DOWNEY FINANCIAL CORP  
Form 10-K  
March 07, 2002

SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-K

(Mark One)

Annual report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2001.

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period from \_\_\_\_\_ to \_\_\_\_\_.

Commission File Number 1-13578

DOWNEY FINANCIAL CORP.  
(Exact name of registrant as specified in its charter)

DELAWARE  
(State or other jurisdiction of incorporation or organization)

3501 Jamboree Road, Newport Beach, California 92660  
(Address of principal executive offices) (Zip Code)

I.R.S. Employer Identification No.: 33-0633413

Registrant's telephone number, including area code: (949) 854-0300

Securities registered pursuant to Section 12(b) of the Act:

TITLE OF EACH CLASS	NAME OF EACH EXCHANGE
Common Stock, \$0.01 par value	New York Stock Exchange Pacific Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by a check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

The aggregate market value of the voting stock held by non-affiliates of the registrant, based upon the closing sale price of its Common Stock on February 28, 2002, on the New York Stock Exchange was \$1,018,509,053.

At February 28, 2002, 28,213,048 shares of the Registrant's Common Stock, \$0.01 par value were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE: Portions of the Registrant's Proxy Statement to be filed with the Securities and Exchange Commission in connection

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

with the Annual Meeting of Stockholders to be held April 24, 2002 are incorporated by reference in Part III hereof.

## PART I

Certain matters discussed in this Annual Report may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act") and, as such, may involve risks and uncertainties. These forward-looking statements relate to, among other things, expectations of the business environment in which Downey Financial Corp. ("Downey," "we," "us" and "our") operates, projections of future performance, perceived opportunities in the market and statements regarding Downey's mission

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

and vision. Downey's actual results, performance or achievements may differ significantly from the results, performance or achievements expressed or implied in such forward-looking statements. For discussion of the factors that might cause such a difference, see Business--Factors That May Affect Future Results on page 17.

### ITEM 1. BUSINESS

#### GENERAL

We were incorporated in Delaware on October 21, 1994. On January 23, 1995, after we obtained necessary stockholder and regulatory approvals, we acquired 100% of the issued and outstanding capital stock of Downey Savings and Loan Association (the "Bank") and the Bank's stockholders became holders of our stock. Downey was thereafter funded by the Bank and presently operates as the Bank's holding company. Our stock is traded on the New York Stock Exchange and Pacific Exchange under the trading symbol "DSL."

The Bank was formed in 1957 as a California-licensed savings and loan association and converted to a federal charter in 1995. As of December 31, 2001, it conducts its business through 137 retail deposit branches, including 68 full-service in-store branches. Residential loans are originated or purchased:

- o by branch managers in our branches;
- o by loan officers who solicit loans from realtors and other business sources, to include via the internet from two California call centers;
- o by wholesale loan representatives who obtain loans submitted by mortgage brokers; and
- o by purchases of loans from correspondent banking institutions or mortgage bankers.

The Bank is regulated or affected by the following governmental entities and laws:

- o As a federally chartered savings association, the Bank's activities and investments are generally governed by the Home Owners' Loan Act, as amended, and regulations and policies of the Office of Thrift Supervision (the "OTS").
- o The Bank and Downey are subject to the primary regulatory and supervisory jurisdiction of the OTS.
- o As a federally insured depository institution, the Bank is regulated and supervised by the Federal Deposit Insurance Corporation (the "FDIC") with respect to some of its activities and investments.
- o The Bank is a member of the Federal Home Loan Bank (the "FHLB") of San Francisco, which is one of the 12 regional banks for federally insured depository institutions comprising the Federal Home Loan Bank System.
- o The Bank's savings deposits are insured through the Savings Association Insurance Fund ("SAIF") of the FDIC, an instrumentality of the United States government.
- o The Bank is regulated by the Federal Reserve with respect to reserves the Bank is required to maintain against deposits and other matters.

General economic conditions, the monetary and fiscal policies of the federal government and the regulatory policies of governmental authorities

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

significantly influence our operations. Additionally, interest rates on competing investments and general market interest rates influence our deposit flows and the costs we incur on interest-bearing liabilities, which represents our cost of funds. Similarly, market interest rates and other factors that affect the supply of and demand for housing and the availability of funds affect our loan volume and our yields on loans and mortgage-backed securities.

Our primary business is banking and we are also involved in real estate investments, each of which we discuss further below.

1

### BANKING ACTIVITIES

Our primary business is banking. Our banking activities focus on:

- o attracting funds from the general public and institutions; and
- o originating and investing in loans, primarily residential real estate mortgage loans, investment securities and mortgage-backed securities.

These mortgage-backed securities include mortgage pass-through securities issued by other entities and securities issued or guaranteed by government-sponsored enterprises like the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Government National Mortgage Association.

Our primary sources of revenue from our banking business are:

- o interest we earn on loans, investment securities and mortgage-backed securities;
- o fees we earn in connection with loans and deposits;
- o gains on sales of our loans, investment securities and mortgage-backed securities; and
- o income we earn on loans and mortgage-backed securities we service for investors.

Our principal expenses in connection with our banking business are:

- o interest we incur on our interest-bearing liabilities, including deposits, borrowings and capital securities; and
- o general and administrative costs.

Our primary sources of funds from our banking business are:

- o deposits;
- o principal and interest payments on our loans and mortgage-backed securities;
- o proceeds from sales of our loans and mortgage-backed securities; and
- o borrowings and capital securities.

Scheduled payments we receive on our loans and mortgage-backed securities are a relatively stable source of funds. However, the funds we receive from deposits and prepayment of loans and mortgage-backed securities vary widely. Below is a detailed discussion of our banking activities.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

### LENDING ACTIVITIES

Historically, our lending activities have primarily emphasized our origination of first mortgage loans secured by residential properties and retail neighborhood shopping centers. To a lesser extent, our lending activities have emphasized our origination of real estate loans secured by multi-family, commercial and industrial properties, including office buildings, land and other properties with income producing capabilities. In addition, we have provided construction loan financing for single family and multi-family residential properties and commercial retail neighborhood shopping center projects. These construction loan financings have included loans to joint ventures, which were being engaged in by DSL Service Company, a wholly owned subsidiary of the Bank, with other participants. We also originate loans to businesses through our commercial banking operations.

We originate automobile loans directly through our branch network. We also conducted an indirect auto-lending program through our purchase of new or used automobile sales contracts from auto dealers in California and other western states. Downey Auto Finance Corp., a previous wholly owned subsidiary of the Bank, operated this indirect auto-lending program, but was sold in February 2000. For more information, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Sale of Subsidiary on page 60.

Our primary focus will continue to be our origination of:

- o adjustable rate single family mortgage loans, including subprime loans which carry higher interest rates; and
- o consumer loans.

2

We will also continue our secondary marketing activities of originating and selling single family loans to various investors.

For more information, see below under the caption entitled Secondary Marketing and Loan Servicing Activities on page 5. For additional information on the composition of our loan and mortgage-backed securities portfolio, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Loans and Mortgage-Backed Securities on page 33.

### LOAN AND MORTGAGE-BACKED SECURITIES PORTFOLIO

We carry loans receivable held for investment at cost. Our net loans receivable are adjusted for amortization of premiums and accretion of discounts which are recognized in interest income using the interest method. Our investments in mortgage-backed securities represent participating interests in pools of first mortgage loans originated and serviced by the issuers of the securities. We carry mortgage-backed securities held to maturity at unpaid principal balances, which are adjusted for unamortized premiums and unearned discounts. We amortize premiums and discounts on mortgage-backed securities by using the interest method over the remaining period to contractual maturity, adjusted for anticipated prepayments.

We identify loans that may be sold before their maturity. In our balance sheets, we classify these as loans held for sale and record them at the lower of amortized cost or fair value. Amortized cost includes a basis adjustment to the loan at funding resulting from the change in the fair value of the associated

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

interest rate lock derivative from the date of commitment to the date of funding. We recognize net unrealized losses on these loans, if any, in a valuation allowance by making charges to our income.

We carry mortgage-backed securities available for sale at fair value. We report net unrealized gains or losses on these securities net of income taxes in stockholders' equity and as a separate component of our other comprehensive income until realized.

The residential mortgage loans we originate typically have contractual maturities at origination of 15 to 40 years. To limit the interest rate risk associated with these 15- to 40-year maturities, we, among other things, principally originate adjustable rate mortgages for our own loan portfolio. We originate fixed rate loans with the intention to sell the majority of them in the secondary market on a non-recourse basis for cash. However, we occasionally originate fixed rate loans for our own portfolio to facilitate the sale of real estate we acquire in settlement of loans or which meet specific yield and other approved guidelines. For more information, see Asset/Liability Management on page 8. In addition, the average term of these fixed rate mortgage loans we originate for our own portfolio historically has been significantly shorter than their contractual maturity due to loan payoffs as a result of home sales or refinancings and prepayments.

### RESIDENTIAL REAL ESTATE LENDING

Our primary lending activity is our origination of mortgage loans secured by single family residential properties consisting of one-to-four units located primarily in California. We provide these mortgage loans for borrowers to purchase residences or to refinance their existing mortgages at lower rates or upon different terms. Our primary strategy is to originate adjustable rate mortgages for our portfolio of loans we hold for investment. For more information, see Asset/Liability Management on page 8. We also originate residential fixed rate mortgage loans to meet consumer demand, but we intend to sell the majority of these loans in the secondary market, rather than hold them in our portfolio. We may, however, place residential fixed rate loans in our portfolio of loans held for investment if these fixed rate loans are funded with long-term funds to mitigate interest rate risk. In addition, we originate a small volume of fixed rate loans for our own investment if they meet specific yield and other approved guidelines, or to facilitate our sale of real estate acquired in settlement of loans. For more information, see Secondary Marketing and Loan Servicing Activities on page 5.

Our adjustable rate mortgages generally:

- o begin with an incentive interest rate, which is an interest rate below the current market rate, that adjusts to the applicable index plus a defined spread, subject to periodic and lifetime caps, after one, three, six or twelve months;
- o provide that the maximum interest rate we can charge borrowers cannot exceed the incentive rate by more than six to nine percentage points, depending on the type of loan and the initial rate offered; and
- o limit interest rate adjustments to 1% per adjustment period for those that adjust semi-annually and 2% per adjustment period for those that adjust annually.

Most of our adjustable rate mortgages adjust monthly instead of semi-annually. These monthly adjustable rate mortgages:

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

- o have a lifetime interest rate cap, but no specified periodic interest rate adjustment cap;
- o have a periodic cap on changes in required monthly payments, which adjust annually; and
- o allow for negative amortization, which is the addition to loan principal of accrued interest that exceeds the required monthly loan payments.

Regarding negative amortization, if a loan incurs significant negative amortization, then there is an increased risk that the fair value of the underlying collateral on the loan would be insufficient to satisfy fully the outstanding principal and interest. We currently impose a limit on the amount of negative amortization for loans with loan-to-value ratios of 80% or less. A loan-to-value ratio is the ratio of the principal amount of the loan to the lower of the sales price or appraised value at origination of the property securing the loan. The limit on negative amortization is that the principal plus the added amount cannot exceed 125% of the original loan amount. This limit does not apply to subprime loans. Rather, for subprime loans the principal plus negative amortization cannot exceed 110% of the original loan amount. At year-end 2001, loans with the higher 125% limit on negative amortization represented about one-fourth of our adjustable rate one-to-four unit residential portfolio. We permit adjustable rate mortgages to be assumed by qualified borrowers.

During 2001, approximately 78% of our one-to-four unit residential real estate loans were obtained by our wholesale loan representatives but originated through outside mortgage brokers. We pay our wholesale loan representatives on a commission basis. We consider the compensation we pay outside mortgage brokers when we set the overall price of our mortgage loan products. These mortgage brokers do not operate from our offices and are not our employees. Our branch managers and residential loan officers originated approximately 22% of our one-to-four unit residential loans during 2001. We compensate residential loan officers located in our call centers on a salary basis plus a fixed amount per loan they originate. Branch managers and assistant managers are compensated a fixed amount per loan they originate. Loan officers located outside our call centers are compensated on a commission only basis and typically receive loan referrals from real estate agents, builders and customers.

We require that our residential real estate loans be approved at various levels of management, depending upon the amount of the loan. On a single family residential loan we originate for our portfolio, the maximum amount we generally will lend is \$1 million. Our average loan size, however, is much lower. In 2001, our average loan size was \$309,000. We generally make loans with loan-to-value ratios not exceeding 80%. We will make loans with loan-to-value ratios of over 80%, if the borrower obtains private mortgage insurance to reduce the effective loan-to-value ratio to between 70% to 78%, consistent with secondary marketing requirements. In addition, we require that borrowers obtain hazard insurance for all residential real estate loans covering the lower of the loan amount or the replacement value of the residence.

In our approval process for the loans we originate or purchase, we assess both the value of the property securing the loan and the applicant's ability to repay the loan. Loan underwriters analyze the loan application and the property involved. Qualified appraisers on our staff or approved outside appraisers establish the value of the collateral through the use of full appraisals or alternative valuation formats that meet regulatory requirements. Appraisal reports prepared by outside appraisers are selectively reviewed by our staff appraisers or by approved fee appraisers. We also obtain information about the applicant's income, financial condition, employment and credit history.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Typically, we will verify an applicant's credit information for loans originated by our retail loan representatives. For loans submitted from outside mortgage brokers, we require the mortgage broker to obtain, review and verify the applicant's credit information and employment.

On our adjustable rate mortgages we offer with incentive interest rates, we currently qualify applicants:

- o for loan programs with no negative amortization at the higher of:
  - o the initial incentive interest rate; or
  - o the fully indexed interest rate.
- o for loan programs that include negative amortization and are owner occupied, at the minimum qualifying interest rate of 7.00%.
- o for loan programs that include negative amortization and are non-owner occupied, at the minimum qualifying interest rate of 7.25%.

4

Late in 1996, we began offering one-to-four unit residential loans to borrowers who have or, in the case of purchases, will have equity in their homes but whose credit rating contains exceptions which preclude them from qualifying for lower or better market interest rates and terms. We refer to these lower grade credits, which we characterize as "A-," "B" and "C" loans, as subprime loans in our loan portfolio. Our subprime loans are characterized by lower loan-to-value ratios and higher average interest rates than higher credit grade loans or "A" loans. We believe these lower credit grade borrowers represent an opportunity for us to earn a higher net return for the risks we assume. We have developed specific underwriting guidelines for each classification of adjustable subprime credit and qualify these applicants at the fully indexed rate. For further information, see Regulation--Regulation of the Bank--Regulatory Capital Requirements on page 11.

### SECONDARY MARKETING AND LOAN SERVICING ACTIVITIES

As part of our secondary marketing activities, we originate some residential real estate adjustable rate mortgages and fixed rate mortgages, which we intend to sell. Accordingly, we classify these loans as held for sale and carry them at the lower of cost or fair value. Amortized cost includes a basis adjustment to the loan at funding resulting from the change in the fair value of the associated interest rate lock derivative from the date of commitment to the date of funding. These loans are secured by first liens on one-to-four unit residential properties and generally have maturities of 30 years or less.

Generally, we use various hedging programs to manage the interest rate risk of our fixed rate mortgage origination process. For further information, see Asset/Liability Management and Market Risk on page 43.

We believe that servicing loans for others can be an important asset/liability management tool because it produces operating results which, in response to changes in market interest rates, tend to move opposite to changes in net interest income. Because adjustable rate mortgages take longer to adjust to market interest rates, net interest income associated with these loans is expected to decline in periods of rising interest rates and increase in periods of falling rates. In contrast, the value of a loan servicing portfolio normally:

- o increases as interest rates rise and loan prepayments decrease; and

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

- o declines as interest rates fall and loan prepayments increase.

In addition, increased levels of servicing activities and the opportunity to offer our other financial services in servicing loans for others can provide us with additional income with minimal additional overhead costs.

Depending upon market pricing for servicing, we sell loans either servicing retained or servicing released. When we sell loans servicing retained, we record gains or losses from these loans at the time of sale. We calculate gains or losses from our sale as the difference between the net sales proceeds and the allocated basis of the loans sold. We capitalize mortgage servicing rights we acquire through either our purchase or origination of mortgage loans we intend to sell with servicing rights retained. We allocate the total cost of the mortgage loans designated for sale to both the mortgage servicing rights and to the mortgage loans without mortgage servicing rights based on their relative fair values. We disclose our mortgage servicing rights in our financial statements and include them as a component of the gain on sale of loans. We recognize impairment losses on the mortgage servicing rights through a valuation allowance and record any associated provision as a component of loan servicing fees. At December 31, 2001, our mortgage servicing rights totaled \$57 million and during 2001 we recorded a \$10.6 million provision for impairment of our mortgage servicing rights.

We may exchange loans we originate for sale with government agencies for mortgage-backed securities collateralized by these loans. Our cost for the exchange, a monthly guaranty fee, is expressed as a percentage of the unpaid principal balance and is deducted from interest income. We can use the securities we receive to collateralize various types of our borrowings at rates that frequently are more favorable than rates on other types of liabilities and also carry a lower risk-based capital requirement than whole loans. We carry these mortgage-backed securities available for sale at fair value. However, we record no gain or loss on the exchange in our statement of income until the securities are sold to a third party. Before we sell these securities to third parties, we show all changes in fair value as a separate component of stockholders' equity as accumulated other comprehensive income, net of income taxes.

### COMMERCIAL REAL ESTATE AND MULTI-FAMILY LENDING

We have provided permanent loans secured by retail neighborhood shopping centers and multi-family properties. Our major loan officers conduct our commercial real estate and multi-family lending activities. We compensate these officers on a salary basis.

5

Commercial real estate and multi-family loans generally entail additional risks as compared to single family residential mortgage lending. We subject each loan, including loans to facilitate the sale of real estate we own, to our underwriting standards, which generally include:

- o our evaluation of the creditworthiness and reputation of the borrower; and
- o the amount of the borrower's equity in the project as determined on the basis of appraisal, sales and leasing information on the property and cash flow projections.

To protect the value of the security for our loan, we require borrowers to maintain casualty insurance for the loan amount or replacement cost. In

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

addition, for non-residential loans in excess of \$500,000, we require the borrower to obtain comprehensive general liability insurance. All commercial real estate loans we originate must be approved by at least two of our officers, one of whom must be the originating loan account officer and the other a designated officer with appropriate loan approval authority.

### CONSTRUCTION LENDING

We have provided construction loan financing for single family and multi-family residential properties and commercial real estate projects, like retail neighborhood shopping centers. Our major loan officers principally originate these loans. We generally make construction loans at floating interest rates based upon the prime or reference rate of a major commercial bank. Generally, we require a loan-to-value ratio of 75% or less on construction lending and we subject each loan to our underwriting standards.

Construction loans involve risks different from completed project lending because we advance loan funds based upon the security of the completed project under construction. If the borrower defaults on the loan, then we may have to advance additional funds to finance the project's completion before the project can be sold. Moreover, construction projects are affected by uncertainties inherent in estimating:

- o construction costs;
- o potential delays in construction time;
- o market demand; and
- o the accuracy of the value on the completed project.

When providing construction loans, we require the general contractor to, among other things, carry contractor's liability insurance equal to specific prescribed minimum amounts, carry builder's risk insurance and have a blanket bond against employee misappropriation.

### COMMERCIAL LENDING

We originate commercial loans and revolving lines of credit and issue standby letters of credit for our middle market commercial customers. We offer the various credit products on both a secured and unsecured basis with interest rates being either fixed or variable. Our portfolio emphasis is toward secured, floating rate credit facilities. Our commercial banking group directs these activities and focuses on our long-term, relationship-based customers. We also utilize our retail branch network as a source of commercial customers, with the lending to these customers being typically managed by the branch manager. We believe our commercial borrowers are desirable because these borrowers generally have lower cost deposit accounts.

### CONSUMER LENDING

The Bank originates direct automobile loans, home equity loans and lines of credit, and other consumer loan products. Before we make a consumer loan, we assess the applicant's ability to repay the loan and, if applicable, the value of the collateral securing the loan. The risk involved with home equity loans and lines of credit is similar to the risk involved with residential real estate loans. We offer customers a credit card through a third party, who extends the credit and services the loans made to our customers.

### INVESTMENT ACTIVITIES

As a federally chartered savings association, the Bank's ability to make

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

securities investments is prescribed under the OTS regulations and the Home Owners' Loan Act. The Bank's authorized officers make investment decisions within guidelines established by the Bank's Board of Directors. The Bank manages these investments in an effort to produce the highest yield, while at the same time maintaining safety of principal, minimizing interest rate risk and complying with applicable regulations.

6

We carry securities held to maturity at amortized cost. We adjust these costs for amortization of premiums and accretion of discounts, which we recognize as interest income using the interest method. We carry securities available for sale at fair value. We exclude unrealized holding gains and losses, or valuation allowances established for net unrealized losses, from our earnings and report them as a separate component of our stockholders' equity as accumulated other comprehensive income, net of income taxes, unless the security is deemed other than temporarily impaired. If the security is determined to be other than temporarily impaired, we charge the amount of the impairment to operations. For further information on the composition of our investment portfolio, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Investment Securities on page 37.

