair value gains of \$16 million for the three months ended March 31, 2011, were primarily due to increases in interest rates and underlying account values during the period due to favorable equity market returns, partially offset by updates to the risk and profit charges that the Company anticipates a hypothetical market participant would require to assume this business.

Beginning in February 2011, the Company implemented a dynamic equity hedge program to reduce a portion of the equity market exposures related to GMIB contracts ("GMIB equity hedge program") by entering into exchange-traded futures contracts. The Company also entered into a dynamic interest rate hedge program that reduces a portion of the interest rate exposure related to GMIB contracts ("GMIB growth interest rate hedge program") using LIBOR swap contracts and exchange-traded treasury futures contracts. See Note 8 for further information.

GMIB fair value gains of \$4 million for the three months ended March 31, 2010 were primarily a result of increases in underlying account values during the period due to favorable equity market returns, offset by declining interest rates.

[Back to Contents](#)

Separate account assets

Fair values and changes in the fair values of separate account assets generally accrue directly to the policyholders and are excluded from the Company's revenues and expenses. As of March 31, 2011 and December 31, 2010 separate account assets were as follows:

March 31, 2011	Quoted	Significant	Significant	Total
	Prices in	Other	Significant	
	Active	Observable	Unobservable	
	Markets for	Inputs	Inputs	
	Identical			
	Assets			
	(Level 1)	(Level 2)	(Level 3)	
<i>(In millions)</i>				
Guaranteed separate accounts (See Note 16)	\$ 297	\$ 1,418	\$ -	\$ 1,715
Non-guaranteed separate accounts ⁽¹⁾	2,138	4,001	559	6,698
TOTAL SEPARATE ACCOUNT ASSETS	\$ 2,435	\$ 5,419	\$ 559	\$ 8,413

(1) As of March 31, 2011, non-guaranteed separate accounts include \$3.2 billion in assets supporting the Company's pension plans, including \$517 million classified in Level 3.

December 31, 2010	Quoted	Significant	Significant	Total
	Prices in	Other	Significant	
	Active	Observable	Unobservable	
	Markets for	Inputs	Inputs	
	Identical			
	Assets			
	(Level 1)	(Level 2)	(Level 3)	
<i>(In millions)</i>				
Guaranteed separate accounts (See Note 16)	\$ 286	\$ 1,418	\$ -	\$ 1,704
Non-guaranteed separate accounts ⁽¹⁾	1,947	3,663	594	6,204
TOTAL SEPARATE ACCOUNT ASSETS	\$ 2,233	\$ 5,081	\$ 594	\$ 7,908

(1) As of December 31, 2010, non-guaranteed separate accounts include \$2.8 billion in assets supporting the Company's pension plans, including \$557 million classified in Level 3.

Separate account assets in Level 1 include exchange-listed equity securities. Level 2 assets primarily include:

-

equity securities and corporate and structured bonds valued using recent trades of similar securities or pricing models that discount future cash flows at estimated market interest rates as described above; and

-

actively-traded institutional and retail mutual fund investments and separate accounts priced using the daily net asset value which is their exit price.

Separate account assets classified in Level 3 include investments primarily in securities partnerships and real estate generally valued based on the separate account's ownership share of the equity of the investee including changes in the fair values of its underlying investments. In addition, certain fixed income funds priced using their net asset values are classified in Level 3 due to restrictions on their withdrawal.

[Back to Contents](#)

The following tables summarize the changes in separate account assets reported in Level 3 for the three months ended March 31, 2011 and 2010.

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Balance at January 1	\$ 594	\$ 550
Policyholder gains ⁽¹⁾	58	16
Purchases, sales and settlements:		
Purchases	9	24
Sales	(40)	(18)
Settlements	(59)	(9)
Total purchases, sales and settlements	(90)	(3)
Transfers into/(out of) Level 3:		
Transfers into Level 3	-	-
Transfers out of Level 3	(3)	(19)
Total transfers into/(out of) Level 3	(3)	(19)
BALANCE AT MARCH 31	\$ 559	\$ 544

(1) Included in this amount are gains of \$40 million and \$15 million attributable to instruments still held at March 31, 2011 and March 31, 2010 respectively.

Assets and Liabilities Measured at Fair Value under Certain Conditions

Some financial assets and liabilities are not carried at fair value each reporting period, but may be measured using fair value only under certain conditions, such as investments in real estate entities and commercial mortgage loans when they become impaired. During the three months ended March 31, 2011, no commercial mortgage loans or real estate entities were written down to their fair values.

During 2010, impaired commercial mortgage loans with carrying values of \$158 million were written down to their fair values of \$134 million, resulting in pre-tax realized investment losses of \$24 million. Also during 2010, impaired real estate entities carried at cost of \$35 million were written down to their fair values of \$21 million, resulting in pre-tax realized investment losses of \$14 million.

These fair values were calculated by discounting the expected future cash flows at estimated market interest rates. Such market rates were derived by calculating the appropriate spread over comparable U.S. Treasury rates, based on the characteristics of the underlying collateral, including the type, quality and location of the assets. The fair value measurements were classified in Level 3 because these cash flow models incorporate significant unobservable inputs.

Fair Value Disclosures for Financial Instruments Not Carried at Fair Value

Most financial instruments that are subject to fair value disclosure requirements are carried in the Company's consolidated financial statements at amounts that approximate fair value. The following table provides the fair values and carrying values of the Company's financial instruments not recorded at fair value that are subject to fair value

disclosure requirements at March 31, 2011 and December 31, 2010:

<i>(In millions)</i>	March 31, 2011		December 31, 2010	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Commercial mortgage loans	\$ 3,434	\$ 3,402	\$ 3,470	\$ 3,486
Contractholder deposit funds, excluding universal life products	\$ 990	\$ 979	\$ 1,001	\$ 989
Long-term debt, including current maturities, excluding capital leases	\$ 3,290	\$ 3,087	\$ 2,926	\$ 2,709

The fair values presented in the table above have been estimated using market information when available. The following is a description of the valuation methodologies and inputs used by the Company to determine fair value.

CIGNA CORPORATION – *Form 10-Q* – 18

[Back to Contents](#)

Commercial mortgage loans. The Company estimates the fair value of commercial mortgage loans generally by discounting the contractual cash flows at estimated market interest rates that reflect the Company's assessment of the credit quality of the loans. Market interest rates are derived by calculating the appropriate spread over comparable U.S. Treasury rates, based on the property type, quality rating and average life of the loan. The quality ratings reflect the relative risk of the loan, considering debt service coverage, the loan-to-value ratio and other factors. Fair values of impaired mortgage loans are based on the estimated fair value of the underlying collateral generally determined using an internal discounted cash flow model.

Contractholder deposit funds, excluding universal life products. Generally, these funds do not have stated maturities. Approximately 50% of these balances can be withdrawn by the customer at any time without prior notice or penalty. The fair value for these contracts is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. Most of the remaining contractholder deposit funds are reinsured by the buyers of the individual life and annuity and retirement benefits businesses. The fair value for these contracts is determined using the fair value of these buyers' assets supporting these reinsured contracts. The Company had a reinsurance recoverable equal to the carrying value of these reinsured contracts.

Long-term debt, including current maturities, excluding capital leases. The fair value of long-term debt is based on quoted market prices for recent trades. When quoted market prices are not available, fair value is estimated using a discounted cash flow analysis and the Company's estimated current borrowing rate for debt of similar terms and remaining maturities.

Fair values of off-balance-sheet financial instruments were not material.

NOTE 7 Investments**Total Realized Investment Gains and Losses**

The following total realized gains and losses on investments include other-than-temporary impairments on debt securities but exclude amounts required to adjust future policy benefits for the run-off settlement annuity business:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Fixed maturities	\$ 21	\$ 15
Equity securities	3	4
Commercial mortgage loans	-	(11)
Other investments, including derivatives	2	(14)
Realized investment gains (losses), before income taxes	26	(6)
Less income taxes (benefits)	9	(3)
NET REALIZED INVESTMENT GAINS (LOSSES)	\$ 17	\$ (3)

Included in pre-tax realized investment gains (losses) above were changes in valuation reserves, asset write-downs and other-than-temporary impairments on fixed maturities as follows:

Three Months Ended

<i>(In millions)</i>	March 31,	
	2011	2010
Credit-related ⁽¹⁾	\$ -	\$ 25
Other	-	1
TOTAL ⁽²⁾	\$ -	\$ 26

(1) Credit related losses include changes in valuation reserves and asset write-downs related to commercial mortgage loans and investments in real estate entities.

(2) Other-than-temporary impairments on fixed maturities for the three months ended March 31, 2011 and March 31, 2010 were not significant.

[Back to Contents](#)

Fixed Maturities and Equity Securities

Securities in the following table are included in fixed maturities and equity securities on the Company's Consolidated Balance Sheets. These securities are carried at fair value with changes in fair value reported in other realized investment gains (losses) and interest and dividends reported in net investment income. The Company's hybrid investments include preferred stock or debt securities with call or conversion features.

<i>(In millions)</i>	As of March 31, 2011	As of December 31, 2010
Included in fixed maturities:		
Trading securities (amortized cost: \$3; \$3)	\$ 3	\$ 3
Hybrid securities (amortized cost: \$54; \$45)	63	52
TOTAL	\$ 66	\$ 55
Included in equity securities:		
Hybrid securities (amortized cost: \$113; \$108)	\$ 94	\$ 86

Fixed maturities included \$55 million at March 31, 2011, which were pledged as collateral to brokers as required under certain futures contracts. These fixed maturities were primarily federal government securities.

The following information about fixed maturities excludes trading and hybrid securities. The amortized cost and fair value by contractual maturity periods for fixed maturities were as follows at March 31, 2011:

<i>(In millions)</i>	Amortized Cost	Fair Value
Due in one year or less	\$ 709	\$ 721
Due after one year through five years	4,714	5,000
Due after five years through ten years	4,966	5,370
Due after ten years	2,570	2,947
Other asset and mortgage-backed securities	822	929
TOTAL	\$ 13,781	\$ 14,967

Actual maturities could differ from contractual maturities because issuers may have the right to call or prepay obligations, with or without penalties. Also, in some cases the Company may extend maturity dates.

Gross unrealized appreciation (depreciation) on fixed maturities (excluding trading securities and hybrid securities with a fair value of \$66 million at March 31, 2011 and \$55 million at December 31, 2010) by type of issuer is shown below.

[Back to Contents](#)

<i>(In millions)</i>	March 31, 2011			
	Amortized Cost	Unrealized Appreciation	Unrealized Depreciation	Fair Value
Federal government and agency	\$ 539	\$ 210	\$ (2)	\$ 747
State and local government	2,264	165	(12)	2,417
Foreign government	1,104	58	(5)	1,157
Corporate	9,052	711	(46)	9,717
Federal agency mortgage-backed	9	1	-	10
Other mortgage-backed	72	10	(2)	80
Other asset-backed	741	109	(11)	839
TOTAL	\$ 13,781	\$ 1,264	\$ (78)	\$ 14,967
<i>(In millions)</i>	December 31, 2010			
Federal government and agency	\$ 459	\$ 229	\$ (1)	\$ 687
State and local government	2,305	172	(10)	2,467
Foreign government	1,095	63	(4)	1,154
Corporate	8,697	744	(49)	9,392
Federal agency mortgage-backed	9	1	-	10
Other mortgage-backed	80	10	(3)	87
Other asset-backed	752	117	(12)	857
TOTAL	\$ 13,397	\$ 1,336	\$ (79)	\$ 14,654

The above table includes investments with a fair value of \$2.4 billion supporting the Company's run-off settlement annuity business, with gross unrealized appreciation of \$421 million and gross unrealized depreciation of \$36 million at March 31, 2011. Such unrealized amounts are required to support future policy benefit liabilities of this business and, as such, are not included in accumulated other comprehensive income. At December 31, 2010, investments supporting this business had a fair value of \$2.5 billion, gross unrealized appreciation of \$476 million and gross unrealized depreciation of \$33 million.

Sales information for available-for-sale fixed maturities and equity securities were as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2011	2010
Proceeds from sales	\$ 155	\$ 240
Gross gains on sales	\$ 14	\$ 15
Gross losses on sales	\$ -	\$ (1)

[Back to Contents](#)

Review of declines in fair value. Management reviews fixed maturities with a decline in fair value from cost for impairment based on criteria that include:

- length of time and severity of decline;
- financial health and specific near term prospects of the issuer;
- changes in the regulatory, economic or general market environment of the issuer's industry or geographic region; and
- the Company's intent to sell or the likelihood of a required sale prior to recovery.

Excluding trading and hybrid securities, as of March 31, 2011, fixed maturities with a decline in fair value from amortized cost (which were primarily investment grade corporate bonds) were as follows, including the length of time of such decline:

<i>(In millions)</i>	Fair Value	Amortized Cos	Unrealized Depreciation	Number of Issues
Fixed maturities:				
One year or less:				
Investment grade	\$ 1,178	\$ 1,213	\$ (35)	371
Below investment grade	\$ 105	\$ 107	\$ (2)	71
More than one year:				
Investment grade	\$ 296	\$ 333	\$ (37)	66
Below investment grade	\$ 37	\$ 41	\$ (4)	18

The unrealized depreciation of investment grade fixed maturities is primarily due to increases in market yields since purchase. There were no equity securities with a fair value significantly lower than cost as of March 31, 2011.

Commercial Mortgage Loans

Mortgage loans held by the Company are made exclusively to commercial borrowers and are diversified by property type, location and borrower. Loans are secured by high quality, primarily completed and substantially leased operating properties, generally carried at unpaid principal balances and issued at a fixed rate of interest.

Credit quality. The Company has one portfolio segment and one class of mortgage loans and applies a consistent and disciplined approach to evaluating and monitoring credit risk, beginning with the initial underwriting of a mortgage loan and continuing throughout the investment holding period. Mortgage origination professionals employ an internal rating system developed from the Company's experience in real estate investing and mortgage lending. A quality rating, designed to evaluate the relative risk of the transaction, is assigned at each loan's origination and is updated

each year as part of the annual portfolio loan review. The Company monitors credit quality on an ongoing basis, classifying each loan as a loan in good standing, potential problem loan or problem loan.

Quality ratings are based on internal evaluations of each loan's specific characteristics considering a number of key inputs, including real estate market-related factors such as rental rates and vacancies, and property-specific inputs such as growth rate assumptions and lease rollover statistics. However, the two most significant contributors to the credit quality rating are the debt service coverage and loan-to-value ratios. The debt service coverage ratio measures the amount of property cash flow available to meet annual interest and principal payments on debt. A debt service coverage ratio below 1.0 indicates that there is not enough cash flow to cover the loan payments. The loan-to-value ratio, commonly expressed as a percentage, compares the amount of the loan to the fair value of the underlying property collateralizing the loan. Based on property valuations and cash flows estimated as part of the most recent annual review completed in July, 2010, and considering updates for loans where material changes were subsequently identified, at March 31, 2011 both the portfolio's average loan-to-value ratio of 74% and debt service coverage ratio of 1.38 were unchanged from December 31, 2010.

[Back to Contents](#)

The following table summarizes the credit risk profile of the Company's commercial mortgage loan portfolio based on loan-to-value and debt service coverage ratios, as of March 31, 2011:

<i>(Dollars in millions)</i>	Debt Service Coverage Ratio					Total
	1.30x or Greater	1.20x to 1.29x	1.10x to 1.19x	1.00x to 1.09x	Less than 1.00x	
Loan-to-Value Ratios						
Below 50%	\$ 330	\$ -	\$ -	\$ -	\$ 29	\$ 359
50% to 59%	382	54	56	-	-	492
60% to 69%	534	72	5	29	25	665
70% to 79%	218	78	33	55	66	450
80% to 89%	186	186	165	125	13	675
90% to 99%	15	54	181	185	119	554
100% or above	-	-	47	43	117	207
TOTAL	\$ 1,665	\$ 444	\$ 487	\$ 437	\$ 369	\$ 3,402

The Company's annual in-depth review of its commercial mortgage loan investments is the primary mechanism for identifying emerging risks in the portfolio. This review is performed by the Company's investment professionals and includes an analysis of each underlying property's most recent annual financial statements, rent rolls, operating plans, budgets, a physical inspection of the property and other pertinent factors. Based on historical results, current leases, lease expirations and rental conditions in each market, the Company estimates the current year and future stabilized property income and fair value, and categorizes the investments as loans in good standing, potential problem loans or problem loans. Quality ratings are adjusted between annual reviews if new property information is received or events such as delinquency or a borrower request for restructure cause management to believe that the Company's estimate of financial performance, fair value or the risk profile of the underlying property has been impacted.

Potential problem mortgage loans are considered current (no payment more than 59 days past due), but exhibit certain characteristics that increase the likelihood of future default. The characteristics management considers include, but are not limited to, the deterioration of debt service coverage below 1.0, estimated loan-to-value ratios increasing to 100% or more, downgrade in quality rating and request from the borrower for restructuring. In addition, loans are considered potential problems if principal or interest payments are past due by more than 30 but less than 60 days. Problem mortgage loans are either in default by 60 days or more or have been restructured as to terms, which could include concessions on interest rate, principal payment or maturity date. The Company monitors each problem and potential problem mortgage loan on an ongoing basis, and updates the loan categorization and quality rating when warranted.

Problem and potential problem mortgage loans, net of valuation reserves, totaled \$373 million at March 31, 2011 and \$383 million at December 31, 2010, with no significant concentrations by property type or geographic region in either year.

