(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2018

or

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 001-33059

FUEL TECH, INC.

(Exact name of registrant as specified in its charter)

Delaware 20-5657551

(State or other jurisdiction of incorporation of organization) (I.R.S. Employer Identification Number)

Fuel Tech, Inc.

27601 Bella Vista Parkway

Warrenville, IL 60555-1617

630-845-4500

www.ftek.com

(Address and telephone number of principal executive offices)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐

Non-accelerated filer ☒ Smaller reporting company ☒

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

On October 31, 2018 there were outstanding 24,170,585 shares of Common Stock, par value \$0.01 per share, of the registrant.

FUEL TECH, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2018

(Unaudited)

(in thousands, except share and per-share data)

1. General

Organization

Fuel Tech, Inc. and subsidiaries ("Fuel Tech", the "Company", "we", "us" or "our") provides advanced engineered solutions for the optimization of combustion systems in utility and industrial applications. Our primary focus is on the worldwide marketing and sale of NOx reduction technologies as well as our FUEL CHEM program. The Company's NOx reduction technologies reduce nitrogen oxide emissions from boilers, furnaces and other stationary combustion sources.

Our FUEL CHEM program is based on proprietary TIFI® Targeted In-Furnace™ Injection technology, in combination with advanced Computational Fluid Dynamics (CFD) and Chemical Kinetics Modeling (CKM) boiler modeling, in the unique application of specialty chemicals to improve the efficiency, reliability and environmental status of combustion units by controlling slagging, fouling, corrosion, opacity and other sulfur trioxide-related issues in the boiler.

Our business is materially dependent on the continued existence and enforcement of air quality regulations, particularly in the United States. We have expended significant resources in the research and development of new technologies in building our proprietary portfolio of air pollution control, fuel and boiler treatment chemicals, computer modeling and advanced visualization technologies.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Exchange Act.

Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, the financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the statements for the periods presented. All significant intercompany transactions and balances have been eliminated. The results of operations for the three and nine months ended September 30, 2018 are not necessarily indicative of the results to be expected for the full year ending December 31, 2018. For further information, refer to the audited consolidated financial statements and footnotes thereto included in Fuel Tech's Annual Report on Form 10-K for the year ended December 31, 2017 as filed with the Securities and Exchange Commission.

2. Summary of Significant Accounting Policies

Restricted cash

Restricted cash represents funds that are restricted to satisfy any amount borrowed against the Company's existing revolving credit facility (the Facility) with JPMorgan Chase Bank, N.A. The balance of restricted cash totaling \$6,520 will remain through the Maturity Date of the Facility, except for \$500 which will become unrestricted cash during the fourth quarter of 2018. Refer to Note 10 Debt Financing for further information on the Facility.

Recently Adopted Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-09 "Revenue from Contracts with Customers" (ASC 606). These changes created a comprehensive framework for all entities in all industries to apply in the determination of when to recognize revenue, and, therefore, supersede virtually all existing revenue recognition requirements and guidance. This framework is expected to result in less complex guidance in application while providing a consistent and comparable methodology for revenue recognition. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that

reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve this principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract(s), (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract(s), and (v) recognize revenue when, or as, the entity satisfies a performance obligation. The new standard also requires additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. In August 2015, the FASB approved a one-year deferral to January 1, 2018. The Company adopted the standard on January 1, 2018 using the modified retrospective transition method. Refer to Note 3 for further details.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (a consensus of the FASB Emerging Issues Task Force). The amendments in this Update require that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Accordingly, restricted cash will be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the Consolidated Statement of Cash Flows. The Company adopted ASU 2016-18 beginning on January 1, 2018 and adopted the standard using a retrospective approach.

The following table provides a reconciliation of cash, cash equivalents, and restricted cash reported within the Consolidated Balance Sheet that sum to the total of the same such amounts shown in the Consolidated Statements of Cash Flows:

	September 30, 2018	September 30, 2017
Cash and cash equivalents	\$ 4,198	\$ 6,130
Restricted cash included in current assets	6,520	1,020
Restricted cash included in long-term assets	—	5,000
Total cash, cash equivalents, and restricted cash shown in the Consolidated Statements of Cash Flows	\$ 10,718	\$ 12,150

Recently Issued Accounting Pronouncements

ASU 2016-02 "Leases (Topic 842)"

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The amendments in this Update increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The liability recorded for a lease is meant to recognize the lease payments and the asset as a right to use the underlying asset for the lease, including optional periods if it reasonably certain the option will be exercised. Recording of the liability should be based on the present value of the lease payments. If a lease term is less than twelve months, a company is allowed to elect not to record the asset and liability. Expense related to these leases are to be amortized on a straight-line basis over the expected term of the lease. Additionally, the provisions of Topic 842 provide additional guidance on separating lease terms from maintenance and other type of provisions that provide a good or service, accounting for sale-leaseback provisions, and leveraged leases. Reporting in the cash flow statement remains virtually unchanged. Additional qualitative and quantitative disclosures are required.

In July 2018, the FASB issued ASU 2018-11 "Leases (Topic 842) Targeted Improvements." This amendment allows companies to elect to record a cumulative effect adjustment to beginning retained earnings on the date of adoption. We expect to elect the provisions of ASU 2018-11 as of the date of adoption on January 1, 2019.

ASU 2016-02 will be effective for the Company beginning on January 1, 2019. The Company is in the initial stages of evaluating the impact of the new standard on the accounting policies, processes, and system requirements. We have begun the process of reviewing existing agreements and are evaluating the impact of this ASU on our financial statements. We expect certain operating leases to be recognized as assets and liabilities as a result of adopting the standard. The Company continues to assess the potential impacts of the new standard and anticipates this standard will have a material impact on the consolidated financial statements. The Company cannot reasonably estimate quantitative information related to the impact of the new standard on the financial statements at this time.

ASU 2017-04 "Intangibles - Goodwill and Other (Topic 350)"

In January 2017, the FASB issued ASU 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This ASU is meant to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. ASU 2017-04 is effective for fiscal years beginning after December 15, 2019, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company expects to early adopt ASU 2017-04 on October 1, 2018 for the annual goodwill impairment test completed during the fourth quarter which will simplify the test by comparing the implied fair value of the reporting unit's goodwill with the carrying amount of goodwill and eliminating Step 2. The Company does not expect this guidance to have a material impact on our financial statements.

