**DONEGAL GROUP INC. AND SUBSIDIARIES
(Unaudited)**

Notes to Consolidated Financial Statements

1- Organization

We were organized as an insurance holding company by Donegal Mutual Insurance Company (Donegal Mutual) on August 26, 1986. Our insurance subsidiaries, Atlantic States Insurance Company (Atlantic States), Southern Insurance Company of Virginia (Southern), Le Mars Insurance Company (Le Mars) and the Peninsula Insurance Group (Peninsula), which consists of Peninsula Indemnity Company and The Peninsula Insurance Company, write personal and commercial lines of property and casualty insurance exclusively through a network of independent insurance agents in certain Mid-Atlantic, Midwest and Southern states. The personal lines products consist primarily of homeowners and private passenger automobile policies. The commercial lines products consist primarily of commercial automobile, commercial multi-peril and workers compensation policies. Donegal Mutual and our insurance subsidiaries conduct business together as the Donegal Insurance Group. We also own approximately 48% of the outstanding stock of Donegal Financial Services Corporation (DFSC), a thrift holding company that owns Province Bank FSB. Donegal Mutual owns the remaining approximately 52% of the outstanding stock of DFSC.

At September 30, 2007, Donegal Mutual held approximately 42% of our outstanding Class A common stock and approximately 73% of our outstanding Class B common stock.

Atlantic States, our largest subsidiary, and Donegal Mutual have a pooling agreement under which both companies proportionately share their combined underwriting results, excluding certain reinsurance assumed by Donegal Mutual from our insurance subsidiaries. See Note 4 Reinsurance for more information regarding the pooling agreement.

On March 7, 2007, our board of directors authorized a share repurchase program, pursuant to which we may purchase up to 500,000 shares of our Class A common stock at market prices prevailing from time to time in the open market subject to the provisions of SEC Rule 10b-18 and in privately negotiated transactions. We purchased 32,000 and 165,727 shares of our Class A common stock under this program during the three and nine months ended September 30, 2007, respectively.

2- Basis of Presentation

Our financial information for the interim periods included herein is unaudited; however, such information reflects all adjustments, consisting only of normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of our financial position, results of operations and cash flows for the interim periods included herein. Our results of operations for the nine months ended September 30, 2007 are not necessarily indicative of our results of operations to be expected for the twelve months ending December 31, 2007.

These interim financial statements should be read in conjunction with the financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2006.

3- Earnings Per Share

We have two classes of common stock, which we refer to as Class A common stock and Class B common stock. Our Class A common stock is entitled to cash dividends that are at least 10% higher than those declared and paid on our Class B common stock. Accordingly, we use the two-class method for the computation of earnings per common share pursuant to Statement of Financial Accounting Standards No. 128, Earnings Per Share. The two-class method is an earnings allocation formula that determines earnings per share separately for each class of common stock based on dividends declared and an allocation of remaining undistributed earnings using a participation percentage reflecting the dividend rights of each class. A reconciliation of the numerators and denominators used in the basic and diluted per share computations is presented below for each class of stock:

Table of Contents

	(dollars in thousands, except per share data)			
	2007		2006	
	Class A	Class B	Class A	Class B

Diluted net income per share	\$ 0.45	\$ 0.41	\$ 0.39	\$ 0.36

	(dollars in thousands, except per share data)			
	2007		2006	
	Class A	Class B	Class A	Class B
For the Nine Months Ended September 30:				
Basic net income per share:				
Numerator:				
Allocation of net income	\$ 21,886	\$ 5,597	\$ 23,151	\$ 6,018
Denominator:				
Weighted-average shares outstanding	19,674,869	5,576,775	19,314,741	5,576,775
Basic net income per share	\$ 1.11	\$ 1.00	\$ 1.20	\$ 1.08
Diluted net income per share:				
Numerator:				
Allocation of net income	\$ 21,886	\$ 5,597	\$ 23,151	\$ 6,018
Denominator:				
Number of shares used in basic computation	19,674,869	5,576,775	19,314,741	5,576,775

Edgar Filing: DONEGAL GROUP INC - Form 10-Q

Weighted-average effect of dilutive securities				
Add: Director and employee stock options	292,257		621,792	
Number of shares used in per share computations	19,967,126	5,576,775	19,936,533	5,576,775
Diluted net income per share	\$ 1.10	\$ 1.00	\$ 1.16	\$ 1.08

Options to purchase the following number of shares of Class A common stock were not included in the computation of diluted earnings per share because the exercise price of the options was greater than the average market price during the relevant period:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2007	2006	2007	2006
Number of shares	1,032,500		1,051,667	

Table of Contents

4- Reinsurance

Atlantic States has participated in an inter-company pooling agreement with Donegal Mutual since 1986. Both Atlantic States and Donegal Mutual place all of their direct business into the pool, and Atlantic States and Donegal Mutual then proportionately share the pooled business in accordance with the terms of the pooling agreement. Atlantic States has a 70% share of the results of the pool, and Donegal Mutual has a 30% share of the results of the pool. There have been no changes to the pool participation percentages since July 1, 2000.