Impaired commercial mortgage loans. A commercial mortgage loan is considered impaired when it is probable that the Company will not collect all amounts due (principal and interest) according to the terms of the original loan agreement. The Company assesses each loan individually for impairment, utilizing the information obtained from the quality review process discussed above. Impaired loans are carried at the lower of unpaid principal balance or the fair value of the underlying collateral. Certain commercial mortgage loans without valuation reserves are considered impaired because the Company will not collect all interest due according to the terms of the original agreements; however, the Company expects to recover their remaining carrying value primarily because it is less than the fair

value of the underlying property.

[Back to Contents](#)

The carrying value of the Company's impaired commercial mortgage loans and related valuation reserves were as follows:

<i>(In millions)</i>	March 31, 2011			December 31, 2010		
	Gross	Reserves	Net	Gross	Reserves	Net
Impaired commercial mortgage loans with valuation reserves	\$ 36	\$ (11)	\$ 25	\$ 47	\$ (12)	\$ 35
Impaired commercial mortgage loans with no valuation reserves	60	-	60	60	-	60
TOTAL	\$ 96	\$ (11)	\$ 85	\$ 107	\$ (12)	\$ 95

During the three months ended March 31, 2010, the Company recorded an \$11 million pre-tax (\$7 million after-tax) increase in valuation reserves on impaired commercial mortgage loans primarily due to decreased valuations of certain office properties collateralizing the loans. The average recorded investment in impaired loans was \$102 million at March 31, 2011 and \$221 million at March 31, 2010. The Company recognizes interest income on problem mortgage loans only when payment is actually received because of the risk profile of the underlying investment. Interest income that would have been reflected in net income if interest on non-accrual commercial mortgage loans had been received in accordance with the original terms was not significant for the three months ended March 31, 2011 or 2010. Interest income on impaired commercial mortgage loans was not significant for the three months ended March 31, 2011 or 2010.

The following table summarizes the changes in valuation reserves for commercial mortgage loans:

<i>(In millions)</i>	2011	2010
Reserve balance, January 1,	\$ 12	\$ 17
Increase in valuation reserves	-	11
Charge-offs upon sales and repayments, net of recoveries	(1)	-
RESERVE BALANCE, MARCH 31,	\$ 11	\$ 28

Short-term investments and cash equivalents. Short-term investments and cash equivalents includes corporate securities of \$1.2 billion, federal government securities of \$124 million and money market funds of \$43 million as of March 31, 2011. The Company's short-term investments and cash equivalents as of December 31, 2010 included corporate securities of \$1.1 billion, federal government securities of \$137 million and money market funds of \$40 million.

NOTE 8 Derivative Financial Instruments

Derivative instruments associated with the Company's run-off reinsurance segment

The Company has written reinsurance contracts with issuers of variable annuity contracts that provide annuitants with certain guarantees of minimum income benefits resulting from the level of variable annuity account values compared with a contractually guaranteed amount (“GMIB liabilities”). The Company has purchased retrocessional coverage for a portion of these contracts (“GMIB assets”). Because cash flows are affected by equity markets and interest rates, but are without significant life insurance risk and are settled in lump sum payments, the Company reports these GMIB liabilities and assets as derivatives at fair value.

During the first quarter of 2011, the Company expanded its dynamic hedge program that substantially reduces equity market exposures associated with its GMDB business to include a portion of equity market exposures associated with its GMIB business (approximately one-quarter). The Company also implemented a dynamic hedge program to reduce the growth interest rate exposures for approximately one-third of its GMDB and one-quarter of its GMIB businesses (“GMDB and GMIB growth interest rate hedge program”). These hedge programs are dynamic because the Company will regularly rebalance the hedging instruments within established parameters as equity and interest rate exposures of these businesses change.

The Company manages these hedge programs using exchange-traded equity, foreign currency and Treasury futures contracts, and interest rate swap contracts. These contracts are generally expected to rise in value as equity markets and interest rates decline, and decline in value as equity markets and interest rates rise.

[Back to Contents](#)

These hedge programs do not qualify for GAAP hedge accounting. Although these hedge programs effectively reduce equity market and interest rate exposures, changes in the fair values of the swap and futures contracts may not exactly offset changes in the portions of the GMDB and GMIB liabilities covered by these hedges, in part because the market does not offer contracts that exactly match the targeted exposure profile. The results of the swaps and futures contracts are included in other revenues and amounts reflecting corresponding changes in liabilities for GMDB contracts are included in benefits and expenses. Related changes in liabilities for GMIB contracts are reported in GMIB fair value (gain) loss.

See Notes 5 and 6 for further details regarding these businesses.

Derivative instruments used in the Company's investment risk management

Derivative financial instruments are also used by the Company as a part of its investment strategy to manage the characteristics of investment assets (such as duration, yield, currency and liquidity) to meet the varying demands of the related insurance and contractholder liabilities (such as paying claims, investment returns and withdrawals). Derivatives are typically used under this strategy to minimize interest rate and foreign currency risks. The Company routinely monitors exposure to credit risk associated with derivatives and diversifies the portfolio among approved dealers of high credit quality to minimize this risk.

Accounting for derivative instruments

The Company applies hedge accounting when derivatives are designated, qualify and are highly effective as hedges. Effectiveness is formally assessed and documented at inception and each period throughout the life of a hedge using various quantitative methods appropriate for each hedge, including regression analysis and dollar offset. Under hedge accounting, the changes in fair value of the derivative and the hedged risk are generally recognized together and offset each other when reported in shareholders' net income.

The Company accounts for derivative instruments as follows:

-

Derivatives are reported on the balance sheet at fair value with changes in fair values reported in shareholders' net income or accumulated other comprehensive income.

-

Changes in the fair value of derivatives that hedge market risk related to future cash flows – and that qualify for hedge accounting – are reported in a separate caption in accumulated other comprehensive income. These hedges are referred to as cash flow hedges.

-

A change in the fair value of a derivative instrument may not always equal the change in the fair value of the hedged item; this difference is referred to as hedge ineffectiveness. Where hedge accounting is used, the Company reflects hedge ineffectiveness in shareholders' net income (generally as part of realized investment gains and losses).

Collateral and termination features

Certain of the Company's over-the-counter derivative instruments contain provisions requiring either the Company or the counterparty to post collateral depending on the amount of the net liability position and predefined financial strength or credit rating thresholds. The collateral posting requirements vary by counterparty. The aggregate fair value of derivative instruments with such credit-risk-related contingent features where the Company was in a net liability position was \$30 million at March 31, 2011 and \$25 million at December 31, 2010 for which the Company was not required to post collateral with its counterparties. If the various contingent features underlying the agreements were triggered as of the balance sheet date, the Company would be required to post collateral equal to the total net liability. The Company is a party to certain other derivative instruments that contain termination provisions for which the counterparties could demand immediate payment of the total net liability position if the financial strength rating of the Company were to decline below specified levels. As of March 31, 2011 and December 31, 2010, there was no net liability position under such derivative instruments.

The following tables present information about the nature and accounting treatment of the Company's primary derivative financial instruments including the Company's purpose for entering into specific derivative transactions, and their locations in and effect on the financial statements as of March 31, 2011 and December 31, 2010, and for the periods ended March 31, 2011 and March 31, 2010. Derivatives in the Company's separate accounts are excluded from the tables because associated gains and losses generally accrue directly to policyholders.

Treasury lock

Interest rate	To hedge the variability of and fix at inception date, the benchmark Treasury rate component of future interest payments on debt to be issued.	The Company paid the fair value of the contract at the expiration. Cash flows were reported in operating activities.	Using cash flow hedge accounting, fair values are reported in other assets or other liabilities, with changes in fair value reported in accumulated other comprehensive income and amortized to interest expense over the period of expected cash flows.
---------------	--	--	--

Fair Value Effect on the Financial Statements

In the first quarter of 2009, all treasury locks matured and the Company recognized a gain of \$14 million in other comprehensive income, resulting in net cumulative losses of \$26 million, to be amortized to interest expense over the period of expected hedged cash flows. In the second quarter of 2009, the Company issued debt and began amortizing this loss to interest expense.

For the three months ended March 31, 2011 and 2010, the amount of gains (losses) reclassified from accumulated other comprehensive income into income was not significant. No gains (losses) were recognized due to ineffectiveness and no amounts were excluded from the assessment of hedge ineffectiveness.

NOTE 9 Variable Interest Entities

When the Company becomes involved with a variable interest entity and when the nature of the Company's involvement with the entity changes, in order to determine if the Company is the primary beneficiary and must consolidate the entity, it evaluates:

- the structure and purpose of the entity;
- the risks and rewards created by and shared through the entity; and
- the entity's participants' ability to direct the activities, receive its benefits and absorb its losses. Participants include the entity's sponsors, equity holders, guarantors, creditors and servicers.

In the normal course of its investing activities, the Company makes passive investments in securities that are issued by variable interest entities for which the Company is not the sponsor or manager. These investments are predominantly

asset-backed securities primarily collateralized by foreign bank obligations and mortgage-backed securities. The asset-backed securities largely represent fixed-rate debt securities issued by trusts which hold perpetual floating-rate subordinated notes issued by foreign banks. The mortgage-backed securities represent senior interests in pools of commercial or residential mortgages created and held by special-purpose entities to provide investors with diversified exposure to these assets. The Company owns senior securities issued by several entities and receives fixed-rate cash flows from the underlying assets in the pools. The Company is not the primary beneficiary and does not consolidate any of these entities because either:

-

it had no power to direct the activities that most significantly impact the entities' economic performance; or

-

it had no right to receive benefits nor obligation to absorb losses that could be significant to these variable interest entities.

The Company has not provided, and does not intend to provide, financial support to these entities. The Company performs ongoing qualitative analyses of its involvement with these variable interest entities to determine if consolidation is required. The Company's maximum potential exposure to loss related to these entities is limited to the carrying amount of its investment reported in fixed maturities and equity securities, and its aggregate ownership interest is insignificant relative to the total principal amount issued by these entities.

NOTE 10 Reinsurance

The Company's insurance subsidiaries enter into agreements with other insurance companies to assume and cede reinsurance. Reinsurance is ceded primarily to limit losses from large exposures and to permit recovery of a portion of direct losses. Reinsurance is also used in acquisition and disposition transactions when the underwriting company is not being acquired. Reinsurance does not relieve the originating insurer of liability. The Company regularly evaluates the financial condition of its reinsurers and monitors its concentrations of credit risk.

[Back to Contents](#)

Retirement benefits business

The Company had reinsurance recoverables of \$1.6 billion as of March 31, 2011 and \$1.7 billion as of December 31, 2010 from Prudential Retirement Insurance and Annuity Company resulting from the sale of the retirement benefits business, which was primarily in the form of a reinsurance arrangement. The reinsurance recoverable, which is reduced as the Company's reinsured liabilities are paid or directly assumed by the reinsurer, is secured primarily by fixed maturities whose book value is equal to or greater than 100% of the reinsured liabilities. These fixed maturities are held in a trust established for the benefit of the Company. As of March 31, 2011, the book value of the trust assets exceeded the recoverable.

Individual life and annuity reinsurance

The Company had reinsurance recoverables of \$4.2 billion as of March 31, 2011 and \$4.3 billion as of December 31, 2010 from The Lincoln National Life Insurance Company and Lincoln Life & Annuity of New York resulting from the 1998 sale of the Company's individual life insurance and annuity business through indemnity reinsurance arrangements. At March 31, 2011, the \$3.8 billion reinsurance recoverable from The Lincoln National Life Insurance Company was secured by assets held in a trust established for the benefit of the Company, and was less than the market value of the trust assets. The trust was established to allow the Company to take statutory reserve credit in New York for business ceded to Lincoln National Life Insurance Company. Under Section 532 of the Dodd-Frank Act, which becomes effective July 21, 2011, the trust will no longer be required in order for the Company to take statutory reserve credit. The remaining recoverable from Lincoln Life & Annuity of New York of \$393 million is currently unsecured, however, if this reinsurer does not maintain a specified minimum credit or claims paying rating, it is required to fully secure the outstanding balance. Similarly, in the event the trust were terminated because of the Dodd-Frank Act, failure of Lincoln National Life Insurance Company to maintain a specified minimum claims paying rating would require the outstanding balance to be fully secured. As of March 31, 2011 both companies had ratings sufficient to avoid triggering a contractual obligation.

Other Ceded and Assumed Reinsurance

Ceded Reinsurance: Ongoing operations

The Company's insurance subsidiaries have reinsurance recoverables from various reinsurance arrangements in the ordinary course of business for its Health Care, Disability and Life, and International segments as well as the non-leveraged and leveraged corporate-owned life insurance business. Reinsurance recoverables of \$291 million as of March 31, 2011 are expected to be collected from more than 70 reinsurers.

The Company reviews its reinsurance arrangements and establishes reserves against the recoverables in the event that recovery is not considered probable. As of March 31, 2011, the Company's recoverables related to these segments were net of a reserve of \$8 million.

Assumed and Ceded reinsurance: Run-off Reinsurance segment

The Company's Run-off Reinsurance operations assumed risks related to GMDB contracts, GMIB contracts, workers' compensation, and personal accident business and also purchased retrocessional coverage to reduce the risk of loss on these contracts. In December 2010, the Company entered into reinsurance arrangements to transfer the remaining liabilities and administration of the workers' compensation and personal accident businesses to a subsidiary of Enstar Group Limited. Under this arrangement, the new reinsurer also assumes the future risk of collection from prior reinsurers. See CIGNA's 2010 Form 10-K for further details regarding this arrangement.

Liabilities related to GMDB, workers' compensation and personal accident are included in future policy benefits and unpaid claims. Because the GMIB contracts are treated as derivatives under GAAP, the asset related to GMIB is recorded in the caption Other assets, including other intangibles and the liability related to GMIB is recorded in the caption Accounts payable, accrued expenses, and other liabilities on the Company's Consolidated Balance Sheets (see Notes 6 and 16 for additional discussion of the GMIB assets and liabilities).

The reinsurance recoverables for GMDB, workers' compensation, and personal accident total \$259 million as of March 31, 2011. Of this amount, approximately 78% are secured by assets in trust or letters of credit.

The Company reviews its reinsurance arrangements and establishes reserves against the recoverables in the event that recovery is not considered probable. As of March 31, 2011, the Company's recoverables related to this segment were net of a reserve of \$1 million.

The Company's payment obligations for underlying reinsurance exposures assumed by the Company under these contracts are based on the ceding companies' claim payments. For GMDB, claim payments vary because of changes in equity markets and interest rates, as well as claim mortality and contractholder behavior. Any of these claim payments can extend many years into the future, and the amount of the ceding companies' ultimate claims, and therefore the amount of the Company's ultimate payment obligations and corresponding ultimate collection from retrocessionaires, may not be known with certainty for some time.

Summary

The Company's reserves for underlying reinsurance exposures assumed by the Company, as well as for amounts recoverable from reinsurers/retrocessionaires for both ongoing operations and the run-off reinsurance operation, are considered appropriate as of March 31, 2011, based on current information. However, it is possible that future developments could have a material adverse effect on the Company's consolidated results of operations and, in certain situations, such as if actual experience differs from the assumptions used in estimating reserves for GMDB, could have a material adverse effect on the Company's financial condition. The Company bears the risk of loss if its retrocessionaires do not meet or are unable to meet their reinsurance obligations to the Company.

[Back to Contents](#)

Effects of reinsurance

In the Company's Consolidated Statements of Income, Premiums and fees were net of ceded premiums, and Total benefits and expenses were net of reinsurance recoveries, in the following amounts:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Ceded premiums and fees		
Individual life insurance and annuity business sold	\$ 47	\$ 46
Other	58	64
TOTAL	\$ 105	\$ 110
Reinsurance recoveries		
Individual life insurance and annuity business sold	\$ 65	\$ 67
Other	47	44
TOTAL	\$ 112	\$ 111

NOTE 11 Pension and Other Postretirement Benefit Plans

The Company and certain of its subsidiaries provide pension, health care and life insurance defined benefits to eligible retired employees, spouses and other eligible dependents through various domestic and foreign plans. The effect of its foreign pension and other postretirement benefit plans is immaterial to the Company's results of operations, liquidity and financial position. Effective July 1, 2009, the Company froze its primary domestic defined benefit pension plans.

For the three months ended March 31, 2011, the Company's postretirement benefits liability decreased by \$5 million pre-tax (\$4 million after-tax) resulting in an increase in shareholders' equity. This was primarily a result of net amortization of actuarial losses and prior service cost.

Pension and Other Postretirement Benefits

Components of net pension and net other postretirement benefit costs were as follows:

<i>(In millions)</i>	Pension Benefits		Other Postretirement Benefits	
	Three Months Ended		Three Months Ended	
	March 31,		March 31,	
	2011	2010	2011	2010
Service cost	\$ 1	\$ -	\$ -	\$ -
Interest cost	57	59	5	5
Expected long-term return on plan assets	(65)	(63)	-	-

Amortization of:

Net (gain) loss from past experience	9	7	-	-
Prior service cost	-	-	(4)	(4)
NET PENSION COST	\$ 2	\$ 3	\$ 1	\$ 1

The Company funds its qualified pension plans at least at the minimum amount required by the Pension Protection Act of 2006. For the three months ended March 31, 2011, the Company contributed \$141 million, of which \$16 million was required and \$125 million was voluntary. For the remainder of 2011, the Company expects to make additional contributions of \$109 million.