3. Revenue

Adoption of ASC 606, "Revenue from Contracts with Customers"

On January 1, 2018, we adopted ASC 606 using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606, while prior period amounts are not adjusted and continue to be reported in accordance with our legacy accounting under Accounting Standards Codification Topic 605: Revenue Recognition (ASC 605).

The cumulative effect of the changes made to our January 1, 2018 consolidated balance sheet for the adoption of ASC 606 were as follows:

	Balance at December 31, 2017	Adjustments Upon Adoption of ASC 606	Balance at January 1, 2018
Liabilities			
Other accrued liabilities	\$ 5,098	(205)	\$ 4,893
Equity			
Accumulated deficit	(102,503)	205	(102,298)

The adjustment made to the January 1, 2018 consolidated balance sheet related to deferred revenue under ASC 605 for the license of standalone functional intellectual property to a customer in one of our foreign locations which is recognized at a point in time upon adoption of ASC 606.

Practical Expedients and Exemptions

We generally expense sales commissions on a ratable basis when incurred because the amortization period would have been one year or less. These costs are recorded within selling, general and administrative expenses within the Condensed Consolidated Statements of Operations.

Revenue Recognition

The Company recognizes revenue when control of the promised goods or services is transferred to our customers, in amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Fuel Tech's sales of products to customers represent single performance obligations, which are not impacted upon the adoption of ASC 606. The majority of our contracts have a single performance obligation as the promise to transfer the individual goods or services is not separately identifiable from other promises in the contracts and, therefore, not distinct. Revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods or providing services. Sales, value add, and other taxes we collect concurrent with revenue-producing activities are excluded from revenue.

FUEL CHEM

Revenues from the sale of chemical products are recognized when control transfers to customer upon shipment or delivery of the product based on the applicable shipping terms. We generally recognize revenue for these arrangements at a point in time based on our evaluation of when the customer obtains control of the promised goods or services.

Air Pollution Control Technology

Fuel Tech's APC contracts are typically six to eighteen months in length. A typical contract will have three or four critical operational measurements that, when achieved, serve as the basis for us to invoice the customer via progress billings. At a minimum, these measurements will include the generation of engineering drawings, the shipment of equipment and the completion of a system performance test.

As part of most of its contractual APC project agreements, Fuel Tech will agree to customer-specific acceptance criteria that relate to the operational performance of the system that is being sold. These criteria are determined based on modeling that is performed by Fuel Tech personnel, which is based on operational inputs that are provided by the customer. The customer will warrant that these operational inputs are accurate as they are specified in the binding contractual agreement. Further, the customer is solely responsible for the accuracy of the operating condition information; typically all performance guarantees and equipment warranties granted by us are voidable if the operating condition information is inaccurate or is not met.

Since control transfers over time, revenue is recognized based on the extent of progress towards completion of the single performance obligation. Fuel Tech uses the cost-to-cost input measure of progress for our contracts since it best depicts the transfer of assets to the customer which occurs as we incur costs on our contracts. Under the cost-to-cost input measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation. Revenues are recorded proportionally as costs are incurred. Costs to fulfill include all internal and external engineering costs, equipment charges, inbound and outbound freight expenses, internal and site transfer costs, installation charges, purchasing and receiving costs, inspection costs, warehousing costs, project personnel travel expenses and other direct and indirect expenses specifically identified as project- or product-line related, as appropriate (e.g. test equipment depreciation and certain insurance expenses).

Fuel Tech has installed over 1,000 units with APC technology and normally provides performance guarantees to our customers based on the operating conditions for the project. As part of the project implementation process, we perform system start-up and optimization services that effectively serve as a test of actual project performance. We believe that this test, combined with the accuracy of the modeling that is performed, enables revenue to be recognized prior to the receipt of formal customer acceptance.

Disaggregated Revenue by Product Technology

The following table presents our revenues disaggregated by product technology:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017 (1)	
Air Pollution Control				
Technology solutions	\$ 10,202	\$ 7,365	\$ 25,516	\$ 15,466
Spare parts	334	312	863	848
Ancillary revenue	346	1,122	1,493	2,032
Total Air Pollution Control Technology revenues	10,882	8,799	27,872	18,346
FUEL CHEM				
FUEL CHEM technology solutions	5,188	4,749	12,836	13,434
Total Revenues	\$ 16,070	\$ 13,548	\$ 40,708	\$ 31,780

(1) As noted above, prior period amounts have not been adjusted under the modified retrospective method.

Disaggregated Revenue by Geography

The following table presents our revenues disaggregated by geography, based on the billing addresses of our customers:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017 (1)	
United States	\$ 11,629	\$ 8,888	\$ 30,701	\$ 21,537
Foreign Revenues				
South America	278	35	904	260
Europe	1,907	2,532	4,935	4,513
Asia	2,256	2,093	4,168	5,470
Total Foreign Revenues	4,441	4,660	10,007	10,243
Total Revenues	\$ 16,070	\$ 13,548	\$ 40,708	\$ 31,780

(1) As noted above, prior period amounts have not been adjusted under the modified retrospective method.

Timing of Revenue Recognition

The following table presents the timing of our revenue recognition:

	Three Months		Nine Months	
	Ended		Ended	
	September		September	
	30,		30,	
	2018	2017	2018	2017
		(1)		(1)
Products transferred at a point in time	5,868	6,183	15,192	16,314
Products and services transferred over time	10,202	7,365	25,516	15,466
Total Revenues	16,070	13,548	40,708	31,780

(1) As noted above, prior period amounts have not been adjusted under the modified retrospective method.

Contract Balances

The timing of revenue recognition, billings and cash collections results in billed accounts receivable, unbilled receivables (contract assets), and customer advances and deposits (contract liabilities) on the consolidated balance sheets. In our Air Pollution Control Technology segment, amounts are billed as work progresses in accordance with agreed-upon contractual terms. Generally, billing occurs subsequent to revenue recognition, resulting in contract assets. These assets are reported on the consolidated balance sheet on a contract-by-contract basis at the end of each reporting period. At September 30, 2018 and December 31, 2017, contract assets were approximately \$11,146 and \$7,894, respectively, and are included in accounts receivable on the consolidated balance sheets.

However, the Company will periodically bill in advance of costs incurred before revenue is recognized, resulting in contract liabilities. These liabilities are reported on the consolidated balance sheet on a contract-by-contract basis at the end of each reporting period. Contract liabilities were \$1,208 and \$2,403, at September 30, 2018 and December 31, 2017, respectively, and are included in other accrued liabilities on the consolidated balance sheets.

