SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended **June 30, 2008**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number **1-13578**

DOWNEY FINANCIAL CORP.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

33-0633413

(I.R.S. Employer Identification No.)

3501 Jamboree Road, Newport Beach, CA

(Address of principal executive office)

92660

(Zip Code)

Registrant's telephone number, including area code

(949) 854-0300

N/A

(Former name, former address and former fiscal year, if changed since last report.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At June 30, 2008, 27,853,783 shares of the Registrant's Common Stock, \$0.01 par value were outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE (1) Basis of Financial Statement Presentation

In the opinion of Downey Financial Corp. and subsidiaries (Downey, we, us and our), the accompanying consolidated financial statements contain all adjustments (consisting of normal recurring accruals unless otherwise disclosed in this Form 10-Q) necessary for a fair presentation of Downey's financial condition as of June 30, 2008, December 31, 2007 and June 30, 2007, the results of operations and comprehensive income (loss) for the three months and six months ended June 30, 2008 and 2007, and changes in cash flows for the six months ended June 30, 2008 and 2007. Certain prior period amounts have been reclassified to conform to the current period presentation.

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial statements and are in compliance with the instructions for Form 10-Q and therefore do not include all information and footnotes necessary for a fair presentation of financial condition, results of operations, comprehensive income (loss) and cash flows. The information under the heading Management's Discussion and Analysis of Financial Condition and Results of Operations presumes that the interim consolidated financial statements will be read in conjunction with Downey's Annual Report on Form 10-K for the year ended December 31, 2007, which contains among other things, a description of the business, the latest audited consolidated financial statements and notes thereto, together with Management's Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2007 and for the year then ended. Therefore, only material changes in financial condition and results of operations are discussed in the remainder of Part I.

NOTE (2) Mortgage Servicing Rights (MSRs)

Effective January 1, 2008, Downey adopted the fair value provision of Statement of Financial Accounting Standards No. 156, Accounting for Servicing of Financial Assets – an amendment of Financial Accounting Standards Board (FASB) Statement No. 140 (SFAS 156) and remeasured its mortgage servicing rights ("MSRs") at fair value. Downey recorded a pretax adjustment to increase MSRs by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the 2008 beginning balance of retained earnings in stockholders' equity. The following table shows the adjustment recorded to the opening balance of MSRs, income taxes, and retained earnings for the remeasurement of Downey's MSRs at fair value.

<i>(Dollars in Thousands)</i>	<i>MSRs</i>	<i>Deferred Tax Asset</i>	<i>Retained Earnings</i>
Balance at December 31, 2007	\$ 19,512	\$ 122,086	\$ 1,254,367
Remeasurement of MSRs upon adoption of SFAS 156	1,543	(651)	892
Balance at January 1, 2008	\$ 21,055	\$ 121,435	\$ 1,255,259

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table summarizes the activity in MSR's using the fair value method and, prior to 2008, using the amortized cost method for the periods indicated.

-----------------	-----------	-----------	-----------	-----------	-----------

Custodial account balances	\$ 67,710	\$ 71,479	\$ 81,778	\$ 84,819	\$ 156,433
----------------------------	-----------	-----------	-----------	-----------	------------

^(a) Effective January 1, 2008, Downey adopted the fair value provision of SFAS 156 and remeasured its MSR's at fair value. Downey recorded a pretax adjustment to increase MSR's by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the 2008 beginning balance of retained earnings in stockholders' equity.

^(b) Included minor amounts repurchased.

^(c) Reflects changes in assumptions for such items as discount rates and prepayment speeds.

^(d) Represents changes due to realization of expected cash flows over time.

^(e) Excludes loans sub-serviced without capitalized mortgage servicing rights. The estimated fair values for periods presented prior to 2008 may exceed book value for certain asset strata and excluded loans sold or securitized prior to 1996.

^(f) Servicing is performed for a fixed fee per loan each month.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table summarizes the activity in MSR and its related allowance for the year-to-date periods indicated.

Six Months Ended June 30,

(Dollars in Thousands)

	2008	2007
Gross balance at beginning of period	\$ 21,973	\$ 21,435
Remeasurement of mortgage servicing rights to fair value ^(a)	(918)	-
Adjusted balance at beginning of period	21,055	21,435

Remeasurement of mortgage servicing rights to fair value ^(a)	(2,461)	-
Adjusted balance at beginning of period	-	239
Reduction of impairment	-	(15)
Impairment write-down	-	(136)
Allowance balance at end of period	-	88
Total mortgage servicing rights, net	\$ 23,558	\$ 21,619

^(a) Effective January 1, 2008, Downey adopted the fair value provision of SFAS 156 and remeasured its MSRs at fair value. Downey recorded a pretax adjustment to increase MSRs by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the 2008 beginning balance of retained earnings in stockholders' equity.

^(b) Included minor amounts repurchased.

^(c) Reflects changes in assumptions for such items as discount rates and prepayment speeds.

^(d) Represents changes due to realization of expected cash flows over time.

Upon adoption in 2008 of the fair value provision of SFAS 156, Downey capitalizes MSRs at fair value for residential one-to-four unit mortgage loans we originate and sell with servicing rights retained or acquired through purchase. Downey discloses MSRs associated with the origination and sale of loans in the financial statements as a component of the net gains on sales of loans and mortgage-backed securities. MSR fair value adjustments are recorded as a component of loan servicing income (loss), net. Prior to 2008, Downey capitalized MSRs at fair value except for those acquired through purchase, which were recorded at the lower of cost or fair value. MSRs were amortized over the estimated servicing period with impairment losses recorded through a valuation allowance with both the associated provisions and amortization recorded as a component of loan servicing income (loss), net category.

Downey's loan servicing portfolio normally increases in value as interest rates rise and loan prepayments decrease and declines in value as interest rates fall and loan prepayments increase. The change in fair value for MSRs reflects changes in assumptions and changes due to the

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

realization of expected cash flows over time. Key assumptions used to determine the fair value of MSR, which vary due to changes in market interest rates, include: expected prepayment speeds, which impact the average life of the portfolio; the earnings rate on custodial accounts, which impacts the value of custodial accounts; expected delinquencies and losses, which impact the servicing income (loss); and the discount rate used in valuing future cash flows. Once a quarter, Downey conducts model validation procedures by obtaining three independent broker results for the fair value of MSR and compares them to the results of its MSR model.

Prior to 2008, under the amortization method of recording MSR, impairment was measured on a disaggregated basis based upon the predominant risk characteristics of the underlying mortgage loans, which include loans by loan term and coupon rate (stratified in 50 basis point increments). Impairment losses were recognized through a valuation allowance for each impaired stratum. Certain strata may have impairment, while other strata may not. Therefore, changes in overall fair value may not equal provisions for or reductions of the valuation allowance.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table summarizes the estimated changes in the fair value of MSR's for changes in those assumptions individually and in combination associated with an immediate 100 basis point increase or decrease in market rates. The sensitivity analysis in the table below is hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 100 basis point variation in assumptions generally cannot be easily extrapolated because the relationship of the change in the assumptions to the change in fair value may not be linear. Also, in this table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumptions. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

<i>(Dollars in Thousands)</i>	<i>Expected Prepayment Speeds</i>	<i>Custodial Accounts Rate</i>	<i>Discount Rate</i>	<i>Combination</i>
Increase rates 100 basis points: ^(a)				
Increase (decrease) in fair value	\$ 2,535	\$ 1,377	\$ (635)	\$ 2,610
Decrease rates 100 basis points: ^(b)				
Increase (decrease) in fair value	(7,371)	(1,491)	621	(8,388)

^(a) The weighted-average expected life of the MSR's portfolio becomes 83 months.

^(b) The weighted-average expected life of the MSR's portfolio becomes 36 months.

The following table presents a breakdown of the components of loan servicing income (loss), net included in Downey's results of operations for the periods indicated.

<i>(In Thousands)</i>	<i>Three Months Ended</i>				
	<i>June 30, 2008</i>	<i>March 31, 2008</i>	<i>December 31, 2007</i>	<i>September 30, 2007</i>	<i>June 30, 2007</i>

^(d) Represents changes due to realization of expected cash flows over time.

NOTE (3) Derivatives, Hedging Activities, Financial Instruments with Off-Balance Sheet Risk and Other Contractual Obligations (Risk Management)

Derivatives

Downey offers short-term interest rate lock commitments to help attract potential home loan borrowers. The commitments guarantee a specified interest rate for a loan if underwriting standards are met, but do not obligate the potential borrower. Accordingly, some commitments never become loans and merely expire. The residential one-to-four unit interest rate lock commitments Downey ultimately expects to result in loans and sell in the secondary market are treated as derivatives. Consequently, as derivatives, the hedging of the interest rate lock commitments does not qualify for hedge accounting. Effective January 1, 2008, Downey adopted the Securities and Exchange Commission Staff Accounting Bulletin No. 109, Written Loan Commitments Recorded at Fair Value Through Earnings, that specifically states the expected net future cash flows related to the associated servicing of a loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. Associated fair value adjustments to the notional amount of interest rate lock commitments and, beginning in 2008, the associated MSR's are recorded in current earnings under net gains on sales of loans and mortgage-backed securities with an offset to the balance sheet in either other assets, or accounts payable and accrued liabilities. Fair values for the notional amount of interest rate lock commitments are based on dealer quoted market prices acquired from third parties. Fair values for the associated MSR's are determined by computing the present value of the expected net servicing income from the portfolio by strata, determined by key characteristics of the underlying loans, primarily coupon interest rate and whether the loans have a fixed or variable rate. The carrying amount of loans held for sale includes a basis adjustment to the loan balance at funding resulting from the change in fair value of the interest rate lock derivative and, beginning in 2008, the associated MSR's from the date of rate lock to the date of funding. At June 30, 2008, Downey had a notional amount of interest rate lock commitments identified to sell as part of its secondary marketing activities of \$54 million, with a change in fair value resulting in a recorded gain of \$0.7 million.