The risk profiles of the business written by Atlantic States and Donegal Mutual historically have been, and continue to be, substantially similar. The products, classes of business underwritten, pricing practices and underwriting standards of Donegal Mutual and our insurance subsidiaries are determined and administered by the same management and underwriting personnel. In addition, as the Donegal Insurance Group, Donegal Mutual and our insurance subsidiaries share a combined business plan to achieve market penetration and underwriting profitability objectives. The products offered by our insurance subsidiaries and Donegal Mutual are generally complementary, thereby allowing Donegal Insurance Group to offer a broader range of products to a given market and to expand Donegal Insurance Group's ability to service an entire personal lines or commercial lines account. Distinctions within the products of Donegal Mutual and our insurance subsidiaries generally relate to specific risk profiles targeted within similar classes of business, such as preferred tier versus standard tier products, but not all of the standard risk gradients are allocated to one company. Therefore, the underwriting profitability of the business directly written by the individual companies will vary. However, because the risk characteristics of all business written directly by Donegal Mutual and Atlantic States are homogenized within the pool and each company shares the results according to its participation level, Atlantic States realizes 70% of the underwriting profitability of the pool (because of its 70% participation in the pool), while Donegal Mutual realizes 30% of the underwriting profitability of the pool (because of Donegal Mutual's 30% participation in the pool). Pooled business represents the predominant percentage of the net underwriting activity of both Atlantic States and Donegal Mutual.

Atlantic States, Southern and Donegal Mutual purchase third-party reinsurance on a combined basis. Le Mars and Peninsula have separate third-party reinsurance programs that provide similar types of coverage and that are commensurate with their relative size and exposures. Several different reinsurers are used, all of which, consistent with Donegal Insurance Group's requirements, have an A.M. Best rating of A- (Excellent) or better or, with respect to foreign reinsurers, have a financial condition that, in the opinion of our management, is equivalent to a company with at least an A- rating. The following information relates to the external reinsurance Atlantic States, Southern and Donegal Mutual has in place during 2007:

excess of loss reinsurance, under which losses are automatically reinsured, through a series of contracts, over a set retention (\$400,000 for 2007), and

catastrophic reinsurance, under which Donegal Insurance Group recovers, through a series of contracts, 100% of an accumulation of many losses resulting from a single event, including natural disasters, over a set retention (\$3.0 million for 2007).

Our insurance subsidiaries and Donegal Mutual also purchase facultative reinsurance to cover exposures from losses that exceed the limits provided by their respective treaty reinsurance.

In addition to the pooling agreement and third-party reinsurance, Atlantic States, Southern, Le Mars and Peninsula have various reinsurance agreements with Donegal Mutual.

There were no significant changes to the pooling agreement, third-party reinsurance or other reinsurance agreements between our insurance subsidiaries and Donegal Mutual during the nine months ended September 30, 2007.

Table of Contents**5- Segment Information**

We evaluate the performance of our personal lines and commercial lines segments based upon the underwriting results of our insurance subsidiaries as determined under statutory accounting principles prescribed or permitted by various state insurance departments (SAP), which our management uses to measure performance for the total business of our insurance subsidiaries. Financial data by segment is as follows:

	Three Months Ended September 30, 2007 2006	
	(\$ in thousands)	
Revenues:		
Premiums earned:		
Commercial lines	\$ 28,058	\$ 28,684
Personal lines	49,552	47,021
Net premiums earned	77,610	75,705
Net investment income	5,813	5,386
Realized investment gains	488	153
Other	1,530	1,376
Total revenues	\$ 85,441	\$ 82,620
Income before income taxes:		
Underwriting income:

Table of Contents

6- Subordinated Debentures

On May 15, 2003, we received \$15.0 million in net proceeds from the issuance of subordinated debentures. The debentures mature on May 15, 2033 and are callable at our option, at par, after five years. The debentures carry an interest rate equal to the three-month LIBOR rate plus 4.10%, which is adjustable quarterly. At September 30, 2007, the interest rate on the debentures was 9.66%.

On October 29, 2003, we received \$10.0 million in net proceeds from the issuance of subordinated debentures. The debentures mature on October 29, 2033 and are callable at our option, at par, after five years. The debentures carry an interest rate equal to the three-month LIBOR rate plus 3.85%, which is adjustable quarterly. At September 30, 2007, the interest rate on the debentures was 9.21%.

On May 24, 2004, we received \$5.0 million in net proceeds from the issuance of subordinated debentures. The debentures mature on May 24, 2034 and are callable at our option, at par, after five years. The debentures carry an interest rate equal to the three-month LIBOR rate plus 3.85%, which is adjustable quarterly. At September 30, 2007, the interest rate on the debentures was 9.35%.

7- Share Based Compensation

Effective January 1, 2006, we adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment which requires the measurement of all share-based payments to employees, including grants of employee stock options, using a fair-value-based method and the recording of such expense in our consolidated statements of income. In determining the expense to be recorded for stock options granted to directors and employees of our subsidiaries and affiliates other than Donegal Mutual, the fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The significant assumptions utilized in applying the Black-Scholes option pricing model are the risk-free interest rate, expected term, dividend yield and expected volatility.

Under SFAS No. 123(R), the compensation expense for our stock compensation plans that has been charged against income before income taxes was \$94,655 and \$51,106 for the three months ended September 30, 2007 and 2006, respectively, with a corresponding income tax benefit of \$33,129 and \$17,887, respectively. The compensation expense for our stock compensation plans that has been charged against income before income taxes was \$248,798 and \$151,089 for the nine months ended September 30, 2007 and 2006, respectively, with a corresponding income tax benefit of \$87,079 and \$52,881, respectively. As of September 30, 2007, our total unrecognized compensation cost related to nonvested share-based compensation granted under our stock compensation plans was \$354,552. This cost is expected to be recognized over a weighted average period of 2.6 years.