Changes in the contract asset and liability balances during the nine month period ended September 30, 2018, were not materially impacted by any other items other than amounts billed and revenue recognized as described previously. During the three and nine months ended September 30, 2018, revenue recognized that was included in the contract liability balance at the beginning of the period was \$7 and \$2,165, respectively, which represented primarily revenue from progress towards completion of our Air Pollution Control technology contracts. During the three and nine months ended September 30, 2017, revenue recognized that was included in the contract liability balance at the beginning of the period was \$243 and \$1,472, respectively, which represented primarily revenue from progress towards completion of our Air Pollution Control technology contracts.

As of September 30, 2018, we had six construction contracts in progress that were identified as loss contracts and a provision for losses of \$159 was recorded in other accrued liabilities on the consolidated balance sheet. As of December 31, 2017, we had four construction contracts in progress that were identified as loss contracts and a provision for losses in the amount of \$117 was recorded in other accrued liabilities on the consolidated balance sheet.

Remaining Performance Obligations

Remaining performance obligations, represents the transaction price of Air Pollution Control technology booked orders for which work has not been performed. As of September 30, 2018, the aggregate amount of the transaction price allocated to remaining performance obligations was \$21,299. The Company expects to recognize revenue on approximately \$19,536 of the remaining performance obligations over the next 12 months with the remaining recognized thereafter.

4. Discontinued Operations

During the second quarter of 2017, the Company suspended all operations associated with the Fuel Conversion business segment. The components of the net assets of the Fuel Conversion discontinued operations as of September 30, 2018 and December 31, 2017 are Assets held for sale on the Consolidated Balance Sheets totaling \$485 which consists primarily of certain equipment. The resulting amount in assets held for sale was determined using management's assumptions based on a plan of sale and we may not be able to realize as much value from the sale of the assets as we expect. In addition, accrued severance of \$95 and \$376 is included in the other accrued liabilities line of the Consolidated Balance Sheets as of September 30, 2018 and December 31, 2017, respectively. The Fuel Conversion business segment had no other assets or liabilities associated with it.

The activity of the Fuel Conversion discontinued operations consisted of Research and Development, severance and other costs for the three- and nine-month periods ended September 30, 2018 of \$10 and \$109, respectively, and for the same periods in 2017 of \$239 and \$2,238, respectively. The loss from discontinued operations in the Consolidated Statement of Operations for the

nine-months ended September 30, 2018 includes an impairment charge related to the Carbonite patent assets of \$56 as a result of not being able to reach an agreement with a third-party to acquire or license the Carbonite technology in combination with the sale of certain equipment included in Assets held for sale. The Company intends to sell the certain equipment in Assets held for sale on a standalone basis. The Fuel Conversion business segment had no revenues associated with it.

As of the date the operations were suspended, the Company incurred \$581 of severance costs related to the suspension of the Fuel Conversion business segment, of which \$311 (\$93 and \$281 was paid for the three- and nine-months ended September 30, 2018) will be paid in 2018 and \$65 will be paid in 2019. The Company expects to incur storage fees and other disposal costs associated with certain property, plant and equipment and contractual termination payments or other miscellaneous expenses but an estimated amount or range of amounts has not yet been determined.

5. Restructuring Activities

The Company recorded no restructuring charge for the three and nine months ended September 30, 2018 and \$0 and \$119 for three and nine months ended September 30, 2017, respectively, in connection with a workforce reduction. The charge consisted primarily of one-time severance payments and benefit continuation costs. The following is a reconciliation of the accrual for the workforce reduction that is included within the "Accrued Liabilities - Employee Compensation" line of the consolidated balance sheets for the three and nine months ending September 30, 2018 and 2017:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2017	
	2018	2017	2018	2017
Restructuring liability at beginning of period	\$188	\$552	\$391	\$309
Amounts expensed	—	—	—	119
Amounts expensed - discontinued operations	—	—	—	396
Amounts paid	(93)	(309)	(296)	(581)
Restructuring liability at end of period	\$95	\$243	\$95	\$243

6. Accumulated Other Comprehensive Loss

The changes in accumulated other comprehensive loss by component were as follows:

	Three months ended September 30, 2018		Nine months ended September 30, 2017	
	2018	2017	2018	2017
Foreign currency translation				
Balance at beginning of period	\$(950)	\$(1,078)	\$(772)	\$(1,574)
Other comprehensive loss:				
Foreign currency translation adjustments (1)	(263)	190	(441)	686
Balance at end of period	\$(1,213)	\$(888)	\$(1,213)	\$(888)
Available-for-sale marketable securities				
Balance at beginning of period	\$1	\$7	\$4	\$6
Other comprehensive income:				
Net unrealized holding loss (2)	—	(2)	(3)	(1)
Balance at end of period	\$1	\$5	\$1	\$5
Total accumulated other comprehensive loss	\$(1,212)	\$(883)	\$(1,212)	\$(883)

- (1) In all periods presented, there were no tax impacts related to rate changes and no amounts were reclassified to earnings.
- (2) In all periods presented, there were no realized holding gains or losses and therefore no amounts were reclassified to earnings.

7. Treasury Stock

Common stock held in treasury totaled 655,306 and 644,091 with a cost of \$1,484 and \$1,472 at September 30, 2018 and December 31, 2017, respectively. These shares were withheld from employees to settle personal tax withholding obligations that arose as a result of restricted stock units that vested in the periods presented.

8. Earnings per Share

Basic earnings per share excludes the dilutive effects of stock options, restricted stock units (RSUs), and the nil coupon non-redeemable convertible unsecured loan notes. Diluted earnings per share includes the dilutive effect of the nil coupon non-redeemable convertible unsecured loan notes, RSUs, and unexercised in-the-money stock options, except in periods of net loss where the effect of these instruments is anti-dilutive. Out-of-the-money stock options are excluded from diluted earnings per share because they are anti-dilutive. For the nine months ended September 30, 2018 and 2017, basic earnings per share is equal to diluted earnings per share because all outstanding stock awards and convertible loan notes are considered anti-dilutive during periods of net loss. The following table sets forth the weighted-average shares used in calculating the earnings per share for the months ended September 30, 2018 and 2017.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2018	2017	2018	2017
Basic weighted-average shares	24,171,000	24,133,000	24,162,000	23,784,000
Conversion of unsecured loan notes	—	—	—	—
Unexercised options and unvested RSUs	417,000	—	—	—
Diluted weighted-average shares	24,588,000	24,133,000	24,162,000	23,784,000

Fuel Tech had 1,286,000 and 976,000 weighted average equity awards outstanding at September 30, 2018 and 2017, respectively, that were not dilutive for the purposes of inclusion in the calculation of diluted earnings per share but could potentially become dilutive in future periods.