Downey does not generally enter into derivative transactions for purely speculative purposes.

Derivative Hedging Activities

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

As part of its secondary marketing activities, Downey typically utilizes short-term loan forward sale and purchase contracts derivatives that mature in less than one year to offset the impact of changes in market interest rates on the value of residential one-to-four unit interest rate lock commitments and loans held for sale. In general, interest rate lock commitments associated with fixed rate loans require a higher percentage of loan forward sale contracts to mitigate interest rate risk than those associated with adjustable rate loans. Contracts designated as hedges for the forecasted sale of loans from the held for sale portfolio are accounted for as cash flow hedges because these contracts have a high correlation to the price movement of the loans being hedged (within a range of 80% - 125%). The measurement approach for determining the ineffective aspects of the hedge is established at the inception of the hedge. Changes in fair value of the notional amount of loan forward sale contracts not designated as cash flow hedges and the ineffectiveness of hedge transactions are recorded in net gains on sales of loans and mortgage-backed securities. Changes in expected future cash flows related to the fair value of

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

the notional amount of loan forward sale contracts designated as cash flow hedges for the forecasted sale of loans held for sale are recorded in other comprehensive income (loss), net of tax, provided cash flow hedge requirements are met. The offset to these changes are recorded in the balance sheet as either other assets, or accounts payable and accrued liabilities. The amounts recorded in accumulated other comprehensive income (loss) will be recognized in the income statement when the hedged forecasted transactions impact earnings. Downey estimates that all of the related unrealized gains or losses in accumulated other comprehensive income will be reclassified into earnings within the next three months. Fair values for the notional amount of loan forward sale contracts are based on dealer quoted market prices acquired from third parties. At June 30, 2008, the notional amount of loan forward sale contracts amounted to \$130 million, with a change in fair value resulting in a gain of \$0.8 million, of which \$72 million were designated as cash flow hedges. The notional amount of loan forward purchase contracts at June 30, 2008 amounted to \$4 million, with less than \$0.1 million change in fair value.

Downey has not discontinued any designated derivative instruments associated with loans held for sale due to a change in the probability of settling a forecasted transaction.

In connection with its interest rate risk management, Downey from time to time enters into interest rate exchange agreements (swap contracts) with certain national investment banking firms or the Federal Home Loan Bank of San Francisco (FHLB) under terms that provide mutual payment of interest on the outstanding notional amount of swap contracts. These swap contracts help Downey manage the effects of adverse changes in interest rates on net interest income. Downey has interest rate swap contracts on which it pays variable interest based on the 3-month London Inter-Bank Offered Rate (LIBOR) while receiving fixed interest. The swaps were designated as a hedge against changes in the fair value of certain FHLB fixed rate advances due to changes in market interest rates. The payment and maturity dates of the swap contracts match those of the advances. This hedge effectively converts fixed interest rate advances into debt that adjusts quarterly to movements in 3-month LIBOR. Because the terms of the swap contracts match those of the advances, the hedge has no ineffectiveness and results are reported in interest expense. The fair value of interest rate swap contracts is based on dealer quoted market prices acquired from third parties and represents the estimated amount Downey would receive or pay upon terminating the contracts, taking into consideration current interest rates and the remaining contract terms. The fair value of the swap contracts is recorded on the balance sheet in either other assets or accounts payable and accrued liabilities. With no ineffectiveness, the recorded swap contract values will essentially act as fair value adjustments to the advances being hedged. At June 30, 2008, swap contracts with a notional amount totaling \$430 million were outstanding and had a fair value gain of \$0.4 million recorded on the balance sheet in other assets and as an increase to the advances being hedged.

The following table summarizes Downey's interest rate swap contracts at June 30, 2008.

<i>(Dollars in Thousands)</i>	<i>Notional Amount</i>	<i>Weighted Average Interest Rate</i>	<i>Term</i>

Net gains on non-qualifying hedge transactions	\$ 2,030	\$ 1,117
Net gains on qualifying cash flow hedge transactions:		
Unrealized hedge ineffectiveness	-	-
Less reclassification of realized hedge ineffectiveness	-	-
Total net gains recognized in sales of loans and		
mortgage-backed securities (SFAS 133 effect)	2,030	1,117
Other comprehensive loss	(13)	(146)

These loan forward sale and swap contracts expose Downey to credit risk in the event of nonperformance by the other parties primarily government-sponsored enterprises such as Federal National Mortgage Association, securities firms and the FHLB. This risk consists primarily of the termination value of agreements where Downey is in an unfavorable position. Downey manages the credit risk associated with its other parties to the various derivative agreements through credit review, exposure limits and monitoring procedures. Downey does not anticipate nonperformance by the other parties.

Financial Instruments with Off-Balance Sheet Risk

Downey utilizes financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to originate fixed and variable rate mortgage loans held for investment, undisbursed loan funds, lines and letters of credit, commitments to purchase loans and mortgage-backed securities for portfolio and commitments to invest in community development funds. The contract or notional amounts of those instruments reflect the extent of involvement Downey has in particular classes of financial instruments.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Commitments to originate fixed and variable rate mortgage loans held for investment are agreements to lend to a customer as long as there is no violation of any condition established in the commitment. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Undisbursed loan funds on construction projects and unused lines of credit on home equity and commercial loans include committed funds not disbursed. Letters of credit are conditional commitments issued by Downey to guarantee the performance of a customer to a third party. Downey also enters into commitments to purchase loans and mortgage-backed securities, investment securities and to invest in community development funds.

The following is a summary of commitments with off-balance sheet risk at the dates indicated.

<i>(In Thousands)</i>	<i>June 30,</i> 2008	<i>March 31,</i> 2008	<i>December 31,</i> 2007	<i>September 30,</i> 2007	<i>June 30,</i> 2007
Commitments to originate adjustable rate loans					
held for investment	\$ 362,317	\$ 524,978	\$ 196,471	\$ 211,277	\$ 138,510
Undisbursed loan funds and unused lines of credit	277,757	265,493	306,532	310,677	316,931

Downey uses the same credit policies in making commitments to originate loans held for investment and lines and letters of credit as it does for on-balance sheet instruments. For commitments to originate loans held for investment, the commitment amounts represent exposure to loss from market fluctuations as well as credit loss. In regard to these commitments, adverse changes from market fluctuations are generally not hedged. Downey manages the credit risk of its commitments to originate loans held for investment through credit approvals, limits and monitoring procedures. The credit risk involved in issuing lines and letters of credit requires the same creditworthiness evaluation as that involved in extending loan facilities to customers. Downey evaluates each customer's creditworthiness.

Downey receives collateral to support commitments when deemed necessary. The most significant categories of collateral include real estate properties underlying mortgage loans, liens on personal property and cash on deposit with Downey.

Downey maintains an allowance for losses to provide for inherent losses for loan-related commitments associated with undisbursed loan funds and unused lines of credit. The allowance for losses on loan-related commitments was \$1 million at June 30, 2008, December 31, 2007 and June 30, 2007.

Other Contractual Obligations

Downey sells all loans without recourse. When a loan sold to an investor without recourse fails to perform according to the contractual terms of the note, the investor will typically review the loan file to determine whether defects in the origination process occurred and whether such defects give rise to a violation of a representation or warranty made to the investor in connection with the sale. If such a defect is identified, Downey may be required to either repurchase the loan or indemnify the investor for losses sustained. If there are no such defects, Downey has no commitment to repurchase the loan. During the first six months of 2008, Downey recorded repurchase or indemnification losses related to defects in the origination process of \$0.2 million and repurchased \$2 million of loans and \$1 million of real estate acquired in settlement of loans.

The loan and servicing sale contracts may also contain provisions to refund sales price premiums to the purchaser if the related loans prepay during a period of typically 90 days, but never more than 120 days, from the sale's settlement date. Downey reserved less than \$1 million at June 30, 2008, December 31, 2007 and June 30, 2007 to cover the estimated loss exposure related to early payoffs. However, if all the loans related to those sales prepaid within the refund period, as of June 30, 2008, Downey's maximum sales price premium refund would be \$1.4 million.

Through the normal course of operations, Downey has entered into certain contractual obligations. Downey's obligations generally relate to the funding of operations through deposits and borrowings, loan servicing, as well as leases for premises and equipment. Downey has obligations under long-term operating leases, principally for building space and land. Lease terms generally cover a five-year period, with options to extend, and are non-cancelable. Downey also has vendor contractual relationships, but the contracts are not considered to be material.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

At June 30, 2008, scheduled maturities of certificates of deposit, FHLB advances and other borrowings, senior notes and future operating minimum lease commitments were as follows:

(In Thousands)	Within 1 Year	After 1 Through 3 Years	After 3 Through 5 Years	Beyond 5 Years	Total Balance
Certificates of deposit	\$ 7,280,647	\$ 213,906	\$ 90,243	\$ -	\$ 7,584,796

Total other contractual obligations	\$ 8,584,050	\$ 421,684	\$ 217,945	\$ 198,980	\$ 9,422,659

Litigation

On October 29, 2004, two former traditional branch employees brought an action in Los Angeles County Superior Court, Case No. BC323796, entitled *Margie Holman and Alice A. Meseck, et al. v. Downey Savings and Loan Association*. The first amended complaint seeks unspecified damages for alleged unpaid regular and overtime wages, inadequate meal breaks, failure to pay split-shift and reporting time wages, and related claims. The plaintiffs are seeking class action status to represent all other current and former Downey Savings and Loan Association, F.A. (Bank) employees who held the position of Customer Service Supervisor and/or Customer Service Representative at the Bank's in-store branches at any time from October 29, 2000 to date. The Bank has opposed the claim and asserted all appropriate defenses, and has provided for what is believed to be a reasonable estimate of exposure for this matter in the event of loss. While acknowledging the uncertainties of litigation, management believes that the ultimate outcome of this matter will not have a material adverse effect on Downey's operations, cash flows or financial position.