Other		29		30
TOTAL LONG-TERM DEBT	\$	2,883	\$	2,288

On March 7, 2011, the Company issued \$300 million of 10-Year Notes due March 15, 2021 at a stated interest rate of 4.5% (\$298 million, net of discount, with an effective interest rate of 4.683% per year) and \$300 million of 30-Year Notes due March 15, 2041 at a stated interest rate of 5.875% (\$298 million, net of discount, with an effective interest rate of 6.008% per year). Interest is payable on March 15 and September 15 of each year beginning September 15, 2011. The proceeds of this debt will be used for general corporate purposes, including the repayment of debt maturing in 2011.

The Company may redeem these Notes, at any time, in whole or in part, at a redemption price equal to the greater of:

-

100% of the principal amount of the Notes to be redeemed; or

-

the present value of the remaining principal and interest payments on the Notes being redeemed discounted at the applicable treasury rate plus 20 basis points (10-Year 4.5% Notes due 2021) or 25 basis points (30-Year 5.875% Notes due 2041).

[Back to Contents](#)**NOTE 13** Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss excludes amounts required to adjust future policy benefits for the run-off settlement annuity business. Changes in accumulated other comprehensive loss were as follows:

<i>(In millions)</i>	Pre-Tax	Tax (Expense) Benefit	After-Tax
Three Months Ended March 31, 2011			
Net unrealized depreciation, securities:			
Net unrealized appreciation on securities arising during the period	\$ 15	\$ (5)	\$ 10

Postretirement benefits liability adjustment:			
Reclassification adjustment for amortization of net losses from past experience and prior service costs	\$ 3	\$ 5	\$ 8

NOTE 14 Income Taxes**A. Income Tax Expense**

Except for its South Korea and Hong Kong operations, the Company accrues U.S. income taxes on the undistributed earnings of its foreign subsidiaries. The Company computes income taxes attributable to the South Korea and Hong Kong operations using the foreign jurisdiction tax rate, as compared to the higher U.S. statutory tax rate, based upon a determination that the prospective earnings of these operations would be permanently invested overseas. The

Company is currently in the process of evaluating the permanent investment of foreign earnings for additional jurisdictions.

As a result, shareholders' net income for the three months ended March 31, 2011 increased by \$9 million, which included \$6 million relative to South Korea and \$3 million relative to Hong Kong. Shareholders' net income for the three months ended March 31, 2010 increased by \$14 million, which included \$6 million related to the first quarter 2010 Hong Kong implementation and \$8 million attributable to recording taxes for the South Korea and Hong Kong operations at the foreign jurisdiction's tax rate. Permanent investment of foreign operation earnings has resulted in cumulative unrecognized deferred tax liabilities of \$63 million through March 31, 2011.

B. Unrecognized Tax Benefits

During the first quarter of 2011, the IRS completed its examination of the Company's 2007 and 2008 consolidated federal income tax returns, resulting in an increase to shareholders' net income of \$24 million (\$33 million reported in income tax expense, partially offset by a \$9 million pre-tax charge). The increase in shareholders' net income included a reduction in net unrecognized tax benefits of \$11 million and a reduction of interest expense of \$11 million (reported in income tax expense).

[Back to Contents](#)

Gross unrecognized tax benefits declined for the three months ended March 31, 2011 by \$79 million due primarily to the completion of the 2007 and 2008 IRS examinations. The effect of this change on shareholders' net income was \$11 million, resulting from completion of the IRS examination.

Within the next twelve months, it is at least reasonably possible there could be a significant increase in the level of unrecognized tax benefits should there be adverse developments relative to certain IRS specific matters, including the tax litigation described below. Any changes are not expected to have a material impact on shareholder's net income.

C. Other Tax Matters

One disputed matter remains unresolved related to the IRS examination of the 2003 and 2004 consolidated federal income tax returns and on June 4, 2009, the Company initiated litigation of this matter by filing a petition in the United States Tax Court. Due to the nature of the litigation process timing of the resolution of this matter is uncertain, though the Court has now set a trial date for mid-September 2011. This same issue also remains unresolved in the IRS examinations of the 2005 through 2008 consolidated federal income tax returns. Though the Company expects to prevail, unfavorable resolution of this litigation could result in a significant cash outlay and a charge to shareholders' net income of up to \$23 million, representing net interest on the cumulative incremental tax for all affected years. Since this dispute relates to the timing of recognition of tax deductions, in the event of an unfavorable resolution, the Company would expect to recover the cash outlay (except for interest) in future periods.

The Patient Protection & Affordable Care Act, including the Reconciliation Act of 2010, included provisions limiting the tax deductibility of certain future retiree benefit and compensation related payments. The effect of these provisions reduced shareholders' net income by \$2 million for the three months ended March 31, 2011 and \$5 million for the three months ended March 31, 2010. The Company will continue to evaluate guidance as issued relative to these provisions.

NOTE 15 Segment Information

The Company's operating segments generally reflect groups of related products, except for the International segment which is generally based on geography. In accordance with GAAP, operating segments that do not require separate disclosure have been combined into Other Operations. The Company measures the financial results of its segments using "segment earnings (loss)," which is defined as shareholders' net income (loss) excluding after-tax realized investment gains and losses.

Summarized segment financial information was as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Premiums and fees, Mail order pharmacy revenues and Other revenues		
Health Care	\$ 3,719	\$ 3,731

CIGNA CORPORATION – Form 10-Q – 34

[Back to Contents](#)

Concentration of risk

For the Company's International segment, South Korea is the single largest geographic market. South Korea generated 30% of the segment's revenues and 47% of the segment's earnings for the three months ended March 31, 2011. Due to the concentration of business in South Korea, the International segment is exposed to potential losses resulting from economic, regulatory, and geopolitical developments in that country, as well as foreign currency movements affecting the South Korean currency, which could have a significant impact on the segment's results and the Company's consolidated financial results.

NOTE 16 Contingencies and Other Matters

The Company, through its subsidiaries, is contingently liable for various financial guarantees provided in the ordinary course of business.

Financial Guarantees Primarily Associated with the Sold Retirement Benefits Business

Separate account assets are contractholder funds maintained in accounts with specific investment objectives. The Company records separate account liabilities equal to separate account assets. In certain cases, primarily associated with the sold retirement benefits business (which was sold in April 2004), the Company guarantees a minimum level of benefits for retirement and insurance contracts written in separate accounts. The Company establishes an additional liability if management believes that the Company will be required to make a payment under these guarantees.

The Company guarantees that separate account assets will be sufficient to pay certain retiree or life benefits. The sponsoring employers are primarily responsible for ensuring that assets are sufficient to pay these benefits and are required to maintain assets that exceed a certain percentage of benefit obligations. This percentage varies depending on the asset class within a sponsoring employer's portfolio (for example, a bond fund would require a lower percentage than a riskier equity fund) and thus will vary as the composition of the portfolio changes. If employers do not maintain the required levels of separate account assets, the Company or an affiliate of the buyer has the right to redirect the management of the related assets to provide for benefit payments. As of March 31, 2011, employers maintained assets that exceeded the benefit obligations. Benefit obligations under these arrangements were \$1.7 billion as of March 31, 2011. Approximately 73% of these guarantees are reinsured by an affiliate of the buyer of the retirement benefits business. The remaining guarantees are provided by the Company with minimal reinsurance from third parties. There were no additional liabilities required for these guarantees as of March 31, 2011. Separate account assets supporting these guarantees are classified in Levels 1 and 2 of the GAAP fair value hierarchy. See Note 6 for further information on the fair value hierarchy.

The Company does not expect that these financial guarantees will have a material effect on the Company's consolidated results of operations, liquidity or financial condition.

Other Financial Guarantees

Guaranteed minimum income benefit (GMIB) contracts

The Company's reinsurance operations, which were discontinued in 2000 and are now an inactive business in run-off mode, reinsured minimum income benefits under certain variable annuity contracts issued by other insurance companies. A contractholder can elect to annuitize the benefit within 30 days of any eligible policy anniversary after a specified contractual waiting period. The Company's exposure arises when the guaranteed annuitization benefit exceeds the annuitization benefit based on the policy's current account value. At the time of annuitization, the

Company pays the excess (if any) of the guaranteed benefit over the benefit based on the current account value in a lump sum to the direct writing insurance company.

In periods of declining equity markets or declining interest rates, the Company's GMIB liabilities increase. Conversely, in periods of rising equity markets and rising interest rates, the Company's liabilities for these benefits decrease.

The Company estimates the fair value of the GMIB assets and liabilities using assumptions for market returns and interest rates, volatility of the underlying equity and bond mutual fund investments, mortality, lapse, annuity election rates, nonperformance risk, and risk and profit charges. See Note 6 for additional information on how fair values for these liabilities and related receivables for retrocessional coverage are determined and Note 8 for information on the Company's dynamic equity and growth interest rate hedge programs for this business.

The Company is required to disclose the maximum potential undiscounted future payments for GMIB contracts. Under these guarantees, the future payment amounts are dependent on equity and bond fund market and interest rate levels prior to and at the date of annuitization election, which must occur within 30 days of a policy anniversary, after the appropriate waiting period. Therefore, the future payments are not fixed and determinable under the terms of the contract. Accordingly, the Company has estimated the maximum potential undiscounted future payments using hypothetical adverse assumptions, defined as follows:

-

no annuitants surrendered their accounts;

[Back to Contents](#)

•

all annuitants lived to elect their benefit;

•

all annuitants elected to receive their benefit on the next available date (2011 through 2018); and

•

all underlying mutual fund investment values remained at the March 31, 2011 value of \$1.3 billion with no future returns.

The maximum potential undiscounted payments that the Company would make under those assumptions would aggregate \$1.1 billion before reinsurance recoveries. The Company expects the amount of actual payments to be significantly less than this hypothetical undiscounted aggregate amount. The Company has retrocessional coverage in place from two external reinsurers which covers 55% of the exposures on these contracts. The receivable from one of these reinsurers is substantially collateralized by assets held in a trust. The Company bears the risk of loss if its retrocessionaires do not meet or are unable to meet their reinsurance obligations to the Company.

Certain other guarantees

The Company had indemnification obligations to lenders of up to \$227 million as of March 31, 2011, related to borrowings by certain real estate joint ventures which the Company either records as an investment or consolidates. These borrowings, which are nonrecourse to the Company, are secured by the joint ventures' real estate properties with fair values in excess of the loan amounts and mature at various dates beginning in 2011 through 2021. The Company's indemnification obligations would require payment to lenders for actual damages resulting from certain acts such as unauthorized ownership transfers, misappropriation of rental payments by others or environmental damages. Based on initial and ongoing reviews of property management and operations, the Company does not expect that payments will be required under these indemnification obligations. Any payments that might be required could be recovered through a refinancing or sale of the assets. In some cases, the Company also has recourse to partners for their proportionate share of amounts paid. There were no liabilities required for these indemnification obligations as of March 31, 2011.

As of March 31, 2011, the Company guaranteed that it would compensate the lessors for a shortfall of up to \$44 million in the market value of certain leased equipment at the end of the lease. Guarantees of \$28 million expire in 2012 and \$16 million expire in 2016. The Company had liabilities for these guarantees of \$12 million as of March 31, 2011.

As part of the reinsurance and administrative service arrangements acquired from Great-West Life and Annuity, Inc., the Company is responsible to pay claims for the group medical and long-term disability business of Great-West Healthcare and collect related amounts due from their third party reinsurers. Any such amounts not collected will represent additional assumed liabilities of the Company and decrease shareholders' net income if and when these amounts are determined uncollectible. At March 31, 2011, there were receivables recorded for paid claims due from third party reinsurers of less than \$1 million and unpaid claims related to this business were estimated at \$19 million.

The Company has agreements with certain banks that provide banking services to settle claim checks processed by the Company for Administrative Services Only ("ASO") and certain minimum premium customers. The customers are responsible for adequately funding their accounts as claim checks are presented for payment. Under these agreements, the Company guarantees that the banks will not incur a loss if a customer fails to properly fund its account. The

amount of the guarantee fluctuates daily. As of March 31, 2011, the aggregate maximum exposure under these guarantees was approximately \$346 million and there were no liabilities required. There were no after-tax charges related to these guarantees for the three months ended March 31, 2011 and there were \$1 million in charges for the same period in 2010. Through April 27, 2011, the exposure that existed at March 31, 2011 has been reduced by approximately 91% through customers' funding of claim checks when presented for payment. In addition, the Company can limit its exposure under these guarantees by suspending claim payments for any customer who has not adequately funded their bank account.

The Company contracts on an ASO basis with customers who fund their own claims. The Company charges these customers administrative fees based on the expected cost of administering their self-funded programs. In some cases, the Company provides performance guarantees associated with meeting certain service-related and other performance standards. If these standards are not met, the Company may be financially at risk up to a stated percentage of the contracted fee or a stated dollar amount. The Company establishes liabilities for estimated payouts associated with these performance guarantees. Approximately 14% of ASO fees reported for the three months ended March 31, 2011 were at risk, with reimbursements estimated to be less than 1%.

The Company had indemnification obligations as of March 31, 2011 in connection with acquisition and disposition transactions. These indemnification obligations are triggered by the breach of representations or covenants provided by the Company, such as representations for the presentation of financial statements, the filing of tax returns, compliance with law or the identification of outstanding litigation. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential amount due is subject to contractual limitations based on a percentage of the transaction purchase price, while in other cases limitations are not specified or applicable. The Company does not believe that it is possible to determine the maximum potential amount due under these obligations, since not all amounts due under these indemnification obligations are subject to limitation. There were no liabilities required for these indemnification obligations as of March 31, 2011.

[Back to Contents](#)

The Company does not expect that these guarantees will have a material adverse effect on the Company's consolidated results of operations, liquidity or financial condition.

Regulatory and Industry Developments

Employee benefits regulation

The business of administering and insuring employee benefit programs, particularly health care programs, is heavily regulated by federal and state laws and administrative agencies, such as state departments of insurance and the Federal Departments of Labor and Justice, as well as the courts. Regulation, legislation and judicial decisions have resulted in changes to industry and the Company's business practices and will continue to do so in the future. In addition, the Company's subsidiaries are routinely involved with various claims, lawsuits and regulatory and IRS audits and investigations that could result in financial liability, changes in business practices, or both. Health care regulation and legislation in its various forms, including the implementation of the Patient Protection and Affordable Care Act (including the Reconciliation Act) that was signed into law during the first quarter of 2010, could have an adverse effect on the Company's health care operations if it inhibits the Company's ability to respond to market demands, adversely affects the way the Company does business, or results in increased medical or administrative costs without improving the quality of care or services.

Other possible regulatory and legislative changes or judicial decisions that could have an adverse effect on the Company's employee benefits businesses include:

- additional mandated benefits or services that increase costs;
- legislation that would grant plan participants broader rights to sue their health plans;
- changes in public policy and in the political environment, which could affect state and federal law, including legislative and regulatory proposals related to health care issues, which could increase cost and affect the market for the Company's health care products and services;
- changes in Employee Retirement Income Security Act of 1974 ("ERISA") regulations resulting in increased administrative burdens and costs;
- additional restrictions on the use of prescription drug formularies and rulings from pending purported class action litigation, which could result in adjustments to or the elimination of the average wholesale price of pharmaceutical products as a benchmark in establishing certain rates, charges, discounts, guarantees and fees for various prescription drugs;
-

additional privacy legislation and regulations that interfere with the proper use of medical information for research, coordination of medical care and disease and disability management;

•

additional variations among state laws mandating the time periods and administrative processes for payment of health care provider claims;

•

legislation that would exempt independent physicians from antitrust laws; and

•

changes in federal tax laws, such as amendments that could affect the taxation of employer provided benefits.

The employee benefits industry remains under scrutiny by various state and federal government agencies and could be subject to government efforts to bring criminal actions in circumstances that could previously have given rise only to civil or administrative proceedings.

Guaranty fund assessments

The Company operates in a regulatory environment that may require the Company to participate in assessments under state insurance guaranty association laws. The Company's exposure to assessments is based on its share of business it writes in the relevant jurisdictions for certain obligations of insolvent insurance companies to policyholders and claimants. For the three months ended March 31, 2011 and 2010, charges related to guaranty fund assessments were not material to the Company's results of operations.

The Company is aware of an insurer that is in rehabilitation, an intermediate action before insolvency. As of March 31, 2011, the regulator had petitioned the state court for liquidation and the Company believes it is likely that the state court will rule on insolvency for this insurer within the next nine months. If the insurer is declared insolvent and placed in liquidation, the Company and other insurers may be required to pay a portion of policyholder claims through guaranty fund assessments from various states in which the Company's insurance subsidiaries write premiums. Based on current information available, which is subject to change, the Company has estimated that potential future assessments could decrease its future results of operations by up to \$40 million after-tax. The ultimate amount and timing of any future charges for this potential insolvency will depend on several factors, including the declaration of insolvency and the amount of the potential insolvency, the basis, amount and timing of associated estimated future guaranty fund assessments and the availability and amount of any potential premium tax and other offsets. Cash payments, if any, by the Company's insurance subsidiaries are likely to extend over several years. The Company will continue to monitor the outcome of the court's deliberations and may record a liability and expense in a future reporting period.

[Back to Contents](#)

Litigation and Other Legal Matters

The Company is routinely involved in numerous claims, lawsuits, regulatory and IRS audits, investigations and other legal matters arising, for the most part, in the ordinary course of the business of administering and insuring employee benefit programs including payments to providers and benefit level disputes. Such legal matters include benefit claims, breach of contract claims, tort claims, disputes regarding reinsurance arrangements, employment related suits, employee benefit claims, wage and hour claims, and intellectual property and real estate related disputes. Litigation of income tax matters is accounted for under FASB's accounting guidance for uncertainty in income taxes. Further information can be found in Note 14. The outcome of litigation and other legal matters is always uncertain, and outcomes that are not justified by the evidence can occur. The Company believes that it has valid defenses to the legal matters pending against it and is defending itself vigorously.