### DEPOSIT ACTIVITIES

We prefer to use deposits as our principal source of funds for supporting our lending activities, because the cost of these funds generally is less than that of borrowings or other funding sources with comparable maturities. We traditionally have obtained our savings deposits primarily from areas surrounding the Bank's branch offices. However, we occasionally raise some retail deposits through Wall Street activities.

General economic conditions affect deposit flows. Funds may flow from depository institutions such as savings associations into direct vehicles like government and corporate securities or other financial intermediaries. Our ability to attract and retain deposits will continue to be affected by money market conditions, prevailing interest rates and available competing investment vehicles. Generally, state or federal regulation does not restrict interest rates we pay on deposits.

In 1996, we began establishing full-service branch facilities in selected supermarket locations throughout California. Each in-store branch offers a full range of financial services including checking and savings accounts as well as residential and consumer loans.

When consistent with our maintenance of appropriate capital levels, we may consider opportunities to augment our retail branch system and deposit base through our acquisition of selected branches or deposits.

For further information, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Deposits on page 40.

### BORROWING ACTIVITIES

Our principal source of funds has been and continues to be deposits we raise through our retail branch system. At various times, however, we have utilized other sources to fund our loan origination and other business activities. We have at times relied upon our borrowings from the FHLB of San Francisco as an additional source of funds. The FHLB of San Francisco makes advances to us through several different credit programs it offers.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

From time to time, we obtain additional sources of funds by selling some of our securities and mortgage loans under agreements to repurchase. These reverse repurchase agreements are generally short-term and are collateralized by our mortgage-backed or investment securities and our mortgage loans. We only deal with investment banking firms that are recognized as primary dealers in U.S. government securities or major commercial banks in connection with these reverse repurchase agreements. In addition, we limit the amounts of our borrowings from any single institution.

For further information, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Borrowings on page 41.

### CAPITAL SECURITIES

On July 23, 1999, we issued \$120 million in capital securities through Downey Financial Capital Trust I. The capital securities pay quarterly cumulative cash distributions at an annual rate of 10.00% of the liquidation value of \$25 per share. Of the \$115 million of net proceeds, we invested \$108 million as additional common stock of the Bank thereby increasing the Bank's regulatory core/tangible capital by that same amount. The balance of the net proceeds have been used for general corporate purposes. For further information regarding our capital securities, see Note 18 on page 91 of Notes to Consolidated Financial Statements.

7

### ASSET/LIABILITY MANAGEMENT

Savings institutions are affected by interest rate risks to the degree that their interest-bearing liabilities, consisting principally of customer deposits, FHLB advances, other borrowings and capital securities, mature or reprice on a different basis than their interest-earning assets, which consist predominantly of intermediate or long-term real estate loans. While having liabilities that on average mature or reprice more frequently than assets may be beneficial in times of declining interest rates, this asset/liability structure may result in declining net earnings during periods of rising interest rates. One of our principal objectives is to manage the effects of adverse changes in interest rates on our interest income while maintaining our asset quality and an acceptable interest rate spread. To improve the rate sensitivity and maturity balance of our interest-earning assets and liabilities, we have emphasized the origination of loans with adjustable interest rates or relatively short maturities. Loans with adjustable interest rates have the beneficial effect of allowing the yield on our assets to increase during periods of rising interest rates, although these loans have contractual limitations on the frequency and extent of interest rate adjustments.

For further information, see Lending Activities on page 2 and Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Asset/Liability Management and Market Risk on page 43.

### EARNINGS SPREAD

We determine our net interest income or the interest rate spread by calculating the difference between:

- o the yield we earn on our interest-earning assets like loans, mortgage-backed securities and investment securities; and
- o the cost we pay on our interest-bearing liabilities like deposits,

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

borrowings and capital securities.

Our net interest income is also determined by the relative dollar amounts of our interest-earning assets and interest-bearing liabilities.

Our effective interest rate spread, which reflects the relative level of our interest-earning assets to our interest-bearing liabilities, equals:

- o the difference between interest income on our interest-earning assets and interest expense on our interest-bearing liabilities, divided by
- o our average interest-earning assets for the period.

For information regarding our net income and the components thereof and for management's analysis of our financial condition and results of operations, see Management's Discussion and Analysis of Financial Condition and Results of Operations beginning on page 23. For information regarding the return on our assets and other selected financial data, see Selected Financial Data on page 21.

### INSURANCE AGENCY ACTIVITIES

Downey Affiliated Insurance Agency was incorporated on January 25, 1995, as Downey's wholly owned subsidiary. We capitalized Downey Affiliated Insurance Agency on February 24, 1995 with \$400,000. In the 1995 second quarter, Downey Affiliated Insurance Agency commenced operations at which time representatives of Downey Affiliated Insurance Agency were available in our branches to offer annuity products. During 1996, Downey Affiliated Insurance Agency began offering forced-placed casualty insurance policies on mortgage loans and stopped offering annuity products. The offering of forced-placed casualty insurance policies ceased in April 1999.

### REAL ESTATE INVESTMENT ACTIVITIES

In addition to our primary business of banking, which has been described above, we are also involved in real estate investment activities, which are conducted primarily through DSL Service Company, a wholly owned subsidiary of the Bank. DSL Service Company is a diversified real estate development company which was established in 1966 as a neighborhood shopping center and residential tract developer, as well as the general contractor for the Bank's branch locations. Today its capabilities include development, construction and property management activities relating to its portfolio of projects primarily within California, but also in Arizona. In addition to DSL Service Company developing its own real estate projects, it associates with other qualified developers to engage in joint ventures. The primary revenue sources of our real estate investment activities include net rental

8

income and gains from the sale of real estate investments. The primary expenses of our real estate investment activities are interest expense and general and administrative expense.

Due to federal law, the Bank is prohibited from making new investments in real estate development and joint venture operations and is required to deduct the full amount of its investment in DSL Service Company in calculating its applicable ratios under the core, tangible and risk-based capital standards. Savings associations generally may invest in service corporation subsidiaries, like DSL Service Company, to the extent of 2% of the association's assets, plus up to an additional 1% of assets for investments which serve primarily community, inner-city or community development purposes. In addition,

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

"conforming loans" by the Bank to DSL's joint venture partnerships are limited to 50% of the Bank's risk-based capital. "Conforming loans" are those generally limited to 80% of appraised value, bear a market rate of interest and require payments sufficient to amortize the principal balance of the loan. We are in compliance with each of these investment limitations.

To the extent Downey or a subsidiary of Downey, other than the Bank or its subsidiaries, makes real estate investments, the above-mentioned capital deductions and limitations do not apply, as they only pertain to the specific investments by savings associations or their subsidiaries.

For further information, see Management's Discussion and Analysis of Financial Condition and Results of Operations--Financial Condition--Investments in Real Estate and Joint Ventures on page 38.

### COMPETITION

We face competition both in attracting deposits and in making loans. Our most direct competition for deposits has historically come from other savings institutions and from commercial banks located in our principal market areas, including many large financial institutions based in other parts of the country or their subsidiaries. In addition, we face additional significant competition for investors' funds from short-term money market securities and other corporate and government securities. Our ability to attract and retain savings deposits depends, generally, on our ability to provide a rate of return, liquidity and risk comparable to that offered by competing investment opportunities and the appropriate level of customer service.

We experience competition for real estate loans principally from other savings institutions, commercial banks, mortgage banking companies and insurance companies. We compete for loans principally through our interest rates and loan fees we charge and our efficiency and quality of services we provide borrowers and real estate brokers.

### EMPLOYEES

At December 31, 2001, we had approximately 1,966 full-time employees and 545 part-time employees. We provide our employees with health and welfare benefits and a retirement and savings plan. Additionally, we offer qualifying employees participation in our stock purchase plan. Our employees are not represented by any union or collective bargaining group, and we consider our employee relations to be good.

### REGULATION

#### GENERAL

Federal and state law extensively regulates savings and loan holding companies and savings associations. This regulation is intended primarily for the protection of our depositors and the SAIF and not for the benefit of our stockholders. In the following information, we describe some of the regulations applicable to us and the Bank. We do not claim this discussion is complete and qualify our discussion in its entirety by reference to applicable statutory or regulatory provisions.

#### REGULATION OF DOWNEY

General. We are a savings and loan holding company and are therefore subject to regulatory oversight by the OTS. Thus, we are required to register and file reports with the OTS and are regulated and examined by the OTS. In addition, the OTS has enforcement authority over us, which also permits the OTS to restrict or prohibit our activities that it determines to be a serious risk

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

to the Bank.

Activities Restrictions. As a savings and loan holding company with only one savings and loan association subsidiary, we generally are not limited by OTS activity restrictions, provided the Bank satisfies the qualified thrift lender test or meets the definition of a domestic building and loan association in the Internal Revenue Code. If we acquire control of another savings association as a separate subsidiary of Downey, we would become a multiple

9

savings and loan holding company. As a multiple savings and loan holding company, our activities, other than the activities of the Bank or any other SAIF-insured savings association, would become subject to restrictions applicable to bank holding companies unless these other savings associations were acquired in a supervisory acquisition and each also satisfies the qualified thrift lender test or meets the definition of a domestic building and loan association. Furthermore, if we were in the future to sell control of the Bank to any other company, such company would not succeed to our grandfathered status as a unitary thrift holding company and would be subject to the same business activity restrictions as a bank holding company. For more information, see Restrictions on Acquisitions below and Regulation of the Bank--Qualified Thrift Lender Test on page 13.

Restrictions on Acquisitions. We must obtain approval from the OTS before acquiring control of any other SAIF-insured association. The OTS generally prohibits these types of acquisitions if they result in a multiple savings and loan holding company controlling savings associations in more than one state. However, the OTS permits interstate acquisitions if the acquisition is authorized by specific state authorization or a supervisory acquisition of a failing savings association.

Federal law generally provides that no "person," acting directly or indirectly or through or in concert with one or more other persons, may acquire "control" of a federally insured savings association unless the person gives at least 60 days written notice to the OTS. The OTS then has the opportunity to disapprove the proposed acquisition. In addition, no company may acquire control of this type of an institution without prior OTS approval. These provisions also prohibit, among other things, any director or officer of a savings and loan holding company, or any individual who owns or controls more than 25% of the voting shares of a savings and loan holding company, from acquiring control of any savings association not a subsidiary of the savings and loan holding company, unless the acquisition is approved by the OTS.

Furthermore, no company may acquire control of an insured savings association, unless that company engages, and continues to engage, only in the financial activities permissible for a Financial Holding Company, unless grandfathered as a unitary savings and loan holding company. Downey is a grandfathered unitary savings and loan holding company.

Financial Holding Company Legislation. On November 12, 1999, the Gramm-Leach-Bliley Act of 1999 (the "Act") was signed into law. This law established a comprehensive framework to permit affiliations among commercial banks, insurance companies, securities firms and other financial service providers by revising and expanding the Bank Holding Company Act framework to permit a holding company to engage in a full range of financial activities through a new entity known as a "Financial Holding Company." "Financial activities" is broadly defined to include not only banking, insurance and securities activities, but also merchant banking and additional activities that the Federal Reserve Board, in consultation with the Secretary of the Treasury, determines to be financial in nature, related or incidental to such financial

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

activities, or complementary activities that do not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally.

The Act provided that no company may acquire control of an insured savings association, unless that company engages, and continues to engage, only in the financial activities permissible for a Financial Holding Company, unless grandfathered as a unitary savings and loan holding company. Downey is a grandfathered unitary savings and loan holding company and we may continue to operate under present law as long as we continue to control only the Bank and the Bank continues to meet the qualified thrift lender test.

We do not believe that this law will have a material adverse effect on our operations in the near-term. However, to the extent that the Act permits banks, securities firms and insurance companies to affiliate, the financial services industry may experience further consolidation. The Act is intended to grant to community banks certain powers as a matter of right that larger institutions have accumulated on an ad hoc basis and which unitary savings and loan holding companies, such as Downey, already possess. Nevertheless, this Act may have the result of increasing the amount of competition that we face from larger institutions and other types of companies offering financial products, many of which may have greater financial resources than we do. In addition, the Act may have an anti-takeover effect because it may tend to limit the range of potential acquirers of Downey to other savings and loan holding companies and Financial Holding Companies.

### REGULATION OF THE BANK

General. The OTS and the FDIC extensively regulate the Bank because the Bank is a federally chartered, SAIF-insured savings association. The Bank must ensure that its lending activities and its other investments comply with various statutory and regulatory requirements. The Bank is also regulated by the Federal Reserve.

10

The OTS, in conjunction with the FDIC, regularly examines the Bank and prepares reports for the Bank's Board of Directors to consider with respect to any deficiencies the OTS or the FDIC finds in the Bank's operations. Federal and state laws also regulate the relationship between the Bank and its depositors and borrowers, especially in matters regarding the ownership of savings accounts and the form and content of mortgage documents used by the Bank.

The Bank must file reports with the OTS and the FDIC concerning its activities and financial condition. In addition, the Bank must obtain regulatory approvals before entering into some transactions like mergers with or acquisitions of other financial institutions. This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the SAIF and our depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in regulations, whether by the OTS, the FDIC or the Congress, could have a material adverse impact on us, the Bank and our operations.

Insurance of Deposit Accounts. The SAIF, as administered by the FDIC, insures the Bank's deposit accounts up to the maximum amount permitted by law. The FDIC may terminate insurance of deposits upon a finding that the institution:

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

- o has engaged in unsafe or unsound practices;
- o is in an unsafe or unsound condition to continue operations; or
- o has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the institution's primary regulator.

The FDIC charges an annual assessment for the insurance of deposits based on the risk a particular institution poses to its deposit insurance fund. Under this system as of December 31, 2001, SAIF members paid within a range of 0% to 0.27% of insured domestic deposits, depending upon the institution's risk classification. This risk classification is based on an institution's capital group and supervisory subgroup assignment.

The Bank also pays, in addition to its normal deposit insurance premium as a member of the SAIF, an amount equal to approximately 0.0212% of insured deposits toward the retirement of the Financing Corporation bonds (known as FICO Bonds) issued in the 1980s to assist in the recovery of the savings and loan industry. These assessments will continue until the FICO Bonds mature in 2017.

Regulatory Capital Requirements. The Bank must meet regulatory capital standards to be deemed in compliance with OTS capital requirements. OTS capital regulations require savings associations to meet the following three capital standards:

- o tangible capital equal to 1.5% of total adjusted assets;
- o leverage capital, or "core capital," equal to 3% of total adjusted assets for institutions such as the Bank; and
- o risk-based capital equal to 8.0% of total risk-based assets.

A savings association with a greater than "normal" level of interest rate exposure must deduct an interest rate risk component in calculating its total capital for purposes of determining whether it meets its risk-based capital requirement. Interest rate exposure is measured, generally, as equal to:

- o the decline in an institution's net portfolio value that would result from a 200 basis point increase or decrease in market interest rates, whichever would result in a lower net portfolio value, divided by
- o the estimated economic value of the savings association's assets.

The interest rate risk component a savings association must deduct from its total capital is equal to:

- o one-half of the difference between an institution's measured exposure and "normal" interest rate risk exposure, which the OTS defines as 2%, multiplied by
- o the estimated economic value of the institution's assets.

In August 1995, the OTS indefinitely delayed implementation of its interest rate risk regulation. However, based on the asset / liability structure of the Bank at December 31, 2001, the Bank would not have been required

to deduct an interest rate component in calculating its total risk-based capital had the OTS's interest rate risk regulation been in effect.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

The OTS views its capital regulation requirements as minimum standards, and it expects most institutions to maintain capital levels well above the minimum. In addition, the OTS regulations provide that the OTS may establish minimum capital levels higher than those provided in the regulations for individual savings associations, upon a determination that the savings association's capital is or may become inadequate in view of its circumstances. The OTS regulations provide that higher individual minimum regulatory capital requirements may be appropriate in circumstances where, among others:

- o a savings association has a high degree of exposure to interest rate risk, prepayment risk, credit risk, concentration of credit risk, other risks arising from nontraditional activities, or similar risks or a high proportion of off-balance sheet risk;
- o a savings association is growing, either internally or through acquisitions, at a rate that presents supervisory issues; or
- o a savings association may be adversely affected by activities or condition of its holding company, affiliates, subsidiaries or other persons, or savings associations with which it has significant business relationships.

The Bank is not required to meet any individual minimum regulatory capital requirement. At December 31, 2001, the Bank's regulatory capital exceeded all minimum regulatory capital requirements.

As a result of a number of federally insured financial institutions extending their risk selection standards to attract lower credit quality accounts due to their having higher interest rates and fees, the federal banking regulatory agencies jointly issued Interagency Guidelines on Subprime Lending. Subprime lending involves extending credit to individuals with less than perfect credit histories.

The agencies guidelines consider subprime lending a high-risk activity that is unsafe and unsound if the risks associated with subprime lending are not properly controlled. Specifically, the 2001 guidelines direct examiners to expect regulatory capital one and one-half to three times higher than that typically set aside for prime assets for institutions that:

- o have subprime assets equal to 25% or higher of Tier 1 capital, or
- o have subprime portfolios experiencing rapid growth or adverse performance trends, are administered by inexperienced management, or have inadequate or weak controls.

Our subprime portfolio, pursuant to our definition, represented 192% of Tier 1 capital as of year-end 2001. Any requirement for us to maintain additional regulatory capital as a result of our activities in subprime lending could have an adverse affect on our future prospects and operations and may restrict our ability to grow. If we are unable to comply with any new capital requirements imposed upon regulatory examination, we may be subject to the prompt corrective action regulations of the OTS. Although we believe we maintain appropriate controls and regulatory capital for our subprime activities, we cannot determine whether, or to what extent, additional capital requirements will be imposed on us after periodic examinations by the OTS.

The Home Owners' Loan Act permits savings associations not in compliance with the OTS capital standards to seek an exemption from penalties or sanctions for noncompliance. The OTS will grant an exemption only if the savings association meets strict requirements. In addition, the OTS must deny the exemption in some circumstances. If the OTS does grant an exemption, the savings

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

association still may be exposed to enforcement actions for other violations of law or unsafe or unsound practices or conditions.

Prompt Corrective Action. The OTS's prompt corrective action regulation requires the OTS to take mandatory actions and authorizes the OTS to take discretionary actions against a savings association that falls within undercapitalized capital categories specified in the regulation.

The regulation establishes five categories of capital classification:

- o "well capitalized;"
- o "adequately capitalized;"
- o "undercapitalized;"

12

- o "significantly undercapitalized;" and
- o "critically undercapitalized."

The regulation uses an institution's risk-based capital, leverage capital and tangible capital ratios to determine the institution's capital classification. At December 31, 2001, the Bank exceeded the capital requirements of a well capitalized institution under applicable OTS regulations.

Loans-to-One-Borrower. Savings associations generally are subject to the lending limits applicable to national banks. With limited exceptions, the maximum amount that a savings association or a national bank may lend to any borrower, including some related entities of the borrower, at one time may not exceed:

- o 15% of the unimpaired capital and surplus of the institution, plus
- o an additional 10% of unimpaired capital and surplus if the loans are fully secured by readily marketable collateral.

Savings associations are additionally authorized to make loans to one borrower, for any purpose:

- o in an amount not to exceed \$500,000; or
- o by order of the Director of OTS, in an amount not to exceed the lesser of \$30,000,000 or 30% of unimpaired capital and surplus to develop residential housing, provided:
  - o the purchase price of each single-family dwelling in the development does not exceed \$500,000;
  - o the savings association is in compliance with its capital requirements;
  - o the loans comply with applicable loan-to-value requirements; and
  - o the aggregate amount of loans made under this authority does not exceed 15% of unimpaired capital and surplus.

At December 31, 2001, the Bank's loans-to-one-borrower limit was \$128 million based upon the 15% of unimpaired capital and surplus measurement.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Qualified Thrift Lender Test. The OTS requires savings associations to meet a qualified thrift lender test. The qualified thrift lender test may be met either by maintaining a specified level of assets in qualified thrift investments as specified in the Home Owners' Loan Act or by meeting the definition of a "domestic building and loan association." Qualified thrift investments are primarily residential mortgages and related investments, including some mortgage-related securities. The required percentage of investments under the Home Owners' Loan Act is 65% of assets while the Internal Revenue Code requires investments of 60% of assets. An association must be in compliance with the qualified thrift lender test or the definition of domestic building and loan association on a monthly basis in nine out of every 12 months. Associations failing to meet the qualified thrift lender test are generally allowed only to engage in activities permitted for both national banks and savings associations.

The FHLB also relies on the qualified thrift lender test. A savings association will only enjoy full borrowing privileges from an FHLB if the savings association is a qualified thrift lender. As of December 31, 2001, the Bank was in compliance with its qualified thrift lender test requirement and met the definition of a domestic building and loan association.

Affiliate Transactions. Transactions between a savings association and its "affiliates" are quantitatively and qualitatively restricted under the Federal Reserve Act. Affiliates of a savings association include, among other entities, the savings association's holding company and companies that are under common control with the savings association.