Two purported shareholder class actions, one brought on behalf of Waterford Township General Employees Retirement System, Case No. CV-08-03261, and the other brought on behalf of Stephen J. Mihalacki, Case No. SACV08-00609, were filed on May 16, 2008 and June 2, 2008, respectively, in the United States District Court for the Central District of California against Downey Financial Corp. (Holding Company) and certain of its current and former officers and certain former directors. The complaints, filed on behalf of all persons who purchased Holding Company common stock during October 16, 2006 to March 14, 2008, seek unspecified damages for alleged violation of federal securities laws, claiming that the defendants made misleading statements and omissions regarding Downey's business and financial results, thereby artificially inflating the common stock price. Specifically, the plaintiffs contend that the defendants concealed that (a) the Bank's portfolio of option ARMs contained millions of dollars worth of impaired and risky securities; (b) the Bank had been aggressive in acquiring loans from mortgage brokers that were highly risky; (c) the Bank had failed to properly account for highly leveraged loans; (d) the Bank had inadequate underwriting practices, which led to large numbers of loan defaults; and (e) the Bank had not adequately reserved for option ARM loans. A motion to consolidate the two actions is pending, after which it is expected that the plaintiffs will file a consolidated complaint.

Related to the shareholder class actions, two purported shareholder derivative lawsuits, one entitled *Michael L. McDougall v. Daniel D. Rosenthal, et al.*, Case No. 30-2008-00180029, and the other entitled *Joyce Mendlin v. Maurice L. McAlister, et al.*, Case No. 30-2008-00087854, were filed on June 10, 2008 and July 28, 2008, respectively, in Orange County Superior Court, in California. The plaintiffs, who purport to bring the lawsuits on behalf of the Holding Company against certain of its current and former officers, its current directors and certain former directors, allege that commencing in October 2006, the defendants caused or allowed Downey to issue a series of press releases and other statements that significantly overstated Downey's business prospects and financial results; that the statements failed to disclose that Downey was more exposed to the subprime market crisis than it had disclosed; that Downey's portfolio of subprime and option ARM mortgage-related assets was overvalued; and that as a result, Downey's reported earnings and business prospects were inaccurate. The plaintiffs allege that the defendants' action constitutes breaches of fiduciary duty, waste of corporate assets and unjust enrichment, and seek, among other relief, unspecified damages to be paid to the Holding Company, corporate governance reforms, and equitable and injunctive relief, including restitution and the creation of a constructive trust.

Downey has been named as a defendant in other legal actions arising in the ordinary course of business, none of which, in the opinion of management, will have a material adverse effect on its operations, cash flows or financial position.

NOTE (4) Income Taxes

FASB Interpretation 48: Accounting for Uncertainty in Income Taxes requires the affirmative evaluation that it is more likely than not, based on the technical merits of a tax position, that an enterprise is entitled to economic benefits resulting from positions taken in income tax returns. If a tax position does not meet the more-likely-than-not recognition threshold, the benefit of that position is not recognized in the financial statements. Management has determined that there are no unrecognized tax benefits to be reported in Downey's financial statements, and none are anticipated during the next 12 months.

During the quarter, the Internal Revenue Service (IRS) completed its examination of Downey's tax returns for 2003, 2004 and 2005. Tax years subsequent to 2005 remain subject to federal examination, while state tax returns for years subsequent to 2002 are subject to examination by taxing authorities. During 2007, Downey determined that its treatment of certain loan origination costs for the years under examination was improper and filed amended tax returns for those years and paid tax and interest to federal and state taxing authorities in the amount of \$144.7 million to resolve this issue. When applicable, Downey classifies interest (net of tax) and penalties on the underpayment of taxes as income tax expense.

SFAS 109, Accounting for Income Taxes, requires that when determining the need for a valuation allowance against a deferred tax asset, management must assess both positive and negative evidence with regard to the realizability of the tax losses represented by that asset. To the extent available sources of taxable income are insufficient to absorb tax losses, a valuation allowance is necessary. Sources of taxable income for this analysis include prior years' tax returns, the expected reversals of taxable temporary differences between book and tax income, prudent and feasible tax-planning strategies, and future taxable income.

Downey has recorded a valuation allowance of \$182.8 million against its deferred tax asset of \$239.9 million as of June 30, 2008, after considering all available evidence and potential tax-planning strategies related to the amount of the tax asset that is more likely than not to be realized.

Downey's deferred tax asset resulted from a significant increase in its loan loss allowance. To the extent the loan loss allowance is not allocable to specific loans, it represents future tax benefits which would be realized when actual charge-offs are made against the allowance. Given Downey's recent operating losses, the valuation allowance recorded at June 30, 2008 reduces the deferred tax asset to the amount management deems more likely than not to be realized only through the carry back of tax losses to prior years' federal tax returns.

Since generally accepted accounting principles require Downey to spread its expected annual tax benefit across the entire year through an effective tax rate, we expect to continue realizing a tax benefit in future periods, but, as explained above, at much smaller levels than in prior periods.

NOTE (5) Employee Stock Option Plans

During 1994, the Bank adopted and Downey's stockholders approved the Downey Savings and Loan Association 1994 Long Term Incentive Plan (LTIP). The LTIP provided for the granting of stock appreciation rights, restricted stock, performance awards and other awards. The LTIP specified an authorization of 434,110 shares (adjusted for stock dividends and splits) of the Bank's common stock available for issuance under the LTIP. Effective January 23, 1995, the Holding Company and the Bank executed an amendment to the LTIP by which the Holding Company adopted and ratified the LTIP such that shares of the Holding Company shall be issued upon exercise of options or payment of other awards, for which payment is to be made in stock, in lieu of the Bank's common stock. The LTIP terminated in 2004; however, options granted and outstanding at termination remain exercisable until the specific termination date of the option. At June 30, 2008, options for 52,914 shares were outstanding, all of which were exercisable at a weighted average option price per share of \$25.44, which represented at least the fair market value of such shares on the date the options were granted and expire at December 31, 2008. At June 30, 2008, 381,239 shares of treasury stock existed that may be used to satisfy the exercise of the options or for payment of other awards. No other stock based plan exists.

NOTE (6) Earnings (Loss) Per Share

Earnings (loss) per share of common stock is calculated on both a basic and diluted basis based on the weighted average number of common and common equivalent shares outstanding, excluding common shares in treasury. Basic earnings per share excludes dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that then shared in earnings.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table presents a reconciliation of the components used to derive basic and diluted earnings per share for the periods indicated.

<i>Three Months Ended June 30,</i>

^(a) For the six months ended June 30, 2008, there was no dilutive effect from our 52,914 outstanding stock options.

NOTE (7) Fair Value of Financial Instruments

Fair value measurements for Downey's financial instruments are determined at a specific point in time based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, we have established a fair value hierarchy as required by the FASB Statement of Financial Accounting Standards No. 157, Fair

Value Measurements, ("SFAS 157"). The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from sources independent of Downey (observable inputs) and (2) Downey's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The notion of unobservable inputs allows for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Because no active market exists for a portion of Downey's financial instruments, fair value estimates are subjective in nature. Additionally, the fair value estimates do not necessarily reflect the price Downey might receive if it were to sell at one time its entire holding of a particular financial instrument.

Fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The highest priority (Level 1 inputs) is for quoted prices (unadjusted) in active markets for identical assets or liabilities, the next priority (Level 2 inputs) is for other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, and the lowest priority (Level 3 inputs) is for unobservable inputs. In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment considering factors specific to the asset or liability and could significantly affect the fair value estimate.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Downey's valuation techniques used to measure fair value are as follows:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.
- Level 2 Valuation is based upon a quoted process for similar instruments or assets in active markets, quoted prices for identical or similar instruments or assets in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of pricing models, discounted cash flow models and similar techniques.

The following table presents for each of these hierarchy levels, Downey's assets and liabilities that are measured at fair value on a recurring basis at the date indicated.

<i>(In Thousands)</i>	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>June 30, 2008</i>
U.S. Treasury, government sponsored entities and other				
investment securities, available for sale	\$ 998,396	\$ -	\$ 61	\$ 998,457
Mortgage-backed securities available for sale	-	-	106	106

Total	\$ 19,882	\$ 6,252	\$ -	\$ (1,755)	\$ -	\$ 24,379	\$ 2,228

^(a) Effective January 1, 2008, Downey adopted the fair value provision of SFAS 156 and remeasured its MSRs at fair value. Downey recorded a pretax adjustment to increase MSRs by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

2008 beginning balance of retained earnings in stockholders' equity. Amount in Net Unrealized Gains/(Losses) column excludes changes in fair value due to changes from the realization of expected cash flows over time.

Also, we may be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis in accordance with U. S. generally accepted accounting principles. The adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets.

The following table provides a level of valuation assumptions used to determine each adjustment and the carrying value of assets measured at fair value on a nonrecurring basis at the date and for the period indicated.

<i>(In Thousands)</i>	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>At June 30,</i>	<i>Gains/(Losses) for the Six Months Ended June 30, 2008</i>
Loans held for investment	\$ -	\$ -	\$ 10,789	\$ 10,789	\$ (388)
Real estate acquired in settlement of loans ^(a)	-	-	261,536	261,536	(35,569)
Investment in real estate and joint ventures	-	-	27,024	27,024	(655)
Total	\$ -	\$ -	\$ 299,349	\$ 299,349	\$ (36,612)

^(a) Amount at June 30, 2008 is net of an \$18 million valuation allowance related to Downey's single family residential properties which reflects recent loss experience from sales compared to their fair value prior to sale.

NOTE (9) Recently Issued Accounting Standards

Statement of Financial Accounting Standards No. 161

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161). This standard is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. This statement is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. Downey is currently evaluating the impact, if any, that this statement will have on its disclosures related to hedging activities.