9. Stock-Based Compensation

Under our stock-based employee compensation plan, referred to as the Fuel Tech, Inc. 2014 Long-Term Incentive Plan (Incentive Plan), awards may be granted to participants in the form of Non-Qualified Stock Options, Incentive Stock Options, Stock Appreciation Rights, Restricted Stock, Restricted Stock Units (“RSUs”), Performance Awards, Bonuses or other forms of share-based or non-share-based awards or combinations thereof. Participants in the Incentive Plan may be our directors, officers, employees, consultants or advisors (except consultants or advisors in capital-raising transactions) as the directors determine are key to the success of our business. There are a maximum of 5,600,676 shares that may be issued or reserved for awards to participants under the Incentive Plan, which includes 1,200,000 additional shares as a result of an amendment to the Incentive Plan approved by our stockholders in May 2018. As of September 30, 2018, Fuel Tech had 2,117,233 shares available for share-based awards under the 2014 Plan.

We record any excess tax benefits within income tax expense for the three and nine months ended September 30, 2018. Given the Company has a full valuation allowance on its deferred tax assets, there were no excess tax benefits to record for the three and nine months ended September 30, 2018. In addition, we account for forfeitures of awards based on an estimate of the number of awards expected to be forfeited and adjusting the estimate when it is no longer probable that the employee will fulfill the service condition.

Stock-based compensation is included in selling, general, and administrative costs in our Consolidated Statements of Operations. The components of stock-based compensation for the three and nine months ended September 30, 2018 and 2017 were as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2018	2017	2018	2017
Stock options and restricted stock units, net of forfeited	\$ 97	\$ 51	\$ 135	\$ 1,207

Edgar Filing: FUEL TECH, INC. - Form 10-Q

Tax benefit of stock-based compensation expense	—	—	—	—
After-tax effect of stock-based compensation	\$ 97	\$ 51	\$ 135	\$ 1,207

Stock Options

Stock options granted to employees under the Incentive Plans have a 10-year life and they vest as follows: 50% after the second anniversary of the award date, 25% after the third anniversary, and the final 25% after the fourth anniversary of the award date. Fuel Tech calculates stock compensation expense for employee option awards based on the grant date fair value of the award, less expected annual forfeitures, and recognizes expense on a straight-line basis over the four-year service period of the award. Stock options granted to members of our board of directors vest immediately. Stock compensation for these awards is based on the grant date fair value of the award and is recognized in expense immediately.

Fuel Tech uses the Black-Scholes option pricing model to estimate the grant date fair value of employee stock options. The principal variable assumptions utilized in valuing options and the methodology for estimating such model inputs include: (1) risk-free interest rate – an estimate based on the yield of zero-coupon treasury securities with a maturity equal to the expected life of the option; (2) expected volatility – an estimate based on the historical volatility of Fuel Tech's Common Stock for a period equal to the expected life of the option; and (3) expected life of the option – an estimate based on historical experience including the effect of employee terminations.

Stock option activity for Fuel Tech's Incentive Plans for the nine months ended September 30, 2018 was as follows:

	Number of Options	Weighted- Average Exercise Price	Weighted- Remaining Contractual Term	Average Aggregate Intrinsic Value
Outstanding on January 1, 2018	1,116,750	\$ 6.34		
Granted	—			
Exercised	—			
Expired or forfeited	(167,750)	\$ 15.19		
Outstanding on September 30, 2018	949,000	\$ 4.78	4.84	\$ 58,960
Exercisable on September 30, 2018	949,000	\$ 4.78	4.84	\$ 58,960

As of September 30, 2018, there was no unrecognized compensation cost related to non-vested stock options granted under the Incentive Plans.

Restricted Stock Units

Restricted stock units (RSUs) granted to employees vest over time based on continued service (typically vesting over a period between two and four years). Such time-vested RSUs are valued at the date of grant using the intrinsic value method based on the closing price of the Common Shares on the grant date. Compensation cost, adjusted for estimated forfeitures, is amortized on a straight-line basis over the requisite service period.

At September 30, 2018, there is \$9 of unrecognized compensation costs related to performance based restricted stock unit awards to be recognized over a weighted average period of 0.4 years.

A summary of restricted stock unit activity for the nine months ended September 30, 2018 is as follows:

	Shares	Weighted Average Grant Date Fair Value
Unvested restricted stock units at January 1, 2018	1,359,162	\$ 1.28
Granted	—	—
Forfeited	(199,995)	\$ 1.59
Vested	(48,890)	\$ 1.59
Unvested restricted stock units at September 30, 2018	1,110,277	\$ 1.21

The fair value of restricted stock that vested during the nine month period ending September 30, 2018 was \$55.

Deferred Directors Fees

In addition to the Incentive Plans, Fuel Tech has a Deferred Compensation Plans for Directors (Deferred Plan). Under the terms of the Deferred Plan, Directors can elect to defer Directors' fees for shares of Fuel Tech Common Stock that are issuable at a future date as defined in the agreement. In accordance with ASC 718, Fuel Tech accounts for these awards as equity awards as opposed to liability awards. In the nine-month periods ended September 30, 2018 and 2017, Fuel Tech recorded no stock-based compensation expense under the Deferred Plan.

10. Debt Financing

On June 16, 2017, the Company amended its existing U.S. Domestic credit facility with JPM Chase to extend the maturity date to June 28, 2019. There are no financial covenants set forth in this amendment to the Facility. The amount of credit available to the Company under the Facility is \$5,000 and will remain as such until the Maturity Date of the Facility on June 28, 2019. During the entire period of the Facility the Company must maintain sufficient cash balances in a segregated deposit account equal to the amount of the Facility and has fully pledged such cash as collateral to the bank to support the credit available to the Company under the Facility. As of September 30, 2018 and December 31, 2017, there were no outstanding borrowings on the credit facility.

On January 10, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment to August 31, 2018. On September 17, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment to December 31, 2018. On October 19, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment through the maturity date of June 28, 2019. The Company must maintain an additional \$500 in a segregated deposit account and has fully pledged such incremental cash as collateral to the bank to support the credit available to the Company through the maturity date of June 28, 2019. There were no other modifications to the terms of the Facility from the amendment of the facility on June 16, 2017.