In general, a savings association or its subsidiaries are limited in their ability to engage in "covered transactions" with affiliates:

- o to an amount equal to 10% of the association's capital and surplus, in the case of covered transactions with any one affiliate; and
- o to an amount equal to 20% of the association's capital and surplus, in the case of covered transactions with all affiliates.

13

In addition, a savings association and its subsidiaries may engage in covered transactions and other specified transactions only on terms and under circumstances that are substantially the same, or at least as favorable to the savings association or its subsidiary, as those prevailing at the time for comparable transactions with nonaffiliated companies. A "covered transaction" includes:

- o a loan or extension of credit to an affiliate;
- o a purchase of investment securities issued by an affiliate;
- o a purchase of assets from an affiliate, with some exceptions;
- o the acceptance of securities issued by an affiliate as collateral for a loan or extension of credit to any party; or
- o the issuance of a guarantee, acceptance or letter of credit on behalf of an affiliate.

In addition, under the OTS regulations:

- o a savings association may not make a loan or extension of credit to an affiliate unless the affiliate is engaged only in activities

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

permissible for bank holding companies;

- o a savings association may not purchase or invest in securities of an affiliate other than shares of a subsidiary;
- o a savings association and its subsidiaries may not purchase a low-quality asset from an affiliate;
- o covered transactions and other specified transactions between a savings association or its subsidiaries and an affiliate must be on terms and conditions that are consistent with safe and sound banking practices; and
- o with some exceptions, each loan or extension of credit by a savings association to an affiliate must be secured by collateral with a fair value ranging from 100% to 130%, depending on the type of collateral, of the amount of the loan or extension of credit.

The OTS regulations generally exclude all non-bank and non-savings association subsidiaries of savings associations from treatment as affiliates, except to the extent that the OTS or the Federal Reserve decides to treat these subsidiaries as affiliates. The regulations also require savings associations to make and retain records that reflect affiliate transactions in reasonable detail and provides that specified classes of savings associations may be required to give the OTS prior notice of affiliate transactions.

**Capital Distribution Limitations.** A savings association that is a subsidiary of a savings and loan holding company, such as the Bank, must file an application or a notice with the OTS at least 30 days before making a capital distribution. Savings associations are not required to file an application for permission to make a capital distribution and need only file a notice if the following conditions are met:

- o they are eligible for expedited treatment under OTS regulations;
- o they would remain adequately capitalized after the distribution;
- o the annual amount of capital distribution does not exceed net income for that year to date added to retained net income for the two preceding years; and
- o the capital distribution would not violate any agreements between the OTS and the savings association or any OTS regulations.

Any other situation would require an application to the OTS. The OTS may disapprove an application or notice if the proposed capital distribution would:

- o make the savings association undercapitalized, significantly undercapitalized or critically undercapitalized,
- o raise safety or soundness concerns or
- o violate a statute, regulation or agreement with the OTS (or with the FDIC), or a condition imposed in an OTS approved application or notice.

**Privacy.** Under the Financial Services Modernization Act, federal banking regulators adopted rules that will limit the ability of banks and other financial institutions to disclose non-public information about consumers to

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

nonaffiliated third parties. Pursuant to those rules, financial institutions must provide:

- o initial notices to customers about their privacy policies, describing the conditions under which they may disclose nonpublic personal information to nonaffiliated third parties and affiliates;
- o annual notices of their privacy policies to current customers; and
- o a reasonable method for customers to "opt out" of disclosures to nonaffiliated third parties.

These privacy provisions affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors.

**Activities of Subsidiaries.** A savings association seeking to establish a new subsidiary, acquire control of an existing company or conduct a new activity through a subsidiary must provide 30 days prior notice to the FDIC and the OTS and conduct any activities of the subsidiary in compliance with regulations and orders of the OTS. The OTS has the power to require a savings association to divest any subsidiary or terminate any activity conducted by a subsidiary that the OTS determines to pose a serious threat to the financial safety, soundness or stability of the savings association or to be otherwise inconsistent with sound banking practices.

**Community Reinvestment Act and the Fair Lending Laws.** Savings associations have a responsibility under the Community Reinvestment Act and related regulations of the OTS to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. An institution's failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in regulatory restrictions on its activities and the denial of applications. In addition, an institution's failure to comply with the Equal Credit Opportunity Act and the Fair Housing Act could result in the OTS, other federal regulatory agencies as well as the Department of Justice taking enforcement actions.

**Federal Home Loan Bank System.** The Bank is a member of the FHLB system. Among other benefits, each FHLB serves as a reserve or central bank for its members within its assigned region. Each FHLB is financed primarily from the sale of consolidated obligations of the FHLB system. Each FHLB makes available loans or advances to its members in compliance with the policies and procedures established by the Board of Directors of the individual FHLB.

As an FHLB member, the Bank is required to own capital stock in an FHLB in an amount equal to the greater of:

- o 1% of its aggregate outstanding principal amount of its residential mortgage loans, home purchase contracts and similar obligations at the beginning of each calendar year;
- o 5% of its FHLB advances or borrowings; or
- o \$500.

The Bank's required investment in FHLB stock, based on December 31, 2001 financial data, was \$98 million. At December 31, 2001, the Bank had \$113 million of FHLB stock.

The Gramm-Leach-Bliley Act made significant reforms to the FHLB system, including:

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

- o Expanded Membership - (i) expands the uses for, and types of, collateral for advances; (ii) eliminates bias toward qualified thrift lenders; and (iii) removes capital limits on advances using real estate related collateral (e.g., commercial real estate and home equity loans).
- o New Capital Structure - each FHLB is allowed to establish two classes of stock: Class A is redeemable within six months of notice; and Class B is redeemable within five years notice. Class B is valued at 1.5 times the value of Class A stock. Each FHLB will be required to maintain minimum capital equal to 5% of equity. Each FHLB, including our FHLB of San Francisco, submitted capital plans for review and approval by the Federal Housing Finance Board.
- o Voluntary Membership - federally chartered savings associations, such as the Bank, are no longer required to be members of the system.

15

- o REFCorp Payments - changes the amount paid by the system on debt incurred in connection with the thrift crisis in the late 1980s from a fixed amount to 20% of net earnings after deducting certain expenses.

At this time it is not possible to predict the impact, if any, such changes or capital plans will have on our financial condition or results of operation.

Federal Reserve System. The Federal Reserve requires all depository institutions to maintain non-interest-bearing reserves at specified levels against their transaction accounts and non-personal time deposits. These transaction accounts include checking, NOW and Super NOW checking accounts. The balances a savings association maintains to meet the reserve requirements imposed by the Federal Reserve may be used to satisfy the liquidity requirements that are imposed by the OTS. At December 31, 2001, the Bank was in compliance with these requirements.

Proposed Legislation. From time to time, new laws are proposed that could have an effect on the financial institutions industry. For example, legislation is currently being considered in the U.S. House of Representatives Financial Institutions Subcommittee which would:

- o Merge the Bank Insurance Fund ("BIF") and the SAIF.
- o Increase the current deposit insurance coverage limit for insured deposits to \$130,000 and index future coverage limits to inflation.
- o Increase deposit insurance coverage limits for municipal deposits.
- o Double deposit insurance coverage limits for individual retirement accounts.
- o Even out bank deposit insurance premiums to avoid sharp increases during times of recession.

While we cannot predict whether such proposals will eventually become law, they could have an effect on our operations and the way we conduct business.

### REGULATION OF DSL SERVICE COMPANY

DSL Service Company is licensed as a real estate broker under the California Real Estate Law and as a contractor with the Contractors State

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

License Board. Thus, the real estate investment activities of DSL Service Company, including development, construction and property management activities relating to its portfolio of projects, are governed by a variety of laws and regulations. Changes in the laws and regulations or their interpretation by agencies and the courts occur frequently. DSL Service Company must comply with various federal, state and local laws, ordinances, rules and regulations concerning zoning, building design, construction, hazardous waste and similar matters. Environmental laws and regulations also affect the operations of DSL Service Company, including regulations pertaining to availability of water, municipal sewage treatment capacity, land use, protection of endangered species, population density and preservation of the natural terrain and coastlines. These and other requirements could become more restrictive in the future, resulting in additional time and expense in connection with DSL Service Company's real estate activities.

With regard to environmental matters, the construction products industry is regulated by federal, state and local laws and regulations pertaining to several areas including human health and safety and environmental compliance. The Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986, as well as analogous laws in some states, create joint and several liability for the cost of cleaning up or correcting releases to the environment of designated hazardous substances. Among those who may be held jointly and severally liable are:

- o those who generated the waste;
- o those who arranged for disposal;
- o those who owned or operated the disposal site or facility at the time of disposal; and
- o current owners.

In general, this liability is imposed in a series of governmental proceedings initiated by the government's identification of a site for initial listing as a "Superfund site" on the National Priorities List or a similar state list and the government's identification of potentially responsible parties who may be liable for cleanup costs. None of the DSL Service Company's project sites are listed as a "Superfund site."

16

In addition, California courts have imposed warranty-like responsibility upon developers of new housing for defects in structure and the housing site, including soil conditions. This responsibility is not necessarily dependent upon a finding that the developer was negligent.

As a licensed entity, DSL Service Company is also examined and supervised by the California Department of Real Estate and the Contractors State License Board.

### TAXATION

Federal. A savings institution is taxed like other corporations for federal income tax purposes, and are required to comply with income tax statutes and regulations similar to those applicable to large commercial banks. The Bank's bad debt deduction is determined under the specific charge-off method, which allows the Bank to take an income tax deduction for these loans only when they have been determined to be wholly or partially worthless.

In addition to the regular income tax, corporations are also subject to an

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

alternative minimum tax. This tax is computed at 20% of the corporation's regular taxable income, after taking certain adjustments into account. The alternative minimum tax applies to the extent that it exceeds the regular income tax liability.

A corporation that incurs alternative minimum tax generally is entitled to take this tax as a credit against its regular tax liability in later years to the extent that the regular tax liability in these later years exceeds the alternative minimum tax.

State. The Bank uses California's financial corporation income tax rate to compute its California franchise tax liability. This rate is higher than the California non-financial corporation income tax rate because the financial corporation income tax rate reflects an amount "in lieu" of local personal property and business license taxes that are paid by non-financial corporations, but not by banks or other financial corporations. The financial corporation income tax rate was 10.84% for both 2001 and 2000.

The Bank files a California franchise tax return on a combined reporting basis. Other income and franchise tax returns are filed on a separate-entity basis in various other states. The Bank anticipates that additional state income and franchise tax returns will be required in future years as its lending business is expanded nationwide.

The Internal Revenue Service and various state taxing authorities have examined our tax returns for all tax years through 1995, and are currently reviewing returns filed for the 1996 and 1997 tax years. The Bank's management believes it has adequately provided for potential exposure with regard to issues that may be raised in the years currently under examination. Our tax years subsequent to 1997 remain open to review by federal and state tax authorities.

### FACTORS THAT MAY AFFECT FUTURE RESULTS

The following discusses certain factors which may affect our financial results and operations and should be considered in evaluating Downey.

Economic Conditions and Geographic Concentrations. Downey is headquartered in and its operations are concentrated in California. As a result of this geographic concentration, our results depend largely upon economic conditions in the state. Leading business forecasters and economists predict that economic growth will likely be modest in 2002 and unemployment rates will likely rise. A significant contributor to the projected 2002 forecast is the impact from the terrorist attack occurring on September 11, 2001 resulting in job losses in the travel and entertainment sector and other businesses. A deterioration in economic conditions could have a material adverse impact on the quality of our loan and real estate portfolios and the demand for our products and services.

Interest Rates. We anticipate that short-term interest rate levels will likely remain relatively stable throughout most of 2002, with the possibility rates might increase modestly in the latter part of the year. If interest rates vary substantially from present levels, our results may differ materially from current levels. Changes in interest rates will influence the growth of loans, investments and deposits and affect the rates received on loans and investment securities and paid on deposits. Changes in interest rates also affect the value of our recorded mortgage servicing rights on loans we service for others, generally increasing in value as interest rates rise and declining as interest rates fall. If interest rates were to increase significantly, the economic feasibility of real estate investment activities also could be adversely affected.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Government Regulation and Monetary Policy. The financial services industry is subject to extensive federal and state supervision and regulation. Significant new laws or changes in, or repeals of, existing laws may cause our results to differ materially. Further, federal monetary policy, particularly as implemented through the Federal Reserve System, significantly affects credit conditions for Downey, primarily through open market operations in United States government securities, the discount rate for borrowings and reserve requirements, and a material change in these conditions would be likely to have a material impact on our results.

Competition. The banking and financial services business in our market areas is highly competitive. The increasingly competitive environment is a result primarily of changes in regulation, changes in technology and product delivery systems, and the accelerating pace of consolidation among financial services providers. Our results may differ if circumstances affecting the nature or level of competition change.

Credit Quality. A significant source of risk arises from the possibility that losses will be sustained because borrowers, guarantors and related parties may fail to perform in accordance with the terms of their loans. We have adopted prudent underwriting and loan quality monitoring systems, procedures and credit policies, including the establishment and review of the allowance for loan losses, that management believes are appropriate to minimize this risk by tracking loan performance, assessing the likelihood of nonperformance and diversifying our loan portfolio. Such policies and procedures, however, may not prevent unexpected losses that could materially adversely affect our results.

18

### ITEM 2. PROPERTIES

#### BRANCHES

The corporate offices of Downey, the Bank and DSL Service Company are located at 3501 Jamboree Road, Newport Beach, California 92660. Part of that corporate facility houses a branch office of the Bank. Certain departments (warehousing, record retention, etc.) are located in other owned and leased facilities in Orange County, California. The majority of our administrative operations, however, are located in our corporate headquarters.

At December 31, 2001, we had 137 branches. We owned the building and land occupied by 59 of our branches and we owned one branch building on leased land. We operate branches in 77 locations (including 68 in-store locations) with leases or licenses expiring at various dates through August 2011, with options to extend the term.

The net book value of our owned branches, including the one on leased land, totaled \$84 million at December 31, 2001, and the net book value of our leased branch offices totaled \$3 million at December 31, 2001. The net book value of our furniture and fixtures, including electronic data processing equipment, was \$25 million at December 31, 2001.

For additional information regarding our offices and equipment, see Note 1 on page 68 and Note 9 on page 84 of Notes to Consolidated Financial Statements.

#### ELECTRONIC DATA PROCESSING

We utilize a mainframe computer system with use of various third-party vendors' software for retail deposit operations, loan servicing, accounting and loan origination functions, including our operations conducted over the

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Internet. The net book value of our electronic data processing equipment, including personal computers and software, was \$13 million at December 31, 2001.

### ITEM 3. LEGAL PROCEEDINGS

We have been named as a defendant in legal actions arising in the ordinary course of business, none of which, in the opinion of management, is material.

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SHAREHOLDERS

No matters were submitted to shareholders during the fourth quarter of 2001.

19

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Our common stock is traded on the New York Stock Exchange ("NYSE") and the Pacific Exchange ("PCX") with the trading symbol "DSL." At February 28, 2002, we had approximately 757 stockholders of record (not including the number of persons or entities holding stock in nominee or street name through various brokerage firms) and 28,213,048 outstanding shares of common stock.

The following table sets forth for the quarters indicated the range of high and low sale prices per share of our common stock as reported on the NYSE Composite Tape.

	2001				2000			
	4th Quarter	3rd Quarter	2nd Quarter	1st Quarter	4th Quarter	3rd Quarter	2nd Quarter	1st Quarter
High .....	\$44.46	\$58.81	\$48.85	\$54.31	\$60.88	\$40.94	\$33.00	\$21.44
Low .....	32.98	40.61	41.44	39.45	33.13	29.94	20.44	18.75
End of period	41.25	44.13	47.26	45.30	55.00	39.50	28.98	21.25

During 2001, we paid quarterly cash dividends totaling \$0.36 per share, aggregating \$10.2 million compared to \$0.36 per share, aggregating \$10.1 million during 2000. On February 22, 2002, we paid a \$0.09 per share quarterly cash dividend, aggregating \$2.5 million.

We may pay additional dividends out of funds legally available therefor at such times as the Board of Directors determines that dividend payments are appropriate. The Board of Directors' policy is to consider the declaration of dividends on a quarterly basis.

The payment of dividends by the Bank to Downey is subject to OTS regulations. For further information regarding these regulations, see Business--Regulation--Regulation of the Bank--Capital Distribution Limitations on page 14.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain statements under this caption constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995 which involve risks and uncertainties. Our actual results may differ significantly from the results discussed in such forward-looking statements. Factors that might cause such a difference include, but are not limited to, economic conditions, competition in the geographic and business areas in which we conduct our operations, fluctuations in interest rates, credit quality and government regulation. For additional information concerning these factors, see Business--Factors that May Affect Future Results on page 17.

OVERVIEW

Our net income for 2001 totaled a record \$120.2 million or \$4.25 per share on a diluted basis. This represented the fourth consecutive year of record net

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

income, which increased by \$26.6 million or 28.3% from \$93.6 million or \$3.31 per share for 2000, excluding the \$5.6 million or \$0.20 per share after-tax gain from the sale of our indirect automobile finance subsidiary from the year-ago results. Including the gain, net income in 2000 totaled \$99.2 million or \$3.51 per share. On January 1, 2001, we adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended, ("SFAS 133") and, as a result, recorded an immaterial cumulative effect of change in accounting principle. For further information, see Financial Condition--Newly Adopted Accounting Principles on page 59.

The increase in our adjusted net income between years was due to higher net income from our banking operations, which increased on an adjusted basis by \$30.3 million or 33.9% to \$119.5 million. That increase more than offset a \$3.7 million decline to \$0.7 million in net income from our real estate investment activities due primarily to lower net gains from sales of properties. Adjusted net income from our banking operations increased due to the following:

- o net interest income increased \$43.3 million or 16.5% due to increases in both average earning assets and our effective interest rate spread;
- o net gains from sales of loans, mortgage-backed securities and mortgage servicing rights increased \$20.1 million due primarily to a record volume of sales;
- o loan and deposit related fees increased \$19.7 million; and
- o provision for loan losses declined \$0.7 million.

Those favorable items were partially offset by the following:

- o loan servicing losses increased \$7.7 million primarily due to higher provisions to the valuation allowance for mortgage servicing rights reflecting the continued decline in market interest rates that increased the expected rate of prepayments on loans we service for others; and
- o operating expenses increased \$23.6 million reflecting an increased number of branch locations, which expanded our market presence, and higher loan origination activity. Despite the increase in operating expense, our efficiency ratio (the percentage of our net interest income and other income, excluding income from real estate investment activities and investment securities gains or losses used to cover our general and administrative expense) improved from 46.2% in 2000 to 43.9% in 2001.

For 2001, our return on average assets was 1.11% and our return on average equity was 17.81%. Both these performance ratios compare favorably to our adjusted 2000 returns of 0.92% for average assets and 16.20% for average equity.

Our assets increased \$211 million or 1.9% during 2001 to \$11.1 billion at year-end, following a 15.8% increase during 2000. The slower growth in 2001 reflected a significant increase in loan repayments as borrowers took advantage of record low mortgage interest rates. Our single family loan originations increased from \$5.0 billion in 2000 to a record \$8.0 billion in 2001, of which \$4.8 billion were originated for sale in the secondary market. Of the 2001 total, \$3.2 billion represented originations of loans for portfolio, of which \$428 million represented subprime credits. In addition to single family loans, we originated \$180 million of other loans during the year, including \$118 million of construction and land loans.

We funded our asset growth with deposits that increased 6.6% to a record year-end level of \$8.6 billion at December 31, 2001.

Non-performing assets totaled \$93 million at December 31, 2001, up from \$55 million a year ago. This increase was due primarily to a rise in residential non-performers, of which \$12 million was in the subprime category. When measured as a percentage of total assets, our non-performing assets rose from 0.50% at year-end 2000 to 0.83% at year-end 2001.

At December 31, 2001, the Bank exceeded all regulatory capital tests, with capital-to-asset ratios of 7.10% for tangible and core capital and 14.53% for risk-based capital. These capital levels are significantly above the "well capitalized" standards defined by the federal banking regulators of 5% for core and tangible capital and 10% for risk-based capital. For further information, see Business--Regulation--Regulation of the Bank--Insurance of Deposit Accounts on page 11, Financial Condition--Investments in Real Estate and Joint Ventures on page 38 and Financial Condition--Regulatory Capital Compliance on page 58.

We have established various accounting policies which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Our significant accounting policies are described in the Notes to the Consolidated Financial Statements beginning on page 68. Certain accounting policies require us to make significant estimates and assumptions which have a material impact on the carrying value of certain assets and liabilities, and we consider these to be critical accounting policies. The estimates and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Actual results could differ significantly from these estimates and assumptions which could have a material impact on the carrying value of assets and liabilities at the balance sheet dates and our results of operations for the reporting periods.

We believe the following are critical accounting policies that require the most significant estimates and assumptions that are particularly susceptible to significant change in the preparation of our financial statements:

- o Allowance for losses on loans and real estate. For further information, see Financial Condition--Problem Loans and Real Estate--Allowance for Losses on Loans and Real Estate on page 52 and Note 1 of Notes to the Consolidated Financial Statements on page 68.
- o Allowance for mortgage servicing rights. For further information, see Note 1 on page 68 and Note 11 on page 85 of Notes to the Consolidated Financial Statements.