Statement of Financial Accounting Standards No. 162

In May 2008, the FASB issued Statement of Financial Accounting Standards No. 162, The Hierarchy of Generally Accepted Accounting Principles, (SFAS 162). This standard is intended to improve financial reporting by identifying the sources of accounting principles and a consistent framework, or hierarchy, for selecting accounting principles to be used in preparing financial statements that are presented in conformity with U.S. GAAP for nongovernmental entities. SFAS 162 will be effective 60 days after the U.S. Securities and Commission approves the Public Company Accounting Oversight Board's amendments to AU Section 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles. Adoption of SFAS 162 is not expected to have a material impact on Downey.

NOTE (10) Subsequent Events

On July 25, 2008, following Downey's second quarter earnings release on July 24, 2008, Moody's Investors Service downgraded the Holding Company's senior unsecured debt rating to B1 from Ba1. In addition, the Bank's financial strength was downgraded to D from the previous rating of a D+, long-term deposit rating to Ba2 from Baa3 and short-term deposits to Not Prime from Prime-3, with the ratings of the Holding Company and the Bank under review for downgrade. On July 26, 2008, Standard & Poor's Ratings Services lowered its senior unsecured and counterparty credit rating on the Holding Company to BB+/B from BBB-/A-3. In addition, the Bank's counterparty and deposit ratings were lowered to BBB-/A-3 from BBB/A-2, with the ratings of both the Holding Company and the Bank on negative watch. These lower ratings, and any further ratings downgrades, could make it more difficult for the Holding Company and the Bank to access the capital markets going forward, as the cost to borrow or raise capital would most likely become more expensive. The cost of the Bank's primary funding sources (deposits and FHLB borrowings) is not influenced directly by the Bank's credit ratings.

In addition, the Holding Company may not issue new debt or renew existing debt without prior non-objection of the OTS.

In addition to its deposits, Downey's principal source of liquidity is its ability to utilize borrowings, as needed. The Bank's primary source of borrowings is the FHLB. At June 30, 2008, the Bank's FHLB borrowings totaled \$1.5 billion, representing 12.1% of total assets. As of August 8, 2008, the Bank's FHLB borrowings totaled \$2.8 billion. Approximately half of the Bank's increase in FHLB borrowings subsequent to June 30, 2008 is being held in cash equivalents and short-term investment securities to meet our liquidity needs. The Bank currently is approved by the FHLB to borrow up to a maximum of \$3.0 billion to the extent it provides qualifying collateral, providing the Bank with an additional \$0.2 billion of borrowing capacity from the FHLB as of August 8. The amount the FHLB is willing to advance differs based on the quality and character of qualifying collateral offered by the Bank, and the advance rates for qualifying collateral may be adjusted upwards or downwards by the FHLB from time to time. The Bank also is approved to borrow funds on an overnight basis from the Federal Reserve Bank of San Francisco subject to the amount of qualifying collateral it pledges. The Bank views the Federal Reserve Bank as a back-up source of liquidity. As of August 8, 2008, the Bank had no outstanding borrowings from the Federal Reserve Bank of San Francisco and the Bank's available qualifying collateral would have permitted it to borrow up to an additional \$1.5 billion. Neither the FHLB nor the Federal Reserve Bank of San Francisco is obligated to lend to us under these loan facilities. To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize additional borrowing capacity from its FHLB and Federal Reserve Bank borrowing arrangements.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

After the end of the second quarter, the Bank experienced elevated levels of deposit withdrawals. More recently, in response to steps taken by management to address the situation, the Bank has experienced net deposit inflows. If the Bank's deposit levels continue to stabilize with withdrawals at historical levels, Downey believes its current sources of funds, including deposits; advances from the FHLB and other borrowings; proceeds from the sale of loans and real estate; payments of loans and payments for and sales of loan servicing; and income from other investments would enable Downey to meet its obligations while maintaining liquidity at appropriate levels. However, if elevated levels of net deposit outflows resume, the Bank's usual sources of liquidity could become depleted, and the Bank would be required to raise additional capital or enter into new financing arrangements to satisfy its liquidity needs. In the current economic environment, there are no assurances that we would be able to raise additional capital or enter into additional financing arrangements.

Management believes that the Holding Company, on a stand-alone basis, currently has adequate liquid assets to meet its current obligations, which are primarily interest payments on \$199 million of senior notes. Limitations imposed by the Office of Thrift Supervision (OTS) discussed below currently prohibit the Bank from providing a dividend to the Holding Company without prior OTS approval, and the Holding Company from paying dividends (other than the quarterly dividend payable in August 2008), and incurring and renewing debt, without prior non-objection of the OTS. At June 30, 2008, the Holding Company's liquid assets, including amounts deposited with the Bank, totaled \$53 million, down from \$102 million at the end of 2007 due primarily to a \$50 million capital contribution to the Bank.

Downey's stockholders' equity totaled \$0.9 billion at June 30, 2008, down from \$1.3 billion at December 31, 2007 and \$1.5 billion at June 30, 2007. The Board reduced the quarterly per share dividend payment from \$0.12 to \$0.01 for the dividend payable in August 2008, after which no future dividends will be paid without prior non-objection of the OTS.

In light of the current operating environment and Downey's recent quarterly losses, the Holding Company and the Bank have been working closely with the Bank's federal banking regulators. In that regard, the OTS, the Bank's principal regulator, has also imposed the following limitations on the Holding Company and the Bank: the Bank may not pay dividends to the Holding Company without prior OTS approval, and the Holding Company may not pay dividends without prior non-objection of the OTS; the Bank may not increase its assets during any quarter in excess of an amount equal to net interest credited on deposit liabilities without prior OTS approval; the Holding Company may not issue or renew debt without the prior non-objection of the OTS; the Holding Company and the Bank must provide prior notice to the OTS regarding any additions or changes to directors or senior executive officers (or changes in the responsibilities of senior executive officers); the Holding Company and the Bank may not pay certain kinds of severance and other forms of compensation without regulatory approval; the Bank may not enter into, renew, extend or revise any contract related to compensation or benefits with any director or senior executive officer without prior regulatory approval; the Bank must provide prior notice to the OTS (and not receive any objection) before engaging in transactions with any affiliate or subsidiary. In addition, Downey is subject to higher regulatory assessments and FDIC deposit insurance premiums than those prevailing in prior periods.

In response to the challenges facing Downey in the current operating environment, Downey has formed a special Board committee to explore a range of strategic alternatives, including the raising of additional capital to levels deemed by the Board to be appropriate under the circumstances.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain statements under this caption may constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995, which involve risks and uncertainties. Forward-looking statements do not relate strictly to historical information or current facts. Some forward-looking statements may be identified by use of terms such as expects, anticipates, intends, plans, believes, seeks, estimates, or words of similar meaning, or future or conditional verbs such as will, would, should, could or may. Our actual results or outcomes may differ significantly from the results discussed in such forward-looking statements. Factors that might cause such a difference include, but are not limited to, economic conditions, competition in the geographic and business areas in which we conduct our operations, new, changed or increased regulatory restrictions, pending or threatened litigation, a decrease in our customers, including a decrease in our deposit base, the possible loss of key personnel, the inability to successfully implement strategic initiatives, changes in deposit flows and loan demand, limitations on our ability to borrow to fund our assets and operations, risk of credit losses, risk associated with residential mortgage lending, risk associated with a slowdown in the housing market or high interest rates, fluctuations in interest rates, credit quality, the outcome of ongoing audits by regulatory and taxing authorities and government regulation and factors, identified under part II Other Information Item 1A. Risk Factors on page 67. We do not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements were made, except as required by law. We are not able to make any assurances, including but not limited to any assurances that the increased rate of sale of foreclosed homes will continue in future periods, the percentage of unsold homes in escrow or under negotiation will be representative of the number or percentage of homes sold in future periods, the improved quality of our loan portfolio will continue in future periods, we will have adequate liquidity in future periods, or our capital levels will exceed well-capitalized levels in future periods.

OVERVIEW

A net loss was recorded for the second quarter of 2008 of \$218.9 million or \$7.86 per share on a diluted basis, compared with net income of \$32.7 million or \$1.17 per share in the second quarter of 2007.

The \$309.5 million unfavorable change in pre-tax income/(loss) between second quarters was due primarily to:

- A \$249.4 million increase in the provision for credit losses;
- A \$28.5 million or 25.6% decline in net interest income due to a lower level of interest-earning assets and a lower effective interest rate spread;
- A \$26.2 million increase in operating expense primarily due to higher costs related to the operation of real estate acquired in settlement of loans; and
- A \$5.2 million unfavorable change in income from real estate and joint ventures held for investment, as an increase in gains from sales was more than offset by provisions for loss to reflect declines in the value of single family home lots in which the company is a joint venture partner.

For the first six months of 2008, the net loss totaled \$466.6 million or \$16.75 per share on a diluted basis, compared with net income of \$75.6 million or \$2.71 per share for the first six months of 2007. The decline primarily reflected an increase in our provision for credit losses, lower net interest income and higher operating expenses.

For the second quarter, our return on average assets was a negative 6.76%, and our return on average equity was a negative 85.33%. These compare to year-ago positive returns of 0.87% on average assets and 9.01% on average equity. For the six months ended June 30, 2008, our return on average assets was a negative 7.08%, and our return on average equity was a negative 80.67%. These compare to year-ago positive returns of 0.98% on average assets and 10.54% on average equity.