At September 30, 2018 and December 31, 2017, the Company had outstanding standby letters of credit and bank guarantees totaling approximately \$5,053 and \$3,004, respectively, under the Facility in connection with contracts in process. Fuel Tech is committed to reimbursing the issuing bank for any payments made by the bank under these instruments. The Company pays a commitment fee of 0.25% per year on the unused portion of the revolving credit facility. At September 30, 2018 and December 31, 2017, approximately \$447 and \$1,996 was available for future borrowings under the Facility.

On June 29, 2018, Beijing Fuel Tech Environmental Technologies Company, Ltd. (Beijing Fuel Tech), a wholly-owned subsidiary of Fuel Tech, entered into a new revolving credit facility (the China Facility) agreement with JPM Chase for RMB 5.25 million (approximately \$765), which expires on June 30, 2019. The current facility for Beijing Fuel Tech is also secured by cash held by the Company of \$1,020 in a separate restricted use designated JPM Chase deposit account. The Company intends to renew the China Facility at its maturity. The facility is unsecured, bears interest at a rate of 140% of the People's Bank of China (PBOC) Base Rate, and is guaranteed by Fuel Tech. Beijing Fuel Tech can use this facility for cash advances and bank guarantees. As of September 30, 2018 and December 31, 2017, Beijing Fuel Tech had no cash borrowings under the China Facility.

On October 19, 2018, Beijing Fuel Tech amended its existing revolving credit facility (the China Facility) agreement with JPM Chase to reduce the credit available to RMB 2.625 million (approximately \$383), which expires on June 30, 2019. The facility for Beijing Fuel Tech is also secured by cash held by the Company of \$520 in a separate restricted use designated JPM Chase deposit account.

At September 30, 2018 and December 31, 2017, the Company had outstanding standby letters of credit and bank guarantees totaling approximately \$0 and \$246, respectively, on its Beijing Fuel Tech revolving credit facility in connection with contracts in process. At September 30, 2018 and December 31, 2017, approximately \$765 and \$753 was available for future borrowings.

In the event of default on either the domestic facility or the China facility, the cross default feature in each allows the lending bank to accelerate the payments of any amounts outstanding and may, under certain circumstances, allow the bank to cancel the facility. If the Company were unable to obtain a waiver for a breach of covenant and the bank accelerated the payment of any outstanding amounts, such acceleration may cause the Company's cash position to deteriorate or, if cash on hand were insufficient to satisfy the payment due, may require the Company to obtain alternate financing to satisfy the accelerated payment.

11. Business Segment and Geographic Financial Data

Business Segment Financial Data

We segregate our financial results into two reportable segments representing two broad technology segments as follows:

The Air Pollution Control technology segment includes technologies to reduce NO_x emissions in flue gas from boilers, incinerators, furnaces and other stationary combustion sources. These include Low and Ultra Low NO_x Burners (LNB and ULNB), Over-Fire Air (OFA) systems, NO_xOUT[®] and HERT[™] Selective Non-Catalytic Reduction (SNCR) systems, and Advanced Selective Catalytic Reduction (ASCR)[™] systems. Our ASCR systems include ULNB, OFA, and SNCR components, along with a downsized SCR catalyst, Ammonia Injection Grid (AIG), and Graduated Straightening Grid GSG[™] systems to provide high NO_x reductions at significantly lower capital and operating costs than conventional SCR systems. The NO_xOUT CASCADE[®] and NO_xOUT-SCR[®] processes are more basic, using just SNCR and SCR catalyst components. ULTRA[™] technology creates ammonia at a plant site using

safe urea for use with any SCR application. Flue Gas Conditioning systems are chemical injection systems offered in markets outside the U.S. and Canada to enhance electrostatic precipitator and fabric filter performance in controlling particulate emissions.

The FUEL CHEM® technology segment, which uses chemical processes in combination with advanced CFD and CKM boiler modeling, for the control of slagging, fouling, corrosion, opacity and other sulfur trioxide-related issues in furnaces and boilers through the addition of chemicals into the furnace using TIFI® Targeted In-Furnace Injection™ technology.

The “Other” classification includes those profit and loss items not allocated to either reportable segment. There are no inter-segment sales that require elimination.

We evaluate performance and allocate resources based on reviewing gross margin by reportable segment. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies (Note 1 in our annual report on Form 10-K). We do not review assets by reportable segment, but rather, in aggregate for the Company as a whole.

Information about reporting segment net sales and gross margin from continuing operations are provided below:

Three months ended September 30, 2018	Air Pollution Control Segment	FUEL CHEM Segment	Other	Total
Revenues from external customers	\$ 10,882	\$ 5,188	\$—	\$16,070

	\$ 50,680	\$ 50,484		

12. Contingencies

Fuel Tech is subject to various claims and contingencies related to, among other things, workers compensation, general liability (including product liability), and lawsuits. The Company records liabilities where a contingent loss is probable and can be reasonably estimated. If the reasonable estimate of a probable loss is a range, the Company records the most probable estimate of the loss or the minimum amount when no amount within the range is a better estimate than any other amount. The Company discloses a contingent liability even if the liability is not probable or the amount is not estimable, or both, if there is a reasonable possibility that a material loss may have been incurred. During the fourth quarter of 2017, the Company was notified that, on a project for which the Company served as a subcontractor to a prime contractor, the prime contractor had received notice from the end-user customer in China of its intent to deduct from final payment for the project liquidated damages in the amount of approximately \$920 due to delays in project completion. Thus far, the prime contractor is working to resolve this matter without resorting to litigation. Nevertheless, the matter is in the preliminary stage and we cannot predict the ultimate outcome of this claim or estimate a range of possible losses related to this matter at this time. We intend to pursue all of our rights should the current negotiations not result in a satisfactory resolution of this matter.

Fuel Tech issues a standard product warranty with the sale of its products to customers. Our recognition of warranty liability is based primarily on analyses of warranty claims experienced in the preceding years as the nature of our historical product sales for which we offer a warranty are substantially unchanged. This approach provides an aggregate warranty accrual that is historically aligned with actual warranty claims experienced.

There was no change in the warranty liability balance during the nine-months ended September 30, 2018 and 2017. The warranty liability balance was \$159 at September 30, 2018 and 2017.

