DATA I/O ANNOUNCES FIRST QUARTER 2007 FINANCIAL RESULTS

Redmond, Wash., April 25, 2007 Data I/O Corporation (NASDAQ: DAIO), the leading provider of manual and automated device programming systems, today announced financial results for the first quarter of 2007.

Revenues for the first quarter of 2007 were \$6.0 million, a decline of 6% compared with \$6.4 million for the first quarter of 2006 and a decline of 28% compared with \$8.4 million for the fourth quarter of 2006. Backlog at the end of the first quarter was \$1.7 million.

Gross margins as a percentage of sales for the first quarter of 2007 were 55.1 percent, compared with 53.2 percent for the first quarter of 2006. This gross margin percentage improvement was primarily due to product mix changes between the two periods and favorable factory labor and overhead variances. Operating expenses for the first quarter of 2007 were down \$37,000 compared to the first quarter of 2006, before a restructuring charge of \$201,000 for the first quarter of 2007. In accordance with U.S. generally accepted accounting principles (GAAP), net loss for the first quarter of 2007 was (\$785,000), or (\$0.09) per share, compared with a net loss of (\$512,000) or (\$0.06) per share for the first quarter of 2006, and compared with net income of \$909,000, or \$0.10 per share, for the fourth quarter of 2006.

During the first quarter, which has been our seasonally weakest quarter, we experienced a significant reduction in sales in Asia and particularly in China, said Fred Hume, president and CEO. We believe that this is not a reflection of demand for Data I/O products, but a temporary weakness in the capital equipment market, and we believe this slow down is now behind us.

In the first quarter we continued to implement additional expense saving structure changes in each of our locations, said Hume. We expect these changes to significantly lower the quarterly revenue breakeven point and position us to achieve profitability.

One of the world's leading mobile handset manufacturers tested a new FLX500 application solution and placed it on its authorized equipment list. An automotive customer placed an order for our APPS Automotive Performance Programming System based on our PS solution. These are two examples of the application innovation focus here at Data I/O Corporation, said Hume. We expect to see new revenue from these solutions in the second quarter.

Conference Call Information

A conference call discussing the first quarter 2007 financial results will follow this release today at 2:00 p.m. Pacific time/5:00 p.m. Eastern time.