At June 30, 2008, assets totaled \$12.632 billion, down \$2.271 billion or 15.2% from a year ago. During the current quarter, assets declined \$499 million due primarily to a decline of \$605 million in investment securities. That decline was partially offset by a \$72 million increase in real estate acquired in settlement of loans, net, and a \$64 million increase in income tax receivable. Although gross loans held for investment increased by \$231 million, this growth was substantially offset by a \$186 million increase in the allowance for loan losses. Included within loans held for investment at quarter end were \$6.242 billion of single family adjustable rate mortgages subject to negative amortization, down \$721 million from March 31, 2008. These loans comprised 57% of the single family residential loan portfolio held for investment at quarter end, compared with 76% a year ago. The amount of negative amortization included in loan balances declined \$31 million during

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

the current quarter to \$344 million or 5.5% of loans subject to negative amortization. During the current quarter, approximately 15% of loan interest income represented negative amortization, down from 20% in the first quarter 2008 and 29% in the year-ago second quarter.

Loan originations (including purchases) totaled \$1.027 billion in the current quarter, down \$182 million or 15.0% from \$1.209 billion a year ago, but up from \$676 million in the first quarter of 2008. Loans originated for sale declined \$283 million or 57.2% to \$212 million, while single family residential loans originated for portfolio increased \$52 million or 7.4% to \$751 million from a year ago. In addition to single family residential loans, \$65 million of other loans were originated in the current quarter, up from \$15 million a year ago. For the first six months of 2008, loan originations totaled \$1.703 billion, down \$767 million or 31.0% from the same period a year-ago.

Not included in the above originations are loans for which we modified the terms of a borrower's loan. During the current quarter, we modified \$320 million of loans associated with our portfolio retention program, wherein the borrower was current with their loan payments and the new interest rate was no less than that afforded new borrowers, and \$79 million of loans at below market interest rates in loan workout situations. Most of the modifications were adjustable rate loans which permitted negative amortization that were modified into five-year interest-only adjustable rate loans with interest rates that adjust semi-annually but do not permit negative amortization.

Deposits totaled \$9.881 billion at quarter end, down \$1.366 billion or 12.1% from a year ago. Although deposits declined from a year ago, the number of checking accounts was up modestly over a year ago. At quarter end, the number of branches totaled 174 (169 in California and five in Arizona). At quarter end, the average deposit size of our 84 traditional branches was \$94 million, while the average deposit size of our 90 in-store branches was \$22 million. During the current quarter, borrowings increased by \$85 million and represented 14% of total assets at quarter end.

Non-performing assets increased during the quarter by \$395 million to \$1.958 billion and represented 15.50% of total assets, compared with 7.77% at year-end 2007 and 1.53% a year ago. Virtually all of the increase in the current quarter was related to our single family residential lending activity. Included in non-performing assets are loans modified pursuant to our borrower retention program. This program was initiated at the beginning of the third quarter of 2007 to provide borrowers who are current with their loan payments a cost effective means to change from an adjustable rate loans that permitted negative amortization to a less costly financing alternative. To the extent borrowers whose loans were modified as part of this program are current with their loan payments and included in non-performing assets, it is relevant to distinguish those from total non-performing assets because, unlike other loans classified as non-performing assets, these loans are paying interest at interest rates no less than those afforded new borrowers. At June 30, 2008, 82% of such borrowers had made all loan payments due. Accordingly, the 15.50% ratio of non-performing assets to total assets includes 4.34% related to performing troubled debt restructurings resulting in an adjusted ratio of 11.16%.

At June 30, 2008, Downey Savings and Loan Association, F.A. (the Bank), our primary subsidiary, had capital-to-asset ratios of 7.57% for both tangible and core capital, and 14.31% for total risk-based capital. As previously reported, the Bank's regulatory capital position was enhanced by \$62 million during the second quarter from a contribution of \$50 million of equity from the Holding Company and a \$12 million dividend paid by DSL Service Company, the Bank's wholly-owned real estate subsidiary. This was more than offset by the net loss recorded in the current quarter.

In light of the current operating environment and Downey's recent quarterly losses, the Holding Company and the Bank have been working closely with the Bank's federal banking regulators. In that regard, the OTS, the Bank's principal regulator, has also imposed the following limitations on the Bank: the Bank may not pay dividends to the Holding Company without prior OTS approval; the Bank may not increase its assets during any quarter in excess of an amount equal to net interest credited on deposit liabilities without prior OTS approval; the Bank must provide prior notice to the OTS regarding any additions or changes to directors or senior executive officers (or changes in the responsibilities of senior executive officers); the Bank may not pay certain kinds of severance and other forms of compensation without regulatory approval; the Bank may not enter into, renew, extend or revise any contract related to compensation or benefits with any director or senior executive officer without prior regulatory approval; and the Bank must provide prior notice to the OTS (and not receive any objection) before engaging in transactions with any affiliate or subsidiary. In addition, the Bank is subject to higher regulatory assessments and FDIC deposit insurance premiums than those prevailing in prior periods.

In response to the challenges facing Downey in the current operating environment, Downey has formed a special Board committee to explore a range of strategic alternatives, including the raising of additional capital to levels deemed by the Board to be appropriate under the circumstances.

CRITICAL ACCOUNTING POLICIES

We have established various accounting policies which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Certain accounting policies require us to make significant estimates and assumptions which could have a material impact on the carrying value of certain assets and liabilities, and we consider these to be critical accounting policies. The estimates and assumptions are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Actual results could differ significantly from these estimates and assumptions which could have a material impact on the future carrying value of assets and liabilities and our results of operations for the reporting periods. We believe the following four critical accounting policies require the most judicious estimates and assumptions, which are particularly susceptible to significant change in the preparation of our financial statements:

- the valuation of interest rate lock commitments;
- the allowance for credit and real estate losses;
- the valuation of mortgage servicing rights (MSRs); and
- the prepayment reserves related to sales of loans and MSRs.

The nature of these judgments, estimates and assumptions are described in greater detail in Downey's Annual Report on Form 10-K for the year ended December 31, 2007 in the "Critical Accounting Policies" section of Management's Discussion and Analysis and in Note 1 to the Consolidated Financial Statements "Summary of Significant Accounting Policies."

In addition to those critical accounting policies addressed in Downey's Annual Report on Form 10-K for the year ended December 31, 2007, we have added:

- the calculation of our income tax provision and related tax accruals as they could have a material impact on the future value of assets and liabilities and our results of operations. Accrued income taxes represent the estimated amounts due or to be received from the various taxing jurisdictions where we have established a business presence. The balance also includes, when appropriate, a contingent reserve for potential taxes, interest and penalties related to uncertain tax positions. On a quarterly basis, management evaluates the contingent tax accruals to determine if they are sufficient based on a probability assessment of potential outcomes. The determination is based on facts and circumstances, including the interpretation of existing law, new judicial or regulatory guidance and the status of tax audits. The provision for income taxes is based on amounts reported in the consolidated statements of income which are adjusted to reflect the permanent and temporary differences in the tax and financial accounting for certain assets and liabilities. Deferred income taxes represent the tax effect of the basis differences in tax and financial reporting arising from temporary differences in accounting treatment. On a quarterly basis, management evaluates its deferred tax assets to determine if these tax benefits are expected to be realized in future periods. This determination is based on facts and circumstances, including our current and future tax outlook. To the extent a deferred tax asset is not considered "more likely than not" to be realized, a valuation allowance is established. At June 30, 2008, we recorded a valuation allowance of \$182.8 million against our deferred tax assets of \$239.9 million.
- the valuation of real estate acquired in settlement of loans. Real estate acquired through foreclosure is recorded at fair value less cost to sell on the date of foreclosure and any subsequent fair value changes are recorded in net operations, with a corresponding charge to the asset value. Fair value is measured based on the lower of the sales price, an appraisal or the list price and an additional loss allowance may be established based on current market trends. List prices are determined based on Management's estimate of value and take into consideration sources of value such as a broker's price opinion, internal appraisal review and market trends. At June 30, 2008, it was deemed necessary to increase our allowance for losses to \$18 million against our single family residential real estate acquired in settlement of loans due to recent loss experience from sales compared to their fair values prior to sale. For further information, see Note 7 on page 16 of Notes to the Consolidated Financial Statements and Problem Loans and Real Estate on page 52.

Management has discussed the development and selection of these critical accounting policies with the Audit Committee of our Board of Directors.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the difference between the interest and dividends earned on loans, mortgage-backed securities and investment securities (interest-earning assets) and the interest paid on deposits and borrowings (interest-bearing liabilities). The spread between the yield on interest-earning assets and the cost of interest-bearing liabilities and the relative dollar amounts of these assets and liabilities principally affects net interest income.

Our net interest income totaled \$82.9 million in the second quarter of 2008, down \$28.5 million or 25.6% from a year ago, reflecting a \$2.367 billion or 16.3% decline in average interest-earning assets to \$12.168 billion and a decline in the effective interest rate spread. The average effective interest rate spread was 2.73% in the current quarter, down 0.34% from a year ago but up 0.10% from the first quarter of 2008. The decline in the current quarter effective interest spread from a year ago primarily reflected the negative impact of a higher proportion of non-performing assets. Although non-performing assets increased in the current quarter from the first quarter of 2008, the earning asset yield did not decline as rapidly as the cost of funds resulting in an increase in the effective interest rate spread.

For the first six months of 2008, net interest income totaled \$166.7 million, down \$69.9 million or 29.6% from the year-ago period. The decline was due to lower interest-earning assets and a lower effective interest rate spread in the current period. The following table presents for the periods indicated the total dollar amount of:

- interest income from average interest-earning assets and resultant yields; and
- interest expense on average interest-bearing liabilities and resultant costs, expressed as rates.