In accordance with applicable accounting guidance, when litigation and regulatory matters present loss contingencies that are both probable and estimable, the Company accrues the estimated loss by a charge to income. In such cases, there may also be an exposure to loss in excess of the amounts accrued. If it is reasonably possible that a material adverse outcome could develop in excess of any amounts accrued, the matter is disclosed. In many proceedings, however, it is inherently difficult to determine whether any loss is probable or even possible or to estimate the amount of any loss. As a litigation or regulatory matter develops, the Company monitors the matter for further developments that could affect the amount previously accrued, if any, and updates such amount accrued or disclosures previously provided as appropriate.

Based upon its current knowledge, and taking into consideration its current accruals, the Company believes that the legal actions, proceedings and investigations currently pending against it should not have a material adverse effect on the Company's results of operation, financial condition or liquidity other than possibly the matters referred to in the following paragraphs. However, in light of the uncertainties involved in these matters, there is no assurance that their ultimate resolution will not exceed the amounts currently accrued by the Company and that an adverse outcome in one or more of these matters could be material to the Company's financial statements, results of operation, financial condition or liquidity for any particular period.

Amara cash balance pension plan litigation

On December 18, 2001, Janice Amara filed a class action lawsuit, captioned *Janice C. Amara, Gisela R. Broderick, Annette S. Glanz, individually and on behalf of all others similarly situated v. CIGNA Corporation and CIGNA Pension Plan*, in the United States District Court for the District of Connecticut against CIGNA Corporation and the CIGNA Pension Plan on behalf of herself and other similarly situated participants in the CIGNA Pension Plan affected by the 1998 conversion to a cash balance formula. The plaintiffs allege various ERISA violations including, among other things, that the Plan's cash balance formula discriminates against older employees; the conversion resulted in a wear away period (during which the pre-conversion accrued benefit exceeded the post-conversion benefit); and these conditions are not adequately disclosed in the Plan.

In 2008, the court issued a decision finding in favor of CIGNA Corporation and the CIGNA Pension Plan on the age discrimination and wear away claims. However, the court found in favor of the plaintiffs on many aspects of the disclosure claims and ordered an enhanced level of benefits from the existing cash balance formula for the majority of the class, requiring class members to receive their frozen benefits under the pre-conversion CIGNA Pension Plan and their accrued benefits under the post-conversion CIGNA Pension Plan. The court also ordered, among other things, pre-judgment and post-judgment interest. Both parties appealed the court's decisions to the United States Court of Appeals for the Second Circuit which issued a decision on October 6, 2009 affirming the District Court's judgment and order on all issues. On January 4, 2010, the Company and the plaintiffs filed separate petitions for a writ of certiorari to the United States Supreme Court. CIGNA's petition was granted on June 28, 2010 and was argued on

November 30, 2010. The United States Supreme Court held the plaintiffs' petition for writ of certiorari and the Company expects it to be disposed of when an opinion is issued. The implementation of the judgment is currently stayed. The Company will continue to vigorously defend itself in this case. As of March 31, 2011, the Company is carrying a liability of \$82 million pre-tax (\$53 million after-tax), which principally reflects the Company's best estimate of the liabilities related to the court order.

Ingenix

On February 13, 2008, State of New York Attorney General Andrew M. Cuomo announced an industry-wide investigation into the use of data provided by Ingenix, Inc., a subsidiary of UnitedHealthcare, used to calculate payments for services provided by out-of-network providers. The Company received four subpoenas from the New York Attorney General's office in connection with this investigation and responded appropriately. On February 17, 2009, the Company entered into an Assurance of Discontinuance resolving the investigation. In connection with the industry-wide resolution, the Company contributed \$10 million to the establishment of a new non-profit company that will compile and provide the data currently provided by Ingenix. In addition, on March 28, 2008, the Company received a voluntary request for production of documents from the Connecticut Attorney General's office seeking certain out-of-network claim payment information. The Company has responded appropriately. Since January 2009, the Company has received and responded to inquiries regarding the use of Ingenix data from the Illinois and Texas Attorneys General and the Departments of Insurance in Illinois, Florida, Vermont, Georgia, Pennsylvania, Connecticut, and Alaska.

[Back to Contents](#)

The Company was named as a defendant in a number of putative nationwide class actions asserting that due to the use of data from Ingenix, Inc., the Company improperly underpaid claims, an industry-wide issue. Three actions were brought on behalf of members, (*Franco v. CIGNA Corp. et al.*, *Chazen v. CIGNA Corp. et al* and *Nelson v. Connecticut General Life Insurance Co. et al.*), and three remaining actions were brought on behalf of providers, (*American Medical Association et al. v. CIGNA Corp. et al.*, *Shiring et al. v. CIGNA Corp. et al.*; and *North Peninsula Surgical Center v. Connecticut General Life Insurance Co. et al.*), all of which were consolidated into the *Franco* case pending in the United States District Court for the District of New Jersey. The consolidated amended complaint, filed on August 7, 2009, asserts claims under ERISA, the RICO statute, the Sherman Antitrust Act and New Jersey state law. CIGNA filed a motion to dismiss the consolidated amended complaint on September 9, 2009, which is fully briefed and pending. Plaintiffs filed a motion for class certification on May 28, 2010, which is also fully briefed and pending. Fact and expert discovery have been completed.

On June 9, 2009, CIGNA filed motions in the United States District Court for the Southern District of Florida to enforce a previous settlement, *In re Managed Care Litigation*, by enjoining the RICO and antitrust causes of action asserted by the provider and medical association plaintiffs in the *Ingenix* litigation on the ground that they arose prior to and were released in the prior settlement. On November 30, 2009, the Court granted the motions and ordered the provider and association plaintiffs to withdraw their RICO and antitrust claims from the *Ingenix* litigation by December 21, 2009. The plaintiffs filed notices of appeal with the United States Court of Appeals for the Eleventh Circuit on December 10 and 11, 2009. On April 21, 2010 and June 16, 2010, the appeals were dismissed for lack of appellate jurisdiction. Plaintiffs' motion for reconsideration was denied on August 18, 2010.

It is reasonably possible that others could initiate additional litigation or additional regulatory action against the Company with respect to use of data provided by Ingenix, Inc. The Company denies the allegations asserted in the investigations and litigation and will vigorously defend itself in these matters.

Due to numerous uncertain and unpredictable factors presented in these cases, including the lack of any clear basis to determine whether and to what extent the claimants have been injured, it is not possible to estimate a range of loss at this time.

Karp gender discrimination litigation

On March 3, 2011, Bretta Karp filed a class action gender discrimination lawsuit, captioned *Bretta Karp on behalf of herself individually and others similarly situated v. CIGNA Healthcare, Inc.*, in the United States District Court for the District of Massachusetts. The plaintiff alleges systemic discrimination against females in compensation, promotions, training, and performance evaluations in violation of Title VII of the Civil Rights Act of 1964, as amended, and parallel Massachusetts law. Plaintiff seeks monetary damages and various other forms of broad programmatic relief, including injunctive relief, backpay, lost benefits, and preferential rights to jobs. The Company denies the allegations asserted in the litigation and will vigorously defend itself in this case. Due to numerous uncertain and unpredictable factors presented in this case, including the merits of the case and the lack of any clear basis to determine the definition of a class of claimants, it is not possible to estimate a range of loss (if any) at this time.

Introduction

In this filing and in other marketplace communications, the Company makes certain forward-looking statements relating to the Company’s financial condition and results of operations, as well as to trends and assumptions that may affect the Company. Generally, forward-looking statements can be identified through the use of predictive words (e.g., “Outlook for 2011”). Actual results may differ from the Company’s predictions. Some factors that could cause results to differ are discussed throughout Management’s Discussion and Analysis (“MD&A”), including in the Cautionary Statement beginning on page 70. The forward-looking statements contained in this filing represent management’s current estimate as of the date of this filing. Management does not assume any obligation to update these estimates.

The following discussion addresses the financial condition of the Company as of March 31, 2011, compared with December 31, 2010, and its results of operations for the three months ended March 31, 2011 compared with the same period last year. This discussion should be read in conjunction with the MD&A included in the Company’s 2010 Form 10-K, to which the reader is directed for additional information.

CIGNA is a global health service organization with subsidiaries that are major providers of medical, dental, disability, life and accident insurance and related products and services. In the U.S., the majority of these products and services are offered through employers and other groups (e.g. unions and associations) and in selected international markets, CIGNA offers supplemental health, life and accident insurance products, international health care coverage, expatriate benefits and services to businesses, governmental and non-governmental organizations and individuals. In addition to its ongoing operations described above, the Company also has certain run-off operations, including a Run-off Reinsurance segment.

Unless otherwise indicated, financial information in the MD&A is presented in accordance with GAAP. Certain reclassifications have been made to prior period amounts to conform to the presentation of 2011 amounts. See Note 1

to the Consolidated Financial Statements for additional information.

The preparation of interim consolidated financial statements necessarily relies heavily on estimates. This and certain other factors, such as the seasonal nature of portions of the health care and related benefits business, as well as competitive and other market conditions, call for caution in estimating full year results based on interim results of operations.

Key Consolidated Financial Data

<i>(Dollars in millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Revenues	\$ 5,413	\$ 5,205
Medical membership (in thousands) ⁽¹⁾	12,532	11,952
Shareholders' net income	\$ 429	\$ 283
Adjusted income from operations ⁽²⁾	\$ 375	\$ 281
Cash flows from operating activities	\$ 51	\$ 394
Shareholders' equity	\$ 7,024	\$ 5,801

(1) Includes medical members of the Company's Health Care segment as well as the International health care business, including expatriate benefits.

(2) For a definition of adjusted income from operations, see the "Consolidated Results of Operations" section of this MD&A beginning on page 44.

Results of Operations

- **Revenues** rose 4% in the first quarter of 2011, reflecting solid growth in the Company's strategically targeted domestic and international markets in its ongoing health care, disability, expatriate benefits, and supplemental health, life and accident businesses. In addition, net investment income and realized investment results both improved. These increases were partially offset by the exit from certain non-strategic markets, primarily the Medicare Advantage Individual Private Fee For Service ("Medicare IPFFS") business.

- **Medical membership** increased 5% primarily reflecting the acquisition of Vanbreda, and growth in strategically targeted markets, partially offset by the exit from certain non-strategic markets, primarily Medicare IPFFS.

- **Shareholders' net income** increased, reflecting strong adjusted income from operations as discussed below as well as the effect of the completion of the 2007 and 2008 IRS examination, improved realized investment results and more favorable GMIB results.

- **Adjusted income from operations** increased 33% in the first quarter of 2011, demonstrating the value of the Company's diversified portfolio of businesses, continued focus and effective execution of the Company's business strategy and continued low medical utilization.

Cash flows from operating activities declined, primarily reflecting higher pension contributions due to timing, higher payouts of incentive compensation and the run-off of the Medicare IPFFS business in the first quarter of 2011.

Liquidity and Financial Condition

During the first quarter of 2011, the Company entered into several transactions to strengthen liquidity and financial condition:

- deployed \$150 million of capital to its subsidiary, CIGNA Arbor Life Insurance Company (“Arbor”) in support of an internal reinsurance transaction related to the GMDB and GMIB businesses. See page 43 of this MD&A for additional discussion of this matter;
- issued \$600 million of new debt primarily to fund debt maturing in 2011;
- contributed \$141 million to the Company’s pension plans; and
- repurchased 3.9 million shares of stock for \$163 million.

Cash at the parent company as of March 31, 2011 was approximately \$790 million. Shareholders’ equity increased substantially since the first quarter of 2010, reflecting strong earnings in 2010 and the first quarter of 2011 as well as a significant increase in unrealized appreciation on investments during 2010 primarily due to lower interest rates.

[Back to Contents](#)

Business Strategy

As a global health service organization, CIGNA's mission is to help the people it serves improve their health, well-being and sense of security. As part of this mission, the Company remains committed to health advocacy as a means of creating sustainable solutions for employers, improving the health of the individuals that the Company serves, and lowering the costs of health care for all constituencies.

CIGNA's long-term growth strategy is based on: (1) growth in targeted geographies, product lines, buying segments and distribution channels; (2) improving its strategic and financial flexibility; and (3) pursuing additional opportunities in high-growth markets with particular focus on individuals. Our strategy can be summarized as follows:

- “Go deep” with growth in targeted customer segments, geographies, buying segments and distribution channels;
- “Go individual” by delivering high quality products and services which improve health, wellness and insurance needs that are helpful and easy to use; and
- “Go global” by pursuing additional opportunities in high-growth markets across the globe and serving individuals regardless of where they live and work.

For additional information on the Company's business strategy, see the “Introduction” section of the Company's MD&A on page 47 of its 2010 Form 10-K.

Run-off Operations

The Company's run-off reinsurance operations have significant exposures, primarily for its guaranteed minimum death benefits (“GMDB”, also known as “VADBe”) and guaranteed minimum income benefits (“GMIB”) products. As part of its strategy to effectively manage these exposures, the Company operates an equity hedge program to substantially reduce the impact of equity market movements on the liability for the GMDB business. In February 2011, the Company implemented a hedge designed to offset a portion of the equity market risk for GMIB contracts as well as hedges designed to offset a portion of the interest rate risk related to GMDB and GMIB. The Company actively monitors the performance of the hedging programs, and will continue to evaluate further adjustments to the hedging programs.

These products are also influenced by a range of economic and behavioral factors that were not hedged or only partially hedged as of March 31, 2011, including:

- a portion of equity market risk for GMIB contracts;
- a portion of interest rates risk;

- future partial surrender elections for GMDB contracts;
- annuity election rates for GMIB contracts;
- annuitant and mortality lapse rates; and
- the collection of amounts recoverable from retrocessionaires.

In order to manage these factors, the Company

- actively studies policyholder behavior experience and adjusts future expectations based on the results of the studies, as warranted;
- actively monitors the hedging programs and will continue to evaluate further adjustments to the hedging program;
- performs regular audits of ceding companies to ensure compliance with agreements as well as to help maximize the collection of receivables from retrocessionaires; and
- monitors the financial strength and credit standing of its retrocessionaires and establishes or collects collateral when warranted.

[Back to Contents](#)

In addition, on January 1, 2011, the Company entered into an internal reinsurance arrangement whereby 100% of the Company's GMDB and GMIB business was ceded from Connecticut General Life Insurance Company to CIGNA Arbor Life Insurance Company (Arbor), a Connecticut-domiciled company. While this reinsurance arrangement does not affect consolidated results of operations, financial condition, or liquidity of the Company, it

-

focuses the financial management of these businesses in Arbor; and

-

separates the impact of the run-off reinsurance business from the Company's core operating subsidiaries.

In the first quarter of 2011, the Company contributed \$150 million to Arbor. The Company believes that the resulting level of capital in Arbor is sufficient to cover potential adverse effects of reasonably likely market downturns on the GMDB and GMIB businesses.

Health Care Reform

In the first quarter of 2010, the Patient Protection and Affordable Care Act, including the Reconciliation Act of 2010, ("Health Care Reform") was signed into law. Health Care Reform mandates broad changes in the delivery of health care benefits that may impact the Company's current business model, including its relationship with current and future customers, producers and health care providers, products, services, processes and technology. Health Care Reform includes, among others, provisions for mandatory coverage of benefits, a minimum medical loss ratio for insured business, eliminates lifetime and annual benefit limits and creates health insurance exchanges. The law contains numerous provisions certain of which became effective during 2010 and others that will take effect from 2011 to 2018. It is possible that the ultimate impact of Health Care Reform could have a material impact on the Company's results of operations due to the provisions that have not yet become effective and uncertainty as to their interpretation. The Company is evaluating potential business opportunities resulting from Health Care Reform that will enable it to leverage the strengths and capabilities of its broad health and wellness portfolio.

On January 1, 2011, the minimum loss ratio became effective and will require payment of premium rebates beginning in 2012 to employers and customers covered under the Company's comprehensive medical insurance if certain annual minimum medical loss ratios are not met. At the close of each quarter, the Company records its rebate accrual based on year-to-date estimated medical loss ratios calculated as prescribed by Health Care Reform using year-to-date premium and claim information by state and market segment for each legal entity that issues comprehensive medical insurance. Since this accrual reflects the amount of rebate that would be payable based on year-to-date estimated medical loss ratios, the amount of rebate will fluctuate as actual claim experience develops each calendar quarter. For the three months ended March 31, 2011, the Company accrued an estimated after-tax rebate of \$10 million.

Health Care Reform also changes certain tax laws which will affect the Company's 2011 financial statements. Although these provisions do not become effective until 2013, they are expected to limit the tax deductibility of certain future retiree benefit and compensation-related payments earned after 2009. The Company recorded after-tax charges of approximately \$2 million for the three months ended March 31, 2011 related to these changes. The Company will continue to evaluate the impact of these tax laws as further guidance is made available.

During the first quarter of 2011, the Company incurred total after-tax costs of approximately \$6 million related to Health Care Reform comprised of:

-

\$2 million of additional income tax related to the impact of the tax law changes as described in the previous paragraph, and

-

\$4 million of after-tax costs related to building the infrastructure necessary to comply with the provisions of Health Care Reform that became effective in 2011. These costs represent the estimated cost of internal staff redeployed to work on Health Care Reform initiatives. The Company expects to spend an additional \$16 million after-tax for the remainder of 2011 related to Health Care Reform initiatives.

