Templeton Global Income Fund  
Notes to Statement of Investments (unaudited)

## 1. ORGANIZATION

Templeton Global Income Fund (Fund) is registered under the Investment Company Act of 1940, as amended, as an open-end investment company.

## 2. FINANCIAL INSTRUMENT VALUATION

The Fund values its investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date.

Under procedures approved by the Fund's Board of Trustees, the Fund may utilize independent pricing services, quotations from securities and financial instrument dealers, and other market sources to determine fair value.

Corporate debt, municipal, and government securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund's pricing services use multiple valuation techniques to determine fair value. In instances where sufficient market activity exists, the pricing services utilize a market-based approach through which quotes from market makers are used to determine fair value. In other instances, the pricing services utilize proprietary valuation models to develop an income-based valuation which may consider characteristics such as option-adjusted spreads, credit risk and spreads, benchmark yield curves, coupon rates, maturity and other unique security features in order to estimate the relevant cash flows which are then used to calculate the fair value. Securities denominated in a foreign currency are converted into their U.S. dollar equivalent at the foreign exchange rate in effect at the close of the NYSE on the date that the values of the foreign debt securities are determined.

The Fund has procedures to determine the fair value of investments for which market prices are not readily available or which may not be reliably priced. Under these procedures, the Fund primarily employs a market-based approach, which may use prices of recent transactions, various market multiples, book values, and other relevant information for the investment, related assets or liabilities or other comparable assets or liabilities to determine the fair value of the investment. In developing this fair value, the Fund may also give consideration to an income-based approach valuation, which considers anticipated future cash flows of the investment and converts those amounts into a net present value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had a ready market existed.

Trading in securities on foreign exchanges and over-the-counter markets may be completed before the daily close of business on the NYSE. Occasionally, events occur between the time at which trading in a foreign security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a foreign security held by the Fund. As a result, variances may arise between the value of the Fund's portfolio securities as determined at the foreign market close and the latest indications of value at the close of the NYSE. In order to minimize the potential for these discrepancies, the investment manager monitors price movements following the close of trading in foreign stock markets through a series of country specific market proxies (such as baskets of American Depositary Receipts, futures contracts and exchange traded funds). These price movements are measured against established trigger thresholds for each specific market proxy to assist in determining if an event has occurred that may call into question the reliability of the values of the foreign securities held by the Fund. If such an event

occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services.

---

Investments in open-end mutual funds are valued at the closing net asset value.

Derivative financial instruments (derivatives) may trade on a securities exchange or in the over-the-counter market. In instances where sufficient market activity exists, the Fund's pricing services use a market-based approach to determine fair value. In other instance, the pricing services use an income-based approach which considers inputs such as anticipated future cash flows, discount rates, benchmark yield and swap curves and other unique security features to determine the net present value of the contract. The Fund's net benefit or obligation under the contract, as measured by the fair market value of the contract, is included in net assets.

### 3. DERIVATIVE FINANCIAL INSTRUMENTS

The Fund may invest in derivative financial instruments in order to manage risk or gain exposure to various other investments or markets. Derivatives are financial contracts based on an underlying or notional amount, require no initial investment or an initial net investment that is smaller than would normally be required to have a similar response to changes in market factors, and require or permit net settlement. Derivatives may contain various risks including the potential inability of the counterparty to fulfill their obligations under the terms of the contract, the potential for an illiquid secondary market, and the potential for market movements.

The Fund generally enters into financial futures contracts in order to manage interest rate risk. A futures contract is an agreement between the Fund and a counterparty to buy or sell a security for a specific price on a future date. Required initial margin deposits of cash or securities are pledged or received by the Fund. Subsequent payments, known as variation margin, are made or received by the Fund, depending on fluctuations in the value of the underlying security. Such variation margin is accounted for as unrealized appreciation or depreciation until the contract is closed, at which time the gains or losses are realized.

The Fund generally enters into forward exchange contracts in order to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. A forward exchange contract is an agreement between the Fund and a counterparty to buy or sell a foreign currency for a specific exchange rate on a future date. Pursuant to the terms of the forward exchange contracts, cash or securities may be required to be deposited as collateral.

The Fund generally enters into interest rate swap contracts in order to manage interest rate risk. An interest rate swap is an agreement between the Fund and a counterparty to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount. Over the term of the contract, contractually required payments to be paid and to be received are accrued daily and recorded as unrealized depreciation and appreciation until the payments are made, at which time they are realized. Pursuant to the terms of the interest rate swap contract, cash or securities may be required to be deposited as collateral. Unrestricted cash may be invested according to the Fund's investment objectives.

### 4. INCOME TAXES

At May 31, 2010, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$ 1,069,975,148
Unrealized appreciation	\$ 125,648,067

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-Q

Unrealized depreciation	(20,470,660)
Net unrealized appreciation (depreciation)	\$ 105,177,407

---

## 5. FAIR VALUE MEASUREMENTS

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). These inputs are used in determining the value of the Fund's investments and are summarized in the following fair value hierarchy:

- Level 1 — quoted prices in active markets for identical securities
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Fund's/ own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of May 31, 2010, in valuing the Fund's assets and liabilities carried at fair value:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments in Securities:				
Bonds	\$ —	\$1,081,989,941	\$ —	\$1,081,989,941
Municipal Bonds	—	41,479,115	—	41,479,115
Short Term Investments	26,701,108	24,982,391	—	51,683,499
<b>Total Investments in Securities</b>	<b>\$26,701,108</b>	<b>\$1,148,451,447</b>	<b>\$ —</b>	<b>\$1,175,152,555</b>
Swaps	—	9,708,278	—	9,708,278
Forward Exchange Contracts	—	64,997,822	—	64,997,822
<b>Liabilities:</b>				
Forward Exchange Contracts	—	15,195,995	—	15,195,995
Financial Futures Contracts	—	143	—	143

## **6. NEW ACCOUNTING PRONOUNCEMENTS**

In January 2010, the Financial Accounting Standards Board issued an Accounting Standards Update (ASU) which enhances and clarifies existing fair value measurement disclosure requirements and is effective for interim and annual periods beginning after December 15, 2009. The Fund believes the adoption of this ASU will not have a material impact on its financial statements.

## **7. SUBSEQUENT EVENTS**

The Fund has evaluated subsequent events through the issuance of the statement of investments and determined that no events have occurred that require disclosure.

For information on the Fund's policy regarding other significant accounting policies, please refer to the Fund's most recent semiannual or annual shareholder report.

---

## Item 2. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Quarterly Schedule of Portfolio Holdings on Form N-Q, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(b) Changes in Internal Controls. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Quarterly Schedule of Portfolio Holdings on Form N-Q.

## Item 3. Exhibits.

(a) Certification pursuant to Section 30a-2 under the Investment Company Act of 1940 of Laura F. Fergerson, Chief Executive Officer - Finance and Administration, and Mark H. Otani, Chief Financial Officer and Chief Accounting Officer.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