SFAS No. 123(R) does not set accounting requirements for share-based compensation to nonemployees. We continue to account for share-based compensation to employees and directors of Donegal Mutual under the provisions of FIN No. 44 and EITF 00-23, which state that when employees of a controlling entity are granted share-based compensation, the entity granting the share-based compensation should measure the fair value of the award at the grant date and recognize the fair value as a dividend to the controlling entity. These provisions apply to options granted to employees and directors of Donegal Mutual, the employer of record for the majority of employees that provide services to us. We recorded implied dividends of \$22,282 and \$23,939 for the three months ended September 30, 2007 and 2006, respectively. We recorded implied dividends of \$61,441 and \$82,809 for the nine months ended September 30, 2007 and 2006, respectively.

Cash received from option exercises under all stock compensation plans for the three months ended September 30, 2007 and 2006 was \$375,210 and \$602,181, respectively. The actual tax benefit realized for the tax deductions from option exercises of share-based compensation was \$161,230 and \$193,969 for the three months ended September 30, 2007 and 2006, respectively. Cash received from option exercises under all stock compensation plans for the nine months ended September 30, 2007 and 2006 was \$504,380 and \$4,093,149, respectively. The actual tax benefit realized for the tax deductions from option exercises of share-based compensation was \$198,965 and \$1,922,041 for the nine months ended September 30, 2007 and 2006, respectively.

Table of Contents

8- Impact of New Accounting Standards

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 (FIN No. 48). FIN No. 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements in accordance with SFAS No. 109, Accounting for Income Taxes. Effective January 1, 2007, we adopted FIN No. 48. As of January 1, 2007, we had no material unrecognized tax benefits or accrued interest and penalties. Our policy is to account for interest as a component of interest expense and penalties as a component of other expense. Federal tax years 2003 through 2006 were open for examination as of January 1, 2007. The adoption of FIN No. 48 did not have a significant effect on our results of operations, financial condition or liquidity.

In September 2006, the Securities and Exchange Commission issued Staff Accounting Bulletin (SAB) No. 108 to address diversity in practice in quantifying financial statement misstatements. SAB No. 108 requires that registrants quantify the impact on the current year's financial statements of correcting all misstatements, including the carryover and reversing effects of prior years' misstatements, as well as the effects of errors arising in the current year. The adoption of SAB No. 108 did not have a significant effect on our results of operations, financial condition or liquidity.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. We do not expect the adoption of this statement to have a significant effect on our results of operations, financial condition or liquidity.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits companies to choose to measure many financial instruments and certain other items at fair value at specified election dates. Upon adoption, an entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. Most of the provisions apply only to entities that elect the fair value option. However, the amendment of SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, applies to all entities with available-for-sale and trading securities. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. We do not expect the adoption of this statement to have a significant effect on our results of operations, financial condition or liquidity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following information should be read in conjunction with the historical financial information and the notes thereto included in this Quarterly Report on Form 10-Q and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2006 as filed with the Securities and Exchange Commission on March 13, 2007.

Critical Accounting Policies and Estimates

Our financial statements are combined with those of our insurance subsidiaries and are presented on a consolidated basis in accordance with generally accepted accounting principles in the United States (GAAP).

Our insurance subsidiaries make estimates and assumptions that can have a significant effect on amounts and disclosures we report in our financial statements. The most significant estimates relate to the reserves of our insurance subsidiaries for property and casualty insurance unpaid losses and loss expenses, valuation of investments and our insurance subsidiaries' policy acquisition costs. While we believe our estimates and the estimates of our insurance subsidiaries are appropriate, the ultimate amounts may differ from the estimates provided. We regularly review these estimates and reflect any adjustment considered necessary in our current results of operations.

Table of Contents**Liability for Losses and Loss Expenses**

Liabilities for losses and loss expenses are estimates at a given point in time of the amounts an insurer expects to pay with respect to policyholder claims based on facts and circumstances then known. An insurer recognizes at the time of establishing its estimates that its ultimate liability for losses and loss expenses will exceed or be less than such estimates. Our insurance subsidiaries base their estimates of liabilities for losses and loss expenses on assumptions as to future loss trends and expected claims severity, judicial theories of liability and other factors. However, during the loss adjustment period, our insurance subsidiaries may learn additional facts regarding individual claims, and consequently it often becomes necessary for our insurance subsidiaries to refine and adjust their estimates of liability. Our insurance subsidiaries reflect any adjustments to their liabilities for losses and loss expenses in their results of operations in the period in which the changes in estimates are made.

Our insurance subsidiaries maintain liabilities for the payment of losses and loss expenses with respect to both reported and unreported claims. It is our intent that the liabilities for loss expenses will cover the ultimate costs of settling all losses, including investigation and litigation costs from such losses. Our insurance subsidiaries base the amount of their liability for reported losses primarily upon a case-by-case evaluation of the type of risk involved, knowledge of the circumstances surrounding each claim and the insurance policy provisions relating to the type of loss. Our insurance subsidiaries determine the amount of their liability for unreported claims and loss expenses on the basis of historical information by line of insurance. Our insurance subsidiaries account for inflation in the reserving function through analysis of costs and trends and reviews of historical reserving results. Our insurance subsidiaries closely monitor their liabilities and recompute them periodically using new information on reported claims and a variety of statistical techniques. Our insurance subsidiaries do not discount their liabilities for losses and loss expenses.