## RESULTS OF OPERATIONS

### NET INTEREST INCOME

Net interest income is the difference between the interest and dividends earned on loans, mortgage-backed securities and investment securities ("interest-earning assets") and the interest paid on deposits, borrowings and capital securities ("interest-bearing liabilities"). The spread between the yield on interest-earning assets and the cost of interest-bearing liabilities and the relative dollar amounts of these assets and liabilities principally affects net interest income.

Our net interest income totaled \$305.6 million in 2001, up \$43.1 million or

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

16.4% from 2000 and \$98.1 million or 47.3% greater than 1999. The 2001 improvement over 2000 primarily reflected increases in both average earning assets and our effective interest rate spread. Our average earning assets increased by \$613 million or 6.2% to \$10.5 billion. Our effective interest rate spread averaged 2.91% in 2001, up from 2.66% in 2000 and 2.88% in 1999. This improvement was due to our cost of funds declining more rapidly than our yield on earning assets. This is indicative of what typically happens when interest rates decline, as there is an administrative lag in the repricing of our loans which are primarily priced to the Federal Home Loan Bank ("FHLB") Eleventh District Cost of Funds Index ("COFI").

The following table presents for the periods indicated the total dollar amount of:

- o interest income from average interest-earning assets and the resultant yields; and
- o interest expense on average interest-bearing liabilities and the resultant costs, expressed as rates.

The table also sets forth our net interest income, interest rate spread and effective interest rate spread. The effective interest rate spread reflects the relative level of interest-earning assets to interest-bearing liabilities and equals:

- o the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities, divided by
- o average interest-earning assets for the period.

The table also sets forth our net interest-earning balance--the difference between the average balance of interest-earning assets and the average balance of total deposits, borrowings and capital securities--for the periods indicated. We included non-accrual loans in the average interest-earning assets balance. We included interest from non-accrual loans in interest income only to the extent we received payments and to the extent we believe we will recover the remaining principal balance of the loans. We computed average balances for the year using the average of each month's daily average balance during the periods indicated.

Changes in our net interest income are a function of both changes in rates and changes in volumes of interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding changes in our interest income and expense for the years indicated. For each category of interest-earning assets and interest-bearing liabilities, we have provided information on changes attributable to:

- o changes in volume--changes in volume multiplied by comparative period rate;
- o changes in rate--changes in rate multiplied by comparative period volume; and
- o changes in rate/volume--changes in rate multiplied by changes in volume.

Interest-earning asset and interest-bearing liability balances used in the calculations represent yearly average balances computed using the average of each month's daily average balance during the periods indicated.

=====						

### PROVISION FOR LOAN LOSSES

Provision for loan losses was \$2.6 million in 2001, down from \$3.3 million in 2000 and \$11.3 million in 1999. The decrease is due primarily to lower growth in our loan portfolio than a year ago.

For further information, see Financial Condition--Problem Loans and Real Estate--Allowance for Losses on Loans and Real Estate on page 52.

27

### OTHER INCOME

Our total other income was \$68.5 million in 2001, up from \$50.6 million in 2000 and \$59.3 million in 1999. Other income in 2000 included a \$9.8 million pre-tax gain associated with our sale of the indirect automobile finance subsidiary. Excluding that gain, our other income would have increased by \$27.7 million in 2001 primarily due to:

- o a \$20.4 million increase in loan and deposit related fees due primarily to increases of \$12.6 million in loan prepayment fees and \$4.5 million in deposit related fees; and
- o a \$20.1 million increase in net gains on sales of loans, mortgage-backed securities and mortgage servicing rights.

Those favorable items were partially offset by an increase of \$7.7 million in loan servicing losses as well as a decline of \$4.9 million in income from real estate held for investment. Below is a further discussion of the major other income categories.

### LOAN AND DEPOSIT RELATED FEES

Loan and deposit related fees totaled \$50.5 million in 2001, up from \$30.1

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

million in 2000 and \$20.1 million in 1999. Our loan related fees accounted for \$15.9 million of the increase from 2000, of which \$12.6 million represented higher loan prepayment fees. Our deposit related fees increased by \$4.5 million or 33.8%, primarily due to higher fees from our checking accounts.

The following table presents a breakdown of loan and deposit related fees during the periods indicated.

(In Thousands)	2001	2000	1999

### REAL ESTATE AND JOINT VENTURES HELD FOR INVESTMENT

Income from our real estate and joint ventures held for investment totaled \$3.9 million in 2001, down from \$8.8 million in 2000 and \$19.3 million in 1999.

The \$4.9 million decline in income from real estate held for investment primarily reflected two factors. First, our net gains from sales declined by \$5.5 million to \$0.5 million. Of the decline, \$2.7 million was related to joint venture projects reported in the category equity in net income from joint ventures. Second, we reduced our allowance for losses on real estate and joint ventures by \$0.3 million in 2001, while we provided \$0.9 million to our allowance in 2000.

28

The table below sets forth the key components comprising our income from real estate and joint venture operations during the periods indicated.

### SECONDARY MARKETING ACTIVITIES

Sales of loans and mortgage-backed securities we originated increased in 2001 to a record \$4.6 billion from \$1.7 billion in 2000 and \$2.4 billion in 1999. Net gains associated with these sales totaled \$22.4 million in 2001, up from \$3.3 million in 2000 and \$14.8 million in 1999. Net gains included the capitalization of mortgage servicing rights of \$44.4 million in 2001, \$18.5 million in 2000 and \$29.3 million in 1999.

In addition to sales of loans and mortgage-backed securities, we also sold during 2001 \$602 million of loans serviced for others at an incremental gain of \$0.9 million above the carrying value of the associated mortgage servicing rights.

A loss of \$11.4 million was recorded in loan servicing from our portfolio of loans serviced for others during 2001, compared to a loss of \$3.6 million in 2000 and income of \$1.7 million in 1999. The loss in 2001 reflects a \$10.6 million provision to the valuation allowance for mortgage servicing rights, up from \$6.1 million in 2000, due to the continued drop in interest rates that have increased the expected rate of prepayments on loans serviced for others, as well as reduced the value of associated custodial accounts. At December 31, 2001, we serviced \$5.8 billion of loans for others, compared to \$4.0 billion at December 31, 2000, and \$2.9 billion at December 31, 1999.

The following table presents a breakdown of the components of our loan servicing income (loss) for the periods indicated.

(In Thousands)	2001	2000	1999

<b>Total loan servicing income (loss), net</b>	<b>\$(11,373)</b>	<b>\$ (3,628)</b>	<b>\$ 1,672</b>

For additional information concerning mortgage servicing rights, see Note 11 of Notes to Consolidated Financial Statements on page 85.

### OTHER CATEGORY

The all other category of other income totaled \$1.8 million in 2001, down from \$2.3 million in 2000 and \$3.1 million in 1999.

### OPERATING EXPENSE

Our operating expense totaled \$163.2 million in 2001, up from \$137.5 million in 2000 and \$144.9 million in 1999. The current year increase was due to higher general and administrative expense, which increased by \$26.3 million or 19.3%. That increase was primarily due to higher costs associated with an increased number of branch locations that expanded our market presence and

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

higher loan origination activity.

The following table presents a breakdown of key components comprising operating expense during the periods indicated.

(In Thousands)	2001	2000	1999
Salaries and related costs .....	\$ 99,935	\$ 82,522	\$ 82,522

### PROVISION FOR INCOME TAXES

Our effective tax rate for 2001 was 42.3%, compared to 42.4% in 2000 and 42.3% in 1999. See Note 1 on page 68 and Note 17 on page 90 of Notes to the Consolidated Financial Statements for a further discussion of income taxes and an explanation of the factors which impact Downey's effective tax rate.

### BUSINESS SEGMENT REPORTING

The previous sections of the Results of Operations discussed our consolidated results. The purpose of this section is to present data and discussion on the results of operations of our two business segments--banking and real estate investment. For a description of these business segments and the accounting policies used, see Business on page 1 and Note 1 on page 68 and Note 25 on page 100 of Notes to Consolidated Financial Statements.

The following table presents by business segment our net income for 2001, 2000 and 1999.

(In Thousands)	2001	2000 (1)	1999
Banking net income .....	\$119,454	\$ 94,822	\$ 53,796
Real estate investment net income	727	4,429	10,008
<b>Total net income .....</b>	<b>\$120,181</b>	<b>\$ 99,251</b>	<b>\$ 63,804</b>

### BANKING

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Net income from our banking operations totaled \$119.5 million in 2001, up from \$94.8 million in 2000 and \$53.8 million in 1999. The previously mentioned sale of our indirect automobile finance subsidiary benefited our 2000 net income from banking operations by \$5.6 million. Excluding that gain, net income from our banking operations would have increased during 2001 by \$30.3 million or 33.9%.

The adjusted increase in our 2001 net income reflected the following:

- o a \$43.3 million increase in net interest income due to increases in both our average earning assets and effective interest rate spread;
- o a \$20.1 million increase in net gains from the sales of loans, mortgage-backed securities and mortgage servicing rights;
- o a \$19.7 million increase in loan and deposit related fees; and
- o a \$0.7 million decline in provision for loan losses.

Those favorable items were partially offset by the following:

- o a \$7.7 million increase in loan servicing losses primarily due to higher provisions to the valuation allowance for mortgage servicing rights reflecting the continued decline in market interest rates that increased the expected rate of prepayments on loans we service for others; and
- o a \$23.6 million increase in operating expenses reflecting an increased number of branch locations and higher loan origination activity.

The table below sets forth banking operational results and selected financial data for the periods indicated.

## REAL ESTATE INVESTMENT

Net income from our real estate investment operations totaled \$0.7 million in 2001, down from \$4.4 million in 2000 and \$10.0 million in 1999. The decline was primarily attributed to lower gains from sales, lower recapture of valuation allowances and higher operating expenses due to the settlement of litigation matters associated with certain joint venture partners.

The table below sets forth real estate investment operational results and selected financial data for the periods indicated.

(In Thousands)	2001	2000	1999

## FINANCIAL CONDITION

## LOANS AND MORTGAGE-BACKED SECURITIES

Total loans and mortgage-backed securities, including those we hold for sale, increased only \$48 million or 0.5% from year-end 2000 to a total of \$10.1 billion or 91.2% of assets at December 31, 2001. The increase represents a higher level of single family loans held for sale and mortgage-backed securities available for sale, as loans held for investment declined by \$308 million due primarily to an increase in loan prepayments as a result of the low interest rate environment and borrower preference for fixed rate loans during 2001. Our prepayment speed during the year was 37%, compared to 18% during 2000 and 26% during 1999. This increase reflected, in large part, the changing propensity of

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

borrowers to refinance existing loans given the low market interest rates in 2001.

Our loan originations, including loans purchased, totaled a record \$8.2 billion in 2001, up from \$5.2 billion in 2000 and \$7.2 billion in 1999. This current year increase primarily reflects record originations of one-to-four unit residential loans of \$8.0 billion, of which approximately \$3.2 billion or 40% were for portfolio, with the balance for sale in the secondary market. Our origination of subprime loans totaled \$428 million in 2001, down from \$492 million in 2000.

The table below presents information regarding interest rates and loan origination costs, net of fees collected on loans originated during the periods indicated.

(Dollars in Thousands)	2001	2000	1999	1998
Average interest rate on new loans .....	6.18%	6.10%	5.92%	6.40%
Total loan origination costs (net of fees) and premiums (net of discounts) deferred during the year .....	\$37,527	\$34,797	\$53,181	\$30,600

We originate one-to-four unit residential adjustable rate mortgages both with and without loan origination fees. In adjustable rate mortgage transactions for which we charge no origination fees, we receive a larger margin over the index to which the loan pricing is tied than in those in which we charge fees. In addition, a prepayment fee on these loans is generally required if prepaid within the first three years. This trend towards loans with no origination fees has generally resulted in deferrable loan origination costs exceeding loan origination fees.

Residential one-to-four unit adjustable rate mortgage originations, including loans purchased, were \$3.2 billion during 2001, down from \$3.5 billion in 2000 and \$4.4 billion in 1999. Refinancing activities related to residential one-to-four unit loans, including new loans to refinance existing loans which we or other lenders originated, constituted 75% of originations during the year compared to 42% during 2000 and 63% during 1999. Refinancing activities increased from \$2.1 billion in 2000 to \$6.0 billion in 2001 as a lower interest rate environment existed throughout most of the year. In addition, the majority of residential originations for our portfolio were adjustable rate mortgages tied to COFI, an index which lags behind the movement in market interest rates. For the year, 63% of one-to-four unit originations for investment represented monthly adjusting COFI rate mortgages which provide for negative amortization. In addition, 15% represented adjustable rate mortgages tied to the London Interbank Offered Rate ("LIBOR") index, and 14% were tied to the Constant Maturity Treasury ("CMT") index, neither of which provide for negative amortization, with the balance represented by a variety of other pricing terms. At December 31, 2001, \$6.8 billion of our one-to-four unit adjustable rate mortgages were subject to negative amortization of which \$180 million represented the amount of negative amortization included in the loan balance. For further information, see Business--Banking Activities--Lending Activities--Residential Real Estate Lending on page 3.

Our origination of commercial real estate loans, including loans purchased, totaled \$7 million in 2001, compared to \$24 million in 2000 and \$10 million in 1999. Originations of loans secured by multi-family properties, including loans purchased, totaled less than \$1 million in 2001, compared to \$1 million in both 2000 and 1999.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

During 2001, we originated \$102 million of construction loans, principally for entry level and first time move-up residential tracts. This compares to \$99 million in 2000 and \$149 million in 1999. Our origination of land development loans totaled \$16 million in 2001, compared to \$17 million in 2000 and \$57 million in 1999.

Origination of non-mortgage commercial loans totaled \$18 million in 2001, down from \$19 million in 2000 and \$25 million in 1999. A substantial majority of these originations represented secured loans.

33

Origination of automobile loans totaled \$5 million in 2001, compared to \$57 million in 2000 and \$234 million in 1999. The majority of these originations in prior years represented our indirect lending program that was conducted by Downey Auto Finance Corp., a former subsidiary sold in February 2000, whereby loans to finance the purchase of new or used automobiles were obtained through preapproved automobile dealers. For further information regarding Downey Auto Finance Corp., see Sale of Subsidiary on page 60.

At December 31, 2001, our unfunded loan application pipeline totaled \$1.9 billion. Within that pipeline, we had commitments to borrowers for short-term interest rate locks of \$683 million, of which \$330 million were related to residential one-to-four unit loans being originated for sale in the secondary market. Furthermore, we had commitments on undrawn lines of credit of \$84 million and loans in process of \$53 million. We believe our current sources of funds will enable us to meet these obligations.

34

The following table sets forth the origination, purchase and sale activity relating to our loans and mortgage-backed securities during the periods indicated.

We carry loans for sale at the lower of cost or fair value. At December 31, 2001, no valuation allowance was required as the fair value exceeded book value on an aggregate basis.

At December 31, 2001, our residential one-to-four units subprime portfolio consisted of approximately 79% "A-" credit, 18% "B" credit and 3% "C" credit loans. At year end, the average loan-to-value ratio at origination for these

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

loans was approximately 75%.

36

We carry mortgage-backed securities available for sale at fair value which, at December 31, 2001, reflected an unrealized loss of \$1.3 million. The 2001 year-end unrealized loss, less the associated tax effect, is reflected within a separate component of other comprehensive income (loss) until realized.

The table below sets forth the scheduled contractual maturities of our loan and mortgage-backed securities portfolio at December 31, 2001.

At December 31, 2001, the maximum amount the Bank could have loaned to any one borrower, and related entities, under regulatory limits was \$128 million, or \$214 million for loans secured by readily marketable collateral, compared to \$112 million or \$187 million for loans secured by readily marketable collateral at year-end 2000. We do not expect that these regulatory limitations will adversely impact our proposed lending activities during 2002.

INVESTMENT SECURITIES

The following table sets forth the composition of our investment securities portfolio at the dates indicated.

INVESTMENTS IN REAL ESTATE AND JOINT VENTURES

DSL Service Company participates as an owner of, or a partner in, a variety of real estate development projects, principally retail neighborhood shopping center developments, most of which are located in California. For additional information regarding the location of these real estate investments, see Note 7 of Notes to the Consolidated Financial Statements on page 79. We have completed and substantially leased most of the real estate development projects--with a weighted average occupancy rate of 79% for retail neighborhood shopping centers at December 31, 2001. At December 31, 2001, the Bank had loan commitments of \$13 million to these joint ventures, of which \$7 million was outstanding.

DSL Service Company is entitled to interest on its equity invested in its joint venture projects on a priority basis after third-party debt and shares profits and losses with the developer partner, generally on an equal basis. DSL Service Company has obtained personal guarantees from the principals of the developer partners in a number of the joint ventures and generally requires the developer partner to secure any outstanding obligations to the joint venture, like its portion of operating losses, when the partner is unable to satisfy such obligations on a current basis. Partnership equity or deficit accounts are affected by current period results of operations, additional partner advances,

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

partnership distributions and partnership liquidations.

As of December 31, 2001, DSL Service Company was involved with two joint venture partners. These partners were operators of one office building, one residential housing development project and one in which land was sold, but the partnership remains until a receivable related to that sale is collected. DSL Service Company had nine wholly owned retail neighborhood shopping centers located in California and Arizona.

Our investment in real estate and joint ventures amounted to \$38 million at December 31, 2001, compared to \$18 million at December 31, 2000 and \$42 million at December 31, 1999. During 2001, our investment increased by \$16 million due primarily to a settlement of litigation with former joint venture partners wherein we became the sole owner of two shopping centers.

38

The following table sets forth the condensed balance sheets of DSL Service Company's joint ventures by property type at December 31, 2001, on a historical cost basis. For further information regarding the establishment of loss allowances, see Problem Loans and Real Estate--Allowance for Losses on Loans and Real Estate on page 52.

39

Real estate investments entail risks similar to those our construction and commercial lending activities present. In addition, California courts have imposed warranty-like responsibility upon developers of new housing for defects in structure and the housing site, including soil conditions. This responsibility is not necessarily dependent upon a finding that the developer was negligent. Owners of real property also may incur liabilities with respect to environmental matters, including financial responsibility for clean-up of hazardous waste or other conditions, under various federal and state laws.

DEPOSITS

Our deposits increased \$537 million or 6.6% in 2001 and totaled a year-end record of \$8.6 billion at December 31, 2001. Our lower-rate transaction accounts--i.e., checking, regular passbook and money market--increased \$1.4 billion or 97.3%, while our certificates of deposit decreased \$906 million or 13.7%. Within transaction accounts, approximately 95% of the increase was in our passbook accounts, as depositors moved monies from certificates of deposit as they seemed more interested in liquidity given the relatively low level of interest rates. Our total checking accounts (non-interest and interest bearing) increased 7.3% between year ends. Of the total increase in our deposits, \$79 million was associated with 19 in-store branches and 4 traditional branches we opened during 2001. One of the new traditional branches is located in Arizona, our first in that state. At December 31, 2001, the average deposit size of our traditional branches was \$107 million, while the average size of our in-store branches was \$18 million, or \$24 million excluding the 19 new in-store branches opened within the past 12 months.

The following table sets forth information concerning our deposits and weighted average rates paid at the dates indicated.

BORROWINGS

At December 31, 2001, borrowings totaled \$1.5 billion, down from \$2.0 billion at year-end 2000 and \$2.1 billion at year-end 1999. The decrease in 2001 primarily occurred in advances from the FHLB.

The following table sets forth information concerning our FHLB advances and other borrowings at the dates indicated.

### CAPITAL SECURITIES

On July 23, 1999, we issued \$120 million in capital securities through Downey Financial Capital Trust I. The capital securities pay quarterly cumulative cash distributions at an annual rate of 10.00% of the liquidation value of \$25 per share. Interest expense, including the amortization of deferred issuance costs, on our capital securities was \$12.2 million for 2001. For further information regarding our capital securities, see Note 18 on page 91 of Notes to Consolidated Financial Statements.

42

### ASSET/LIABILITY MANAGEMENT AND MARKET RISK

Market risk is the risk of loss from adverse changes in market prices and interest rates. Our market risk arises primarily from interest rate risk in our lending and deposit taking activities. This interest rate risk primarily occurs to the degree that our interest-bearing liabilities reprice or mature on a different basis--generally more rapidly--than our interest-earning assets. Since our earnings depend primarily on our net interest income, which is the difference between the interest and dividends earned on interest-earning assets and the interest paid on interest-bearing liabilities, one of our principal objectives is to actively monitor and manage the effects of adverse changes in interest rates on net interest income while maintaining asset quality.