Health Care Reform will require the assessment of fees and excise taxes on health services companies such as CIGNA and others in the health care industry to help fund the additional insurance benefits and coverages provided by this legislation. The amount that the Company will be required to pay for these fees and excise taxes starting in 2013 and 2014, will result in charges to the Company's financial statements in future periods. In addition, since these fees and excise taxes will generally not be tax deductible, the Company's effective tax rate is expected to increase in future periods. However, the Company is unable to estimate the amount of these fees and excise taxes or the increase in the effective tax rate because guidance for the calculation has not been finalized.

Management is currently unable to estimate the full impact of Health Care Reform on the Company's future results of operations, and its financial condition and liquidity due to uncertainties related to interpretation, implementation and timing of its many provisions. It is possible; however, that this impact could be material to future results of operations. Management, through its internal task force, continues to closely monitor implementation of the law, report on the Company's compliance with Health Care Reform, actively engage with regulators to assist with the ongoing conversion of legislation to regulation and assess potential opportunities arising from Health Care Reform.

[Back to Contents](#)

Consolidated Results of Operations

The Company measures the financial results of its segments using “segment earnings (loss)”, which is defined as shareholders’ net income (loss) before after-tax realized investment results. Adjusted income from operations is defined as consolidated segment earnings (loss) excluding special items (defined below) and the results of the GMIB business. Adjusted income from operations is another measure of profitability used by the Company’s management because it presents the underlying results of operations of the Company’s businesses and permits analysis of trends in underlying revenue, expenses and shareholders’ net income. This measure is not determined in accordance with accounting principles generally accepted in the United States (“GAAP”) and should not be viewed as a substitute for the most directly comparable GAAP measure, which is shareholders’ net income.

Summarized below is a reconciliation between shareholders’ net income and adjusted income from operations.

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Premiums and fees	\$ 4,733	\$ 4,543
Net investment income	279	266
Mail order pharmacy revenues	339	348
Other revenues	36	54
Total realized investment gains (losses)	26	(6)
Total revenues	5,413	5,205
Benefits and expenses	4,813	4,783
Income before taxes	600	422
Income taxes	170	138
Net Income	430	284
Less: Net income attributable to noncontrolling interest	1	1
Shareholders’ net income	429	283
Less: realized investment gains (losses), net of taxes	17	(3)
Segment earnings	412	286
Less adjustments to reconcile to adjusted income from operations:		
Results of GMIB business (after-tax)	13	5
Special item (after-tax):		
Completion of IRS Examination (See Note 14 to the Consolidated Financial Statements)	24	-
Adjusted income from operations	\$ 375	\$ 281

Summarized below is adjusted income from operations by segment:

(In millions) **Three Months Ended**

	March 31,	
	2011	2010
Adjusted Income (Loss) From Operations		
Health Care	\$ 246	\$ 167
Disability and Life	77	70
International	77	72
Run-off Reinsurance	-	(1)
Other Operations	19	19
Corporate	(44)	(46)
TOTAL	\$ 375	\$ 281

CIGNA CORPORATION – *Form 10-Q* – 44

[Back to Contents](#)

Overview of March 31, 2011 Consolidated Results of Operations

Three Months Ended March 31, 2011 Compared with Three Months Ended March 31, 2010

Shareholders' net income increased for the three months ended March 31, 2011 compared with the same period in 2010 due to higher adjusted income from operations as explained further below as well as the impact of the settlement of the 2007 and 2008 IRS audit, favorable realized investment results and higher GMIB income. See the Run-off Reinsurance section of this MD&A beginning on page 55 for further discussion about the GMIB businesses.

Adjusted income from operations increased 33% for the three months ended March 31, 2011 compared to the same period in 2010, due to improved results in each of its three ongoing businesses, primarily Health Care, reflecting the solid business growth in strategically targeted markets and favorable medical utilization. See the individual segment sections of this MD&A for further discussion.

Special Item and GMIB

Management does not believe that the special item noted in the table above is representative of the Company's underlying results of operations. Accordingly, the Company excluded this special item from adjusted income from operations in order to facilitate an understanding and comparison of results of operations and permit analysis of trends in underlying revenue, expenses and shareholders' income from continuing operations.

The special item for the three months ended March 31, 2011 resulted from the completion of the 2007 and 2008 IRS examinations. See Note 14 to the Consolidated Financial Statements for additional information. There were no special items for the three months ended March 31, 2010.

The Company also excludes the results of the GMIB business, including the results of the related hedges starting in 2011, from adjusted income from operations because the fair value of GMIB assets and liabilities must be recalculated each quarter using updated capital market assumptions. The resulting changes in fair value, which are reported in shareholders' net income, are volatile and unpredictable. See the Critical Accounting Estimates section of the MD&A beginning on page 57 of the Company's 2010 Form 10-K for more information on the effect of capital market assumption changes on shareholders' net income. Because of this volatility, and since the GMIB business is in run-off, management does not believe that its results are meaningful in assessing underlying results of operations.

Outlook for 2011

The Company expects 2011 consolidated adjusted income from operations to be higher than 2010. This outlook includes an assumption that GMDB (also known as "VADBe") results will be approximately break-even for 2011, which assumes that actual experience, including capital market performance, will be consistent with long-term reserve assumptions. See Note 5 to the Consolidated Financial Statements as well as the 2010 Form 10-K under the Critical Accounting Estimates section of the MD&A beginning on page 57 for more information on the potential effect of capital market and other assumption changes on shareholders' net income.

Information is not available for management to reasonably estimate the future results of the GMIB business or realized investment results due in part to interest rate and stock market volatility and other internal and external factors. In addition, the Company is not able to identify or reasonably estimate the financial impact of special items in 2011, however they may include potential adjustments associated with litigation, tax and assessment-related matters.

The Company's outlook for 2011 is subject to the factors cited above and in the Cautionary Statement beginning on page 70 of this Form 10-Q and the sensitivities discussed in the 2010 Form 10-K under the Critical Accounting

Estimates section of the MD&A beginning on page 57. If unfavorable equity market and interest rate movements occur, the Company could experience losses related to investment impairments and the GMIB and GMDB businesses. These losses could adversely impact the Company's consolidated results of operations and financial condition by potentially reducing the capital of the Company's insurance subsidiaries and reducing their dividend-paying capabilities.

Revenues

Total revenues increased 4% for the three months ended March 31, 2011, compared with the same period in 2010. Changes in the components of total revenue are described more fully below.

[Back to Contents](#)

Premiums and Fees

Premiums and fees increased 4% for the three months ended March 31, 2011, compared with the same period in 2010, primarily reflecting membership growth in the Health Care and International segments partially offset by the Company's exit from the Medicare IPFFS business. Excluding this business that the Company exited in 2011, premiums and fees increased by 9% for the three months ended March 31, 2011.

Net Investment Income

Net investment income increased 5% for the three months ended March 31, 2011, compared with the same period in 2010, primarily reflecting the absence of losses from real estate investments and higher investment assets, partially offset by lower yields.

Mail Order Pharmacy Revenues

Mail order pharmacy revenues decreased by 3% for the three months ended March 31, 2011, compared with the same period in 2010, primarily reflecting a decline in volume, partially offset by price increases.

Other Revenues

Other revenues included pre-tax losses of \$44 million for the three months ended March 31, 2011 from futures contracts used in the GMDB equity hedge program (see Note 8 to the Consolidated Financial Statements), compared with losses of \$45 million for the three months ended March 31, 2010. There were less than \$1 million of losses recorded in the first quarter for the GMIB equity hedge program that began in February 2011. Other revenues in 2011 also include gains of \$5 million on LIBOR swap and treasury futures contracts associated with the GMDB and GMIB growth interest rate hedge programs. Amounts reflecting related changes in liabilities for GMDB contracts were included in benefits and expenses consistent with GAAP when a premium deficiency exists (see below "Other Benefits and Expenses"). Changes in liabilities for GMIB contracts, including the portion covered by the hedges, are recorded in GMIB fair value (gain) loss. Excluding the impact of these swaps and futures contracts, other revenues declined 24% for the three months ended March 31, 2011 compared with the same periods in 2010, primarily reflecting the absence of revenue in 2011 from the workers' compensation and case management business, which was sold in the fourth quarter of 2010.

Realized Investment Results

Realized investment results improved for the three months ended March 31, 2011, compared with the same period in 2010 primarily due to the absence of impairments in first quarter 2011, compared with after-tax impairments of \$17 million in the first quarter of 2010.

See Note 7 to the Consolidated Financial Statements for additional information.

[Back to Contents](#)

Critical Accounting Estimates

The preparation of consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect reported amounts and related disclosures in the consolidated financial statements. Management considers an accounting estimate to be critical if:

- it requires assumptions to be made that were uncertain at the time the estimate was made; and

- changes in the estimate or different estimates that could have been selected could have a material effect on the Company's consolidated results of operations or financial condition.

Management has discussed the development and selection of its critical accounting estimates and reviewed the disclosures presented below with the Audit Committee of the Company's Board of Directors.

The Company's most critical accounting estimates, as well as the effects of hypothetical changes in material assumptions used to develop each estimate, are described in the 2010 Form 10-K beginning on page 57 and are as follows:

- future policy benefits – guaranteed minimum death benefits;
- Health Care medical claims payable;
- accounts payable, accrued expenses and other liabilities, and other assets – guaranteed minimum income benefits;
- reinsurance recoverables for Run-off Reinsurance;
- accounts payable, accrued expenses and other liabilities – pension liabilities;
- investments – fixed maturities; and
- investments – commercial mortgage loans – valuation reserves.

The Company regularly evaluates items which may impact critical accounting estimates. As of March 31, 2011, there are no significant changes to the critical accounting estimates from what was reported in the 2010 Form 10-K.

Summary

There are other accounting estimates used in the preparation of the Company's Consolidated Financial Statements, including estimates of liabilities for future policy benefits other than those identified above, as well as estimates with respect to goodwill, unpaid claims and claim expenses, post-employment and postretirement benefits other than pensions, certain compensation accruals and income taxes.

Management believes the current assumptions used to estimate amounts reflected in the Company's Consolidated Financial Statements are appropriate. However, if actual experience differs from the assumptions used in estimating amounts reflected in the Company's Consolidated Financial Statements, the resulting changes could have a material adverse effect on the Company's consolidated results of operations, and in certain situations, could have a material adverse effect on liquidity and the Company's financial condition.

Segment Reporting

Operating segments generally reflect groups of related products, but the International segment is generally based on geography. The Company measures the financial results of its segments using "segment earnings (loss)," which is defined as shareholders' net income (loss) excluding after-tax realized investment gains and losses. "Adjusted income from operations" for each segment is defined as segment earnings excluding special items and the results of the Company's GMIB business. Adjusted income from operations is another measure of profitability used by the Company's management because it presents the underlying results of operations of the segment and permits analysis of trends. This measure is not determined in accordance with GAAP and should not be viewed as a substitute for the most directly comparable GAAP measure, which is segment earnings. Each segment provides a reconciliation between segment earnings and adjusted income from operations.

Health Care Segment

Segment Description

The Health Care segment offers insured and self-insured medical, dental, behavioral health, vision, and prescription drug benefit plans, health advocacy programs and other products and services that may be integrated to provide comprehensive health care benefit programs. CIGNA HealthCare companies offer these products and services in all 50 states, the District of Columbia and the U.S. Virgin Islands. These products and services are offered through a variety of funding arrangements such as guaranteed cost, retrospectively experience-rated and administrative services only arrangements.

The Company measures the operating effectiveness of the Health Care segment using the following key factors:

- segment earnings and adjusted income from operations;
- membership growth;
- sales of specialty products to core medical customers;
- changes in operating expenses per member;
- operating expense as a percentage of segment revenues (operating expense ratio); and
- medical expense as a percentage of premiums (medical care ratio) in the guaranteed cost business.

Results of Operations

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Premiums and fees	\$ 3,311	\$ 3,319
Net investment income	67	54
Mail order pharmacy revenues	339	348
Other revenues	69	64

Edgar Filing: CIGNA CORP - Form 10-Q

Segment revenues ⁽¹⁾	3,786	3,785
Mail order pharmacy cost of goods sold	276	285
Benefits and other expenses	3,126	3,240
Benefits and expenses	3,402	3,525
Income before taxes	384	260
Income taxes	137	93
Segment earnings	247	167
Less special item (after-tax) included in segment earnings:		
Completion of IRS examination (See Note 14 to the Consolidated Financial Statements)	1	-
Adjusted income from operations	\$ 246	\$ 167
Realized investment gains (losses), net of taxes	\$ 10	\$ (3)

(1) Segment revenues for the three months ended March 31, 2010 included \$202 million related to the Medicare IPFFS business, that the company exited effective January 1, 2011.

Segment earnings for the Health Care segment increased 48%, reflecting significantly higher adjusted income from operations as explained below.

[Back to Contents](#)

The Health Care segment's adjusted income from operations for the three months ended March 31, 2011 increased by 47%, compared with the same period in 2010 reflecting:

- growth in premium and fees of 6%, excluding the impact of exiting the Medicare IPFFS business, primarily due to increased membership in the guaranteed cost business, particularly in the targeted market segments: Middle, Select and Individual, as well as growth in specialty revenues;
- a lower guaranteed cost medical care ratio driven by continued low utilization levels for medical services, as well as favorable prior year development, partially offset by the estimated cost of premium rebates calculated under the minimum medical loss ratio requirements of Health Care Reform;
- higher investment income from real estate partnerships and increased average asset levels driven by membership growth; and
- solid management of medical operating expenses offset by an increase in other operating expenses, reflecting higher premium taxes and commissions due to membership growth and costs related to strategic investments to expand market capabilities.

Revenues

The table below shows premiums and fees for the Health Care segment:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Medical:		
Guaranteed cost ^{(1),(2)}	\$ 1,057	\$ 928
Experience-rated ^{(2),(3)}	474	483
Stop loss	349	321
Dental	221	200
Medicare	125	362
Medicare Part D	196	170
Other ⁽⁴⁾	142	138
Total medical	2,564	2,602
Life and other non-medical	20	33

Total premiums	2,584	2,635
Fees ^{(2),(5)}	727	684
TOTAL PREMIUMS AND FEES	\$ 3,311	\$ 3,319

(1) Includes guaranteed cost premiums primarily associated with open access, commercial HMO and voluntary/limited benefits, as well as other risk-related products.

(2) Premiums and/or fees associated with certain specialty products are also included.

(3) Includes minimum premium business that has a risk profile similar to experience-rated funding arrangements. The risk portion of minimum premium revenue is reported in experience-rated medical premium whereas the self funding portion of minimum premium revenue is recorded in fees. Also, includes certain non-participating cases for which special customer level reporting of experience is required.

(4) Other medical premiums include risk revenue for specialty products.

(5) Represents administrative service fees for medical members and related specialty product fees for non-medical members, as well as fees related to Medicare Part D of \$12 million for the three months March 31, 2011 and \$10 million for the three months ended March 31, 2010.

Premiums and fees were up 6% for the three months ended March 31, 2011 compared with the same period of 2010, excluding the impact of exiting the Medicare IPFFS business, primarily reflecting membership growth in the guaranteed cost business driven by strong retention and sales in targeted market segments as noted above. Higher penetration of specialty products, as well as increased membership and rates, drove the increase in fees. These increases reflect the Company's success in delivering differentiated value to our customers with a focus on providing products and services that expand access and provide superior clinical outcomes.

Net investment income increased by 24% for the three months ended March 31, 2011 compared with the same periods of 2010 reflecting higher real estate partnership results and increased average asset levels driven by membership growth.

Other revenues for the Health Care segment consist of revenues earned on direct channel sales of certain specialty products, including behavioral health and disease management.

[Back to Contents](#)

Benefits and Expenses

Health Care segment benefits and expenses consist of the following:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Medical claims expense	\$ 2,077	\$ 2,209
Other benefit expenses	24	28
Mail order pharmacy cost of goods sold	276	285
Operating expenses:		
Medical operating expenses	673	678
Other operating expenses (ex. Medicare IPFFS)	352	301
Operating expenses (ex. Medicare IPFFS)	1,025	979
Other operating expenses - Medicare IPFFS	-	24
Total operating expenses	1,025	1,003
TOTAL BENEFITS AND EXPENSES	\$ 3,402	\$ 3,525

Medical claims expense increased by 3% for the three months ended March 31, 2011 compared with the same period in 2010, excluding the impact of exiting the Medicare IPFFS business, largely due to growth in the guaranteed cost book and medical cost inflation, tempered by continued low utilization in commercial risk businesses.

Operating expenses increased 2% for the three months ended March 31, 2011 compared to the same period in 2010, and increased 5% after adjusting for the impact of exiting the Medicare IPFFS business, reflecting higher premium taxes and commissions due to membership growth in the guaranteed cost business, as well as strategic investments to expand market capabilities. The operating expense ratio increased from 26.5% to 27.1% for March 31, 2011 when compared to the same period in 2010. Excluding the impact of exiting the Medicare IPFFS business, the operating expense ratio improved from 27.3% to 27.1% driven, in part, by revenue growth and a reduction of medical operating expenses.

Other Items Affecting Health Care Results

Health Care Medical Claims Payable

Medical claims payable is essentially flat for the three months ended March 31, 2011. This reflects the run-out of the Medicare IPFFS business, which the Company exited in 2011, and is mostly offset by the seasonal buildup of Stop Loss reserves. (See Note 4 to the Consolidated Financial Statements for additional information).

Medical Membership

A medical member reported within the Health Care segment (excluding members in the International and Disability and Life segments) is defined as a person meeting any one of the following criteria:

-

is covered under an insurance policy or service agreement issued by the Company;

-

has access to the Company's provider network for covered services under their medical plan;

-

has medical claims that are administered by the Company; or

-

is covered under an insurance policy that is (i) marketed by the Company, and (ii) for which the Company assumes reinsurance of at least 50%.