Reserve estimates can change over time because of unexpected changes in assumptions related to our insurance subsidiaries' external environment and, to a lesser extent, assumptions as to our insurance subsidiaries' internal operations. Assumptions related to our insurance subsidiaries' external environment include the absence of significant changes in tort law and the legal environment that increase liability exposure, consistency in judicial interpretations of insurance coverage and policy provisions and stability in economic conditions and the rate of loss cost inflation. For example, our insurance subsidiaries have experienced a decrease in claims frequency on bodily injury liability claims during the past several years while claims severity has gradually increased. These trend changes give rise to greater uncertainty as to the pattern of future loss settlements on bodily injury claims. Related uncertainties regarding future trends include the cost of medical technologies and procedures and changes in the utilization of medical procedures. Internal assumptions include accurate measurement of the impact of rate changes and changes in policy provisions and consistency in the quality and characteristics of business written within a given line of business, among other items. To the extent our insurance subsidiaries determine that underlying factors impacting their assumptions have changed, our insurance subsidiaries attempt to make appropriate adjustments for such changes in their reserves. Accordingly, our insurance subsidiaries' ultimate liability for unpaid losses and loss expenses will likely differ from the amount recorded at September 30, 2007. For every 1% change in our estimate for loss and loss expense reserves of our insurance subsidiaries, net of reinsurance recoverable, the effect on our pre-tax results of operations would be approximately \$1.5 million.

The establishment of appropriate liabilities is an inherently uncertain process, and there can be no assurance that the ultimate liability of our insurance subsidiaries will not exceed our insurance subsidiaries' loss and loss expense reserves and have an adverse effect on our results of operations and financial condition. Furthermore, the timing, frequency and extent of adjustments to our insurance subsidiaries' estimated future liabilities cannot be predicted, since the historical conditions and events that serve as a basis for our insurance subsidiaries' estimates of ultimate claim costs may change. As is the case for substantially all property and casualty insurance companies, our insurance subsidiaries have found it necessary in the past to increase their estimated future liabilities for losses and loss expenses in certain periods, and in other periods their estimates have exceeded their actual liabilities. Further adjustments could be required in the future. However, on the basis of our insurance subsidiaries' internal procedures, which analyze, among other things, their prior assumptions, their experience with similar cases and historical trends such as reserving patterns, loss payments, pending levels of unpaid claims and product mix, as well as court decisions, economic

conditions and public attitudes, we believe that our insurance subsidiaries have made adequate provision for their liability for losses and loss expenses.

Table of Contents

Excluding the impact of isolated catastrophic weather events, our insurance subsidiaries have noted slight downward trends in the number of claims incurred and the number of claims outstanding at period ends relative to their premium base in recent years across most of their lines of business. However, the amount of the average claim outstanding has increased gradually over the past several years as the property and casualty insurance industry has experienced increased litigation trends, periods in which economic conditions extended the estimated length of disabilities, increased medical loss cost trends and a general slowing of settlement rates in litigated claims.

Because of Atlantic States' participation in the pool with Donegal Mutual, Atlantic States is exposed to adverse loss development on the business of Donegal Mutual included in the pool. However, pooled business represents the predominant percentage of the net underwriting activity of both companies, and Donegal Mutual and Atlantic States would proportionately share any adverse risk development of the pooled business. The business in the pool is homogenous, i.e., Atlantic States has a 70% share of the entire pool and Donegal Mutual has a 30% share of the entire pool. Since substantially all of the business of Atlantic States and Donegal Mutual is pooled and the results shared by each company according to its participation level under the terms of the pooling agreement, the underwriting pool is intended to produce a more uniform and stable underwriting result from year to year for each company than either would experience individually and to spread the risk of loss among each company.

Our insurance subsidiaries' liability for losses and loss expenses by major line of business as of September 30, 2007 and December 31, 2006 consisted of the following:

	September 30, 2007	December 31, 2006
(dollars in thousands)		
Commercial lines:		
Automobile	\$ 22,064	\$ 23,406
Workers' compensation	38,351	39,563
Commercial multi-peril	24,322	25,994
Other	2,443	2,633
Total commercial lines	87,180	91,596
Personal lines:		
Automobile	55,385	59,657
Homeowners	9,657	10,360
Other	1,489	1,699
Total personal lines	66,531	71,716
Total commercial and personal lines	153,711	163,312
Plus reinsurance recoverable	88,289	95,710
Total liability for losses and loss expenses	\$ 242,000	\$ 259,022

We have evaluated the effect on our insurance subsidiaries' loss and loss expense reserves and our stockholders' equity in the event of reasonably likely changes in the variables considered in establishing loss and loss expense reserves. We established the range of reasonably likely changes based on a review of changes in accident year development by line of business and applied to our insurance subsidiaries' loss reserves as a whole. The selected range does not necessarily indicate what could be the potential best or worst case or likely scenario. The following table sets

forth the effect on our insurance subsidiaries' loss and loss expense reserves and our stockholders' equity in the event of reasonably likely changes in the variables considered in establishing loss and loss expense reserves:

13

Investments

We present our investments in available-for-sale fixed maturity and equity securities at estimated fair value, which generally represents quoted market prices.

We held fixed maturities and equity securities with unrealized losses representing declines that we considered temporary at September 30, 2007 as follows:

	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(\$ in thousands)			
U.S. Treasury securities and obligations of U.S. government corporations and agencies	\$	\$	\$ 71,933	\$ 685
Obligations of states and political subdivisions	50,076	399	46,357	447
Corporate securities	3,461	47	6,017	145
Mortgage-backed securities	14,981	135	32,949	795
Equity securities	10,418	1,189	583	103
Totals	\$ 78,936	\$ 1,770	\$ 157,839	\$ 2,175

Of the total fixed maturity securities with an unrealized loss at September 30, 2007, we classified securities with a fair value of \$136.9 million and an unrealized loss of \$1.5 million as available for sale and carried them at fair value on our balance sheet, while we classified securities with a fair value of \$88.9 million and an unrealized loss of \$1.2 million as held to maturity on our balance sheet and carried them at amortized cost.