In addition to the market risk associated with our lending and deposit taking activities, we also have market risk associated with our secondary marketing activities. Changes in mortgage interest rates, primarily fixed rate mortgages, impact the fair value of loans held for sale as well as our off-balance sheet commitments wherein we have committed to an interest rate with a potential borrower for a loan we intend to sell (known as an interest rate lock derivative). Our objective is to hedge against fluctuations in interest rates through use of forward sale and purchase contracts with government-sponsored enterprises and whole loan sale contracts with various parties. These contracts are typically obtained at the time the interest rate lock commitments are made. Therefore, as interest rates fluctuate, the changes in the fair value of our loans held for sale and interest rate lock commitments tend to be offset by changes in the fair value of the hedge contracts. The method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge. Although we continue to hedge as previously done, SFAS 133, as applied to our risk management strategies, may increase or decrease reported net income and stockholders' equity, depending on levels of interest rates and other variables affecting the fair values of derivative instruments and hedged items, but will have no effect on the overall economics of the transactions.

Changes in mortgage interest rates also impact the value of our mortgage servicing rights. Rising interest rates typically result in slower prepayment speeds on the loans being serviced for others which increases the value of mortgage servicing rights, whereas declining interest rates typically result in faster prepayment speeds which decreases the value of mortgage servicing rights. Currently, we do not hedge our mortgage servicing rights against that risk.

Our Asset/Liability Management Committee is responsible for implementing the interest rate risk management policy which sets forth limits established by the Board of Directors of acceptable changes in net interest income and net

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

portfolio value from specified changes in interest rates. The OTS defines net portfolio value as the present value of expected net cash flows from existing assets minus the present value of expected net cash flows from existing liabilities plus the present value of expected cash flows from existing off-balance sheet contracts. Our Asset/Liability Management Committee reviews, among other items, economic conditions, the interest rate outlook, the demand for loans, the availability of deposits and borrowings, and our current operating results, liquidity, capital and interest rate exposure. In addition, our Asset/Liability Management Committee monitors asset and liability maturities and repricing characteristics on a regular basis and performs various simulations and other analyses to determine the potential impact of various business strategies in controlling interest rate risk and the potential impact of those strategies upon future earnings under various interest rate scenarios. Based on these reviews, our Asset/Liability Management Committee formulates a strategy that is intended to implement the objectives set forth in our business plan without exceeding the net interest income and net portfolio value limits set forth in our interest rate risk policy.

We currently do not enter into hedging contracts for speculative purposes.

43

One measure of our exposure to differential changes in interest rates between assets and liabilities is shown in the following table which sets forth the repricing frequency of our major asset and liability categories as of December 31, 2001, as well as other information regarding the repricing and maturity difference between our interest-earning assets and total deposits, borrowings and capital securities in future periods. We refer to these differences as "gap." We have determined the repricing frequencies by reference to projected maturities, based upon contractual maturities as adjusted for scheduled repayments and "repricing mechanisms"--provisions for changes in the interest and dividend rates of assets and liabilities. We assume prepayment rates on substantially all of our loan portfolio based upon our historical loan prepayment experience and anticipated future prepayments. Repricing mechanisms on a number of our assets are subject to limitations, such as caps on the amount that interest rates and payments on our loans may adjust, and accordingly, these assets do not normally respond to changes in market interest rates as completely or rapidly as our liabilities. The interest rate sensitivity of our assets and liabilities illustrated in the following table would vary substantially if we used different assumptions or if actual experience differed from the assumptions set forth.

December 31, 2000 .....	28.66	7.13	5.94	3.1
December 31, 1999 .....	21.29	10.20	4.97	1.9
<hr/>				

Our six-month gap at December 31, 2001 was a positive 12.01%. This means that more interest-earning assets reprice within six months than total deposits, borrowings and capital securities. This compares to a positive six-month gap of 28.66% at December 31, 2000 and 21.29% at December 31, 1999. Our primary strategy to manage interest rate risk is to emphasize the origination of adjustable rate mortgages or loans with relatively short maturities. Interest rates on adjustable rate mortgages are primarily tied to COFI. We originated and purchased approximately \$3.4 billion during both 2001 and 2000 and \$4.7 billion during 1999 of loans and mortgage-backed securities with adjustable interest rates or maturities of five years or less. These loans represented approximately 99% during 2001, 97% during 2000 and 92% during 1999 of all loans and mortgage-backed securities originated and purchased for investment during these periods.

At December 31, 2001, 99% of our interest-earning assets mature, reprice or are estimated to prepay within five years, compared to 98% at December 31, 2000 and 97% at December 31, 1999. At December 31, 2001, loans held for investment and mortgage-backed securities with adjustable interest rates represented 90% of those portfolios. During 2002, we will continue to offer residential fixed rate loan products to our customers to meet customer demand. We primarily originate fixed rate loans for sale in the secondary market and price them accordingly to create loan servicing income and to increase opportunities for originating adjustable rate mortgages. However, we may originate fixed rate loans for investment when funded with long-term funds to mitigate interest rate risk and

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

small volumes to facilitate the sale of real estate acquired through foreclosure or that meet required yield and other approved guidelines. For further information, see Business--Banking Activities--Lending Activities--Secondary Marketing and Loan Servicing Activities on page 5.

We are better protected against rising interest rates with a positive six-month gap. However, we remain subject to possible interest rate spread compression, which would adversely impact our net interest income if interest rates rise. This is primarily due to the lag in repricing of the indices to which our adjustable rate loans and mortgage-backed securities are tied, as well as the repricing frequencies and periodic interest rate caps on these adjustable rate loans and mortgage-backed securities. The amount of such interest rate spread compression would depend upon the frequency and severity of such interest rate fluctuations.

In addition to measuring interest rate risk via a gap analysis, we establish limits on, and measure the sensitivity of, our net interest income and net portfolio value to changes in interest rates. Changes in interest rates are defined as instantaneous and sustained movements in interest rates in 100 basis point increments. We utilize an internally maintained asset/liability management simulation model to make the calculations which, for net portfolio value, are calculated on a discounted cash flow basis. First, we estimate our net interest income for the next twelve months and the current net portfolio value assuming no change in interest rates from those at period end. Once the base case has been estimated, we make calculations for each of the defined changes in interest rates, to include any associated differences in the anticipated prepayment speed of loans. We then compare those results against the base case to determine the estimated change to net interest income and net portfolio value due to the changes in interest rates. The following are the estimated impacts to net interest income and net portfolio value from various instantaneous, parallel shifts in interest rates based upon our asset and liability structure as of year-ends 2001 and 2000. Since we base these estimates upon numerous assumptions, like the expected maturities of our interest-bearing assets and liabilities and the shape of the period-end interest rate yield curve, our actual sensitivity to interest rate changes could vary significantly if actual experience differs from those assumptions used in making the calculations.

Change in Interest Rates (In Basis Points)	2001		2000	
	Net Interest Income (1)	Net Portfolio Value (2)	Net Interest Income (1)	Net Por Value
+200 .....	(11.3)%	6.0%	(7.5)%	(3.0)
+100 .....	(5.9)	4.6	(3.4)	0.0
(100) .....	4.9	(5.4)	0.7	(4.0)
(200) .....	8.8	(5.2)	2.1	(9.0)

The following table shows our financial instruments that are sensitive to changes in interest rates, categorized by expected maturity, and the instruments' fair values at December 31, 2001. This data differs from that in the gap table as it does not incorporate the repricing characteristics of assets

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

and liabilities. Rather, it only reflects contractual maturities adjusted for anticipated prepayments. Market risk sensitive instruments are generally defined as on and off balance sheet derivatives and other financial instruments. Our assets and liabilities that do not have a stated maturity date, such as certain deposits, are considered to be long term in nature and are reported in the "thereafter" column. We do not consider these financial instruments to be materially sensitive to interest rate fluctuations and historically, the balances have remained fairly constant over various economic conditions. The weighted average interest rates for the various fixed-rate and variable-rate assets and liabilities presented are based on the actual rates that existed at December 31, 2001. The fair value of our financial instruments is determined as follows:

- o Fed funds and FHLB Stock equal their book values due to their short maturities.
- o Investment securities and mortgage-backed securities are based on the closing market price quotations from financial market monitoring firms.
- o Loans held for sale are based on bid quotations from financial market monitoring firms.
- o Loans held for investment takes into consideration discounted cash flows through the estimated maturity or repricing dates using estimated market discount rates.
- o Demand deposits, money market and savings accounts are equal to their book values.
- o Time deposits and borrowings are based on the discounted value of contractual cash flows, which is estimated using wholesale borrowing rates offered for similar terms.

The degree of market risk inherent in loans with prepayment features may not be completely reflected in the disclosures. Although we have taken into consideration our historical prepayment trends to determine expected maturity categories, prepayment features are triggered by changes in the market rates of interest. Unexpected changes may increase the rate of prepayments above those anticipated. As such, the potential loss from such market rate changes may be significantly larger.

=====					

The year-end weighted average yield on our loan portfolio decreased to 7.15% at December 31, 2001, from 8.45% at year-end 2000. The weighted average rate on new loans originated during 2001 was 6.18%, compared to 6.10% during 2000 and 5.92% during 1999. At December 31, 2001, our adjustable rate mortgage portfolio of single family residential loans, including mortgage-backed securities, totaled \$9.0 billion with a weighted average rate of 7.11%, compared to \$9.0 billion with a weighted average rate of 8.47% at December 31, 2000 and \$7.3 billion with a weighted average rate of 7.52% at December 31, 1999.

### PROBLEM LOANS AND REAL ESTATE

#### NON-PERFORMING ASSETS

Non-performing assets consist of loans on which we have ceased the accrual of interest, which we refer to as non-accrual loans, loans restructured at a below market rate, real estate acquired in settlement of loans and repossessed automobiles. Non-performing assets totaled \$93 million at December 31, 2001, compared to \$55 million at December 31, 2000 and \$39 million at December 31, 1999. The increase in our non-performing assets during 2001 was primarily attributed to a rise in residential non-performers, of which \$12 million was in the subprime category and was likely due to the economic slowdown that began in 2001. Of the total, real estate acquired in settlement of loans, net of allowances, represented \$15 million at December 31, 2001, up from \$10 million at December 31, 2000 and \$6 million at December 31, 1999. When measured as a percentage of total assets, our non-performing assets rose to 0.83% at year-end 2001, compared to 0.50% at year-end 2000 and 0.42% at year-end 1999.

48

The following table summarizes our non-performing assets at the dates indicated.

<hr/>				

It is our policy to take appropriate, timely and aggressive action when necessary to resolve non-performing assets. When resolving problem loans, it is our policy to determine collectibility under various circumstances which are intended to result in our maximum financial benefit. We accomplish this by either working with the borrower to bring the loan current or by foreclosing and selling the asset. We perform ongoing reviews of loans that display weaknesses and maintain adequate loss allowances on the loans. For a discussion on our internal asset review policy, refer to Allowance for Losses on Loans and Real Estate on page 52.

All but \$19.8 million of our non-performing assets at December 31, 2001 were located in California, compared to \$7.2 million outside of California a year ago.

We evaluate the need for appraisals for non-performing assets on a periodic basis. We will generally obtain a new appraisal when we believe that there may have been an adverse change in the property operations or in the economic conditions of the geographic market of the property securing our loans. Our policy is to obtain new appraisals at least annually for major real estate acquired in settlement of loans. Throughout 2001, we obtained new appraisals for non-performing loans and real estate acquired in settlement of loans.

**Non-Accrual Loans.** It is our general policy to account for a loan as non-accrual when the loan becomes 90 days delinquent or when collection of interest appears doubtful. In a number of cases, loans may remain on accrual status past 90 days when we determine that continued accrual is warranted because the loan is well-secured and in process of collection. As of December 31, 2001, we had no loans 90 days or more delinquent which remained on accrual status. We reverse and charge against interest income any interest previously accrued with respect to non-accrual loans. We recognize interest income on non-accrual loans to the extent that we receive payments and to the extent that we believe we will recover the remaining principal balance of the loan. We restore these loans to an accrual status only if all past due payments are made by the borrower and the borrower has demonstrated the ability to make future payments of principal and interest. At December 31, 2001, non-accrual loans aggregating \$20 million were less than 90 days delinquent relative to their contractual terms. Additional loans aggregating \$1 million were not contractually past due, but were deemed non-accrual due to management's assessment of the borrower's ability to pay.

**Troubled Debt Restructurings.** We consider a restructuring of a debt a troubled debt restructuring when we, for economic or legal reasons related to

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

the borrower's financial difficulties, grant a concession to the borrower that we would not otherwise grant. Troubled debt restructurings may include changing repayment terms, reducing the stated interest rate or reducing the amounts of principal and/or interest due or extending the maturity date. The restructuring of a loan is intended to recover as much of our investment as possible and to achieve the highest yield possible. At December 31, 2001 we had less than \$1 million of troubled debt restructurings on accrual status representing a single one-to-four unit residential loan.

49

**Real Estate Acquired in Settlement of Loans.** Real estate acquired in settlement of loans consists of real estate acquired through foreclosure or deeds in lieu of foreclosure and totaled \$15 million at December 31, 2001.

**Potential Problem Loan.** We have a commercial real estate loan of \$4 million secured by a shopping center in which the principal tenant closed its store several years ago, but continued paying rent pursuant to its lease obligation. The tenant mitigated its cost by sub-leasing its space. The principal tenant filed bankruptcy subsequent to year end which may adversely affect this loan in future periods.

### DELINQUENT LOANS

When a borrower fails to make required payments on a loan and does not cure the delinquency within 60 days, we normally record a notice of default to commence foreclosure proceedings, so long as we have given any required prior notice to the borrower. If the loan is not reinstated within the time permitted by law for reinstatement, which is normally five business days prior to the date set for the non-judicial trustee's sale, we may then sell the property at a foreclosure sale. In general, if we have elected to pursue a non-judicial foreclosure, we are not permitted under applicable law to obtain a deficiency judgment against the borrower, even if the security property is insufficient to cover the balance owed. At these foreclosure sales, we generally acquire title to the property.

At December 31, 2001, loans delinquent 30 days or more as a percentage of total loans was 1.10%, up from 0.66% at year-end 2000 and 0.58% at year-end 1999. The increase primarily occurred in our residential one-to-four unit and non-mortgage commercial categories. As a percentage of its loan category, residential one-to-four units increased from 0.46% at year-end 2000 to 0.80% at year-end 2001, while subprime residential one-to-four units increased from 1.68% at year-end 2000 to 2.87% at year-end 2001. A higher incidence of delinquency is expected on these subprime loans as these borrowers have a history of delinquencies for which we charge higher interest rates to compensate for that risk. In addition, the loan-to-value ratio on these loans is generally lower thereby providing more equity protection against loss.

50

ALLOWANCE FOR LOSSES ON LOANS AND REAL ESTATE

We maintain a valuation allowance for losses on loans and real estate to provide for losses inherent in those portfolios. The adequacy of the allowance is evaluated quarterly by management to maintain the allowance at levels sufficient to provide for inherent losses. A key component to our evaluation is our internal asset review process.

Our Internal Asset Review Department conducts independent reviews to evaluate the risk and quality of all our assets. Our Internal Asset Review Committee is responsible for the review and classification of assets. The Internal Asset Review Committee members include the Chief Internal Asset Review Officer, Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer, Chief Lending Officer, General Counsel and Director of Compliance/Risk Management. The Internal Asset Review Committee meets quarterly to review and to determine asset classifications and to recommend any changes to asset valuation allowances. With the exception of payoffs or asset sales, the classification of an asset, once established, can be removed or upgraded only upon approval of the Internal Asset Review Committee. The Chief Internal Asset Review Officer reports quarterly to the Audit Committee of the Board of Directors regarding overall asset quality, the adequacy of valuation allowances on classified assets and our adherence to policies and procedures regarding asset classification and valuation.

We adhere to an internal asset review system and loss allowance methodology designed to provide for timely recognition of problem assets and adequate general valuation allowances to cover asset losses. Our current asset monitoring process includes the use of asset classifications to segregate the assets, largely loans and real estate, into various risk categories. We use the various asset classifications as a means of measuring risk for determining the valuation allowance at a point in time. We currently use a six grade system to classify our assets. The current grades are:

- o pass;
- o watch;
- o special mention;
- o substandard;
- o doubtful; and
- o loss.

We consider substandard, doubtful and loss assets "classified assets" for regulatory purposes. A brief description of these classifications follows:

- o The pass classification represents a level of credit quality which contains no well-defined deficiency or weakness.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

- o The watch classification is used to identify an asset that currently contains no well-defined deficiency or weakness, but it is determined to be desirable to closely monitor the asset--e.g., loans to facilitate the sale of real estate acquired in settlement of loans. This category may also be used for assets upgraded from lower classifications where continuing monitoring is deemed appropriate.
- o A special mention asset does not currently expose us to a sufficient degree of risk to warrant an adverse classification, but does possess a correctable deficiency or potential weakness deserving management's close attention.
- o Substandard assets have a well-defined weakness or weaknesses. They are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected.
- o An asset classified doubtful has all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. We consider doubtful to be a temporary classification until resolution of pending weakness issues enables us to more clearly define the potential for loss.
- o That portion of an asset classified as loss is considered uncollectible and of so little value that its continuance as an asset, without establishment of a specific valuation allowance, is not warranted. A loss classification does not mean that an asset has absolutely no recovery or salvage value, but rather it is not reasonable to defer writing off or providing for all or a portion of an impaired asset even though

52

partial recovery may be effected in the future. We will generally classify as loss the balance of the asset that is greater than the net fair value of the asset unless we can expect payment from another source. Therefore, the amount of an asset classified as loss reflects the total of specific valuation allowances established for the particular asset. Specific valuation allowances are not includable in determining the Bank's total regulatory capital.

The OTS has the authority to require us to change our asset classifications. If the change results in an asset being classified in whole or in part as loss, a specific allowance must be established against the amount so classified or that amount must be charged off. OTS guidelines set forth quantitative benchmarks as a starting point for the determination of appropriate levels of general valuation allowances. The OTS directs its examiners to rely on management's estimates of adequate general valuation allowances if the Bank's process for determining adequate allowances is deemed to be sound.

Our policy is to provide an allowance for losses on loans and real estate when it is probable that the value of the asset has been impaired and the loss can be reasonably estimated. To comply with this policy, we have established a monitoring system that requires at least an annual review of all assets in excess of \$5 million and a semiannual review of all assets considered adversely classified or criticized. The monitoring system requires a review of current operating statements, an evaluation of the property's current and past performance, an evaluation of the borrower's ability to repay and the preparation of a discounted cash flow analysis. Based on the results of the

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

review, we may require a new appraisal.

We utilize the asset classifications from our internal asset review process in the following manner to determine the amount of our allowances:

- o General valuation allowances: This element relates to assets with no well-defined deficiency or weakness (i.e., assets classified pass or watch) and takes into consideration loss that is imbedded within the portfolio but has not yet been realized. Generally, we believe that borrowers are impacted by events well in advance of a lender's knowledge that may ultimately result in loan default and eventual loss. Examples of such loss-causing events would be borrower job loss, divorce or medical crisis in the case of single family residential and consumer loans, or loss of a major tenant in the case of commercial real estate loans. General valuation allowances are determined by applying factors that take into consideration past loss experience and asset duration for each major asset type to the associated asset balance.
- o Allocated allowances: This element relates to assets with well-defined deficiencies or weaknesses (i.e., assets classified special mention, substandard, doubtful or loss). We calculate on an ongoing basis loss by credit classification for each major asset type. Factors based upon those loss statistics are applied against current classified asset balances to determine the amount of allocated allowances. Included in these allowances are those amounts associated with assets where it is probable that the value of the asset has been impaired and the loss can be reasonably estimated. If we determine the net fair value of the asset exceeds our carrying value, a specific allowance is recorded for the amount of that difference.
- o Unallocated allowance: This element is more subjective and is reviewed quarterly to take into consideration estimation errors and economic trends that are not necessarily captured in determining the general valuation and allocated allowances.

Our provision for loan losses was \$2.6 million in 2001, down \$0.7 million from 2000. The provision for loan losses exceeded our net loan charge-offs by \$1.7 million resulting in an increase in the allowance for loan losses to \$36.1 million at December 31, 2001. The increase in the allowance reflected an increase of \$0.8 million in general valuation allowances to \$27.8 million. Allocated allowances increased by \$1.8 million in our single-family portfolio and \$0.2 million in our commercial non-mortgage portfolio, which was partially offset by a \$1.0 million decrease in the commercial real estate mortgage portfolio. There was no change in the unallocated allowance of \$2.8 million. During 2000, our provision for loan losses exceeded net loan charge-offs by \$1.9 million and our allowance for loan losses declined by \$3.9 million to \$34.5 million at December 31, 2000. The decline in the allowance reflected a decrease of \$3.6 million in general valuation allowances to \$27.0 million primarily due to a reduction of \$5.5 million associated with the sale of the indirect automobile finance subsidiary which more than offset an increase related to increases in residential one-to-four unit loans. Allocated allowance declined by \$0.2 million of which \$0.3 million was associated with the subsidiary sale. There was no change in the unallocated allowance.

The following table is a summary of the activity in our allowance for loan losses during the years indicated.