The table also sets forth our net interest income, interest rate spread and effective interest rate spread. The effective interest rate spread reflects the relative level of interest-earning assets to interest-bearing liabilities and equals:

- the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities, divided by
- average interest-earning assets for the period.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The table also sets forth the difference between the average balance of interest-earning assets and the average balance of total deposits and borrowings for the quarters indicated. While we included non-accrual loans in the average interest-earning assets balance, interest from non-accrual loans has not been included in interest income unless we received payments and we believe the remaining principal balance of the loans will be recovered. We computed average balances for the quarter using the average of each month's daily average balance during the periods indicated.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Changes in our net interest income are a function of changes in both rates and volumes of interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding changes in our interest income and expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, we have provided information on changes attributable to:

- changes in volume: changes in volume multiplied by comparative period rate;
- changes in rate: changes in rate multiplied by comparative period volume; and
- changes in rate/volume: changes in rate multiplied by changes in volume.

Interest-earning asset and interest-bearing liability balances used in the calculations represent quarterly average balances computed using the average of each month's daily average balance during the periods indicated.

Provision for Credit Losses

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

During the current quarter, our provision for credit losses totaled \$258.9 million, up \$249.4 million from a year ago. The increase in our provision for credit losses reflects continued weakening and uncertainty relative to the housing market and disruption in the secondary markets which have unfavorably impacted our borrowers and the value of their loan collateral.

For the first six months of 2008, the provision for credit losses totaled \$495.7 million, compared with \$10.1 million a year ago. For further information, see Allowance for Credit and Real Estate Losses on page 57.

Other Income

Other income totaled \$12.1 million in the current quarter, down \$5.5 million or 31.2% from a year ago. Primary contributors to the decline between second quarters were:

- A \$5.2 million unfavorable change in income from real estate and joint ventures held for investments; and
- A \$4.4 million decline in net gains on sale of loans and mortgage-backed securities, reflecting both a decline in loans sold and a lower gain per dollar of loan sold.

These unfavorable items were partially offset by a \$4.8 million increase in income from loan servicing fees due primarily to a favorable change in the fair value of mortgage servicing rights as a result of slower prepayment speeds.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

For the first six months of 2008, other income totaled \$21.0 million, down \$14.2 million or 40.4% from a year ago. The decline primarily reflected lower net gains from the sale of loans and mortgage-backed securities as well as an unfavorable change in income from real estate and joint ventures held for investment.

Below is a further detailed discussion of the major other income categories.

Loan and Deposit Related Fees

Our loan and deposit related fees totaled \$8.2 million in the current quarter, down \$1.1 million from a year ago. The decline was primarily related to lower automated teller machine fees of \$0.6 million and loan related fees of \$0.4 million.

The following table presents a breakdown of loan and deposit related fees during the quarters indicated.

<i>(In Thousands)</i>	<i>Three Months Ended</i>				
	<i>June 30,</i> <i>2008</i>	<i>March 31,</i> <i>2008</i>	<i>December</i> <i>31,</i> <i>2007</i>	<i>September</i> <i>30,</i> <i>2007</i>	<i>June 30,</i> <i>2007</i>
Loan related fees	\$ 377	\$ 422	\$ 467	\$ 572	\$ 819
Deposit related fees:					
Automated teller machine fees	1,859	1,997	2,285	2,287	2,440
Other fees	5,968	5,820	6,215	6,054	6,079
Total loan and deposit related fees	\$ 8,204	\$ 8,239	\$ 8,967	\$ 8,913	\$ 9,338

For the first six months of 2008, loan and deposit related fees totaled \$16.4 million, down \$1.7 million from the same period of 2007. Both automated teller machine fees and loan related fees declined by \$0.9 million each.

The following table presents a breakdown of loan and deposit related fees during the year-to-date periods indicated.

<i>(In Thousands)</i>	<i>Six Months Ended June 30,</i>	
	<i>2008</i>	<i>2007</i>
Loan related fees	\$ 799	\$ 1,661
Deposit related fees:		
Automated teller machine fees	3,856	4,745
Other fees	11,788	11,768
Total loan and deposit related fees	\$ 16,443	\$ 18,174

Real Estate and Joint Ventures Held for Investment

A loss of \$5.3 million was recorded from our real estate and joint ventures held for investment, compared to a loss of \$0.1 million a year ago. Although net gains from sales increased \$5.8 million from a year ago to \$6.2 million, that improvement was more than offset by a current quarter provision for losses of \$11.1 million to reflect declines in the value of single family lots in which we are a joint venture partner.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table sets forth the key components comprising our income from real estate and joint venture operations during the quarters indicated.

(In Thousands)	<i>Three Months Ended</i>				
	<i>June 30,</i> 2008	<i>March 31,</i> 2008	<i>December 31,</i> 2007	<i>September 30,</i> 2007	<i>June 30,</i> 2007
Net rental operations and income from community					
development funds	\$ 133	\$ 331	\$ (49)	\$ 576	\$ 49
Net gains on sales of wholly owned real estate	6,129	-	-	-	-
Equity (deficit) in net income (loss) from					
joint ventures	(79)	(945)	681	(8,492)	193
(Provision for) reduction of losses on real estate					
and joint ventures	(11,454)	9	10	24	(353)
Total income (loss) from real estate and					
joint ventures held for investment, net	\$ (5,271)	\$ (605)	\$ 642	\$ (7,892)	\$ (111)

For the first six months of 2008, a loss of \$5.9 million was recorded from real estate and joint ventures held for investment, compared to income of \$0.4 million a year ago. The unfavorable change primarily reflected an increase in the provision for losses in the current period which were only partially offset by net gains from sales.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table sets forth the key components comprising our income from real estate and joint venture operations during the year-to-date periods indicated.

(In Thousands)	Six Months Ended June 30,	
	2008	2007
Net rental operations and income from community development funds	\$ 464	\$ 594
Net gains on sales of wholly owned real estate	6,129	22
Equity (deficit) in net income (loss) from joint ventures	(1,024)	102
Provision for losses on real estate and joint ventures	(11,445)	(353)
Total income (loss) from real estate and joint ventures held for investment, net	\$ (5,876)	\$ 365

Secondary Marketing Activities

We service loans for others and those activities generated a gain of \$4.0 million in the current quarter, up from a loss of \$0.8 million in the year-ago quarter. This primarily reflected a \$3.6 million favorable change from the measurement of MSR to fair value and a \$1.0 million favorable change in payoff and curtailment interest cost. Payoff and curtailment interest costs represent the difference between the contractual obligation to pay interest to the investor for an entire month and the actual interest received when a loan prepays prior to the end of the month. Loan servicing income (loss), net does not reflect the interest income we derive from the use of those loan repayments as it is included in net interest income.

Effective January 1, 2008, we adopted the fair value provision of Statement of Financial Accounting Standards No. 156, Accounting for Servicing of Financial Assets – an amendment of FASB Statement No. 140 (SFAS 156) and remeasured our MSR to fair value. For further information regarding the adoption of SFAS 156 and our MSR, see Note 2 of Notes to Consolidated Financial Statements on page 6.

At June 30, 2008, MSR totaled \$23.6 million or 0.95% of the \$2.471 billion of associated loans serviced for others, up \$1.9 million from the year ago balance accounted for under the amortized cost method. In addition to the loans we serviced for others with capitalized MSR, at June 30, 2008, we serviced \$2.961 billion of loans on a sub-servicing basis where we receive a fixed fee per loan, with no risk associated with changing MSR values.

The following table presents a breakdown of the components of our loan servicing income (loss), net for the quarters indicated.

(In Thousands)	Three Months Ended

servicing rights	-	-	(2,197)	(214)	(29)
<hr/>					
Total loan servicing income (loss), net	\$ 3,976	\$ (1,196)	\$1,660)	\$ (294)	\$ (789)
<hr/>					

(a) Represents the difference between the contractual obligation to pay interest to the investor for an entire month and the actual interest received when a loan prepays prior to the end of the month. However, loan servicing activities do not include the benefit of the use of total loan repayments to increase net interest income.

(b) Effective January 1, 2008, Downey adopted the fair value provision of SFAS 156 and remeasured its MSR's at fair value. Downey recorded a pretax adjustment to increase MSR's by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the 2008 beginning balance of retained earnings in stockholders' equity.

(c) Reflects changes in assumptions for such items as discount rates and prepayment speeds.

(d) Represents changes due to realization of expected cash flows over time.

For the first six months of 2008, income of \$2.8 million was recorded from loan servicing activities, compared to a loss of \$1.2 million for the same period of 2007. The favorable change primarily reflected a reduction in payoff and curtailment interest costs and a favorable change in the fair value of MSR's in the current period versus the amortization of MSR's a year ago.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table presents a breakdown of the components of our loan servicing income (loss), net during the year-to-date periods indicated.

(In Thousands)	Six Months Ended June 30,	
	2008	2007

^(a) Represents the difference between the contractual obligation to pay interest to the investor for an entire month and the actual interest received when a loan prepays prior to the end of the month. However, loan servicing activities do not include the benefit of the use of total loan repayments to increase net interest income.

^(b) Effective January 1, 2008, Downey adopted the fair value provision of SFAS 156 and remeasured its MSRs at fair value. Downey recorded a pretax adjustment to increase MSRs by \$1.5 million and a corresponding cumulative effect adjustment of \$0.9 million, after tax, to increase the 2008 beginning balance of retained earnings in stockholders' equity.

^(c) Reflects changes in assumptions for such items as discount rates and prepayment speeds.

^(d) Represents changes due to realization of expected cash flows over time.

Our net gains on sales of loans and mortgage-backed securities totaled \$4.6 million in the current quarter, down \$4.4 million from a year ago, reflecting both a decline in loans sold and a lower gain per dollar of loan sold. The current quarter included a \$2.1 million gain due to the SFAS 133 impact of valuing derivatives associated with the sale of loans, compared with a SFAS 133 gain of \$0.9 million in the year-ago quarter. Excluding the impact of SFAS 133, a gain was realized equal to 1.05% on secondary market sales of \$235 million, compared with the year-ago gain of 1.42% on secondary market sales of \$570 million.

The following table presents a breakdown of the components of our net gains on sales of loans and mortgage-backed securities for the quarters indicated.