[Back to Contents](#)

As of March 31, estimated medical membership was as follows:

<i>(In thousands)</i>	2011	2010
Guaranteed cost ⁽¹⁾	1,178	1,083
Experience-rated ⁽²⁾	791	811
Total commercial risk	1,969	1,894
Medicare	44	145
Total risk	2,013	2,039
Service	9,409	9,314
TOTAL MEDICAL MEMBERSHIP	11,422	11,353

(1) Includes members primarily associated with open access, commercial HMO and voluntary/limited benefits as well as other risk-related products.

(2) Includes minimum premium members, who have a risk profile similar to experience-rated members. Also, includes certain non-participating cases for which special customer level reporting of experience is required.

The Company's overall medical membership as of March 31, 2011 increased 1.4% when compared with March 31, 2010, excluding the impact of exiting the Medicare IPFFS business, primarily reflecting new business sales and improved persistency in the guaranteed cost businesses.

Disability and Life Segment

Segment Description

The Disability and Life segment includes group disability, life, accident and specialty insurance.

Key factors for this segment are:

- premium and fee growth, including new business and customer retention;
- net investment income;
- benefits expense as a percentage of earned premium (loss ratio); and
- other operating expense as a percentage of earned premiums and fees (expense ratio).

Results of Operations

Three Months Ended

Financial Summary

<i>(In millions)</i>	March 31,	
	2011	2010
Premiums and fees	\$ 688	\$ 661
Net investment income	65	64
Other revenues	-	29
Segment revenues	753	754
Benefits and expenses	647	656
Income before taxes	106	98
Income taxes	24	28
Segment earnings	82	70
Less special item (after-tax) included in segment earnings:		
Completion of IRS examination (See Note 14 to the Consolidated Financial Statements)	5	-
Adjusted income from operations	\$ 77	\$ 70
Realized investment gains, net of taxes	\$ 5	\$ 1

CIGNA CORPORATION – Form 10-Q – 51

[Back to Contents](#)

Segment earnings increased 17%, reflecting improved adjusted income from operations (see below) as well as the effect of the special item related to the completion of the 2007 and 2008 IRS examinations.

Segment adjusted income from operations for the three months ended March 31, 2011 increased compared with the same period in 2010, primarily reflecting favorable life and accident claims experience and continued strong disability claims management partially offset by a higher operating expense ratio. Results in 2011 include the \$6 million after-tax favorable effect of reserve studies as compared with the \$10 million after-tax favorable impact of reserve studies in 2010.

Revenues

Premiums and fees: Excluding the impact of the Company's exit from two large, low-margin assumed government life insurance programs, premiums and fees increased 5% for the three months ended March 31, 2011 compared with the same period of 2010 reflecting disability and life sales growth and continued solid persistency.

Net investment income increased 2% for the three months ended March 31, 2011 compared with the same period of 2010 due to higher average invested assets.

Other revenues: The absence of other revenues for the three months ended March 31, 2011 reflects the sale of the workers compensation case management business which was completed during the fourth quarter of 2010.

Benefits and Expenses

Benefits and expenses for the three months ended March 31, 2011 decreased by 1% as compared with the same period of 2010, reflecting the absence of operating expenses associated with the sold workers compensation case management business. Excluding the impact of the sale, benefits and expenses increased by 3% as a result of disability and life business growth and a higher operating expense ratio, partially offset by more favorable life and accident claims experience. The higher operating expense ratio reflects strategic information technology investments. The more favorable life claims experience reflects lower mortality. The more favorable accident claims experience reflects lower claim sizes and counts.

[Back to Contents](#)

International Segment

Segment Description

The International segment includes supplemental health, life and accident insurance products and international health care products and services, including those offered to expatriate employees of multinational corporations and other organizations.

The key factors for this segment are:

- premium and fee growth, including new business and customer retention;
- benefits expense as a percentage of earned premium (loss ratio);
- operating expense as a percentage of revenue (expense ratio); and
- impact of foreign currency movements.

Results of Operations

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Premiums and fees	\$ 698	\$ 527
Net investment income	23	19

Impact of foreign currency movements on current period segment earnings	\$ 1	

Edgar Filing: CIGNA CORP - Form 10-Q

Impact of permanent investment of overseas earnings:

Implementation effect	\$	-	\$	5
Effect of recording taxes at the tax rates of respective foreign jurisdictions		8		8
Total	\$	8	\$	13
Realized investment gains, net of taxes	\$	-	\$	2

CIGNA CORPORATION – *Form 10-Q* – 53

[Back to Contents](#)

Excluding the impact of the tax adjustments discussed below and foreign currency movements (presented in the table above), the International segment's adjusted income from operations (and segment earnings) increased 15% for the three months ended March 31, 2011 compared with the same period last year. The increase for the three months ended March 31, 2011, was primarily due to revenue growth, including the acquisition of Vanbreda International, higher persistency in the supplemental health, life and accident business, particularly in South Korea, as well as earnings from Vanbreda International, included in the expatriate employee benefits business, and higher net investment income, partially offset by higher loss ratios in both the expatriate employee benefits and supplemental health, life and accident businesses.

During the first quarter of 2010, the Company's International segment implemented a capital management strategy to permanently invest the earnings of its Hong Kong operation overseas. Income taxes for this operation, and the South Korean operation that implemented a similar strategy in the second quarter of 2009, are recorded at the tax rate of the respective foreign jurisdiction. See the Financial Summary table for the effect of these capital management strategies on International's adjusted income from operations for each applicable period.

Throughout this discussion, the impact of foreign currency movements was calculated by comparing the reported results to what the results would have been had the exchange rates remained constant with the prior year's comparable period exchange rates.

Revenues

Premiums and fees. Excluding the effect of foreign currency movements, premiums and fees were \$686 million for the first quarter of 2011, compared with reported premiums of \$527 million for the first quarter of 2010, an increase of 30%. This increase is primarily attributable to higher membership from new sales and the acquisition of Vanbreda International in the expatriate employee benefits business and new sales growth in the supplemental health, life and accident business, particularly in South Korea and Taiwan.

Net investment income increased by 21% for the three months ended March 31, 2011, compared with the same period last year. The increase was primarily due to asset growth, particularly in South Korea.

Benefits and Expenses

Excluding the impact of foreign currency movements, benefits and expenses were \$610 million for the first quarter of 2011, compared with reported benefits and expenses of \$459 million for the first quarter of 2010, an increase of 33%. This increase was primarily due to business growth, the acquisition of Vanbreda International and higher loss ratios in both the expatriate employee benefits and supplemental health, life and accident businesses.

Loss ratios increased for the three months ended March 31, 2011 in the expatriate benefits business and the supplemental health, life and accident insurance business compared to the same period last year reflecting less favorable claims experience.

Policy acquisition expenses increased for the three months ended March 31, 2011, reflecting business growth and foreign currency movements.

Expense ratios increased for the three months ended March 31, 2011, compared to the same period last year. The increase reflects the higher expense ratios associated with the service nature of the Vanbreda International business.

Other Items Affecting International Results

For the Company's International segment, South Korea is the single largest geographic market. South Korea generated 30% of the segment's revenues and 47% of the segment's earnings for the three months ended March 31, 2011. Due to the concentration of business in South Korea, the International segment is exposed to potential losses resulting from economic, regulatory and geopolitical developments in that country, as well as foreign currency movements affecting the South Korean currency, which could have a significant impact on the segment's results and the Company's consolidated financial results.

[Back to Contents](#)

Run-off Reinsurance Segment

Segment Description

The Company's reinsurance operations were discontinued and are now an inactive business in run-off mode since the sale of the U.S. individual life, group life and accidental death reinsurance business in 2000. This segment is predominantly comprised of guaranteed minimum death benefit ("GMDB", also known as "VADBe") and guaranteed minimum income benefit ("GMIB") products. In December 2010, the Company essentially exited from its workers' compensation and personal accident reinsurance business by purchasing retrocessional coverage from a Bermuda subsidiary of Enstar Group Limited and transferring the ongoing administration of this business to the reinsurer. See Note 3 to the Consolidated Financial Statements included in the Company's 2010 Form 10-K for further information regarding this transaction. Segment results prior to this transaction also included results from its workers' compensation and personal accident reinsurance business.

The determination of liabilities for GMDB and GMIB requires the Company to make assumptions and critical accounting estimates. The Company describes the assumptions used to develop the reserves for GMDB in Note 5 to the Consolidated Financial Statements and for the assets and liabilities associated with GMIB in Note 6 to the Consolidated Financial Statements. The Company also provides the effects of hypothetical changes in assumptions in the Critical Accounting Estimates section of the MD&A beginning on page 57 of the Company's 2010 Form 10-K.

The Company excludes the results of the GMIB business from adjusted income from operations because the fair value of GMIB assets and liabilities must be recalculated each quarter using updated capital market assumptions. The resulting changes in fair value, which are reported in shareholders' net income, are volatile and unpredictable.

Results of Operations

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Premiums and fees	\$ 6	\$ 8
Net investment income	24	28
Other revenues	(40)	(46)
Segment revenues	(10)	(10)
Benefits and expenses	(30)	(17)
Income before income taxes	20	7
Income taxes	7	3
Segment earnings	13	4
Less: results of GMIB business	13	5
Adjusted (loss) from operations	\$ -	\$ (1)
Realized investment (losses), net of taxes	\$ -	\$ (1)

Segment results for the three months ended March 31, 2011 reflect a larger gain for the GMIB business (presented in the table above) compared to the same period last year.

See the Benefits and Expenses section for further discussion around the results of the GMIB and GMDB businesses.

[Back to Contents](#)

Other Revenues

Other revenues included pre-tax losses of \$44 million for the three months ended March 31, 2011 from futures contracts used in the GMDB equity hedge program (see Note 5 to the Consolidated Financial Statements), compared with losses of \$45 million for the three months ended March 31, 2010. There were less than \$1 million of losses recorded in the first quarter for the GMIB equity hedge program. Other revenues in 2011 also include gains on LIBOR swap and treasury futures contracts associated with the GMDB and GMIB growth interest rate hedge programs of \$5 million. Amounts reflecting related changes in liabilities for GMDB contracts were included in benefits and expenses consistent with GAAP when a premium deficiency exists (see below “Other Benefits and Expenses”). Changes in liabilities for GMIB contracts, including the portion covered by the hedges, are recorded in GMIB fair value (gain) loss. The Company held futures contract positions related to the equity programs with a notional amount of \$839 million, and LIBOR swaps and treasury futures related to the growth interest rate hedge programs with a notional amount of \$285 million at March 31, 2011.

Benefits and Expenses

Benefits and expenses were comprised of the following:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
GMIB fair value (gain)	\$ (16)	\$ (4)
Other benefits and expenses	(14)	(13)
BENEFITS AND EXPENSES	\$ (30)	\$ (17)

GMIB fair value gain. Under the GAAP guidance for fair value measurements, the Company’s results of operations are expected to be volatile in future periods because capital market assumptions needed to estimate the assets and liabilities for the GMIB business are based largely on market-observable inputs at the close of each reporting period including interest rates (LIBOR swap curve) and market-implied volatilities. See Note 6 to the Consolidated Financial Statements for additional information about assumptions and asset and liability balances related to GMIB.

GMIB fair value gains of \$16 million for the three months ended March 31, 2011 were primarily due to increases in interest rates as well as increases in underlying account values in the period, driven by favorable equity market returns, partially offset by updates to the risk and profit charge estimate.

GMIB fair value gains of \$4 million and for the three months ended March 31, 2010, were primarily due to increases in underlying account values due to favorable equity market and bond fund returns, partially offset by generally lower interest rates.

Beginning in February 2011, the Company implemented a dynamic equity hedge program to reduce a portion of the equity market exposures related to GMIB contracts (“GMIB equity hedge program”) by entering into exchange-traded futures contracts. The company also entered into a dynamic interest rate hedge program that reduces a portion of the interest rate exposure related to GMIB (“GMIB growth interest rate program”) using LIBOR swap contracts and exchange-traded treasury futures contracts. The hedge programs are designed to partially offset both positive and negative changes in equity markets and interest rates related to GMIB. The results of the swaps and futures contracts are included in other revenue and provide a partial offset to the GMIB fair value gains and losses discussed above. For the three months ended March 31, 2011, other revenue included a \$1 million gain related to the GMIB growth interest

rate hedge program. There were less than \$1 million of losses recorded in the first quarter of 2011 related to the GMIB equity hedge program.

The GMIB liabilities and related assets are calculated using a complex internal model and assumptions from the viewpoint of a hypothetical market participant. This resulting liability (and related asset) is higher than the Company believes will ultimately be required to settle claims primarily because market-observable interest rates are used to project growth in account values of the underlying mutual funds to estimate fair value from the viewpoint of a hypothetical market participant. The Company's payments for GMIB claims are expected to occur over the next 15 to 20 years and will be based on actual values of the underlying mutual funds and the 7-year Treasury rate at the dates benefits are elected. Management does not believe that current market-observable interest rates reflect (i) actual growth expected for the underlying mutual funds over that timeframe, or (ii) the interest rates expected to be achieved from the invested assets supporting the block, and therefore believes that the recorded liability and related asset do not represent what management believes will ultimately be required as this business runs off.

[Back to Contents](#)

However, significant declines in mutual fund values that underlie the contracts (increasing the exposure to the Company) together with declines in the 7-year Treasury rates (used to determine claim payments) similar to what occurred periodically during the last few years would increase the expected amount of claims that would be paid out for contractholders who choose to annuitize. It is also possible that such unfavorable market conditions would have an impact on the level of contractholder annuitizations, particularly if such unfavorable market conditions persisted for an extended period.

Other Benefits and Expenses. Other benefits and expenses are comprised of the following:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Results of GMDB equity and interest rate hedging programs	\$ (40)	\$ (45)
Other GMDB, primarily accretion of discount	20	22
GMDB benefits expense (income)	(20)	(23)
Other including operating expenses	6	10
Other benefits and expenses	\$ (14)	\$ (13)

Equity market movements. The reduction in benefits expense in 2011 and 2010 reflects favorable equity market performance. As explained in Other revenues above, these changes do not affect shareholders' net income because they are offset by gains or losses on futures contracts used to hedge equity market performance.

See Note 5 to the Consolidated Financial Statements for additional information about assumptions and reserve balances related to GMDB.

Other, including operating expenses. The decrease is due to lower expenses following the reinsurance of the workers' compensation and personal accident business to Enstar Group Limited on December 31, 2010.

Segment Summary

The Company's payment obligations for underlying reinsurance exposures assumed by the Company under these contracts are based on ceding companies' claim payments. For GMDB and GMIB, claim payments vary because of changes in equity markets and interest rates, as well as mortality and policyholder behavior. Any of these claim payments can extend many years into the future, and the amount of the ceding companies' ultimate claims, and therefore the amount of the Company's ultimate payment obligations and corresponding ultimate collection from its retrocessionaires may not be known with certainty for some time.

The Company's reserves for underlying reinsurance exposures assumed by the Company, as well as for amounts recoverable from retrocessionaires, are considered appropriate as of March 31, 2011, based on current information. However, it is possible that future developments, which could include but are not limited to worse than expected claim experience and higher than expected volatility, could have a material adverse effect on the Company's consolidated results of operations and could have a material adverse effect on the Company's financial condition. The Company bears the risk of loss if its payment obligations to cedents increase or if its retrocessionaires are unable to meet, or successfully challenge, their reinsurance obligations to the Company.

[Back to Contents](#)

Other Operations Segment

Segment Description

Other Operations consist of:

-

corporate-owned life insurance (“COLI”);

-

deferred gains recognized from the 1998 sale of the individual life insurance and annuity business and the 2004 sale of the retirement benefits business; and

-

run-off settlement annuity business.

Results of Operations

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Premiums and fees	\$ 30	\$ 28
Net investment income	99	101
Other revenues	14	15
Segment revenues	143	144
Benefits and expenses	123	115
Income before taxes	20	29
Income taxes	(3)	10
Segment earnings	23	19
Less special item (after-tax) included in segment earnings:		
Completion of IRS examination (See Note 14 to the Consolidated Financial Statements)	4	-
Adjusted income from operations	\$ 19	\$ 19
Realized investment gains (losses), net of taxes	\$ 2	\$ (2)

Segment earnings increased for the three months ended March 31, 2011 compared with the same period in 2010, reflecting a \$4 million increase to earnings due to the completion of the Company’s 2007 and 2008 IRS examination.

Adjusted income from operations for Other Operations was flat for the three months ended March 31, 2011 compared with the same period in 2010, primarily reflecting lower earnings from the continued decline in deferred gain amortization associated with the sold businesses, offset by slightly improved COLI earnings.

Revenues

Net investment income. Net investment income decreased 2% for the three months ended March 31, 2011, compared with the same period in 2010, primarily reflecting lower yields.

Other revenues. Other revenues decreased 7% for the three months ended March 31, 2011, compared with the same period in 2010, primarily due to lower deferred gain amortization related to the sold retirement benefits and individual life insurance and annuity businesses.

For more information regarding the sale of these businesses, see Note 10 to the Consolidated Financial Statements.

Benefits and Expenses

Benefits and expenses. Benefits and expenses increased 7% for the three months ended March 31, 2011, compared with the same period in 2010, primarily due to a charge to reimburse the buyer of the retirement benefits business with a portion of the tax benefits resulting from the completion of the 2007 and 2008 IRS examination as required under a tax sharing agreement.