=====						

Impaired Loans. We consider a loan to be impaired when, based upon current information and events, we believe it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. We carry impaired loans at either the present value of expected future cash flows discounted at the loan's effective interest rate or at the loan's observable market price or the net fair value of the collateral securing the loan. Impaired loans exclude large groups of smaller balance homogeneous loans that we collectively evaluate for impairment. For us, loans we collectively review for impairment include all single family loans and performing multi-family and non-residential loans having principal balances of less than \$5 million.

In determining impairment, we consider large non-homogeneous loans with the following characteristics: non-accrual loans, debt restructurings and performing loans which exhibit, among other characteristics, high loan-to-value ratios or delinquent taxes. We base the measurement of collateral dependent impaired loans on the fair value of the loan's collateral. We value non-collateral dependent loans based on a present value calculation of expected future cash flows, discounted at the loan's effective rate. We generally use cash receipts on impaired loans not performing according to contractual terms to reduce the carrying value of the loan, unless we believe we will recover the remaining principal balance of the loan. We include impairment losses in the allowance for loan losses through a charge to provision for loan losses. We include adjustments to impairment losses due to changes in the fair value of the collateral of impaired loans in provision for loan losses. Upon disposition of an impaired loan, we record loss of principal through a charge-off to the allowance for loan losses. At December 31, 2001, the recorded investment in loans for which we have recognized impairment totaled \$13 million, down from \$14 million at December 31, 2000. The total allowance for losses related to these loans was \$1 million for both

56

December 31, 2001 and 2000. During 2001, the total interest recognized on the impaired portfolio was \$1.7 million, compared to \$2.9 million in 2000. For further information regarding impaired loans, see Note 6 of the Notes to Consolidated Financial Statements on page 77.

The following table is a summary of the activity in our allowance for loan losses associated with impaired loans during the years indicated.

=====					

In addition to losses charged against the allowance for loan losses, we have maintained a valuation allowance for losses on real estate and joint ventures held for investment. The provision reductions in all years were, in general, due to a continuing improvement in the real estate market which favorably impacted the valuation of certain neighborhood shopping center investments and to a reduction in the investment in certain joint venture investments.

The following table is a summary of the activity in our allowance for real estate and joint ventures held for investment during the years indicated.

=====					

We have recorded losses on real estate acquired in settlement of loans by direct write-off to net operations of real estate acquired in settlement of loans and against an allowance for losses specifically established for these assets. As of September 30, 1999, we are no longer maintaining an allowance for real estate acquired in settlement of loans as we record the related individual assets at the lower of cost or fair value.

The following table is a summary of the activity of our allowance for real estate acquired in settlement of loans during the years indicated.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

### CAPITAL RESOURCES AND LIQUIDITY

Our sources of funds include deposits, advances from the FHLB and other borrowings; proceeds from the sale of real estate, loans and mortgage-backed securities; payments of loans and mortgage-backed securities and payments for and sales of loan servicing; and income from other investments. Interest rates, real estate sales activity and general economic conditions significantly affect repayments on loans and mortgage-backed securities and deposit inflows and outflows.

Our primary sources of funds generated during 2001 were from:

- o principal repayments--including prepayments, but excluding our refinances of our existing loans--on loans and mortgage-backed securities of \$2.9 billion;
- o a net deposit inflow of \$537 million; and
- o maturities and sales of U.S. Treasury securities, agency obligations and other investment securities available for sale of \$492 million.

We used these funds for the following purposes:

- o to originate and purchase loans held for investment, excluding our refinances of our existing loans, of \$2.5 billion;
- o to purchase U.S. Treasury securities, agency obligations and other investment securities available for sale of \$584 million;
- o to paydown our borrowings by \$456 million;
- o to increase our loans held for sale a net \$247 million; and
- o to purchase mortgage-backed securities available for sale of \$116 million.

Our principal source of liquidity is our ability to utilize, as needed, borrowings. Our primary source of borrowings is the FHLB. At December 31, 2001, our FHLB borrowings totaled \$1.5 billion, representing 13.7% of assets. We currently are approved by the FHLB to borrow up to 40% of assets to the extent we provide qualifying collateral and hold sufficient FHLB stock. That approved limit would have permitted us, as of year end, to borrow an additional \$2.9 billion. To the extent 2002 deposit growth falls short of satisfying ongoing commitments to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans, make investments, and continue branch improvement programs, we will utilize our FHLB borrowing arrangement or possibly other sources. At December 31, 2001, we had commitments to borrowers for short-term rate locks of \$683 million, undisbursed loan funds and unused lines and letters of credit of \$137 million, and other contingent liabilities of \$2 million. We believe our current sources of funds will enable us to meet these obligations while maintaining our liquidity at appropriate levels.

Another measure of liquidity in the savings and loan industry is the ratio of cash and eligible investments to the sum of withdrawable savings and borrowings due within one year. At December 31, 2001 and 2000, the Bank's ratio was 4.3%, compared to 4.2% at December 31, 1999.

Downey currently has liquid assets, including due from Bank--interest bearing balances, of \$22 million and can obtain further funds by means of dividends from subsidiaries, subject to certain limitations, or issuance of further debt or equity.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Stockholders' equity totaled \$734 million at December 31, 2001, up from \$625 million at December 31, 2000 and \$532 million at December 31, 1999.

### REGULATORY CAPITAL COMPLIANCE

Our core and tangible capital ratios were 7.10% and our risk-based capital ratio was 14.53% at December 31, 2001. These levels are up slightly from comparable ratios of 6.42% for core and tangible capital and 12.94% for risk-based capital at December 31, 2000, and continue to exceed the "well capitalized" standards of 5.00% for core capital and 10.00% for risk-based capital, as defined by regulation. During 2001, the net investment in our real estate subsidiary increased by \$17 million due primarily to the settlement of litigation with former joint venture partners wherein we became the sole owner of two shopping centers. This increase reduces regulatory capital until we decide to sell the shopping centers.

58

The following table is a reconciliation of the Bank's stockholder's equity to federal regulatory capital as of December 31, 2001.

### NEWLY ADOPTED ACCOUNTING PRINCIPLES

Statement of Financial Accounting Standards No. 133. On January 1, 2001, we adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended ("SFAS 133"). SFAS 133 required the recognition of all derivative financial instruments at fair value and reported as either assets or liabilities on the balance sheet. Derivative instruments used to hedge the variability of forecasted cash flows attributable to interest rate risk were designated as cash flow hedges. At the time of adoption, Downey designated anew certain derivative instruments used for risk management into hedging relationships in accordance with the requirements of the new standard. With the implementation of SFAS 133, Downey recorded

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

transition amounts associated with establishing the fair values of the derivative instruments and hedged items on the balance sheet as an increase of \$62,000 to net gains on sales of loans and mortgage-backed securities and a reduction of \$388,000 in other comprehensive income. All of the other comprehensive income transition amount was reclassified into earnings during the first quarter of 2001.

Under the provisions of SFAS 133, the method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge. Those methods are consistent with the Downey's approach to managing risk.

Although we continue to hedge as previously done, SFAS 133, as applied to our risk management strategies, may increase or decrease reported net income and stockholders' equity, depending on levels of interest rates and other variables affecting the fair values of derivative instruments and hedged items, but will have no effect on the overall economics of the transactions.

### CURRENT ACCOUNTING ISSUES

Statement of Financial Accounting Standards No. 141. In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 141, "Business Combinations" ("SFAS 141") and Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142").

SFAS 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. The use of the pooling-of-interests method will be prohibited. It is not anticipated that the financial impact of this Statement will have a material effect on Downey.

59

Statement of Financial Accounting Standards No. 142. SFAS 142 applies to all acquired intangible assets whether acquired singularly, as part of a group, or in a business combination. The Statement supersedes APB Opinion No. 17, "Intangible Assets," and will carry forward provisions in Opinion 17 related to internally developed intangible assets. The Statement changes the accounting for goodwill from an amortization method to an impairment-only approach. Goodwill should no longer be amortized, but instead tested for impairment at least annually at the reporting unit level. The accounting provisions are effective for fiscal years beginning after December 31, 2001. For 2001, our amortization of excess of cost over fair value of net assets acquired was \$0.5 million and as of December 31, 2001, goodwill amounted to \$3.2 million. Our intangible assets and goodwill are related to branch acquisitions and not within the scope of SFAS 142. We recognized an unidentifiable intangible asset or goodwill because the fair value of the liabilities assumed exceeded the fair value of the assets acquired. According to the provisions of SFAS 142, we will continue to amortize the remaining \$3.2 million of goodwill. However, this may change as the Financial Accounting Standards Board is currently reconsidering the exclusion of amortization of goodwill related to branch acquisitions and is expected to issue a final Statement in the fourth quarter of 2002.

Statement of Financial Accounting Standards No. 143. Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS 143"), addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. It is not anticipated that the financial impact of this Statement will have a material effect on

# Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Downey.

Statement of Financial Accounting Standards No. 144. Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144"), addresses financial accounting and reporting for the impairment or disposal of long-lived assets. This Statement supersedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of," and the accounting and reporting provisions of APB Opinion No. 30, "Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions," for the disposal of a segment of a business. This Statement also eliminates the exception to consolidation for a subsidiary for which control is likely to be temporary. The provisions of this Statement are effective for financial statements issued for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years. The provisions of this Statement generally are to be applied prospectively. It is not anticipated that the financial impact of this Statement will have a material effect on Downey.

## SALE OF SUBSIDIARY

On February 29, 2000, the Bank sold its indirect automobile finance subsidiary, Downey Auto Finance Corp., to Auto One Acceptance Corp., a subsidiary of California Federal Bank and recognized a pre-tax gain from the sale of \$9.8 million. At December 31, 1999, Downey Auto Finance Corp. had loans totaling \$366 million and total assets of \$373 million. The proceeds from the sale have provided additional capital to further the growth of our residential lending business.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders  
Downey Financial Corp.:

We have audited the accompanying consolidated balance sheets of Downey Financial Corp. and subsidiaries ("Downey") as of December 31, 2001 and 2000, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2001. These consolidated financial statements are the responsibility of Downey's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Downey Financial Corp. and subsidiaries as of December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States of America.

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the Years Ended December 31, 2001, 2000 and 1999

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

The consolidated financial statements of Downey Financial Corp. and subsidiaries ("Downey") include all accounts of Downey Financial Corp. and the consolidated accounts of all subsidiaries, including Downey Savings and Loan Association, F.A. (the "Bank"). All significant intercompany balances and transactions have been eliminated.

### BUSINESS

Downey provides a full range of financial services to individual and corporate customers. Downey is subject to competition from other financial institutions. Downey is subject to the regulations of certain governmental agencies and undergoes periodic examinations by those regulatory authorities.

### BASIS OF FINANCIAL STATEMENT PRESENTATION

The accompanying consolidated financial statements have been prepared in conformity with generally accepted accounting principles accepted in the United States of America. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the balance sheets and the results of operations for the reporting periods. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowances for losses on loans, real estate and mortgage servicing rights ("MSRs"). Management believes that the allowances established for losses on loans, real estate and MSRs are adequate. While management uses available information to recognize losses on loans, real estate and MSRs, future changes to the allowances may be necessary based on changes in economic conditions. In addition, various regulatory agencies, as an integral part of their examination process, periodically review Downey's allowances for losses on loans, real estate and MSRs. Such agencies may require Downey to recognize changes to the allowances based on their judgments about information available to them at the time of their examination.

Downey is required to carry its loans held for sale portfolio, mortgage-backed and investment securities available for sale portfolio, real estate acquired in settlement of loans, real estate held for investment or under development and MSRs at the lower of cost or fair value or in certain cases, at fair value. Fair value estimates are made at a specific point in time based upon relevant market information and other information about the asset. Such estimates related to the mortgage-backed and investment securities portfolios include published bid prices or bid quotations received from securities dealers. Fair value estimates for real estate acquired in settlement of loans and real estate held for investment or under development is determined by current appraisals and, where no active market exists for a particular property, discounting a forecast of expected cash flows at a rate commensurate with the risk involved.

### NEWLY ADOPTED ACCOUNTING PRINCIPLES

Statement of Financial Accounting Standards No. 133. On January 1, 2001, we adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended ("SFAS 133"). SFAS 133 required the recognition of all derivative financial instruments at fair value and reported as either assets or liabilities on the balance sheet. Derivative instruments used to hedge the variability of forecasted cash flows attributable to interest rate risk were designated as cash flow hedges. At the time of adoption, Downey designated anew certain

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

derivative instruments used for risk management into hedging relationships in accordance with the requirements of the new standard. With the implementation of SFAS 133, Downey recorded transition amounts associated with establishing the fair values of the derivative instruments and hedged items on the balance sheet as an increase of

68

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

\$62,000 to net gains on sales of loans and mortgage-backed securities and a reduction of \$388,000 in other comprehensive income. All of the other comprehensive income transition amount was reclassified into earnings during the first quarter of 2001.

Under the provisions of SFAS 133, the method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge. Those methods are consistent with the Downey's approach to managing risk.

Although we continue to hedge as previously done, SFAS 133, as applied to our risk management strategies, may increase or decrease reported net income and stockholders' equity, depending on levels of interest rates and other variables affecting the fair values of derivative instruments and hedged items, but will have no effect on the overall economics of the transactions.

#### CASH AND CASH EQUIVALENTS

For purposes of the statements of cash flows, cash and cash equivalents include cash on hand, amounts due from banks, certificates of deposit with maturities three months or less and federal funds sold. Generally, federal funds are purchased and sold for one-day periods.

#### MORTGAGE-BACKED SECURITIES PURCHASED UNDER RESALE AGREEMENTS, U.S. TREASURY SECURITIES AND AGENCY OBLIGATIONS, OTHER INVESTMENT SECURITIES, MUNICIPAL SECURITIES AND MORTGAGE-BACKED SECURITIES

Downey has established written guidelines and objectives for its investing activities. At the time of purchase of a mortgage-backed security purchased under resale agreement, U.S. Treasury security and agency obligation, other investment security, municipal security or a mortgage-backed security, management of Downey designates the security as either held to maturity, available for sale or held for trading based on Downey's investment objectives, operational needs and intent. Downey then monitors its investment activities to ensure that those activities are consistent with the established guidelines and objectives.

Held to Maturity. Securities held to maturity are carried at cost, adjusted for amortization of premiums and accretion of discounts which are recognized in interest income using the interest method. Mortgage-backed securities represent participating interests in pools of long-term first mortgage loans originated and serviced by the issuers of the securities. Mortgage-backed securities held to maturity are carried at unpaid principal balances, adjusted for unamortized premiums and unearned discounts. Premiums and discounts on mortgage-backed securities are amortized using the interest method over the remaining period to contractual maturity, adjusted for anticipated prepayments. It is the positive intent of Downey, and Downey has the ability, to hold these securities until maturity as part

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

of its portfolio of long-term, interest-earning assets. If the cost basis of these securities is determined to be other than temporarily impaired, the amount of the impairment is charged to operations.

Available for Sale. Securities available for sale are carried at fair value. Premiums and discounts are amortized using the interest method over the remaining period to contractual maturity and, in the case of mortgage-backed securities, adjusted for anticipated prepayments. Unrealized holding gains and losses, or valuation allowances established for net unrealized losses, are excluded from earnings and reported as a separate component of stockholders' equity as accumulated other comprehensive income, net of income taxes, unless the security is deemed other than temporarily impaired. If the security is determined to be other than temporarily impaired, the amount of the impairment is charged to operations.

Realized gains and losses on the sale of securities available for sale, determined using the specific identification method and recorded on a trade date basis, are reflected in earnings.

Held for Trading. Securities held for trading are carried at fair value. Realized and unrealized gains and losses are reflected in earnings.

69

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

#### DERIVATIVES AND HEDGES

Derivative financial instruments are recorded at fair value and reported as either assets or liabilities on the balance sheet. The accounting for gains and losses associated with changes in the fair value of derivatives are reported in current earnings or other comprehensive income, net of tax, depending on whether they qualify for hedge accounting and whether the hedge is highly effective in achieving offsetting changes in the fair value or cash flows of the asset or liability hedged. Derivative instruments designated in a hedge relationship to mitigate exposure to the variability in fair values or expected future cash flows are considered fair value hedges or cash flow hedges, respectively. The method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge.

#### LOANS HELD FOR SALE

Downey identifies those loans which foreseeably may be sold prior to maturity. These loans have been classified as held for sale in the Consolidated Balance Sheets and are recorded at the lower of amortized cost or fair value. Effective with the adoption of SFAS 133, the carrying amount includes a basis adjustment to the loan at funding resulting from the change in the fair value of the interest rate lock derivative from the date of commitment to the date of funding. In response to unforeseen events such as changes in regulatory capital requirements, liquidity shortfalls, changes in the availability of sources of funds and excess loan demand by borrowers that could not be controlled immediately by loan price changes, Downey may sell loans which had been held for investment. In such occurrences, the loans are transferred at amortized cost and the lower of cost or market method is then applied.

#### GAINS OR LOSSES ON SALES OF LOANS AND MORTGAGE SERVICING ASSETS

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Gains or losses on sales of loans are recognized at the time of sale and are determined by the difference between the net sales proceeds and the allocated basis of the loans sold. Downey capitalizes MSR's acquired through either the purchase or origination of mortgage loans for sale or securitization with servicing rights retained. The total cost of the mortgage loans designated for sale is allocated to the MSR's and the mortgage loans without the MSR's based on their relative fair values. The MSR's are included as a component of gain on sale of loans. The MSR's are amortized in proportion to and over the estimated period of net servicing income. Such amortization is reflected as a component of loan servicing income (loss).

The MSR's are periodically reviewed for impairment based on their fair value. The fair value of the MSR's, for the purposes of impairment, is measured using a discounted cash flow analysis based on market-adjusted discount rates and anticipated prepayment speeds. Market sources are used to determine prepayment speeds, the net cost of servicing per loan, and inflation, default and interest rates for mortgages.

The Company capitalizes and measures MSR impairment on a disaggregated basis based on the following predominant risk characteristics of the underlying mortgage loans: fixed-rate mortgage loans by loan term and coupon rate (less than 7%, 150 basis point increments between 7% and 10%, and greater than 10%), and loan term for adjustable rate mortgages. Impairment losses are recognized through a valuation allowance for each impaired stratum, with any associated provision recorded as a component of loan servicing income (loss).

### LOANS RECEIVABLE HELD FOR INVESTMENT

Loans receivable are recorded at cost, net of discounts and premiums, undisbursed loan proceeds, net deferred fees and costs and the allowance for loan losses.

Interest income on loans is accrued based on the outstanding principal amount of loans using the interest method. Discounts and premiums on loans are amortized to income using the interest method over the remaining period to contractual maturity. The amortization of discounts into income is discontinued on loans that are contractually ninety days past due or when collection of interest appears doubtful.

70

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

Loan origination fees and related incremental direct loan origination costs are deferred and amortized to income using the interest method over the contractual life of the loans, adjusted for actual prepayments. Fees received for a commitment to originate or purchase a loan or group of loans are deferred and, if the commitment is exercised, recognized over the life of the loan as an adjustment of yield or, if the commitment expires unexercised, recognized as income upon expiration of the commitment. The amortization of deferred fees and costs is discontinued on loans that are contractually ninety days past due or when collection of interest appears doubtful.

Accrued interest on loans that are contractually ninety days or more past due or when collection of interest appears doubtful is generally reversed and charged against interest income. Income is subsequently recognized only

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

to the extent cash payments are received and the principal balance is expected to be recovered. Such loans are restored to an accrual status only if the loan is brought contractually current and the borrower has demonstrated the ability to make future payments of principal and interest.

### ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses is maintained at an amount management deems adequate to cover inherent losses. Downey has implemented and adheres to an internal asset review system and loan loss allowance methodology designed to provide for the detection of problem assets and an adequate allowance to cover loan losses. In determining the allowance for loan losses related to specific major loans (loans over \$5 million), management evaluates its allowance on an individual loan basis, including an analysis of the creditworthiness, cash flows and financial status of the borrower, and the condition and the estimated value of the collateral. Downey reviews all loans under \$5 million by analyzing their performance and composition of their collateral as a whole, because of the relatively homogeneous nature of the portfolios. Given the above evaluations, the amount of the allowance is based upon the summation of general valuation allowances, allocated allowances and an unallocated allowance. General valuation allowances relate to loans with no well-defined deficiency or weakness and are determined by applying against such loans factors for each major loan category that consider past loss experience and loan duration. Allocated allowances relate to loans with well-defined deficiencies or weaknesses and are generally determined by loss factors that consider past loss experience for such loans or are determined by the excess of the recorded investment in the loan over the fair value of the collateral, where appropriate. The unallocated allowance is more subjective and is reviewed quarterly to take into consideration estimation errors and other factors such as prevailing and forecasted economic conditions.