(In Thousands)	Three Months Ended				
	June 30, 2008	March 31, 2008	December 31, 2007	September 30, 2007	June 30, 2007

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

133 as a percentage of associated sales 1.05 % 0.75 % 0.31 % 0.91 % 1.42 %

For the first six months of 2008, our sales of loans and mortgage-backed securities totaled \$464 million, down from \$1.3 billion a year ago. Net gains associated with these sales totaled \$6.2 million, or \$11.5 million lower than the prior year amount. Excluding the impact of SFAS 133, a gain equal to 0.90% per dollar of loan sold was realized in the current year, down from the year-ago gain of 1.29%.

The following table presents a breakdown of the components of our net gains on sales of loans and mortgage-backed securities during the year-to-date periods indicated.

<i>(In Thousands)</i>	<i>Six Months Ended June 30,</i>	
	<i>2008</i>	<i>2007</i>
Mortgage servicing rights	\$ 2,679	\$ 3,267

Secondary marketing gain excluding SFAS 133 as a percentage of associated sales	0.90 %	1.29 %

Operating Expense

Our operating expense totaled \$88.5 million in the current quarter, up \$26.2 million or 42.0% from a year ago. The increase primarily reflected an increase of \$23.2 million in net operations of real estate acquired in the settlement of loans due to a higher number of foreclosed properties. General and administrative expense increased \$3.0 million or 4.8% between second quarters, due primarily to an increase in the other general and administrative expense category, which was up \$2.8 million. That increase was primarily attributable to an adjustment in the prior year period related to liabilities associated with workers' compensation insurance claims. Also contributing to the increase between second quarters was a \$1.2 million increase in regulatory assessments due primarily to a special credit received in the prior period. Partially offsetting these unfavorable items was a \$1.1 million decline in advertising expense. Although salaries and related costs were essentially unchanged between second quarters, the current quarter included severance costs of approximately \$1.0 million associated with the previously announced departure of Downey's former President.

The following table presents a breakdown of key components comprising operating expense for the quarters indicated.

	<i>Three Months Ended</i>				
	<i>June 30,</i>	<i>March 31,</i>	<i>December</i>	<i>September</i>	<i>June 30,</i>
<i>(In Thousands)</i>	<i>2008</i>	<i>2008</i>	<i>31,</i>	<i>30,</i>	<i>2007</i>
			<i>2007</i>	<i>2007</i>	
Salaries and related costs	\$ 40,884	\$ 39,702	\$ 38,882	\$ 36,699	\$ 40,998
Premises and equipment costs	9,181	8,997	10,257	9,736	9,122
Advertising expense	816	461	1,443	1,400	1,878
Deposit insurance premiums and regulatory assessments	3,689	3,703	2,516	2,413	2,482
Professional fees	843	303	916	489	731
Impairment writedown of goodwill	-	3,149	-	-	-
Other general and administrative expense	8,974	8,480	8,732	8,275	6,201
Total general and administrative expense	64,387	64,795	62,746	59,012	61,412
Net operation of real estate acquired in settlement of loans	24,139	24,196	4,583	3,664	948
Total operating expense	\$ 88,526	\$ 88,991	\$ 67,329	\$ 62,676	\$ 62,360

For the first six months of 2008, operating expense totaled \$177.5 million, up \$49.5 million or 38.7% from a year ago. The increase primarily reflected higher net operations of real estate acquired in the settlement of loans, deposit insurance premiums, a goodwill impairment charge during the first quarter of 2008 and other general and administrative expenses. Those increases were partially offset by a decline in salaries and related costs and advertising expense.

The following table presents a breakdown of key components comprising operating expense during the year-to-date periods indicated.

	<i>Six Months Ended June 30,</i>	
	<i>2008</i>	<i>2007</i>
Salaries and related costs	\$ 80,586	\$ 83,232

<hr/>		
Total operating expense	\$ 177,517	\$ 128,003
<hr/>		

Provision for Income Taxes

A tax benefit of \$33.5 million was recorded in the current quarter, reflecting an effective tax rate of 13.3%, compared with the year-ago effective tax rate of 42.7%. For the first six months of 2008, the effective tax rate was 3.9%, compared with 43.4% a year ago. For further information, see Note 4 of Notes to Consolidated Financial Statements on page 15.

Business Segment Reporting

The previous discussion and analysis of the Results of Operations pertained to our consolidated results. This section discusses and analyzes the results of operations of our two business segments: banking and real estate investment. For further information, see Note 8 of Notes to Consolidated Financial Statements on page 18.

The following table presents by business segment our net income (loss) for the periods indicated.

<i>(In Thousands)</i>	<i>Three Months Ended</i>				
	<i>June 30,</i> <i>2008</i>	<i>March 31,</i> <i>2008</i>	<i>December 31,</i> <i>2007</i>	<i>September 30,</i> <i>2007</i>	<i>June 30,</i> <i>2007</i>

Banking

A net loss of \$215.7 million was recorded in the current quarter related to our banking operations, compared with income of \$32.6 million a year ago. The unfavorable change between second quarters primarily reflected:

- A \$249.4 million increase in provision for credit losses;
- A \$28.2 million or 25.4% decline in net interest income due to a lower level of interest-earning assets and a lower effective interest rate spread; and
- A \$26.1 million increase in operating expense due primarily to higher costs related to the operation of real estate acquired in settlement of loans.

The following table sets forth our banking operational results and selected financial data for the quarters indicated.

<i>(In Thousands)</i>	<i>Three Months Ended</i>

Real Estate Investment

A net loss of \$3.2 million was recorded in the current quarter from our real estate investment operations, compared to net income of \$0.1 million a year ago. Although net gains from sales increased \$5.8 million between second quarters, that was more than offset by a \$11.1 million provision for losses in the current quarter to reflect declines in the value of single family lots in which we are a joint venture partner.

The following table sets forth real estate investment operational results and selected financial data for the quarters indicated.

Our investments in real estate and joint ventures amounted to \$63 million at June 30, 2008, down from \$69 million at December 31, 2007, and \$65 million at June 30, 2007.

For information on valuation allowances associated with real estate and joint venture loans, see Allowance for Credit and Real Estate Losses on page 57.

FINANCIAL CONDITION

Loans and Mortgage-Backed Securities

Total loans and mortgage-backed securities, including those we hold for sale, were virtually unchanged during the current quarter at \$10.7 billion or 84.8% of total assets at June 30, 2008. During the quarter loans held for investment increased \$15 million while loans held for sale declined \$24 million.

Our loan originations, including loans purchased, totaled \$1.027 billion in the current quarter, down \$182 million or 15.0% from the \$1.209 billion we originated in the year-ago second quarter but 51.9% above the \$676 million we originated in the first quarter of 2008. Loans originated for sale declined \$283 million or 57.2% from a year ago to \$212 million, while single family loans originated for portfolio increased \$52 million or 7.4% to \$751 million. Our prepayment speed, which measures the annualized percentage of loans repaid, for residential one-to-four unit loans held for investment declined from 37% a year ago to 13% in the current quarter and was down from 16% in the first quarter of 2008. During the current quarter, 61% of our residential one-to-four unit originations represented refinance transactions, including new loans to refinance existing loans which we or other lenders originated. This is down from 78% in the first quarter of 2008 and down from 88% in the year-ago second quarter.

Not included in the above originations are loans in which we modified the terms of the notes for borrowers. During the current quarter, we modified \$320 million of loans associated with our borrower retention program. This program provided borrowers who were current with their loan payments with the opportunity to change from an adjustable rate loan subject to negative amortization to less costly financing alternatives, albeit at new interest rates that were no less than those offered new borrowers. The majority of these modifications were modified into adjustable rate loans whereby the interest rate adjusts semi-annually but does not permit negative amortization. An additional \$79 million of loans were modified at below market interest rates in loan workout situations.

We originate residential one-to-four unit mortgage loans both with and without loan origination fees. In mortgage transactions for which we charge no origination fees, we receive a higher interest rate than those for which we charge origination fees. These loans generally result in deferrable loan origination costs exceeding loan origination fees. A prepayment fee on these loans may be required if these loans are prepaid within the first three years.

Originations of adjustable rate residential one-to-four unit loans for portfolio, including loans purchased, totaled \$748 million in the current quarter, up from \$699 million in the year-ago quarter and \$435 million in the first quarter of 2008. Of the current quarter total:

- 98% were adjustable rate loans fixed for 3-5 years, compared with 51% in the year-ago quarter;
- 1% were adjustable rate loans tied to either the LIBOR index, which typically adjust every six months, or the Constant Maturity Treasury ("CMT") index, compared with 41% in the year-ago quarter; and
- 1% were adjustable rate loans tied to either the FHLB Eleventh District Cost of Funds Index ("COFI") or the 12-month moving average of yields on actively traded U.S. Treasury securities adjusted to a constant maturity of one year ("MTA") index and generally have rates that adjust monthly and provide for negative amortization, compared with 8% in the year-ago quarter. Effective July 2008, we no longer offer to borrowers loans that provide for negative amortization.

^(a) Excludes residential one-to-four unit adjustable fixed for 3-5 year loans still in their initial fixed rate period.

Our adjustable rate mortgage loans generally:

- either begin with an incentive interest rate ("start rate"), which is an interest rate below the current market rate, that adjusts to the applicable index plus a defined margin, subject to periodic and lifetime caps, after one, three, six or twelve months, or have a fixed interest rate for a period of three to five years then adjust semi-annually or annually thereafter;
- provide that the maximum interest rate cannot exceed the start rate by more than six to twelve percentage points, depending on the type of loan and the initial rate offered; and
- limit interest rate adjustments, for loans that adjust both the interest rate and payment amount simultaneously, to 1% per adjustment for those that adjust semi-annually and 2% per adjustment for those that adjust annually.