[Back to Contents](#)

Corporate

Description

Corporate reflects amounts not allocated to segments, such as net interest expense (defined as interest on corporate debt less net investment income on investments not supporting segment operations), interest on uncertain tax positions, certain litigation matters, intersegment eliminations, compensation cost for stock options and certain corporate overhead expenses such as directors' expenses and, beginning in 2010, pension expense related to the Company's frozen pension plans.

Financial Summary	Three Months Ended	
	March 31,	
<i>(In millions)</i>	2011	2010
Segment loss	\$ (30)	\$ (46)
Less special item (after-tax) included in segment loss:		
Completion of IRS examination (See Note 14 to the Consolidated Financial Statements)	14	-
ADJUSTED LOSS FROM OPERATIONS	\$ (44)	\$ (46)

Segment loss for Corporate was significantly lower, primarily reflecting the tax benefit resulting from the completion of the IRS examination which is reported as a special item.

Corporate's adjusted loss from operations was lower for the three months ended March 31, 2011 compared with the same period in 2010 primarily reflecting:

- lower pension expense driven by a higher 2010 year end asset base; and

- decrease in tax expense related to Healthcare Reform. See Note 14 for additional information.

[Back to Contents](#)

Liquidity and Capital Resources

Liquidity

The Company maintains liquidity at two levels: the subsidiary level and the parent company level.

Liquidity requirements at the subsidiary level generally consist of:

- claim and benefit payments to policyholders; and
- operating expense requirements, primarily for employee compensation and benefits.

The Company's subsidiaries normally meet their operating requirements by:

- maintaining appropriate levels of cash, cash equivalents and short-term investments;
- using cash flows from operating activities;
- selling investments;
- matching investment durations to those estimated for the related insurance and contractholder liabilities; and
- borrowing from its parent company.

Liquidity requirements at the parent company level generally consist of:

- debt service and dividend payments to shareholders; and
- pension plan funding.

The parent normally meets its liquidity requirements by:

-
- maintaining appropriate levels of cash, cash equivalents and short-term investments;
-
- collecting dividends from its subsidiaries;
-
- using proceeds from issuance of debt and equity securities; and
-
- borrowing from its subsidiaries.

Cash flows for the three months ended March 31, were as follows:

<i>(In millions)</i>	2011	2010
Operating activities	\$ 51	\$ 394
Investing activities	\$ (316)	\$ (123)
Financing activities	\$ 305	\$ 107

Cash flows from operating activities consist of cash receipts and disbursements for premiums and fees, mail order pharmacy and other revenues, gains (losses) recognized in connection with the Company's GMDB equity hedge program, investment income, taxes, and benefits and expenses.

Because certain income and expense transactions do not generate cash, and because cash transactions related to revenue and expenses may occur in periods different from when those revenues and expenses are recognized in shareholders' net income, cash flows from operating activities can be significantly different from shareholders' net income.

Cash flows from investing activities generally consist of net investment purchases or sales and net purchases of property and equipment, which includes capitalized software, as well as cash used to acquire businesses.

Cash flows from financing activities are generally comprised of issuances and re-payment of debt at the parent company level, proceeds on the issuance of common stock resulting from stock option exercises, and stock repurchases. In addition, the subsidiaries report net deposits/withdrawals to/from investment contract liabilities (which include universal life insurance liabilities) because such liabilities are considered financing activities with policyholders.

[Back to Contents](#)

2011:

Operating activities

For the three months ended March 31, 2011, cash flows from operating activities were less than net income by \$379 million. Net income contains certain after-tax income and expense items which neither provide nor use operating cash flow, including:

- GMIB fair value gain of \$16 million;
- net pre-tax charges related to special items of \$9 million;
- tax benefits related to the resolution of federal tax matters of \$33 million;
- depreciation and amortization charges of \$83 million; and
- realized investment gains of \$26 million.

Cash flows from operating activities were lower than net income excluding the non-cash items noted above by \$396 million. Excluding cash outflows of \$44 million associated with the GMDB equity hedge program (which did not affect shareholders' net income), cash flows from operating activities were lower than net income by \$352 million. This result primarily reflects pension contributions of \$141 million, the annual payment of management incentive compensation in the first quarter and significant claim run-out from the Medicare IPFFS business, which the Company exited in 2011.

Cash flows from operating activities decreased by \$343 million compared with the three months ended March 31, 2010. Excluding the results of the GMDB equity hedge program (which did not affect shareholders' net income), cash flows from operating activities decreased by \$344 million. This decrease primarily reflects higher contributions to the qualified domestic pension plan (\$141 million for the three months ended March 31, 2011, compared with \$55 million for the three months ended March 31, 2010), as well as higher management compensation and income tax payments. In addition, the decline reflects unfavorable operating cash flows in the Medicare IPFFS business for the three months ended March 31, 2011 due to significant claim run-out in 2011 compared to significant favorable operating cash flows reflecting significant growth in this business in 2010. Operating cash flows were favorably affected in the first quarter of 2010 because paid claims on this business growth in 2010 lagged premium collections.

Investing activities

Cash used in investing activities was \$316 million. This use of cash consisted primarily of net purchases of investments of \$231 million and net purchases of property and equipment of \$73 million.

Financing activities

Cash provided from financing activities consisted primarily of net proceeds from the issuance of long-term debt of \$591 million, changes in cash overdraft position of \$6 million, proceeds from issuances of common stock from employee benefit plans of \$66 million and net deposits to contractholder deposit funds of \$18 million. These inflows were partially offset by the repayment of debt of \$224 million and cash used for common stock repurchases of \$152 million.

2010:

Operating activities

For the three months ended March 31, 2010, cash flows from operating activities were higher than net income by \$110 million. Net income contains certain after-tax income and expense items which neither provide nor use operating cash flow, including:

-

GMIB fair value gain of \$4 million;

-

depreciation and amortization charges of \$61 million; and

-

realized investment losses of \$6 million.

Cash flows from operating activities were higher than net income excluding the non-cash items noted above by \$47 million. Excluding cash outflows of \$45 million associated with the GMDB equity hedge program which did not affect shareholders' net income, cash flows from operating activities were higher than net income by \$92 million. This result primarily reflects premium growth in the Health Care segment's risk businesses due to significant new business in 2010. Since paid claims on new business tend to lag premium collections, cash flow from operating activities was favorably affected by this new business. In addition, the Company was not required to make a federal tax payment in the first quarter. These favorable effects were partially offset by the annual payment of management incentive compensation in the first quarter.

[Back to Contents](#)

Investing activities

Cash used in investing activities was \$123 million. This use of cash primarily consisted of net purchases of investments of \$66 million and net purchases of property and equipment of \$52 million.

Financing activities

Cash provided from financing activities primarily consisted of changes in cash overdraft position of \$40 million, proceeds from issuances of common stock from employee benefit plans of \$24 million and net deposits to contractholder deposit funds of \$45 million.

Interest Expense

Interest expense on long-term debt, short-term debt and capital leases was as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31,	
	2011	2010
Interest expense	\$ 44	\$ 43

The increase in interest expense for the three months ended March 31, 2011 was primarily due to higher long-term debt outstanding in 2011, resulting from the issuance of debt in March, 2011, and May, 2010 used for general corporate purposes.

Capital Resources

The Company's capital resources (primarily retained earnings and the proceeds from the issuance of debt and equity securities) provide protection for policyholders, furnish the financial strength to underwrite insurance risks and facilitate continued business growth.

Management, guided by regulatory requirements and rating agency capital guidelines, determines the amount of capital resources that the Company maintains. Management allocates resources to new long-term business commitments when returns, considering the risks, look promising and when the resources available to support existing business are adequate.

The Company prioritizes its use of capital resources to:

- provide capital necessary to support growth and maintain or improve the financial strength ratings of subsidiaries which includes evaluating potential solutions for the Company's run-off reinsurance business and pension funding obligations;

- consider acquisitions that are strategically and economically advantageous; and

-

return capital to investors through share repurchase.

The availability of capital resources will be impacted by equity and credit market conditions. Extreme volatility in credit or equity market conditions may reduce the Company's ability to issue debt or equity securities.

Sources of Capital

On March 7, 2011, the Company issued \$300 million of 10-Year Notes due March 15, 2021 at a stated interest rate of 4.5% (\$298 million, net of discount, with an effective interest rate of 4.683% per year) and \$300 million of 30-Year Notes due March 15, 2041 at a stated interest rate of 5.875% (\$298 million, net of discount, with an effective interest rate of 6.008% per year). Interest is payable on March 15 and September 15 of each year beginning September 15, 2011. The proceeds of this debt were used for general corporate purposes, including the repayment of debt maturing in 2011.

[Back to Contents](#)

Uses of Capital

For the three months ended March 31, 2011, the Company's uses of capital included the following.

Pension funding. The Company contributed \$141 million to the pension plans, of which \$16 million was required and \$125 million was voluntary.

Share Repurchase. The Company maintains a share repurchase program, which was authorized by its Board of Directors. The decision to repurchase shares depends on market conditions and alternate uses of capital. The Company has, and may continue from time to time, to repurchase shares on the open market through a Rule 10b5-1 plan which permits a company to repurchase its shares at times when it otherwise might be precluded from doing so under insider trading laws or because of self-imposed trading blackout periods. The Company suspends activity under this program from time to time and also removes such suspensions, generally without public announcement.

Through May 5, 2011, the Company repurchased 4.9 million shares for approximately \$207 million. The total remaining share repurchase authorization as of May 5, 2011 was \$541 million.

Liquidity and Capital Resources Outlook

At March 31, 2011, there was \$790 million in cash and short-term investments available at the parent company level. For the remainder of 2011, the parent company's cash requirements include scheduled interest payments of approximately \$155 million on long-term debt (including current maturities) of \$3.1 billion outstanding at March 31, 2011. In addition, \$100 million of commercial paper will mature over the next three months and scheduled long-term debt repayments of \$226 million are due in October of 2011. The Company expects to make additional contributions to the pension plan of \$109 million for the remainder of the year. The parent company expects to fund these cash requirements by using available cash, subsidiary dividends and by refinancing the maturing commercial paper borrowings with new commercial paper.

The availability of resources at the parent company level is partially dependent on dividends from the Company's subsidiaries, most of which are subject to regulatory restrictions and rating agency capital guidelines, and partially dependent on the availability of liquidity from the issuance of debt or equity securities.

The Company expects, based on current projections for cash activity, to have sufficient liquidity to meet its obligations.

However, the Company's cash projections may not be realized and the demand for funds could exceed available cash if:

-

ongoing businesses experience unexpected shortfalls in earnings;

-

regulatory restrictions or rating agency capital guidelines reduce the amount of dividends available to be distributed to the parent company from the insurance and HMO subsidiaries (including the impact of equity market deterioration and volatility on subsidiary capital);

-

significant disruption or volatility in the capital and credit markets reduces the Company's ability to raise capital or creates unexpected losses related to the GMDB and GMIB businesses;

-

a substantial increase in funding over current projections is required for the Company's pension plans;

-

a substantial increase in funding is required for the Company's hedge programs in the run-off reinsurance operations;
or

In those cases, the Company expects to have the flexibility to satisfy liquidity needs through a variety of measures, including intercompany borrowings and sales of liquid investments. The parent company may borrow up to \$600 million from Connecticut General Life Insurance Company ("CGLIC") without prior state approval. As of March 31, 2011, the parent company had no outstanding borrowings from CGLIC.

In addition, the Company may use short-term borrowings, such as the commercial paper program and the committed revolving credit and letter of credit agreement of up to \$1.75 billion subject to the maximum debt leverage covenant in its line of credit agreement. This agreement permits up to \$1.25 billion to be used for letters of credit. As of March 31, 2011, there were two letters totaling \$82 million issued out of the credit facility. As of March 31, 2011, the Company had an additional \$1.7 billion of borrowing capacity under the credit facility.

[Back to Contents](#)

The Company is currently engaged in a dispute with the IRS relative to a federal income tax matter (see Note 14). Although the Company expects to prevail in this matter, an unfavorable tax court decision could result in a significant cash outlay. Due to the nature of this dispute the amount of any potential IRS payment cannot be reasonably estimated. The Company would fund this cash outlay using the various sources of cash as discussed above. Since this dispute relates to the timing of recognition of tax deductions, in the event of an unfavorable resolution, the Company would expect to recover the cash outlay (except interest) in future periods.

Though the Company believes it has adequate sources of liquidity, continued significant disruption or volatility in the capital and credit markets could affect the Company's ability to access those markets for additional borrowings or increase costs associated with borrowing funds.

Guarantees and Contractual Obligations

The Company, through its subsidiaries, is contingently liable for various contractual obligations entered into in the ordinary course of business. See Note 16 to the Consolidated Financial Statements for additional information.

Contractual obligations. The Company has updated its contractual obligations previously provided on page 86 of the Company's 2010 Form 10-K for Long-term debt, due to the issuance of new debt on March 7, 2011. See Note 12 to the Consolidated Financial Statements for additional information.

<i>(In millions, on an undiscounted basis)</i>	Total	Less than 1 year	1-3 years	4-5 years	After 5 years

CIGNA CORPORATION – Form 10-Q – 64

[Back to Contents](#)

Investment Assets

The Company's investment assets do not include separate account assets. Additional information regarding the Company's investment assets and related accounting policies is included in Notes 2, 6, 7, 8, 9 and 13 to the Consolidated Financial Statements. More detailed information about the fixed maturities portfolios by type of issuer, maturity dates, and, for mortgages, by debt service coverage and loan-to-value ratios is included in Note 7 to the Consolidated Financial Statements and Notes 2, 11, 12 and 18 to the Consolidated Financial Statements in the Company's 2010 Form 10-K.

As of March 31, 2011, the Company's mix of investments and their primary characteristics had not materially changed since December 31, 2010. The Company's fixed maturity portfolio is diversified by issuer and industry type, with no single industry constituting more than 10% of total invested assets as of March 31, 2011. The Company's commercial mortgage loan portfolio is diversified by property type, location and borrower to reduce exposure to potential losses.

Fixed Maturities

Investments in fixed maturities include publicly-traded and privately placed debt securities, mortgage and other asset-backed securities, preferred stocks redeemable by the investor, hybrid and trading securities. Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price.

The Company performs ongoing analyses of prices used to value the Company's invested assets to determine that they represent appropriate estimates of fair value. This process involves quantitative and qualitative analysis including reviews of pricing methodologies, judgments of valuation inputs, the significance of any unobservable inputs, pricing statistics and trends. The Company also performs sample testing of sales values to confirm the accuracy of prior fair value estimates.

The net appreciation of the Company's fixed maturity portfolio decreased approximately \$70 million in the three months ended March 31, 2011 driven by an increase in market yields. Although overall asset values are well in excess of amortized cost, there are specific securities with amortized cost in excess of fair value by \$78 million as of March 31, 2011. See Note 7 to the Consolidated Financial Statements for further information.

The Company's investment in state and local government securities is diversified by issuer and geography with no single exposure greater than \$32 million. The Company focuses on the underlying issuer's credit quality with 97% rated A3 or better excluding guarantees by monoline bond insurers, consistent with the prior year. As of March 31, 2011, approximately 63% or \$1,530 million of the Company's total investments in state and local government securities were guaranteed by monoline bond insurers, providing additional credit quality support. The quality ratings of these investments with and without this guaranteed support as of March 31, 2011 were as follows:

<i>(In millions)</i>	Quality Rating	As of March 31, 2011	
		Fair Value With Guarantee	Fair Value Without Guarantee
State and local governments	Aaa	\$ 104	\$ 104

Aa1-Aa3	1,171	1,124
A1-A3	214	259
Baa1-Baa3	41	43

**TOTAL STATE AND LOCAL
GOVERNMENTS**

\$ 1,530 \$ 1,530

The Company also invests in high quality foreign government obligations, with an average quality rating of AA- as of March 31, 2011. The diversification of these investments was consistent with the geographic distribution of the international business operations.

As of March 31, 2011, the Company's investments in other asset and mortgage-backed securities totaling \$932 million included \$475 million of investment grade private placement securities guaranteed by monoline bond insurers. Quality ratings without considering the guarantees for these other asset-backed securities were not available.

[Back to Contents](#)

As of March 31, 2011, the Company had no direct investments in monoline bond insurers. Guarantees provided by various monoline bond insurers for certain of the Company's investments in state and local governments and other asset-backed securities as of March 31, 2011 were:

<i>(In millions)</i>	As of March 31, 2011
Guarantor	Indirect Exposure
National Public Finance Guarantee (formerly MBIA, Inc.)	\$ 1,210
Assured Guaranty Municipal Corp (formerly Financial Security Assurance)	586
AMBAC	172
Financial Guaranty Insurance Co.	37
TOTAL	\$ 2,005

AMBAC filed for bankruptcy during the fourth quarter of 2010. However, the Company does not expect this action to materially impact valuations of guaranteed securities given the high quality of underlying issuer credit without this guaranteed support.

Commercial Mortgage Loans

The Company's commercial mortgage loans are fixed rate loans, diversified by property type, location and borrower to reduce exposure to potential losses. Loans are secured by high quality commercial properties and are generally made at less than 75% of the property's value at origination of the loan. In addition to property value, debt service coverage, which is the ratio of the estimated cash flows from the property to the required loan payments (principal and interest), is an important underwriting consideration. The Company holds no direct residential mortgage loans and does not securitize or service mortgage loans.

The Company completed its annual in depth review of its commercial mortgage loan portfolio in July, 2010. This review included an analysis of each property's year-end 2009 financial statements, rent rolls, operating plans and budgets for 2010, a physical inspection of the property and other pertinent factors. Based on property values and cash flows estimated as part of this review, along with updates for portfolio activity subsequent to the review, as of March 31, 2011 both the portfolio's average loan-to-value ratio of 74% and debt service coverage ratio of 1.38 were unchanged from December 31, 2010.