Downey considers a loan to be impaired when, based upon current information and events, it believes it is probable that Downey will be unable to collect all amounts due according to the contractual terms of the loan agreement. In determining impairment, Downey considers large non-homogeneous loans with the following characteristics: non-accrual loans, debt restructurings and performing loans which exhibit, among other characteristics, high loan-to-value ratios or delinquent taxes. Downey bases the measurement of collateral dependent impaired loans on the fair value of the loan's collateral. Non-collateral dependent loans are valued based on a present value calculation of expected future cash flows, discounted at the loan's effective rate. Cash receipts on impaired loans not performing according to contractual terms are generally used to reduce the carrying value of the loan, unless Downey believes it will recover the remaining principal balance of the loan. Impairment losses are included in the allowance for loan losses through a charge to provision for loan losses. Adjustments to impairment losses due to changes in the fair value of collateral of impaired loans are included in provision for loan losses. Upon disposition of an impaired loan, loss of principal, if any, is recorded through a charge-off to the allowance for loan losses.

In the opinion of management, and in accordance with the loan loss allowance methodology, the present allowance is considered adequate to absorb estimable and probable loan losses. Additions to the allowances are reflected in current operations. Charge-offs to the allowance are made when the loan is considered uncollectible or is transferred to real estate owned. Recoveries are credited to the allowance.

For regulatory capital purposes, the Bank's general allowance for loan losses is included to a limit of 1.25% of regulatory risk-weighted assets.

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

LOAN SERVICING

Downey services mortgage loans for investors. Fees earned for servicing loans owned by investors are reported as income when the related mortgage loan payments are collected. Loan servicing costs are charged to expense as incurred.

INVESTMENT IN REAL ESTATE AND JOINT VENTURES

Real estate held for investment or under development is held at the lower of cost (less accumulated depreciation) or fair value. Costs, including interest, of holding real estate in the process of development or improvement are capitalized, whereas costs relating to holding completed property are expensed. An allowance for losses is established by a charge to operations if the carrying value of a property exceeds its fair value, including the consideration of disposition costs.

Downey utilizes the equity method of accounting for investments in non-controlled joint ventures and the consolidation method for investments in controlled joint ventures. All intercompany profits are eliminated.

Income from the sale of real estate is recognized principally when title to the property has passed to the buyer, minimum down payment requirements are met and the terms of any notes received by Downey satisfy continuing investment requirements. At the time of sale, costs are relieved from real estate projects on a relative sales value basis and charged to operations.

REAL ESTATE ACQUIRED IN SETTLEMENT OF LOANS

Real estate acquired through foreclosure is initially recorded at fair value (net of an allowance for estimated selling costs) on the date of foreclosure and a writedown is recorded. A valuation allowance is established for any subsequent declines in fair value. All legal fees and direct costs, including foreclosure and other related costs, are expensed as incurred.

PREMISES AND EQUIPMENT

Buildings, leasehold improvements and furniture, fixtures and equipment are carried at cost, less accumulated depreciation and amortization. Buildings and furniture, fixtures and equipment are depreciated using the straight-line method over the estimated useful lives of the assets. The cost of leasehold improvements is being amortized using the straight-line method over the shorter of the estimated useful life of the asset or the terms of the related leases.

IMPAIRMENT OF LONG-LIVED ASSETS

Downey reviews long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceed the fair value of the assets. Assets to be disposed of are

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

reported at the lower of the carrying amount or fair value less costs to sell.

### SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Downey enters into sales of securities under agreements to repurchase ("reverse repurchase agreements"). Reverse repurchase agreements are treated as financing arrangements and, accordingly, the obligations to repurchase the securities sold are reflected as liabilities in Downey's consolidated financial statements. The securities collateralizing reverse repurchase agreements are delivered to several major national brokerage firms who arranged the transactions. These securities are reflected as assets in Downey's consolidated financial statements. The brokerage firms may loan such securities to other parties in the normal course of their operations and agree to return the identical securities to Downey at the maturity of the agreements.

72

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

#### INCOME TAXES

Downey applies the asset and liability method of accounting for income taxes. The asset and liability method recognizes deferred income taxes for the tax consequences of "temporary differences" by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date.

Deferred tax assets are to be recognized for temporary differences that will result in deductible amounts in future years and for tax carryforwards if, in the opinion of management, it is more likely than not that the deferred tax assets will be realized.

#### STOCK OPTION PLAN

Downey records compensation expense on the date of grant only if the current market price of the underlying stock exceeded the exercise price rather than recognizing as expense over the vesting period the fair value of all stock-based awards on the date of grant. However, Downey provides pro forma net income and pro forma net income per share disclosures for employee stock option grants made since 1995 as if the fair-value of all stock-based awards as of the grant date are recognized as expense over the vesting period.

#### PER SHARE INFORMATION

Two earnings per share ("EPS") measures are presented. Basic EPS excludes dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from issuance of common stock that then shared in earnings.

#### CURRENT ACCOUNTING PRONOUNCEMENTS

Statement of Financial Accounting Standards No. 141. In July 2001, the

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 141, "Business Combinations" ("SFAS 141") and Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142").

SFAS 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. The use of the pooling-of-interests method will be prohibited. It is not anticipated that the financial impact of this Statement will have a material effect on Downey.

Statement of Financial Accounting Standards No. 142. SFAS 142 applies to all acquired intangible assets whether acquired singularly, as part of a group, or in a business combination. The Statement supersedes APB Opinion No. 17, "Intangible Assets," and will carry forward provisions in Opinion 17 related to internally developed intangible assets. The Statement changes the accounting for goodwill from an amortization method to an impairment-only approach. Goodwill should no longer be amortized, but instead tested for impairment at least annually at the reporting unit level. The accounting provisions are effective for fiscal years beginning after December 31, 2001. For 2001, the amortization of excess of cost over fair value of net assets acquired was \$0.5 million and as of December 31, 2001, goodwill amounted to \$3.2 million. Downey's intangible assets and goodwill are related to branch acquisitions and not within the scope of SFAS 142. An unidentified intangible asset or goodwill was recognized because the fair value of the liabilities assumed exceeded the fair value of the assets acquired. According to the provisions of SFAS 142, this type of goodwill will continue to be amortized. However, this may change as the Financial Accounting Standards Board is currently reconsidering the exclusion of amortization of goodwill related to branch acquisitions and is expected to issue a final Statement in the fourth quarter of 2002.

73

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

Statement of Financial Accounting Standards No. 143. Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS 143"), addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. It is not anticipated that the financial impact of this Statement will have a material effect on Downey.

Statement of Financial Accounting Standards No. 144. Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" ("SFAS 144"), addresses financial accounting and reporting for the impairment or disposal of long-lived assets. This Statement supersedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of," and the accounting and reporting provisions of APB Opinion No. 30, "Reporting the Results of Operations-Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions," for the disposal of a segment of a business. This Statement also eliminates the exception to consolidation for a subsidiary for which control is likely to be temporary. The provisions of this Statement are effective for financial statements issued for fiscal years beginning after December 15, 2001 and interim periods within those fiscal years. The provisions of this Statement generally are to be applied prospectively. It

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

is not anticipated that the financial impact of this Statement will have a material effect on Downey.

### (2) BUSINESS COMBINATION

During 1988, the Bank acquired Butterfield Savings and Loan Association, FSA ("Butterfield") from the Federal Savings and Loan Insurance Corporation ("FSLIC") in a FSLIC assisted acquisition.

Concurrent with the acquisition, the Bank and the FSLIC entered into an assistance agreement ("Butterfield Assistance Agreement") that provides for the indemnification of the Bank against losses incurred on the disposal of certain defined covered assets and the settlement of certain unreserved preacquisition liabilities or contingencies reduced by tax benefits associated with those expenses as defined. Additionally, the FSLIC agreed to provide yield maintenance assistance on certain covered assets at the Federal Home Loan Bank ("FHLB") Eleventh District Cost of Funds Index ("COFI"). All such amounts received are nontaxable under the Internal Revenue Code.

All assets subject to the Butterfield Assistance Agreement were sold or repurchased by the Federal Deposit Insurance Corporation ("FDIC") on December 29, 1995. By its terms, the Butterfield Assistance Agreement terminated on March 31, 1997.

The Butterfield Assistance Agreement provides broad authority to the FDIC to conduct audits. A compliance audit was completed by the FDIC for the period July 1, 1993 to June 30, 1996. A final post termination audit of the Butterfield Assistance Agreement by the FDIC remains to be completed at the FDIC's option.

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

#### (3) U.S. TREASURY SECURITIES, AGENCY OBLIGATIONS AND OTHER INVESTMENT SECURITIES AVAILABLE FOR SALE

The amortized cost and estimated fair value of U.S. Treasury securities, agency obligations and other investment securities available for sale are summarized as follows:

(In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
U.S. Treasury and agency securities	\$355,947	\$ 1,214	\$ 251	\$356,910
Corporate securities .....	44,259	1,203	17	45,445
December 31, 2001 .....	\$400,206	\$ 2,417	\$ 268	\$402,355
U.S. Treasury and agency securities	\$283,132	\$ 1,069	\$ 99	\$284,102
Corporate securities .....	21,212	301	--	21,513
December 31, 2000 .....	\$304,344	\$ 1,370	\$ 99	\$305,615

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

At December 31, 2001, \$356 million in amortized cost and \$357 million in estimated fair value of these investment securities contain call provisions. The call dates range from January 4, 2002 to November 15, 2002.

The amortized cost and estimated fair value of U.S. Treasury securities, agency obligations and other investment securities available for sale at December 31, 2001, by contractual maturity, are shown below.

(In Thousands)	Amortized Cost	Fair Value
Due in one year or less .....	\$ 18,003	\$ 18,220
Due after one year through five years	301,256	303,099
Due after five years .....	80,947	81,036
<b>Total .....</b>	<b>\$400,206</b>	<b>\$402,355</b>

Proceeds, gross realized gains and losses on the sales of U.S. Treasury securities, agency obligations and other investment securities available for sale are summarized as follows:

(In Thousands)	2001	2000	1999
Proceeds .....	\$29,139	\$29,645	\$67,195
Gross realized gains	\$ 329	\$ 4	\$ 288
Gross realized losses	\$ --	\$ 110	\$ --

Net unrealized gains on investment securities available for sale were recognized in stockholders' equity as accumulated other comprehensive income in the amount of \$2.1 million, or \$1.2 million net of income taxes, at December 31, 2001, compared to net unrealized gains of \$1.3 million, or \$0.7 million net of income taxes, at December 31, 2000.

(4) LOANS AND MORTGAGE-BACKED SECURITIES PURCHASED UNDER RESALE AGREEMENTS AND OTHER INVESTMENT SECURITIES HELD TO MATURITY

LOANS AND MORTGAGE-BACKED SECURITIES PURCHASED UNDER RESALE AGREEMENTS

There were no outstanding loans or mortgage-backed securities purchased under resale agreements at December 31, 2001 or 2000. The average interest rate and balance of such transactions was 4.35% and

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

\$34 million, respectively, during 2001 and 6.70% and \$3 million, respectively, during 2000. The maximum amount outstanding at any month-end was \$60 million during 2001. There was no amount outstanding at any month-end during 2000.

### MUNICIPAL SECURITIES HELD TO MATURITY

The amortized cost and estimated fair value of municipal securities held to maturity are summarized as follows:

(In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
December 31, 2001	\$6,388	\$ --	\$ 15	\$6,373
December 31, 2000	\$6,550	\$ --	\$ 16	\$6,534

All of the investment at December 31, 2001 and 2000 represents an industrial revenue bond on which the interest income is not subject to federal income taxes and matures in 2015.

### (5) MORTGAGE-BACKED SECURITIES AVAILABLE FOR SALE

The amortized cost and estimated fair value of the mortgage-backed securities available for sale are summarized as follows:

(In Thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
December 31, 2001:				
Agency certificates ...	\$ 17,805	\$ --	\$ 387	\$ 17,418
Non-agency certificates	102,480	15	932	101,563
Total .....	\$120,285	\$ 15	\$ 1,319	\$118,981
December 31, 2000:				
Agency certificates ...	\$ 4,182	\$ --	\$ 29	\$ 4,153
Non-agency certificates	6,086	6	42	6,050
Total .....	\$ 10,268	\$ 6	\$ 71	\$ 10,203

Net unrealized losses on mortgage-backed securities available for sale were recognized in stockholders' equity as accumulated other comprehensive income in the amount of \$1.3 million, or \$0.8 million net of income taxes, at December 31, 2001. At December 31, 2000, net unrealized losses were recognized in stockholders' equity as accumulated other comprehensive income in the amount of \$65,000, or \$37,000 net of income taxes.

Proceeds, gross realized gains and losses on the sales of mortgage-backed securities available for sale are summarized as follows:

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

(In Thousands)	2001	2000	1999
Proceeds .....	\$3,798,775	\$963,712	\$1,386,151
Gross realized gains	\$ 24,507	\$ 4,788	\$ 14,017
Gross realized losses	\$ 5,030	\$ 5,690	\$ 2,504

(6) LOANS RECEIVABLE

Loans receivable are summarized as follows:

(In Thousands)	December 31,	
	2001	2000
Held for investment:		
Loans secured by real estate:		
Residential:		
One-to-four units .....	\$ 7,699,061	\$ 7,655,238
One-to-four units - subprime .....	1,506,719	1,743,914
Five or more units .....	11,179	19,460
Commercial real estate .....	112,509	164,604
Construction .....	84,942	118,165
Land .....	22,028	26,880
Non-mortgage:		
Commercial .....	22,017	21,721
Automobile .....	24,529	39,614
Other consumer .....	50,908	60,653
Total loans receivable held for investment	9,533,892	9,850,249
Increase (decrease) for:		
Undisbursed loan funds .....	(61,280)	(72,328)
Net deferred costs and premiums .....	77,916	79,109
Allowance for losses .....	(36,120)	(34,452)
Total loans held for investment, net .....	\$ 9,514,408	\$ 9,822,578
Held for sale:		
Loans secured by real estate:		
Residential one-to-four units .....	\$ 509,317	\$ 251,014
Residential one-to-four units - subprime ...	33	558
Capitalized basis adjustment (1) .....	(10,326)	--
Total loans held for sale, net .....	\$ 499,024	\$ 251,572

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Over 94% of the real estate securing Downey's loans is located in California.

77

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

A summary of activity in the allowance for loan losses for loans receivable held for investment during 2001, 2000 and 1999 follows:

(In Thousands)	Real Estate	Commercial	Automobile	Other Consumer	Not Specifically Allocated
Balance at December 31, 1998	\$ 19,408	\$ 218	\$ 8,344	\$ 747	\$ 2,800
Provision for loan losses ..	9,252	116	1,879	23	--
Charge-offs .....	(580)	--	(4,795)	(160)	--
Recoveries .....	250	--	831	9	--
Balance at December 31, 1999	28,330	334	6,259	619	2,800
Provision for loan losses ..	2,350	108	517	276	--
Charge-offs .....	(735)	--	(832)	(182)	--
Recoveries .....	269	--	136	14	--
Transfers (1) .....	--	--	(5,811)	--	--
Balance at December 31, 2000	30,214	442	269	727	2,800
Provision for loan losses ..	2,103	131	201	129	--
Charge-offs .....	(874)	--	(197)	(277)	--
Recoveries .....	434	--	4	14	--
Balance at December 31, 2001	\$ 31,877	\$ 573	\$ 277	\$ 593	\$ 2,800

Net charge-offs represented 0.01%, 0.01% and 0.06% of average loans for 2001, 2000 and 1999, respectively.

All impaired loans at December 31, 2001 and 2000 were secured by commercial real estate. The following table presents impaired loans with specific allowances and the amount of such allowances and impaired loans without specific allowances.

(In Thousands)	Net Carrying Value	Specific Allowance	Net Balance
December 31, 2001:			
Loans with specific allowances ..	\$ --	\$ --	\$ --
Loans without specific allowances	13,201	--	13,201
Total impaired loans .....	\$13,201	\$ --	\$13,201

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

December 31, 2000:

Loans with specific allowances ..	\$ --	\$ --	\$ --
Loans without specific allowances	13,841	--	13,841
<hr style="border-top: 1px dashed black;"/>			
Total impaired loans .....	\$13,841	\$ --	\$13,841
<hr style="border-top: 3px double black;"/>			

The average recorded investment in impaired loans totaled \$14 million in 2001 and \$13 million in 2000. During 2001, total interest recognized on the impaired loan portfolio was \$1.7 million, compared to \$2.9 million in 2000 and \$1.9 million in 1999.

The combined weighted average interest yield on loans receivable held for investment and sale was 7.16% and 8.45% at December 31, 2001 and 2000, respectively, and averaged 7.80%, 7.99% and 7.48% during 2001, 2000 and 1999, respectively.

78

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

The aggregate amount of non-accrual loans receivable that are contractually past due 90 days or more as to principal or interest, in the foreclosure process, restructured, or upon which interest collection is doubtful were \$77 million and \$45 million at December 31, 2001 and 2000, respectively. At December 31, 2001 we had less than \$1 million of troubled debt restructurings on accrual status representing a single one-to-four unit residential loan.

Interest due on non-accrual loans, but excluded from interest income, was approximately \$3.2 million for 2001, \$1.8 million for 2000 and \$1.1 million for 1999.

Downey has had, and expects in the future to have, transactions in the ordinary course of business with executive officers, directors and their associates ("related parties") on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other non-related parties. In the opinion of management, those transactions neither involve more than the normal risk of collectibility nor present any unfavorable features. At December 31, 2001, the Bank had extended loans to two of its directors and their associates totaling \$21 million. At December 31, 2000, the Bank had extended loans to two directors and their associates totaling \$23 million. All such loans are performing in accordance with their loan terms. Presented below is a summary of activity with respect to such loans for the years ending December 31, 2001 and 2000:

(In Thousands)	2001	2000
<hr style="border-top: 1px dashed black;"/>		
Balance at beginning of period	\$ 23,067	\$ 26,657
Additions .....	508	632
Repayments .....	(2,096)	(4,222)
<hr style="border-top: 1px dashed black;"/>		
Balance at end of period .....	\$ 21,479	\$ 23,067
<hr style="border-top: 3px double black;"/>

Accumulated depreciation and amortization	(88,209)	(79,971)
Total premises and equipment, net ....	\$ 111,762	\$ 104,178

Downey has commitments under long term operating leases, principally for building space and land. Lease terms generally cover a five-year period. Rental expense was \$2.8 million in 2001, \$2.3 million in 2000 and \$2.1 million in 1999. The following table summarizes future minimum rental commitments under noncancelable leases.

(In Thousands)	
2002 .....	\$ 3,220
2003 .....	3,004
2004 .....	2,449
2005 .....	2,174
2006 .....	1,621
Thereafter (1)	3,394
Total future lease commitments	\$15,862

(10) FEDERAL HOME LOAN BANK STOCK

The Bank's required investment in FHLB stock, based on December 31, 2001 financial data, was \$98 million. The investment in FHLB stock amounted to \$113 million and \$106 million at December 31, 2001 and 2000, respectively.

(11) MORTGAGE SERVICING RIGHTS

The following table is a summary of the activity in our mortgage servicing rights and related allowance for the periods indicated and other related

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

financial data.

(Dollars in Thousands)	2001	2000	1999
Gross balance at beginning of period .....	\$ 46,214	\$ 34,266	\$ 8,311
Additions .....	44,391	18,510	29,311
Amortization .....	(9,813)	(5,968)	(3,311)
Sale of servicing .....	(7,826)	--	--
Impairment write-down .....	(7,336)	(594)	--
Gross balance at end of period .....	65,630	46,214	34,311
Allowance balance at beginning of period .....	5,483	3	--
Provision for (reduction of) impairment .....	10,588	6,074	--
Impairment write-down .....	(7,336)	(594)	--
Allowance balance at end of period .....	8,735	5,483	--
Total mortgage servicing rights, net .....	\$ 56,895	\$ 40,731	\$ 34,311
Estimated fair value (1) .....	\$ 58,047	\$ 41,826	\$ 37,311
Weighted average expected life (in months) .....	82	82	--
Custodial account earnings rate .....	4.36%	6.35%	--
Weighted average discount rate .....	9.16	9.78	--
AT PERIOD END			
Mortgage loans serviced for others:			
Total .....	\$ 5,805,811	\$ 3,964,462	\$ 2,923,311
With capitalized mortgage servicing rights (1):			
Amount .....	5,379,513	3,779,562	2,711,311
Weighted average interest rate .....	6.97%	7.56%	--
Custodial escrow balances .....	\$ 10,596	\$ 8,207	\$ 5,311

Key assumptions--that vary due to changes in market interest rates--used to determine the fair value of our mortgage servicing rights include expected prepayment speeds, which impact the average life of the portfolio, the earnings rate on custodial accounts, which impact the value of custodial accounts, and the discount rate used in valuing future cash flows. The table below summarizes the estimated changes in the fair value of our mortgage servicing rights for changes in those assumptions individually and in combination associated with an immediate 100 basis point increase or decrease in market rates. Also summarized is the earnings impact associated with provisions to or reductions in the valuation allowance for mortgage servicing rights. Impairment is measured on a disaggregated basis based upon the predominant risk characteristics of the underlying mortgage loans such as term and coupon. Certain stratum may have impairment, while other stratum may not. Therefore, changes in overall fair value may not equal provisions to or reductions in the valuation allowance.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

The sensitivity analysis in the table below is hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 100 basis point variation in assumptions generally cannot be easily extrapolated because the relationship of the change in the assumptions to the change in fair value may not be linear. Also, in this table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

(Dollars in Thousands)	Expected Prepayment Speeds	Value of Custodial Accounts	Discount Rate	Combination
-----				
Increase rates 100 basis points:				
Fair value (1) .....	\$ 10,831	\$ 3,386	\$ (1,949)	\$ 11,518
Reduction of (increase in) valuation allowance .....	6,663	1,468	(875)	7,083
Decrease rates 100 basis points:				
Fair value (2) .....	(17,188)	(3,386)	2,072	(19,597)
Reduction of (increase in) valuation allowance .....	(16,036)	(2,234)	702	(18,445)

Downey made income and franchise tax payments, net of refunds, amounting to \$78.0 million, \$73.7 million and \$22.1 million in 2001, 2000 and 1999, respectively.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Downey and its wholly owned subsidiaries file a consolidated federal income tax return and various state income and franchise tax returns on a calendar year basis. The Internal Revenue Service and state taxing authorities have examined Downey's tax returns for all tax years through 1995, and are currently reviewing returns filed for the 1996 and 1997 tax years. Tax years subsequent to 1997 remain open to review by federal and state tax authorities. Downey's management believes it has adequately provided for potential exposure with regard to issues that may be raised in the years currently under examination and open to review.

