Sasol hosts an investor visit to its US ethane cracker and derivatives project

Sasol will today be hosting analysts and investors at its Westlake facility in Lake Charles, Louisiana.

On 27 October 2014, the company announced that it had taken a final investment decision to construct an 8.1 billion dollar ethane cracker and derivatives complex at its existing site in Lake Charles, Louisiana.

Once commissioned, this world-scale petrochemicals complex will roughly triple Sasol's chemical production capacity in the United States, enabling Sasol to further strengthen its position in a growing global chemicals market. The U.S. Gulf Coast's robust infrastructure for transporting and storing abundant, low-cost ethane was a key driver in the decision to invest in America.

Last week, Sasol announced that it is developing a comprehensive plan to respond to the current low oil price environment. At the same time, the company confirmed that the construction of the cracker and derivatives complex will continue.

Given the robust project economics, the Sasol team is confident that this facility is the first step in developing the Louisiana site into an integrated multi-asset, multi-business hub, which will enable future growth for several decades to come.

A supporting presentation and audio webcast will be available on the company's website at <http://www.sasol.com/investor-centre/presentations-and-speeches/us-site-visit> and will begin at 10h30 (CST), 18h30 (SA), 16h30 (GMT).
