Item 7.01. Regulation FD Disclosure.

The following information, including the exhibit described below, shall not be deemed “filed” hereunder for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

On June 17, 2010, Caterpillar Inc. issued a press release announcing the company’s plans to produce a full range of mining shovels, ranging from a 125-ton model through an 800-ton model. Initial production will take place at the company’s facility in Aurora, Illinois and the first commercially available shovels are expected to be available in late 2011. The new 125-ton class shovel is expected to begin pilot production in early 2011 and the larger shovels are expected to be available beginning in 2013 through 2014.

The company also announced plans to expand capacity for trucks at its Decatur, Illinois and its Chennai, India facilities. The Decatur facility expansion is expected to increase truck capacity at the facility by nearly 30 percent. The Chennai facility expansion will increase capacity for 60-ton and 100-ton trucks, which is expected to more than double truck production capabilities in India.

The mining shovel development program and the additional truck capacity represent investments by the company of nearly \$700 million.

The company is also updating the status of its electric-drive mining trucks. Commercial production of the 345-ton 795F AC truck is scheduled to begin in late 2010. Due to strong interest in the 795F, the company is increasing its planned build rate by more than 40 percent for 2011. Production of pilot units of the 240-ton 793F AC truck are expected to begin in early 2012.

Item 9.01. Financial Statements and Exhibits.