13. Income Taxes

The Company's effective tax rate is 0% for the three-month and nine-month periods ended September 30, 2018 and 2017, respectively. Effective January 1, 2018, the U.S. federal corporate income tax rate was reduced from 35 percent to 21 percent attributed to the impact of the 2017 Tax Cuts and Jobs Act enacted into law on December 22, 2017. The Company's effective tax rate differs from the statutory federal tax rate of 21% for the three-month and nine-month periods ended September 30, 2018 primarily due to a full valuation allowance recorded on our United States, China and Italy deferred tax assets since we cannot anticipate when or if we will have sufficient taxable income to utilize the deferred tax assets in the future. Further, our effective tax rate differs from the statutory federal tax rate due to state taxes, differences between U.S. and foreign tax rates, foreign losses incurred with no related tax benefit, non-deductible commissions, and non-deductible meals and entertainment expenses for the three-month and nine-month periods ended September 30, 2018 and 2017.

Fuel Tech had no unrecognized tax benefits as of September 30, 2018 and December 31, 2017.

14. Goodwill and Other Intangibles

Goodwill is allocated among and evaluated for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment. Fuel Tech has two reporting units for goodwill evaluation purposes: the FUEL CHEM® technology segment and the APC technology segment. There is no goodwill associated with our APC segment. At both September 30, 2018 and December 31, 2017, our entire goodwill balance of \$2,116 was allocated to the FUEL CHEM® technology segment.

Goodwill is allocated to each of our reporting units after considering the nature of the net assets giving rise to the goodwill and how each reporting unit would enjoy the benefits and synergies of the net assets acquired. There were no indications of goodwill impairment in the nine months ended September 30, 2018 and 2017.

Fuel Tech reviews other intangible assets, which include customer lists and relationships, covenants not to compete, patent assets, tradenames, and acquired technologies, for impairment on a recurring basis or when events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. In the event that impairment indicators exist, a further analysis is performed and if the sum of the expected undiscounted future cash flows resulting from the use of the asset is less than the carrying amount of the asset, an impairment loss equal to the excess of the asset's carrying value over its fair value is recorded. Management considers historical experience and all available information at the time the estimates of future cash flows are made, however, the actual cash values that could be realized may differ from those that are estimated.

In the second quarter of 2018, Fuel Tech recorded an abandonment charge of \$317 associated with certain international patent assets which the Company elected to not maintain and abandon in certain international locations due to limited business opportunities in those regions. The abandonment charge was calculated by determining the net book values of the abandoned patent assets by deducting the accumulated amortization from the acquisition cost. The abandonment charge of \$317 is included in "Intangible assets abandonment and building impairment" line in the accompanying Consolidated Statements of Operations for the nine months ended September 30, 2018.

There were no other indications of intangible asset impairments for the nine month period ended September 30, 2018.

FUEL TECH, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations

Revenues for the three and nine month periods ending September 30, 2018 and 2017 were \$16,070 and \$13,548 and \$40,708 and \$31,780, respectively, representing increases of \$2,522 or 19% and \$8,928 or 28% versus the same periods last year.

The Air Pollution Control (APC) technology segment generated revenues of \$10,882 and \$27,872 for the three and nine month periods ending September 30, 2018, representing an increase of \$2,083 or 24% and \$9,526 or 52% from the prior year amounts of \$8,799 and \$18,346, respectively. The increase in APC revenue for the three and nine month periods ending September 30, 2018 in comparison to the same periods prior year amounts were related to the timing

of project execution as a result of conversion of new orders announced during 2017.

Consolidated APC backlog at September 30, 2018 was \$21,299 versus backlog at December 31, 2017 of 22,053. Our current backlog consists of U.S. domestic projects totaling \$18,875 and international projects totaling \$2,424.

The FUEL CHEM® technology segment generated revenues of \$5,188 and \$12,836 for the three and nine months ended September 30, 2018. For the three and nine periods, this represents a decrease of \$439 or 9% and \$598 or 4% from the prior year amounts of \$4,749 and \$13,434, respectively. This segment continues to be affected by the soft electric demand market and low natural gas prices, which leads to fuel switching, unscheduled outages, and combustion units operating at less than capacity.

Consolidated gross margin percentage for the three month periods ended September 30, 2018 and 2017 was 34% and 37% and was 35% and 39% for the nine month periods then ended. The overall decrease in gross margin is primarily attributable to business segment revenue mix. The gross margin percentage for the APC technology segment for the three month periods ended September 30, 2018 and 2017 was 25% and 30%, respectively, and remained consistent at 28% for both nine month periods ended September 30, 2018 and 2017. The decrease in gross margin is primarily due to project mix, timing of project execution and margin erosion on lower-margin projects being executed in foreign geographies, which will not recur. For the FUEL CHEM technology segment, the gross margin percentage remained consistent at 51% for the three month periods ending September 30, 2018 and 2017. For the nine month periods, the gross margin percentage for the FUEL CHEM technology segment was 49% and 51% for the nine month periods ending September 30, 2018 and 2017. The gross margin decrease for the FUEL CHEM technology segment was due to costs incurred due to certain international product demonstration costs incurred for the nine months ended September 30, 2018.

Selling, general and administrative expenses (SG&A) were \$4,105 and \$4,968 for the three month periods ended September 30, 2018 and 2017 and \$13,789 and \$16,045 for nine month periods ending September 30, 2018 and 2017, respectively. For the three and nine month periods ended September 30, 2018, this represents a decrease of \$863 and \$2,256. For the three month period ended September 30, 2018 the decrease was primarily the result of a reduction in administrative costs relating to foreign subsidiaries of \$494, professional fees and consulting services of \$314, and employee related costs and other administrative expenses of \$55. For the nine month period ended September 30, 2018 this was primarily the result of a decrease in employee related costs of \$1,383, administrative costs relating to foreign subsidiaries of \$467, travel, technical conferences and depreciation of \$252 and other administrative costs of \$46. SG&A as a percentage of revenues decreased to 26% from 37% and 34% from 50% in the three and nine month periods ending September 30, 2018 and 2017. The decrease in SG&A percentage is primarily attributed to the increase in revenues due to the timing of project execution as a result of conversion of new orders announced during 2017.

In the second quarter of 2018, Fuel Tech recorded an abandonment charge of \$317 associated with certain international patent assets which the Company elected to not maintain and abandon in certain international locations due to limited business opportunities in those regions. The abandonment charge was calculated by determining the net book values of the abandoned patent assets by deducting the accumulated amortization from the acquisition cost. The abandonment charge of \$317 is included in "Intangible assets abandonment and building impairment" line in the accompanying Consolidated Statements of Operations for the nine months ended September 30, 2018.