We have no direct exposure to sub-prime residential mortgage-backed securities and hold no collateralized debt obligations. Substantially all of the unrealized losses within our fixed maturity investment portfolio resulted from increases in market interest rates and the related impact on our fixed maturity investment valuations. When determining possible impairment of our debt securities, we consider unrealized losses that are due to the impact of higher market interest rates to be temporary in nature because we have the ability and intent to hold our debt securities to maturity.

We make estimates concerning the valuation of our investments and the recognition of other than temporary declines in the value of our investments. When we consider the decline in value of an individual investment to be other than temporary, we write down the investment to its estimated net realizable value, and the amount of the write-down is reflected as a realized loss in our results of operations. We individually monitor all investments for other than temporary declines in value. Generally, if an individual equity security has depreciated in value by more than 20% of original cost, and has been in an unrealized loss position for

Table of Contents

more than six months, we assume there has been an other than temporary decline in value. We held 51 equity securities that were in an unrealized loss position at September 30, 2007. All of these securities have declined in value by less than 20% of original cost or have been in an unrealized loss position for less than six months, and we considered these declines in value to be temporary. With respect to debt securities, we assume there has been an other than temporary decline in value if it is probable that we will not receive contractual payments. In addition, we may write down securities in an unrealized loss position based on a number of other factors, including the fair value of the investment being significantly below its cost, the deteriorating financial condition of the issuer of a security and the occurrence of industry, company and geographic events that have negatively impacted the value of a security or rating agency downgrades. We determined that certain investments trading below cost had declined on an other than temporary basis during the first nine months of 2007 and 2006. Losses of \$295,500 and \$47,538 were included in net realized investment gains for these investments in the first nine months of 2007 and 2006, respectively.

Policy Acquisition Costs

We defer policy acquisition costs, consisting primarily of commissions, premium taxes and certain other underwriting costs that vary with and are directly related to the production of business, and amortize them over the period in which our insurance subsidiaries earn the premiums. The method followed in computing deferred policy acquisition costs limits the amount of such deferred costs to their estimated realizable value, which gives effect to the premiums to be earned, related investment income, losses and loss expenses and certain other costs we expect to incur as our insurance subsidiaries earn the premiums. Estimates in the calculation of policy acquisition costs have not shown material variability because of uncertainties in applying accounting principles or as a result of sensitivities to changes in key assumptions.

Results of Operations Three Months Ended September 30, 2007 Compared to Three Months Ended September 30, 2006

Net Premiums Written. Net premiums written for the three months ended September 30, 2007 were \$79.9 million, relatively unchanged from the \$80.4 million of net premiums written for the comparable period in 2006. Personal lines net premiums written increased \$2.1 million, or 3.9%, in the third quarter of 2007 compared to the comparable period in 2006. We benefited during the third quarter of 2007 from the addition of new business related to increased agent utilization of our WritePro automated underwriting and policy issuance system. Commercial lines net premiums written decreased \$2.4 million, or 8.8%, in the third quarter of 2007 compared to the comparable period in 2006 due to competitive market conditions.

Net Premiums Earned. Net premiums earned increased to \$77.6 million for the third quarter of 2007, an increase of \$1.9 million, or 2.5%, over the third quarter of 2006. Our insurance subsidiaries earn premiums and recognize them as revenue over the terms of their policies, which are one year or less in duration. Therefore, increases or decreases in net premiums earned generally reflect increases or decreases in net premiums written in the preceding twelve-month period compared to the comparable period one year earlier.

Investment Income. For the three months ended September 30, 2007, our net investment income increased 7.4% to \$5.8 million, compared to \$5.4 million for the comparable period one year ago. An increase in average invested assets from \$570.8 million in the third quarter of 2006 to \$593.2 million in the third quarter of 2007 and an increase in the annualized average rate of return on investments from 3.8% for the third quarter of 2006 to 3.9% for the third quarter of 2007 accounted for the increase in net investment income. The increase in our annualized average rate of return on investments was primarily due to improved yields generated from the reinvestment of maturity proceeds of lower-yielding bonds, offset in part by decreases in our annualized average rate of return due to our increased holdings of tax-exempt fixed maturities in our investment portfolio during the third quarter of 2007 compared to the comparable period a year earlier. The increased holdings of tax-exempt fixed maturities in 2007 resulted from a continuing shift from taxable to tax-exempt fixed maturities in order to obtain more favorable after-tax yields.

Net Realized Investment Gains. Net realized investment gains in the third quarter of 2007 were \$488,226, compared to \$152,694 for the comparable period in 2006. During the third quarter of 2007 and 2006, impairment losses of \$197,500 and \$0, respectively, were included in net realized investment gains. The remaining net realized investment gains and losses in both periods resulted from normal turnover within our investment portfolio.

Table of Contents

Losses and Loss Expenses. The loss ratio of our insurance subsidiaries, which is the ratio of incurred losses and loss expenses to premiums earned, for the third quarter of 2007 was 52.8%, compared to 56.2% for the third quarter of 2006. The commercial lines loss ratio increased to 49.1% for the third quarter of 2007, compared to 43.8% for the third quarter of 2006, primarily due to increases in the commercial mutli-peril, and workers compensation loss ratios as a result of increases in claim severity in those lines of business. The personal lines loss ratio decreased from 64.0% for the third quarter of 2006 to 55.2% for the third quarter of 2007 due to a decrease in the private passenger loss ratio primarily related to decreases in claim frequency and severity in that line of business. Net losses incurred during the quarter benefited from a continuation of favorable prior accident year reserve development resulting from the settlements of open claims.