Commercial real estate capital markets and fundamental performance for well leased, quality commercial real estate located in strong institutional investment markets continue to show improvement. The vast majority of properties securing the mortgages in CIGNA's mortgage portfolio reflect these market improvements. While commercial real estate capital markets and fundamentals continued to improve, a sustained recovery will be dependent on continued improvement in local markets and the broader national economy.

The following table reflects the commercial mortgage loan portfolio as of March 31, 2011 summarized by loan-to-value ratio based on the annual loan review completed in July, 2010.

Loan-to-Value Distribution		
Loan-to-Value Ratios	Amortized Cost	% of Mortgage

<i>(In millions)</i>	Loans				
	Senior	Subordinated	Total		
Below 50%	\$ 219	\$ 140	\$ 359	11%	
50% to 59%	459	33	492	14%	
60% to 69%	618	47	665	20%	
70% to 79%	421	29	450	13%	
80% to 89%	642	33	675	20%	
90% to 99%	527	27	554	16%	
100% or above	207	-	207	6%	
TOTALS	\$ 3,093	\$ 309	\$ 3,402	100%	

CIGNA CORPORATION – *Form 10-Q* – 66

[Back to Contents](#)

As summarized above, \$309 million or 9% of the commercial mortgage loan portfolio is comprised of subordinated notes and loans, including \$276 million of loans secured by first mortgages, which were fully underwritten and originated by the Company using its standard underwriting procedures. Senior interests in these first mortgage loans were then sold to other institutional investors. This strategy allowed the Company to effectively utilize its origination capabilities to underwrite high quality loans, limit individual loan exposures, and achieve attractive risk adjusted yields. In the event of a default, the Company would pursue remedies up to and including foreclosure jointly with the holders of the senior interest, but would receive repayment only after satisfaction of the senior interest.

There are seven loans where the aggregate carrying value of the mortgage loans exceeds the value of the underlying properties by \$17 million. Five of these loans have current debt service coverage of 1.0 or greater and two with debt service coverage below 1.0 have other mitigating factors, including significant borrower commitment. The mortgage portfolio contains approximately 170 loans, and all but four loans totaling \$85 million, continue to perform under their contractual terms with the actual aggregate default rate at 2.5%. The Company has \$537 million of loans maturing in the next twelve months. Given the quality and diversity of the underlying real estate, positive debt service coverage and significant borrower cash investment averaging nearly 30%, the Company remains confident that the vast majority of borrowers will continue to perform as required. While considered unlikely, if property values were to decrease 10% from those levels estimated during the annual in-depth loan review, approximately 18% of the portfolio's carrying values would exceed the fair values of their underlying properties by approximately \$80 million.

Other Long-term Investments

The Company's other long-term investments include \$755 million in security partnership and real estate funds as well as direct investments in real estate joint ventures. The funds typically invest in mezzanine debt or equity of privately held companies (securities partnerships) and equity real estate. Because these investments have a subordinate position in the capital structure, the Company assumes a higher level of risk for higher expected returns. To mitigate risk, these investments are diversified across approximately 65 separate partnerships, and approximately 40 general partners who manage one or more of these partnerships. Also, the funds' underlying investments are diversified by industry sector or property type, and geographic region. No single partnership investment exceeds 5% of the Company's securities and real estate partnership portfolio. Although the total fair values of these investments exceeded their carrying values as of March 31, 2011, the fair value of the Company's ownership interest in certain funds (those carried at cost) was less than its carrying value by \$51 million. These investment values improved during the past year, but remained at depressed levels reflecting the impact of declines in value experienced predominantly during 2008 and 2009 due to economic weakness and disruption in the capital markets, particularly in the commercial real estate market. The Company expects to recover its carrying value over the remaining lives of the funds. Given the current economic environment, future impairments are possible; however, management does not expect those losses to have a material effect on the Company's results of operations, financial condition or liquidity.

Problem and Potential Problem Investments

"Problem" bonds and commercial mortgage loans are either delinquent by 60 days or more or have been restructured as to terms, including concessions by the Company for modification of interest rate, principal payment or maturity date. "Potential problem" bonds and commercial mortgage loans are considered current (no payment more than 59 days past due), but management believes they have certain characteristics that increase the likelihood that they may become problems. The characteristics management considers include, but are not limited to, the following:

-

request from the borrower for restructuring;

- principal or interest payments past due by more than 30 but fewer than 60 days;

- downgrade in credit rating;

- collateral losses on asset-backed securities; and

- for commercial mortgages, deterioration of debt service coverage below 1.0 or estimated loan-to-value ratios increasing to 100% or more.

The Company recognizes interest income on problem bonds and commercial mortgage loans only when payment is actually received because of the risk profile of the underlying investment. The additional amount that would have been reflected in net income if interest on non-accrual investments had been recognized in accordance with the original terms was not significant for the three months ended March 31, 2011 or 2010.

[Back to Contents](#)

The following table shows problem and potential problem investments at amortized cost, net of valuation reserves and write-downs:

<i>(In millions)</i>	March 31, 2011			December 31, 2010		
	Gross	Reserve	Net	Gross	Reserve	Net
Problem bonds	\$ 86	\$ (39)	\$ 47	\$ 86	\$ (39)	\$ 47
Problem commercial mortgage loans	96	(11)	85	90	(4)	86
Foreclosed real estate	59	-	59	59	-	59
TOTAL PROBLEM INVESTMENTS	\$ 241	\$ (50)	\$ 191	\$ 235	\$ (43)	\$ 192
Potential problem bonds	\$ 36	\$ (10)	\$ 26	\$ 40	\$ (10)	\$ 30
Potential problem commercial mortgage loans	288	-	288	305	(8)	297
TOTAL POTENTIAL PROBLEM INVESTMENTS	\$ 324	\$ (10)	\$ 314	\$ 345	\$ (18)	\$ 327

Net problem investments represent 1.0% and net potential problem investments represent 1.6% of total investments excluding policy loans at March 31, 2011. Net problem and potential problem investments were essentially unchanged from December 31, 2010.

Commercial mortgage loans are considered impaired when it is probable that the Company will not collect all amounts due according to the terms of the original loan agreement. In the above table, problem and potential problem commercial mortgage loans totaling \$85 million (net of valuation reserves) at March 31, 2011, are considered impaired. During 2010, the Company recorded a \$24 million pre-tax (\$15 million after-tax) increase to valuation reserves on impaired commercial mortgage loans.

Summary

Included in after-tax realized investment gains (losses) were changes in valuation reserves and asset write-downs related to commercial mortgage loans and investments in real estate entities as well as other-than-temporary impairments on fixed maturities as follows:

<i>(In millions)</i>	Three Months Ended	
	March 31, 2011	2010
Credit-related	\$ -	\$ 16
Other	-	1
TOTAL	\$ -	\$ 17

Market yields were relatively unchanged and valuations of the Company's invested assets were fairly stable during the first quarter of 2011 even though financial markets were impacted by several macroeconomic activities, including economic growth in the United States and international geopolitical events. Future realized and unrealized investment results will be impacted largely by market conditions that exist when a transaction occurs or at the reporting date. These future conditions are not reasonably predictable. Management believes that the vast majority of the Company's fixed maturity investments will continue to perform under their contractual terms, and that declines in their fair values below carrying value are temporary. Based on the strategy to match the duration of invested assets to the duration of insurance and contractholder liabilities, the Company expects to hold a significant portion of these assets for the long term. Future credit-related losses are not expected to have a material adverse effect on the Company's liquidity or financial condition.

While management believes the commercial mortgage loan portfolio is positioned to perform well due to its solid aggregate loan-to-value ratio, strong debt service coverage and minimal underwater position, the commercial real estate market continues to exhibit signs of distress and if these conditions remain for an extended period or worsen substantially, it could result in an increase in problem and potential problem loans. Given the current economic environment, future impairments are possible; however, management does not expect those losses to have a material effect on the Company's financial condition or liquidity.

[Back to Contents](#)

Market Risk

Financial Instruments

The Company's assets and liabilities include financial instruments subject to the risk of potential losses from adverse changes in market rates and prices. The Company's primary market risk exposures are interest-rate risk, foreign currency exchange rate risk and equity price risk.

The Company uses futures contracts as part of a GMDB equity hedge program to substantially reduce the effect of equity market changes on certain reinsurance contracts that guarantee minimum death benefits based on unfavorable changes in underlying variable annuity account values. The hypothetical effect of a 10% increase in the S&P 500, S&P 400, Russell 2000, NASDAQ, TOPIX (Japanese), EUROSTOXX and FTSE (British) equity indices and a 10% weakening in the U.S. dollar to the Japanese yen, British pound and euro would have been a decrease of approximately \$80 million in the fair value of the futures contracts outstanding under this program as of March 31, 2011. A corresponding decrease in liabilities for GMDB contracts would result from the hypothetical 10% increase in these equity indices and 10% weakening in the U.S. dollar. See Note 5 to the Consolidated Financial Statements for further discussion of this program and related GMDB contracts.

Stock Market Performance

The performance of equity markets can have a significant effect on the Company's businesses, including on:

- risks and exposures associated with GMDB (see Note 5 to the Consolidated Financial Statements) and GMIB contracts (see Note 6 to the Consolidated Financial Statements); and

- pension liabilities since equity securities comprise a significant portion of the assets of the Company's employee pension plans. See "Liquidity and Capital Resources" section of the MD&A beginning on page 60 for further information.

Cautionary Statement for Purposes of the “Safe Harbor” Provisions of the Private Securities Litigation Reform Act of 1995

CIGNA Corporation and its subsidiaries (the “Company”) and its representatives may from time to time make written and oral forward-looking statements, including statements contained in press releases, in the Company’s filings with the Securities and Exchange Commission, in its reports to shareholders and in meetings with analysts and investors. Forward-looking statements may contain information about financial prospects, economic conditions, trends and other uncertainties. These forward-looking statements are based on management’s beliefs and assumptions and on information available to management at the time the statements are or were made. Forward-looking statements include but are not limited to the information concerning possible or assumed future business strategies, financing plans, competitive position, potential growth opportunities, potential operating performance improvements, trends and, in particular, the Company’s strategic initiatives, litigation and other legal matters, operational improvement initiatives in the health care operations, and the outlook for the Company’s full year 2011 and beyond results. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words “believe”, “expect”, “plan”, “intend”, “anticipate”, “estimate”, “predict”, “potential”, “may” or similar expressions.

By their nature, forward-looking statements: (i) speak only as of the date they are made, (ii) are not guarantees of future performance or results and (iii) are subject to risks, uncertainties and assumptions that are difficult to predict or quantify. Therefore, actual results could differ materially and adversely from those forward-looking statements as a result of a variety of factors. Some factors that could cause actual results to differ materially from the forward-looking statements include:

1.

increased medical costs that are higher than anticipated in establishing premium rates in the Company’s Health Care operations, including increased use and costs of medical services;

2.

increased medical, administrative, technology or other costs resulting from new legislative and regulatory requirements imposed on the Company’s businesses;

3.

challenges and risks associated with implementing operational improvement initiatives and strategic actions in the ongoing operations of the businesses, including those related to: (i) growth in targeted geographies, product lines, buying segments and distribution channels, (ii) offering products that meet emerging market needs, (iii) strengthening underwriting and pricing effectiveness, (iv) strengthening medical cost and medical membership results, (v) delivering quality service to members and health care professionals using effective technology solutions, (vi) lowering administrative costs and (vii) transitioning to an integrated operating company model, including operating efficiencies related to the transition;

4.

risks associated with pending and potential state and federal class action lawsuits, disputes regarding reinsurance arrangements, other litigation and regulatory actions challenging the Company’s businesses, including disputes related to payments to health care professionals, government investigations and proceedings, and tax audits and related litigation;

5.

heightened competition, particularly price competition, which could reduce product margins and constrain growth in the Company's businesses, primarily the Health Care business;

6.

risks associated with the Company's mail order pharmacy business which, among other things, includes any potential operational deficiencies or service issues as well as loss or suspension of state pharmacy licenses;

7.

significant changes in interest rates or sustained deterioration in the commercial real estate markets;

8.

downgrades in the financial strength ratings of the Company's insurance subsidiaries, which could, among other things, adversely affect new sales, retention of current business as well as a downgrade in financial strength ratings of reinsurers which could result in increased statutory reserve or capital requirements;

9.

limitations on the ability of the Company's insurance subsidiaries to dividend capital to the parent company as a result of downgrades in the subsidiaries' financial strength ratings, changes in statutory reserve or capital requirements or other financial constraints;

10.

inability of the hedge program adopted by the Company to substantially reduce equity market and interest rate risks in the run-off reinsurance operations;

11.

adjustments to the reserve assumptions (including lapse, partial surrender, mortality, interest rates and volatility) used in estimating the Company's liabilities for reinsurance contracts covering guaranteed minimum death benefits under certain variable annuities;

12.

adjustments to the assumptions (including annuity election rates and amounts collectible from reinsurers) used in estimating the Company's assets and liabilities for reinsurance contracts covering guaranteed minimum income benefits under certain variable annuities;

13.

significant stock market declines, which could, among other things, result in increased expenses for guaranteed minimum income benefit contracts, guaranteed minimum death benefit contracts and the Company's pension plans in future periods as well as the recognition of additional pension obligations;

14.

significant deterioration in economic conditions and significant market volatility, which could have an adverse effect on the Company's operations, investments, liquidity and access to capital markets;

[Back to Contents](#)

15.

significant deterioration in economic conditions and significant market volatility, which could have an adverse effect on the businesses of our customers (including the amount and type of health care services provided to their workforce, loss in workforce and our customers' ability to pay receivables) and our vendors (including their ability to provide services);

16.

adverse changes in state, federal and international laws and regulations, including health care reform legislation and regulation which could, among other items, affect the way the Company does business, increase cost, limit the ability to effectively estimate, price for and manage medical costs, and affect the Company's products, services, market segments, technology and processes;

17.

amendments to income tax laws, which could affect the taxation of employer provided benefits, the taxation of certain insurance products such as corporate-owned life insurance, or the financial decisions of individuals whose variable annuities are covered under reinsurance contracts issued by the Company;

18.

potential public health epidemics, pandemics and bio-terrorist activity, which could, among other things, cause the Company's covered medical and disability expenses, pharmacy costs and mortality experience to rise significantly, and cause operational disruption, depending on the severity of the event and number of individuals affected;

19.

risks associated with security or interruption of information systems, which could, among other things, cause operational disruption;

20.

challenges and risks associated with the successful management of the Company's outsourcing projects or vendors, including the agreement with IBM for provision of technology infrastructure and related services;

21.

the ability to successfully complete the integration of acquired businesses; and

22.

the political, legal, operational, regulatory and other challenges associated with expanding our business globally.

This list of important factors is not intended to be exhaustive. Other sections of the Company's 2010 Annual Report on Form 10-K, including the "Risk Factors" section, and other documents filed with the Securities and Exchange Commission include both expanded discussion of these factors and additional risk factors and uncertainties that could preclude the Company from realizing the forward-looking statements. The Company does not assume any obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise, except

as required by law.

ITEM 4 Controls and Procedures

Based on an evaluation of the effectiveness of CIGNA's disclosure controls and procedures conducted under the supervision and with the participation of CIGNA's management, CIGNA's Chief Executive Officer and Acting Chief Financial Officer concluded that, as of the end of the period covered by this report, CIGNA's disclosure controls and procedures are effective to ensure that information required to be disclosed by CIGNA in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Security and Exchange Commission's rules and forms and is accumulated and communicated to CIGNA's management, including CIGNA's Chief Executive Officer and Acting Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

During the period covered by this report, there have been no changes in CIGNA's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, CIGNA's internal control over financial reporting.

ITEM 1A Risk Factors

CIGNA's Annual Report on Form 10-K for the year ended December 31, 2010 includes a detailed description of its risk factors.

CIGNA CORPORATION – *Form 10-Q* – 75

[Back to Contents](#)**ITEM 2** Unregistered Sales of Equity Securities and Use of Proceeds

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table provides information about CIGNA's share repurchase activity for the quarter ended March 31, 2011:

Issuer Purchases of Equity Securities

Period	Total # of shares purchased ⁽¹⁾	Average price paid per share	Total # of shares purchased as part of publicly announced program ⁽²⁾	Approximate dollar value of shares that may yet be purchased as part of publicly announced program ⁽³⁾
January 1-31, 2011	1,838,634	\$ 39.96	1,831,784	\$ 174,108,842
February 1-28, 2011	85,942	\$ 42.00	0	\$ 674,108,842
March 1-31, 2011	2,181,831	\$ 42.84	2,087,850	\$ 584,652,339
TOTAL	4,106,407	\$ 41.54	3,919,634	N/A

(1) Includes shares tendered by employees as payment of taxes withheld on the exercise of stock options and the vesting of restricted stock granted under the Company's equity compensation plans. Employees tendered 6,850 shares in January, 85,942 shares in February and 93,981 shares in March.

(2) CIGNA has had a repurchase program for many years, and has had varying levels of repurchase authority and activity under this program. The program has no expiration date. CIGNA suspends activity under this program from time to time and also removes such suspensions, generally without public announcement. On February 23, 2011, the Board of Directors increased share repurchase authority by \$500 million. Remaining authorization under the program was approximately \$585 million as of March 31, 2011 and \$541 million as of May 5, 2011.

(3) Approximate dollar value of shares is as of the last date of the applicable month.