### (18) CAPITAL SECURITIES

On July 23, 1999, Downey, through Downey Financial Capital Trust I (the "Trust"), issued \$120 million in 10.00% capital securities. The capital securities, which were sold in a public underwritten offering, pay quarterly cumulative cash distributions at an annual rate of 10.00% of the liquidation value of \$25 per share and are recorded as interest expense by Downey. The capital securities represent undivided beneficial interests in the Trust, which was established by Downey for the purpose of issuing the capital securities. Downey owns all of the issued and outstanding common securities of the Trust. Proceeds from the offering and from the issuance of common securities were invested by the Trust in 10.00% Junior Subordinated Deferrable Interest Debentures due September 15, 2029 issued by Downey (the "Junior Subordinated Debentures"), with an aggregate principal amount of \$124 million. The sole asset of the Trust is the Junior Subordinated Debentures. The obligations of the Trust with respect to the securities are fully and unconditionally guaranteed by Downey. The payment of distributions on the capital securities may be deferred if Downey defers payments of interest on the junior subordinated debentures. Downey will have the right, on one or more occasions, to defer payments of interest on the junior subordinated debentures for up to 20 consecutive quarterly periods. During the time Downey defers interest payments, interest on the junior subordinated debentures will continue to accrue and distributions on the capital securities will continue to accumulate and the deferred interest and deferred distributions will themselves accrue interest at an annual rate of 10.00%, compounded quarterly, to the extent permitted by applicable law. Downey may redeem, in whole or in part, the junior subordinated debentures before their maturity at a redemption price of 100% of their principal amount plus accrued and unpaid interest on or after July 23, 2004.

Downey invested \$108 million of the \$115 million of net proceeds from the sale of the Junior Subordinated Debentures (net of underwriting discounts and commissions and other offering expenses) as additional common stock of the Bank thereby increasing the Bank's regulatory core / tangible capital by that amount. The balance of the net proceeds have been used for general corporate purposes.

=====					

### CAPITAL DISTRIBUTIONS

The OTS rules impose certain limitations regarding stock repurchases and redemptions, cash-out mergers and any other distributions charged against an institution's capital accounts. The payment of dividends by the Bank is subject to OTS regulations. Inasmuch as the Bank is owned by a holding company, the Bank is required to provide the OTS with a notice before payment of any dividend. Prior OTS approval is required to the extent the Bank would not be considered adequately capitalized under the prompt corrective action regulations of the OTS following the distribution or the amount of the dividend exceeds the Bank's retained net income for that year to date plus retained net income for the preceding two years.

As of December 31, 2001, the Bank had the capacity to declare a dividend totaling \$250 million without obtaining prior OTS approval.

### EMPLOYEE STOCK OPTION PLANS

During 1994, the Bank adopted and the stockholders approved the Downey Savings and Loan Association 1994 Long Term Incentive Plan (the "LTIP"). The LTIP provides for the granting of stock appreciation rights, restricted stock, performance awards and other awards. The LTIP specifies an authorization of 434,110 shares (adjusted for stock dividends and splits) of the Bank's common stock available for issuance under the LTIP. Effective January 23, 1995, Downey Financial Corp. and the Bank executed an

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

amendment to the LTIP by which Downey Financial Corp. adopted and ratified the LTIP such that shares of Downey Financial Corp. shall be issued upon exercise of options or payment of other awards, for which payment is to be made in stock, in lieu of the Bank's common stock. No other stock based plan exists.

No shares were granted under the LTIP since 1998.

Options outstanding under the LTIP at December 31, 2001 and 2000 are summarized as follows:

	Outstanding Options	
	Number of Shares	Average of Option Price
December 31, 1998	219,451	\$ 20.03
Options granted .	--	--
Options exercised	(16,633)	13.16
Options canceled	(2,068)	13.39
December 31, 1999	200,750	20.66
Options granted .	--	--
Options exercised	(57,332)	14.91
Options canceled	--	--
December 31, 2000	143,418	22.96
Options granted .	--	--
Options exercised	(7,307)	22.01
Options canceled	(15,922)	25.44
December 31, 2001	120,189	\$ 22.69

Under the LTIP, options are exercisable over vesting periods specified in each grant and, unless exercised, the options terminate between five or ten years from the date of the grant. Further, under the LTIP, the option price shall at least equal or exceed the fair market value of such shares on the date the options are granted.

At December 31, 2001, 120,189 were outstanding at a weighted average remaining contractual life of six years, of which 82,667 options were exercisable at a weighted average option price per share of \$21.44 and 131,851 shares were available for future grants under the LTIP. At December 31, 2000 and 1999, options of 71,214 and 100,344, respectively, were exercisable at a weighted average option price per share of \$20.45 and \$16.30, respectively.

Downey measures its employee stock-based compensation arrangements under the provisions of APB 25. Accordingly, no compensation expense has been recognized for the stock option plan. Had compensation expense for Downey's stock option plan been determined based on the fair value estimated using

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

the Black-Scholes model at the grant date for previous awards, Downey's net income and income per share would have been reduced to the pro forma amounts indicated below:

(21) EMPLOYEE BENEFIT PLANS

RETIREMENT AND SAVINGS PLAN

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

Downey amended its profit sharing plan (the "Plan") and restated it in its entirety as of October 1, 1997. The Plan continues to qualify as both a profit sharing plan and a qualified cash or deferred arrangement under Internal Revenue Code Sections 401 (a) and 401 (k). Under the Plan, all employees of Downey are eligible to participate provided they are 21 years of age and have completed one year of service. Participants may contribute up to 15% of their compensation each year, as defined in the Plan. Downey makes a matching contribution equal to 25% of the participant's pretax contributions which do not exceed 4% of the participant's annual compensation. In addition, Downey makes an annual discretionary profit sharing contribution to the Plan based on Downey's net income. Allocation of the discretionary contribution is based on points credited to each eligible participant and salary. Points are credited based on the employee's age and vested years of service. Downey's contributions to the Plan totaled \$2.4 million for 2001, compared to \$2.0 million in 2000 and \$1.9 million in 1999.

As of January 1, 2002, Downey will increase the matching contribution to 50% of the first 6% of the participant's salary deferred in the Plan year and will eliminate the annual discretionary profit sharing contribution. In addition, the age requirement for eligibility will be changed from 21 to 18.

Downey has a Deferred Compensation Plan for key management employees and directors. The Deferred Compensation Plan is considered to be an essential element in a comprehensive competitive benefits package designed to attract and retain individuals who contribute to the success of Downey. Participants are eligible to defer compensation on a pre-tax basis, including director fees, and earn a competitive interest rate on the amounts deferred. As of December 31, 2001, 72 management employees and seven directors are eligible to participate in the program. During 2001, 22 management employees and one director elected to defer compensation pursuant to the plan. Downey's expense related to the Deferred Compensation Plan has been less than \$0.1 million each year since inception.

94

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

### GROUP BENEFIT PLAN

Downey provides certain health and welfare benefits for active employees under a cafeteria plan (the "Benefit Plan") as defined by section 125 of the Internal Revenue Code. Under the Benefit Plan, employees make appropriate selections as to the type of benefits and the amount of coverage desired. The benefits are provided through insurance companies and other health organizations and are funded by contributions from Downey, employees and retirees and include deductibles, co-insurance provisions and other limitations. Downey's expense for health and welfare benefits was \$4.3 million, \$3.9 million and \$3.6 million in 2001, 2000 and 1999, respectively.

### (22) COMMITMENTS AND CONTINGENCIES

#### LITIGATION

Downey has been named as a defendant in legal actions arising in the ordinary course of business, none of which, in the opinion of management, is material.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

### FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK

Downey utilizes financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to originate fixed and variable rate mortgage loans, commitments to sell or purchase loans and mortgage-backed securities, letters of credit, lines of credit and loans in process. The contract or notional amounts of those instruments reflect the extent of involvement Downey has in particular classes of financial instruments.

Downey uses the same credit policies in making commitments to originate loans, lines of credit and letters of credit as it does for on-balance-sheet instruments. For commitments to originate fixed rate loans, the contract amounts represent exposure to loss from market fluctuations as well as credit loss. To hedge adverse changes from market fluctuations, Downey utilizes forward sale and purchase derivative contracts that mature in less than one year. Downey controls the credit risk of its commitments to originate fixed rate loans through credit approvals, limits and monitoring procedures.

The following is a summary of commitments and contingent liabilities:

(In Thousands)	December 31,	
	2001	2000
Commitments to sell loans and mortgage-backed securities (1) .	\$787,025	\$149,898
Commitments to originate loans and mortgage-backed securities:

Fixed (2) .....	330,732	239,415
Undisbursed loan funds and unused lines of credit .....	137,151	148,304
Standby letters of credit and other contingent liabilities ...	2,640	2,446
=====		

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

Commitments to sell or purchase loans and mortgage-backed securities are used as part of Downey's secondary marketing activities. These contracts have a high correlation to the price movement on loans which provides a hedge against adverse changes in interest rates.

Commitments to originate fixed and variable rate mortgage loans are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The credit risk involved in issuing lines and letters of credit requires the same creditworthiness evaluation as that involved in extending loan facilities to customers. Downey evaluates each customer's

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

creditworthiness on a case-by-case basis. Undisbursed loan funds and unused lines of credit include home equity lines of credit and funds not disbursed, but committed to construction and commercial lending by the Bank.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party.

Downey receives collateral to support commitments for which collateral is deemed necessary. The most significant categories of collateral include real estate properties underlying mortgage loans, liens on personal property and cash on deposit with Downey. At December 31, 2001, the extent of collateral supporting mortgage and other loans varied from nothing to 100% of the maximum credit exposure.

In connection with its interest rate risk management, Downey may enter into interest rate exchange agreements ("swap contracts") with certain national investment banking firms under terms that provide mutual payment of interest on the outstanding notional amount of the swap. The effect of these swaps serve to reduce Downey's interest rate risk between repricing assets and liabilities. At December 31, 2001, no swap contracts were outstanding.

### (23) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (RISK MANAGEMENT)

We offer short-term interest rate lock commitments to help us attract potential home loan borrowers. The commitments guarantee a specified interest rate for a loan if our underwriting standards are met, but do not obligate the potential borrower. The interest rate lock commitments we ultimately expect to sell in the secondary market are treated as derivatives. Consequently, as derivatives, the hedging of the expected commitments do not qualify for hedge accounting. Associated fair value adjustments are recorded in current earnings under net gains on sales of loans and mortgage-backed securities, with an offset to the balance sheet in either other assets, or accounts payable and accrued liabilities. Fair values for interest rate lock commitments are based on observable market prices acquired from third parties. Effective with the adoption of SFAS 133, the carrying amount of loans held for sale includes a basis adjustment to the loan at funding resulting from the change in the fair value of the interest rate lock derivative from the date of commitment to the date of funding.

As part of our secondary marketing activities, we typically utilize short-term forward sale and purchase contracts--derivatives--that mature in less than one year to offset the impact of changes in market interest rates on the value of interest rate lock commitments and loans held for sale. Contracts designated to loans held for sale are accounted for as cash flow hedges because these contracts have a high correlation to the price movement of the loans being hedged (within a range of 80% - 125%). Changes in forward sale contract values not designated to loans held for sale and the ineffectiveness of hedge transactions that are not perfectly correlated are recorded in net gains on sales of loans and mortgage-backed securities. Changes in forward sale contract values designated as cash flow hedges for loans held for sale are recorded in other comprehensive income, net of tax, provided cash flow hedge requirements are met. The offset to these changes in forward sale contract values are recorded in the balance sheet in either other assets, or accounts payable and accrued liabilities. The amounts recorded in accumulated other comprehensive income will be recognized in the income statement when the hedged forecasted transactions settle. We estimate that all of the related unrealized gains or losses in accumulated other comprehensive income will be reclassified into earnings within the next three months. Downey does not

DOWNEY FINANCIAL CORP. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

generally enter into derivative transactions for purely speculative purposes. Fair values for forward sale contracts are based on observable market prices acquired from third parties.

As of December 31, 2001, the amount of hedge ineffectiveness recorded in the income statement through net gains on sale of loans and mortgage-backed securities was a net loss of \$467,000.

Downey has not discontinued any designated derivative instruments due to a change in the probability of settling a forecasted transaction.

These forward contracts expose Downey to credit risk in the event of nonperformance by the other parties--primarily government-sponsored enterprises such as Federal National Mortgage Association--to such agreements. This risk consists primarily of the termination value of agreements where Downey is in an unfavorable position. Downey controls the credit risk associated with its other parties to the various derivative agreements through credit review, exposure limits and monitoring procedures. Downey does not anticipate nonperformance by the other parties.

(24) FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value estimates are made at a specific point in time based upon relevant market information and other information about the financial instrument. The estimates do not necessarily reflect the price Downey might receive if it were to sell at one time its entire holding of a particular financial instrument. Because no active market exists for a significant portion of Downey's financial instruments, fair value estimates are based upon the following methods and assumptions, some of which are subjective in nature. Changes in assumptions could significantly affect the estimates.

CASH, FEDERAL FUNDS SOLD AND SECURITIES PURCHASED UNDER RESALE AGREEMENTS

The carrying amounts reported in the balance sheet for these items approximate fair value.

INVESTMENT SECURITIES INCLUDING U.S. TREASURIES AND MORTGAGE-BACKED SECURITIES

Fair value is based upon bid prices published in financial newspapers, or bid quotations received from securities dealers or readily available market quote systems.

LOANS RECEIVABLE

For residential mortgage loans, fair value is estimated based upon market prices obtained from readily available market quote systems. The remaining portfolio was segregated into those loans with variable rates of interest and those with fixed rates of interest. For non-residential loans, fair values are based on discounting future contractual cash flows using discount rates offered for such loans with similar remaining maturities and credit risk. The amounts so determined for each category of loan are reduced by the associated allowance for loan losses which thereby takes into consideration changes in credit risk.

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

### INTEREST-BEARING ADVANCES TO JOINT VENTURES

The carrying amounts approximate fair value as the interest earned is based upon a variable rate.

### FEDERAL HOME LOAN BANK STOCK

The carrying amounts approximate fair value.

### MORTGAGE SERVICING RIGHTS

The fair value of MSRs related to loans serviced for others is determined by computing the present value of the expected net servicing income from the portfolio.

97

## DOWNEY FINANCIAL CORP. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

### DERIVATIVE ASSETS AND LIABILITIES

Fair values for interest rate lock commitments and loan forward sale and purchase contracts are based on observable market prices acquired from third parties.

### DEPOSITS

The fair value of deposits with no stated maturity such as regular passbook accounts, money market accounts and checking accounts, is the carrying amount reported in the balance sheet. The fair value of deposits with a stated maturity such as certificates of deposit is based on discounting future contractual cash flows by discount rates offered for such deposits with similar remaining maturities.

### BORROWINGS

For short-term borrowings, fair value approximates carrying value. The fair value of long-term borrowings is based on their interest rate characteristics. For variable rate borrowings, fair values approximate carrying values. For fixed rate borrowings, fair value is based on discounting future contractual cash flows by discount rates paid on such borrowings with similar remaining maturities.

### CAPITAL SECURITIES

Fair value is based upon closing stock price published in financial information services or newspapers.

### OFF-BALANCE-SHEET FINANCIAL INSTRUMENTS

Outstanding commitments to originate loans and mortgage-backed securities held for investment, unused lines of credit, standby letters of credit and other contingent liabilities are essentially carried at zero with a fair value of less than \$1 million. See Note 22 on page 95, for information concerning the notional amount of such financial instruments.

### DOWNEY FINANCIAL CORP. AND SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS----(CONTINUED)

##### (25) BUSINESS SEGMENT REPORTING

Downey views its business as consisting of two reportable business segments--banking and real estate investment. The accounting policies of the segments are the same as those described in Note 1, Summary of Significant Accounting Policies on page 68. Downey evaluates performance based on the net income generated by each segment. Internal expense allocations between segments are independently negotiated and, where possible, service and price is measured against comparable services

## Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

available in the external marketplace.

The following describes the two business segments.

### BANKING

The principal business activities of this segment are attracting funds from the general public and institutions and originating and investing in loans, primarily residential real estate mortgage loans, mortgage-backed securities and investment securities.

This segment's primary sources of revenue are interest earned on mortgage loans and mortgage-backed securities, income from investment securities, gains on sales of loans and mortgage-backed securities, fees earned in connection with loans and deposits and income earned on its portfolio of loans and mortgage-backed securities serviced for investors.

This segment's principal expenses are interest incurred on interest-bearing liabilities, including deposits and borrowings, and general and administrative costs.

### REAL ESTATE INVESTMENT

Real estate development and joint venture operations are conducted principally through the Bank's wholly owned service corporation subsidiary, DSL Service Company. However, Downey Financial Corp. owned one investment in land which it purchased from DSL Service Company at fair value in 1995 and sold in 1999.

DSL Service Company participates as an owner of, or a partner in, a variety of real estate development projects, principally retail neighborhood shopping center developments, most of which are located in California. Most of the real estate development projects have been completed and are substantially leased.

In its joint ventures, DSL Service Company is entitled to interest on its equity invested in the project on a priority basis after third-party debt and shares profits and losses with the developer partner, generally on an equal basis. Partnership equity (deficit) accounts are affected by current period results of operations, additional partner advances, partnership distributions and partnership liquidations.

This segment's primary sources of revenue are net rental income and gains from the sale of real estate investment assets. This segment's principal expenses are interest expense and general and administrative expense.

(27) PARENT COMPANY FINANCIAL INFORMATION

Downey Financial Corp. was incorporated in Delaware on October 21, 1994. On January 23, 1995, after obtaining necessary stockholder and regulatory approvals, Downey Financial Corp. acquired 100% of the issued and outstanding capital stock of the Bank, and the Bank's stockholders became stockholders of Downey Financial Corp. The transaction was accounted for in a manner similar to a pooling-of-interests. Downey Financial Corp. was thereafter funded by a \$15 million dividend from the Bank. Condensed financial statements of Downey Financial Corp. only are as follows:

## (28) SALE OF SUBSIDIARY

On February 29, 2000, Downey Savings and Loan Association, F.A. sold its indirect automobile finance subsidiary, Downey Auto Finance Corp., to Auto One Acceptance Corp., a subsidiary of California Federal Bank and recognized a pre-tax gain from the sale of \$9.8 million. As of December 31, 1999, Downey Auto Finance Corp. had loans totaling \$366 million and total assets of \$373 million. The proceeds of the sale provided additional capital to further the growth of our residential lending business.

## ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-K

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Downey Financial Corp. intends to file with the Securities and Exchange Commission a definitive proxy statement (the "Proxy Statement") pursuant to Regulation 14A, which will involve the election of directors, within 120 days of the end of the year covered by this Form 10-K. Information regarding directors of Downey Financial Corp. will appear under the caption "Election of Directors" in the Proxy Statement for the Annual Meeting of Stockholders to be held on April 24, 2002, and is incorporated herein by reference. Information regarding executive officers of Downey Financial Corp. will appear under the caption "Executive Officers" in the Proxy Statement and is incorporated herein by this reference.

ITEM 11. EXECUTIVE COMPENSATION

Information regarding executive compensation will appear under the caption "Executive Compensation" in the Proxy Statement and is incorporated herein by this reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

Information to be included under the captions "Security Ownership of Certain Beneficial Owners" in the Proxy Statement is incorporated herein by this reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Information to be included under the caption "Certain Relationships and Related Transactions" in the Proxy Statement is incorporated herein by this reference.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

- (a) 1. Financial Statements. These documents are listed in the Index to Consolidated Financial Statements under Item 8.
- 2. Financial Statement Schedules. Financial Statement Schedules have been omitted because they are not applicable or the required information is shown in the Consolidated Financial Statements or Notes thereto.
- (b) Reports on Form 8-K during the last quarter of 2001.

Form 8-K filed October 16, 2001, with respect to a press release reporting results of operations for the three and nine months ended September 30, 2001.