Underwriting Expenses. The expense ratio, which is the ratio of policy acquisition costs and other underwriting expenses to premiums earned, for the third quarter of 2007 and 2006 was 35.0% and 32.6%, respectively. The increased expense ratio reflected additional expenses incurred for increased new business acquisition costs and increased underwriting-based incentive compensation costs. The increase in underwriting-based incentive compensation costs was directly related to the significant improvement in underwriting results during the third quarter of 2007 compared to those posted in the first six months of 2007.

Combined Ratio. The combined ratio of our insurance subsidiaries was 88.3% and 89.5 for the three months ended September 30, 2007 and 2006, respectively. The combined ratio represents the sum of the loss ratio, expense ratio and dividend ratio, which is the ratio of workers compensation policy dividends incurred to premiums earned.

Interest Expense. Interest expense for the third quarter of 2007 was \$733,558, compared to \$725,994 for the third quarter of 2006, and reflected an increase in average interest rates on our subordinated debentures in the third quarter of 2007 compared to the comparable period in 2006.

Income Taxes. Income tax expense was \$4.5 million for the third quarter of 2007, representing an effective tax rate of 28.6%, compared to \$3.8 million for the third quarter of 2006, representing an effective tax rate of 27.9%. The change in effective tax rates is primarily due to tax-exempt interest income representing a lesser proportion of net income before taxes in the 2007 period compared to the 2006 period.

Net Income and Earnings Per Share. Our net income for the third quarter of 2007 was \$11.2 million, or \$.45 per share of Class A common stock and \$.41 per share of Class B common stock on a diluted basis, an increase of 14.3% over net income of \$9.8 million, or \$.39 per share of Class A common stock and \$.36 per share of Class B common stock on a diluted basis, reported for the third quarter of 2006. Our fully diluted Class A shares outstanding for the third quarter of 2007 decreased to 19.9 million, compared to 20.1 million for the third quarter of 2006, as a result of our repurchase of outstanding stock. Our Class B shares outstanding were unchanged at 5.6 million.

Results of Operations Nine Months Ended September 30, 2007 Compared to Nine Months Ended September 30, 2006

Net Premiums Written. Net premiums written for the nine months ended September 30, 2007 were \$242.9 million, an increase of \$6.2 million, or 2.6%, over the comparable period in 2006. Personal lines net premiums written increased \$7.3 million, or 5.0%, in the first nine months of 2007 compared to the comparable period in 2006. Commercial lines net premiums written decreased \$1.1 million, or 1.2%, in the first nine months of 2007 compared to the comparable period in 2006 due to competitive market conditions.

Net Premiums Earned. Net premiums earned increased to \$231.9 million for the first nine months of 2007, an increase of \$6.6 million, or 2.9%, over the first nine months of 2006. Premiums are earned, or recognized as revenue, over the terms of our policies, which are one year or less in duration. Therefore, increases or decreases in net premiums earned generally reflect increases or decreases in net premiums written in the preceding twelve-month period compared to the comparable period one year earlier.

Investment Income. For the nine months ended September 30, 2007, our net investment income increased 9.4% to \$16.9 million, compared to \$15.4 million for the comparable period one year ago. An increase in average invested assets from \$564.0 million in the first nine months of 2006 to \$594.1 million in the first nine months of 2007 and an increase in the annualized average rate of return on investments from 3.6% for the first nine months of 2006 to 3.8% for the first nine months of 2007 accounted for the increase in

Table of Contents

net investment income. The increase in our annualized average rate of return on investments was primarily due to improved yields generated from the reinvestment of maturity proceeds of lower-yielding bonds, offset in part by decreases in our annualized average rate of return on increased holdings of tax-exempt fixed maturities in our investment portfolio during the first nine months of 2007 compared to the comparable period a year earlier.

Net Realized Investment Gains. Net realized investment gains in the first nine months of 2007 were \$653,656, compared to \$1.0 million for the comparable period in 2006. Impairment charges of \$295,500 were recognized in the first nine months of 2007, compared to impairment charges of \$47,538 recognized in the first nine months of 2006. The impairment charges for both periods were the result of declines in the market value of equity securities that we deemed to be other than temporary. The remaining net realized investment gains and losses in both periods resulted from normal turnover within our investment portfolio.

Losses and Loss Expenses. Our loss ratio in the first nine months of 2007 was 57.0%, compared to 56.2% in the first nine months of 2006. The commercial lines loss ratio improved to 47.8% in the first nine months of 2007, compared to 48.9% in the first nine months of 2006, primarily due to improved experience in our workers compensation and commercial automobiles lines of business. The personal lines loss ratio increased from 61.1% in the first nine months of 2006 to 62.5% in the first nine months of 2007 due to increased claim frequency and severity in our homeowners line of business.

Underwriting Expenses. Our expense ratio for the first nine months of 2007 was 34.2%, compared to 32.7% in the first nine months of 2006. The increase in the first nine months of 2007 expense ratio reflects additional costs incurred for increased new business acquisition costs and increased underwriting-based incentive compensation costs.