During the second quarter of 2017, the Company suspended all operations associated with the Fuel Conversion business segment. The activity of the Fuel Conversion discontinued operations consisted of Research and Development, severance and other costs for the three and nine month periods ended September 30, 2018 and 2017 of \$10 and \$239, and \$109 and \$2,238, respectively. The loss from discontinued operations in the Consolidated Statement of Operations for the nine months ended September 30, 2018 includes an impairment charge related to the Carbonite patent assets of \$56 as a result of not being able to reach an agreement with a third-party to acquire or license the Carbonite technology in combination with the sale of certain equipment included in Assets held for sale. The Fuel Conversion business segment had no revenues associated with it. The overall decline in the discontinued operations for the three and nine month periods ending September 30, 2018 in comparison to the same periods in 2017 is due to the overall wind-down of operations for the Fuel Conversion discontinued operations.

In July 2016, the Company reduced its workforce to better align its organizational infrastructure to its revised operating plans. The Company recorded no restructuring charge for the three and nine months ended September 30, 2018. The Company recorded a charge of \$0 and \$119 for the three and nine month periods ended September 30, 2017, respectively in connection with the workforce reduction. The charge consisted primarily of one-time severance payments and benefit continuation costs. For further information related to restructuring, refer to Note 5 - Restructuring Activities.

Research and development expenses for the three and nine month periods ended September 30, 2018 were \$265 and \$814, respectively, and for the same periods in 2017 were \$216 and \$780, respectively. The expenditures in our research and development expenses were focused on new product development efforts in the pursuit of commercial applications for technologies outside of our traditional markets, and in the development and analysis of new technologies that could represent incremental market opportunities. This includes water treatment technologies that include DGI™ Dissolved Gas Infusion Systems, an innovative alternative to current aeration technology. This infusion process has a variety of applications in the water and waste water industries, including remediation, treatment, biological activity and wastewater odor management. DGI technology benefits include reduced energy consumption, installation costs, and operating costs, while improving treatment performance.

Income tax (benefit) expense for the three and nine month period ended September 30, 2018 and 2017 were \$0 and \$(5), and \$(2) and \$10, respectively. Effective January 1, 2018, the U.S. federal corporate income tax rate was reduced from 35 percent to 21 percent attributed to the impact of the 2017 Tax Cuts and Jobs Act enacted into law on December 22, 2017. The Company is projecting a consolidated effective tax rate of 0% for 2018 which was lower than the federal income tax rate of 21%. The Company's effective tax rate differs from the statutory federal tax rate of 21% for the three months ended September 30, 2018 primarily due to a full valuation allowance recorded on our United States, China and Italy deferred tax assets since we cannot anticipate when or if we will have sufficient taxable income to utilize the deferred tax assets in the future. Further, our effective tax rate differs from the statutory federal tax rate due to state taxes, differences between U.S. and foreign tax rates, foreign losses incurred with no related tax benefit, non-deductible commissions, and non-deductible meals and entertainment expenses.

On January 1, 2018, we adopted ASC 606 "Revenue from Contracts with Customers" using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606, while prior period amounts are not adjusted and continue to be reported in accordance with our legacy accounting under Accounting Standards Codification Topic 605: Revenue Recognition (ASC 605). Refer to Footnote 3 to the Consolidated Financial Statements for the impact of the adoption of ASC 606.

Liquidity and Sources of Capital

At September 30, 2018, Fuel Tech had unrestricted cash and cash equivalents and short-term investments on hand of \$4,198 (excluding restricted cash of \$6,520) and working capital of \$23,234 versus \$8,366 (excluding restricted cash of \$6,020) and \$18,025 at December 31, 2017, respectively.

Operating activities used cash of \$2,664 during the nine month period ended September 30, 2018. This decrease in cash from operations was due to our net loss of \$924, a decrease in our accrued liabilities and other non-current liabilities of \$1,378, offset by cash provided by a increase in prepaid and other assets of \$1,840, an increase in accounts payable of \$3,896.

Investing activities used cash of \$391 during the nine month period ended September 30, 2018 and primarily related to net cash used for purchases of equipment and patents.

Financing activities used cash of \$12 during the nine month period ended September 30, 2018 all of which related to cash used for the acquisition of common shares held in treasury that were withheld for taxes due by employees upon vesting of restricted stock units.

On June 16, 2017, the Company amended its existing U.S. Domestic credit facility with JPM Chase to extend the maturity date to June 28, 2019. There are no financial covenants set forth in this amendment to the Facility. The amount of credit available to the Company under the Facility is \$5,000 and will remain as such until the Maturity Date of the Facility on June 28, 2019. During the entire period of the Facility the Company must maintain sufficient cash balances in a segregated deposit account equal to the amount of the Facility and has fully pledged such cash as collateral to the bank to support the credit available to the Company under the Facility. As of September 30, 2018 and December 31, 2017, there were no outstanding borrowings on the credit facility.

On January 10, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment to August 31, 2018. On September 17, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment to December 31, 2018. On October 19, 2018, the Company amended its existing U.S. Domestic credit facility with JPM Chase to increase the credit available under the Facility by \$500 to \$5,500 from the effective date of the amendment through the maturity date of June 28, 2019. The Company must maintain an additional \$500 in a segregated deposit account and has fully pledged such incremental cash as collateral to the bank to support the credit available to the Company through the maturity date of June 28, 2019. There were no other modifications to the terms of the Facility from the amendment of the facility on June 16, 2017.

At September 30, 2018 and December 31, 2017, the Company had outstanding standby letters of credit and bank guarantees totaling approximately \$5,053 and \$3,004, respectively, under the Facility in connection with contracts in process. Fuel Tech is committed to reimbursing the issuing bank for any payments made by the bank under these instruments. The Company pays a commitment fee of 0.25% per year on the unused portion of the revolving credit facility. At September 30, 2018 and December 31, 2017, approximately \$447 and \$1,996 was available for future borrowings under the Facility.

On June 29, 2018, Beijing Fuel Tech Environmental Technologies Company, Ltd. (Beijing Fuel Tech), a wholly-owned subsidiary of Fuel Tech, entered into a new revolving credit facility (the China Facility) agreement with JPM Chase for RMB 5.25 million (approximately \$765), which expires on June 30, 2019. The current facility for Beijing Fuel Tech is also secured by cash held by

the Company of \$1,020 in a separate restricted use designated JPM Chase deposit account. The Company intends to renew the China Facility at its maturity. The facility is unsecured, bears interest at a rate of 140% of the People's Bank of China (PBOC) Base Rate, and is guaranteed by Fuel Tech. Beijing Fuel Tech can use this facility for cash advances and bank guarantees. As of September 30, 2018 and December 31, 2017, Beijing Fuel Tech had no cash borrowings under the China Facility.