Combined Ratio. Our combined ratio was 91.5% and 89.3% for the nine months ended September 30, 2007 and 2006, respectively. The combined ratio represents the sum of the loss ratio, expense ratio and dividend ratio. The increase in the combined ratio was attributable to the increases in our loss and expense ratios for the 2007 period compared to the 2006 period.

Interest Expense. Interest expense for the first nine months of 2007 was \$2.2 million, compared to \$2.1 million for the first nine months of 2006, and reflected an increase in average interest rates on our subordinated debentures in the first nine months of 2007 compared to the comparable period in 2006.

Income Taxes. Income tax expense was \$10.3 million for the first nine months of 2007, representing an effective tax rate of 27.3%, compared to \$11.7 million for the first nine months of 2006, representing an effective tax rate of 28.7%. The change in effective tax rates is primarily due to tax-exempt interest income representing a greater proportion of net income before taxes in the 2007 period compared to the 2006 period.

Net Income and Earnings Per Share. Our net income for the first nine months of 2007 was \$27.5 million, or \$1.10 per share of Class A common stock and \$1.00 per share of Class B common stock on a diluted basis, a decrease of 5.8% from our net income of \$29.2 million, or \$1.16 per share of Class A common stock and \$1.08 per share of Class B common stock on a diluted basis, for the first nine months of 2006. Our fully diluted Class A shares outstanding for the first nine months of 2007 increased to 20.0 million, compared to 19.9 million for the first nine months of 2006. Our Class B shares outstanding were unchanged at 5.6 million.

Liquidity and Capital Resources

Liquidity is a measure of an entity's ability to secure enough cash to meet its contractual obligations and operating needs as they arise. Our major sources of funds from operations are the net cash flows generated from our insurance subsidiaries' underwriting results, investment income and maturing investments.

We have historically generated sufficient net positive cash flow from our operations to fund our commitments and build our investment portfolio, thereby increasing future investment returns. The impact of the pooling agreement with Donegal Mutual historically has been cash flow positive because of the historical underwriting profitability of the pool. The pool is settled monthly, thereby resulting in cash flows substantially similar to cash flows that would result from the underwriting of direct business. We have not experienced any unusual variations in the timing of claim payments associated with the loss reserves of our insurance subsidiaries. We maintain a high degree of liquidity in our investment portfolio in the form of readily marketable fixed maturities, equity securities and short-term investments. Our fixed-maturity investment portfolio is structured following a laddering approach, so that projected cash flows from investment income

Table of Contents

and principal maturities are evenly distributed from a timing perspective, thereby providing an additional measure of liquidity to meet our obligations should an unexpected variation occur in the future. Net cash flows provided by operating activities in the first nine months of 2007 and 2006 were \$25.1 million and \$30.0 million, respectively.

On November 25, 2003, we entered into a credit agreement with Manufacturers and Traders Trust Company (M&T) relating to a four-year \$35.0 million unsecured, revolving line of credit. On July 20, 2006, we amended the agreement with M&T to extend the credit agreement for four years from the date of amendment on substantially the same terms. As of September 30, 2007, we have the ability to borrow \$35.0 million at interest rates equal to M&T's current prime rate or the then current LIBOR rate plus between 1.50% and 1.75%, depending on our leverage ratio. In addition, we pay a fee of 0.15% per annum on the loan commitment amount, regardless of usage. The credit agreement requires our compliance with certain covenants, which include minimum levels of our net worth, leverage ratio and statutory surplus and A.M. Best ratings of our insurance subsidiaries. During the nine months ended September 30, 2007, we had no borrowings outstanding under the credit agreement, and we were in compliance with all requirements of the credit agreement.

The following table shows our expected payments for significant contractual obligations as of September 30, 2007.

(\$ in thousands)	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Net liability for unpaid losses and loss expenses of our insurance subsidiaries	\$ 153,711	\$ 67,545	\$ 68,636	\$ 7,954	\$ 9,576
Subordinated debentures	30,929				30,929
Total contractual obligations	\$ 184,640	\$ 67,545	\$ 68,636	\$ 7,954	\$ 40,505

We estimate the timing of the amounts for the net liability for unpaid losses and loss expenses of our insurance subsidiaries based on historical experience and expectations of future payment patterns. The liability is shown net of reinsurance recoverable on unpaid losses and loss expenses to reflect expected future cash flows related to such liability. Amounts assumed by Atlantic States from the pooling agreement with Donegal Mutual represent a substantial portion of our insurance subsidiaries' gross liability for unpaid losses and loss expenses, and amounts ceded by Atlantic States to the pooling agreement represent a substantial portion of our insurance subsidiaries' reinsurance recoverable on unpaid losses and loss expenses. Future cash settlement of Atlantic States' assumed liability from the pool will be included in monthly settlements of pooled activity, wherein amounts ceded to and assumed from the pool are netted. Although Donegal Mutual and we do not anticipate any changes in the pool participation levels in the foreseeable future, any such change would be prospective in nature and therefore would not impact the timing of expected payments for Atlantic States' proportionate liability for pooled losses occurring in periods prior to the effective date of such change.

The timing of the amounts for the subordinated debentures is based on their contractual maturities. The debentures are redeemable at our option, at par, after five years from their issuance dates as discussed in Note 6 Subordinated Debentures. Our subordinated debentures carry interest rates that vary based upon the three-month LIBOR rate and adjust quarterly. Based upon the interest rates in effect as of September 30, 2007, our annual interest cost associated with our subordinated debentures is approximately \$2.8 million. For every 1% change in the three-month LIBOR rate, the effect on our annual interest cost would be approximately \$300,000.

On March 7, 2007, our board of directors authorized a share repurchase program, pursuant to which we may purchase up to 500,000 shares of our Class A common stock at market prices prevailing from time to time in the open market subject to the provisions of SEC Rule 10b-18 and in privately negotiated transactions. During the first nine months of 2007, we purchased 165,727 shares of our Class A common stock under this program.

On October 18, 2007, our board of directors declared quarterly cash dividends of 9.0 cents per share for our Class A common stock and 7.75 cents per share for our Class B common stock, payable

Table of Contents

November 15, 2007 to stockholders of record as of the close of business on November 1, 2007. There are no regulatory restrictions on the payment of dividends to our stockholders, although there are state law restrictions on the payment of dividends from our insurance subsidiaries to us. Our insurance subsidiaries are required by law to maintain certain minimum surplus on a statutory basis, and are subject to regulations under which payment of dividends from statutory surplus is restricted and may require prior approval of the applicable domiciliary insurance regulatory authorities. Our insurance subsidiaries are subject to risk-based capital (RBC) requirements. At December 31, 2006, our insurance subsidiaries' capital levels were each substantially above RBC requirements. At January 1, 2007, amounts available for distribution as dividends to us from our insurance subsidiaries without prior approval of their domiciliary insurance regulatory authorities were \$26.7 million from Atlantic States, \$5.9 million from Southern, \$2.5 million from Le Mars and \$3.3 million from Peninsula, all of which remained available at September 30, 2007.

As of September 30, 2007, we had no material commitments for capital expenditures.

Equity Price Risk

Our portfolio of marketable equity securities, which is carried on our consolidated balance sheets at estimated fair value, has exposure to the risk of loss resulting from an adverse change in prices. We manage this risk by performing an analysis of prospective investments and through regular reviews of our portfolio by our investment staff.

Credit Risk

Our portfolio of fixed-maturity securities and, to a lesser extent, our portfolio of short-term investments is subject to credit risk. This risk is defined as the potential loss in market value resulting from adverse changes in the borrower's ability to repay the debt. We manage this risk by performing an analysis of prospective investments and through regular reviews of our portfolio by our investment staff. We also limit the percentage and amount of our total investment portfolio that can be invested in the securities of any one issuer.

Our insurance subsidiaries provide property and liability insurance coverages through independent insurance agencies located throughout our operating area. The majority of this business is billed directly to the insured, although a portion of the commercial business is billed through agents to whom our insurance subsidiaries extend credit in the normal course of business.

Because the pooling agreement does not relieve Atlantic States of primary liability as the originating insurer, Atlantic States is subject to a concentration of credit risk arising from business ceded to Donegal Mutual. Our insurance subsidiaries maintain reinsurance agreements in place with Donegal Mutual and with a number of other major unaffiliated authorized reinsurers.

Impact of Inflation

Property and casualty insurance premium rates are established before the amount of losses and loss settlement expenses, or the extent to which inflation may impact such expenses, are known. Consequently, our insurance subsidiaries attempt, in establishing rates, to anticipate the potential impact of inflation.

Risk Factors

The business, results of operations and financial condition, and therefore the value of our common stock, are subject to a number of risks. For a description of certain risks, reference is made to our 2006 annual report on Form 10-K filed with the Securities and Exchange Commission on March 13, 2007.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our market risk generally represents the risk of gain or loss that may result from the potential change in the fair value of our investment portfolio as a result of fluctuations in prices and interest rates and, to a lesser extent, our debt obligations. We attempt to manage our interest rate risk by maintaining an appropriate relationship between the average duration of our investment portfolio and the approximate duration of liabilities, i.e., policy claims of our insurance subsidiaries and debt obligations.

Other than our continuing shift from taxable to tax-exempt fixed maturity investments, we have maintained approximately the same investment mix and duration of our investment portfolio to our liabilities from December 31, 2006 to September 30, 2007.

There have been no material changes to our quantitative or qualitative market risk exposure from December 31, 2006 through September 30, 2007.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We conducted an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we (including our consolidated subsidiaries) are required to disclose in our periodic filings with the Securities and Exchange Commission is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995

Certain forward-looking statements contained herein involve risks and uncertainties. These statements include certain discussions relating to underwriting, premium and investment income volume, business strategies and our business activities during 2007 and beyond. In some cases, you can identify forward-looking statements by terms such as may, will, should, could, would, expect, plan, intend, anticipate, believe, estimate, project, or similar expressions. These forward-looking statements reflect our current views about future events, are based on assumptions that reflect current conditions and are subject to known and unknown risks and uncertainties that may cause our actual results to differ materially from those anticipated by these forward-looking statements. Many of the factors that will determine future events or our future results of operations are beyond our ability to control or predict.

(1) Donegal Mutual purchased these shares pursuant to its announcement on August 17, 2004 that it will, at its discretion, purchase shares of our Class A common stock and Class B

common stock
at market prices
prevailing from
time to time in
the open market
subject to the
provisions of
SEC
Rule 10b-18 and
in privately
negotiated
transactions.
Such
announcement
did not stipulate
a maximum
number of
shares that may
be purchased
under this
program.

- (2) We purchased
these shares
pursuant to our
announcement
on March 7,
2007 that we
will purchase up
to 500,000
shares of our
Class A
common stock
at market prices
prevailing from
time to time in
the open market
subject to the
provisions of
SEC
Rule 10b-18 and
in privately
negotiated
transactions. We
may purchase
up to 334,273
additional
shares of our
Class A
common stock
under this

program.