On October 19, 2018, Beijing Fuel Tech amended its existing revolving credit facility (the China Facility) agreement with JPM Chase to reduce the credit available to RMB 2.625 million (approximately \$383), which expires on June 30, 2019. The facility for Beijing Fuel Tech is also secured by cash held by the Company of \$520 in a separate restricted use designated JPM Chase deposit account.

At September 30, 2018 and December 31, 2017, the Company had outstanding standby letters of credit and bank guarantees totaling approximately \$0 and \$246, respectively, on its Beijing Fuel Tech revolving credit facility in connection with contracts in process. At September 30, 2018 and December 31, 2017, approximately \$765 and \$753 was available for future borrowings.

In the event of default on either the domestic facility or the China facility, the cross default feature in each allows the lending bank to accelerate the payments of any amounts outstanding and may, under certain circumstances, allow the bank to cancel the facility. If the Company were unable to obtain a waiver for a breach of covenant and the bank accelerated the payment of any outstanding amounts, such acceleration may cause the Company's cash position to deteriorate or, if cash on hand were insufficient to satisfy the payment due, may require the Company to obtain alternate financing to satisfy the accelerated payment.

We continue to monitor our liquidity needs and in response to our continued losses have taken measures to reduce expenses and restructure operations which we feel are necessary to ensure we maintain sufficient working capital and liquidity to operate the business and invest in our future.

We have sustained losses from continuing operations during the nine month period ended September 30, 2018 totaling \$815. Our cash used from continuing operations for this same period totaled \$2,330. We have taken measures to reduce our expense infrastructure, and over the past three years have eliminated approximately \$19 million in aggregate expense through headcount and other operating expense cutbacks. Our ability to operate our base businesses prospectively is based on our ability to secure new orders in the APC business and our ability to successfully execute existing APC projects in line with our internal budgets.

Our cash balance as of September 30, 2018 totaled \$10,718 (including restricted cash of \$6,520), and our working capital totaled \$23,234. We do not have any outstanding debt obligations other than our letters of credit, and our current credit agreement does not have any financial covenants as we have moved to a cash collateralized line of credit with our lender.

We have evaluated our ongoing business needs, and considered the cash requirements of our base business of Air Pollution Control and Fuel Chem, as well as our efforts to wind-up our Fuel Conversion business. This evaluation included consideration of the following: a) customer and revenue trends in our APC and Fuel Chem business segments, b) current operating structure and expenditure levels, and c) the costs of winding up our Fuel Conversion business and other research and development initiatives.

Based on this analysis, management believes that currently we have sufficient cash and working capital to operate our base APC and Fuel Chem businesses.

Contingencies and Contractual Obligations

Fuel Tech issues a standard product warranty with the sale of its products to customers as discussed in Note 12. There was no change in the warranty liability balance during the nine months ended September 30, 2018.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains "forward-looking statements," as defined in Section 21E of the Securities Exchange Act of 1934, as amended, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and reflect Fuel Tech's current expectations regarding future growth, results of

operations, cash flows, performance and business prospects, and opportunities, as well as assumptions made by, and information currently available to, our management. Fuel Tech has tried to identify forward-looking statements by using words such as “anticipate,” “believe,” “plan,” “expect,” “estimate,” “intend,” “will,” and similar expressions, but these words are not the exclusive means of identifying forward-looking statements. These statements are based on information currently available to Fuel Tech and are subject to various risks, uncertainties, and other factors, including, but not limited to, those discussed in Fuel Tech’s Annual Report on Form 10-K for the year ended December 31, 2017 in Item 1A under the caption “Risk Factors,” which could cause Fuel Tech’s actual growth, results of operations, financial condition, cash flows, performance and business prospects and opportunities to differ materially from those expressed in, or implied by, these statements. Fuel Tech undertakes no obligation to update such factors or to publicly announce the results

of any of the forward-looking statements contained herein to reflect future events, developments, or changed circumstances or for any other reason. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including those detailed in Fuel Tech's filings with the Securities and Exchange Commission.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Foreign Currency Risk Management

Fuel Tech's earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates. We do not enter into foreign currency forward contracts nor into foreign currency option contracts to manage this risk due to the immaterial nature of the transactions involved.

Fuel Tech is also exposed to changes in interest rates primarily due to its debt facilities (refer to Note 10 to the consolidated financial statements). A hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would not have a materially adverse effect on interest expense during the upcoming year ended December 31, 2018.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Fuel Tech maintains disclosure controls and procedures and internal controls designed to ensure (a) that information required to be disclosed in Fuel Tech's filings under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (b) that such information is accumulated and communicated to management, including the principal executive and financial officer, as appropriate to allow timely decisions regarding required disclosure. Fuel Tech's Chief Executive Officer and principal financial officer have evaluated the Company's disclosure controls and procedures, as defined in Rules 13a – 15(e) and 15d -15(e) of the Exchange Act, as of the end of the period covered by this report, and they have concluded that these controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are from time to time involved in litigation incidental to our business. We are not currently involved in any litigation in which we believe an adverse outcome would have a material effect on our business, financial conditions, results of operations, or prospects.

Item 1A. Risk Factors

The risk factors included in our Annual Report on Form 10-K for fiscal year ended December 31, 2017 have not materially changed.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

21

Item 6. Exhibits

a. Exhibits (all filed herewith)

- 10.1 Twelfth Amendment to Credit Agreement, dated as of September 17, 2018, by and among Fuel Tech, Inc., Fuel Tech, S.r.L. and JPMorgan Chase Bank, N.A.
- 10.2 Thirteenth Amendment to Credit Agreement, dated as of October 19, 2018, by and among Fuel Tech, Inc., Fuel Tech, S.r.L. and JPMorgan Chase Bank, N.A.
- 10.3 11th Amendment to Continuing Guaranty, dated as of October 19, 2018, between JPMorgan Chase Bank, N.A., JPMorgan Chase Bank (China) Company Limited and Fuel Tech, Inc.
- 31.1 Certification of CEO pursuant to Section 302 of Sarbanes-Oxley Act of 2002
- 31.2 Certification of principal financial officer pursuant to Section 302 of Sarbanes-Oxley Act of 2002
- 32 Certification of CEO and principal financial officer pursuant to Section 906 of Sarbanes-Oxley Act of 2002