Our adjustable rate loans subject to negative amortization, which are no longer offered to borrowers, have an interest rate that adjusts monthly and a minimum monthly loan payment that adjusts annually. The start rate for these loans is lower than the fully-indexed rate and is the rate at which we earned interest for the loan only during the first month. After the first month, interest accrues at the fully-indexed rate. The start rate, however, is used to calculate the minimum monthly loan payment for the first twelve months. The borrower is required to make at least the minimum monthly payment, but retains the option to make a larger payment to reduce loan principal and avoid negative amortization (the addition to loan principal of accrued interest that exceeds the minimum monthly loan payment). If the borrower chooses to make the minimum monthly loan payment, and the interest accrual based on the fully-indexed rate results in monthly interest due exceeding the payment amount, the loan balance will increase by the difference. These payment options were clearly defined in the loan documents signed by the borrower at funding and are explained again on the borrower's monthly statement.

More particularly, our adjustable rate loans subject to negative amortization:

- typically limit the maximum loan balance to 110% of the original loan amount if the original loan-to-value ratio (a loan-to-value ratio is the proportion of the principal amount of the loan to the lower of the sales price or appraised value of the property securing the loan at origination) is greater than 75%, and to 115% if the loan-to-value ratio is 75% or less;
- have a lifetime interest rate cap, but no periodic cap on interest rate adjustments; and
- include a payment cap that limits the change in minimum monthly loan payments to 7.5% per year, unless the loan is recast (*i.e.*, a new monthly loan payment is calculated using the fully-indexed interest rate and provides for amortization of the loan balance over the remaining term of the loan). A loan is recast every five years and additionally when the loan balance reaches the maximum level of loan balance permitted.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The maximum home loan we currently make for our own portfolio, except for a limited amount related to Community Reinvestment Act ("CRA") activities and loans to facilitate the sale of real estate acquired in settlement of loans, is equal to 80% of a property's appraised value. If a loan incurs negative amortization, the loan-to-value ratio could rise, which increases credit risk, and the fair value of the underlying collateral could be insufficient to satisfy fully the outstanding loan obligation in the event of a loan default. A loan-to-value ratio is the proportion of the principal amount of the loan to the lower of the sales price or appraised value of the property securing the loan at origination.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Our loan portfolio held for investment contains loans previously originated with a limit on the maximum loan balance of 125% of the original loan amount. At June 30, 2008, loans with the higher 125% limit on the maximum loan balance represented 2% of our one-to-four unit residential loan portfolio, while those with the 115% limit represented 4% and those with the 110% limit represented 51% of that portfolio. We permit adjustable rate mortgage loans to be assumed by qualified borrowers.

While start rates of our loan products fluctuate with the market, we do not use them to qualify a loan applicant. Rather, we qualify an applicant for adjustable rate mortgage loans using a fully-amortizing payment calculated from the higher of the fully-indexed rate or, currently, for our:

- lower risk applicants:
 - 6.00% for owner occupied; or
 - 6.25% for non-owner occupied.
- higher risk applicants:
 - 7.00% for owner occupied; or
 - 7.25% for non-owner occupied.

At June 30, 2008, \$6.2 billion or 57% of our total residential one-to-four unit loans held for investment were subject to negative amortization. The amount of negative amortization included in the loan balance declined \$31 million during the quarter to \$344 million or 5.5% of loans subject to negative amortization. During current quarter, approximately 15% of our loan interest income represented negative amortization, down from 20% in first quarter and 29% in year-ago second quarter. At origination, these loans had a weighted average loan-to-value ratio of 73%. In addition, \$3.9 billion or 36% of our residential one-to-four unit loans held for investment represented loans requiring interest only payments over the initial terms of the loans, generally the first three to five years.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table sets forth our investment portfolio of residential one-to-four unit adjustable rate loans subject to negative amortization and with interest only payments, along with negative amortization included in the loan balance, loan to value ratio information and weighted average age of the loans, at the dates indicated.

^(a) Based on current loan balance relative to the lower of the appraised value or sales price at time of origination. ^(b) Loans with interest only payments include loans modified with previously capitalized interest due to negative amortization.

Our adjustable rate loans subject to negative amortization require a payment recast every five years and additionally when the loan balance reaches the maximum permissible level of negative amortization, while interest only loans require a payment recast when the initial fixed rate or interest only period expires. At payment recast, the fully-indexed interest rate is used to calculate a new monthly loan payment that provides for full amortization of the loan balance over the remaining term of the loan. Generally, the new loan payment is significantly higher and therefore default risk typically increases. We have other adjustable rate loans that also are subject to payment recasts but the new loan payments are not likely to be as severe as those associated with loans subject to negative amortization or interest only payments because the original loan payments already include principal amortization.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table sets forth projected first-time loan payment recasts for our investment portfolio of residential one-to-four unit adjustable rate loans subject to negative amortization and loans with interest only payments for two consecutive quarters starting with the third quarter of 2008 and annually thereafter through 2011. To determine projected first-time loan payment recasts, we assumed that borrowers will continue to utilize negative amortization at the same rate as they did in the preceding 12 months and no loans prepay. Therefore, the projected recast amounts may be overstated as some portion of these loans is likely to prepay or be modified as part of our borrower retention or loan workout programs. For example, at the end of the first quarter of 2008, we forecasted that \$825 million of loans subject to negative amortization and loans with interest only payments would recast for the first-time during the second quarter of 2008, of which \$521 million did recast while:

- \$135 million were modified during the quarter as part of our borrower retention program;
- \$61 million did not recast during the quarter as borrowers reduced their utilization of negative amortization;
- \$52 million paid off;
- \$40 million were foreclosed upon; and
- \$16 million were modified as part of our loan workout program.

--	----	--	----	--	----	--	----	--	----

residential
one-to-four
units

(a) Primarily related to Community Reinvestment Act activities.

In addition to the other credit risks already identified, 77% of our residential one-to-four unit loans held for investment at June 30, 2008 were underwritten based on borrower stated income and asset verification and an additional 6% were underwritten with no verification of either borrower income or assets. In April 2008, we changed our guidelines to no longer permit stated income programs for portfolio loans.

Credit risks are mitigated primarily by various minimum borrower credit requirements and maximum loan-to-value ratio limitations. For example, at June 30, 2008, the average loan-to-value ratio at origination of our residential one-to-four unit loan portfolio was 72%. However, even with these requirements and limitations, our risk mitigation strategy is limited by potential defects in the underwriting process as well as potential changes in the loan-to-value ratio due to negative amortization and declines in home values after the loans were originated. For example, while residential property values increased in the past thereby further reducing our exposure to credit risk, home value declines emerged in 2006 and are continuing in most markets in which we lend. The uncertainty of future home value changes may materially impact the risk associated with our loan portfolio since 52% of these loans were originated after 2005.

We originated \$3 million of home equity loans and lines of credit in the current quarter, up from \$2 million in the first quarter of 2008 but unchanged from the year-ago second quarter. During the current quarter, we originated \$24 million of residential five or more unit loans, compared to none in the first quarter of 2008 and \$1 million in the year-ago second quarter. During the current quarter we originated \$36 million of construction loans, of which \$34 million related to 2 shopping centers, up from less than \$1 million in the first quarter of 2008 and \$2 million in the year-ago second quarter. Consumer loan originations totaled less than \$1 million in the current quarter, down from \$1 million in the first quarter of 2008 and year-ago second quarter.

At June 30, 2008, our unfunded loan application pipeline totaled \$907 million. Within that pipeline, we had commitments to borrowers for short-term interest rate locks, before the reduction of expected fallout, of \$460 million, of which \$78 million were related to residential one-to-four unit loans being originated for sale in the secondary market. Furthermore, we had commitments for undrawn lines of credit of \$205 million and loans in process of \$73 million. We believe our current sources of funds will be adequate relative to these obligations.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

^(a) Primarily included changes in undisbursed funds for lines of credit and construction loans, in loss allowances, in net deferred costs and premiums, in interest capitalized on loans (negative amortization), and from loans transferred to real estate acquired in settlement of loans or from (to) the held for sale portfolio.

^(b) These transactions typically involve creation of an MBS by a government sponsored entity (GSE) from loans sold by, and delivered by, us to the GSE. While the GSE is obligated to provide us with the MBS in exchange for the sold loans, the GSE typically fulfills this commitment through delivery of the MBS directly to the third-party purchaser based on a forward sales commitment made by us to that third party. The sales of both the loans and MBS are settled typically on a same-day basis such that we do not retain the MBS. If the MBS were to be retained with an intent to sell, we would classify the security as held for trading and record changes in fair value in our consolidated statement of income.

^(c) Reflected the change in fair value of the interest rate lock derivative from the date of rate lock to the date of funding. Effective January 2008, we included the fair value of MSRs in the fair value of interest rate lock derivatives in accordance with Staff Accounting Bulletin 109, Written Loan Commitments Recorded at Fair Value Through Earnings.

^(d) Primarily included repayments and the change in net deferred costs and premiums.

(a) At June 30, 2008, 25% of our investment securities had step-up provisions that stipulate increases in the coupon rate ranging from 0.25% to 1.43% at various specified dates ranging from February 2011 to February 2020. In addition, at June 30, 2008, all of these investment securities contained call provisions from June 2008 to November 2022. Yields for investment securities available for sale are calculated using historical cost balances and are not adjusted for changes in fair value that are reflected as a separate component of stockholders' equity.

Deposits

At June 30, 2008, our deposits totaled \$9.9 billion, down \$1.4 billion or 12.1% from the year-ago level and \$615 million or 5.9% from year-end 2007. Compared with the year-ago period, certificates of deposit declined \$1.1 billion or 12.9% and our transaction accounts (*i.e.*, checking, money market and regular passbook) declined \$240 million or 9.5%. Within our transaction accounts, checking accounts declined \$136 million and regular passbook accounts declined \$149 million. Of the decline in checking, \$82 million reflected the decline in custodial accounts related to loan servicing reflecting the concurrent decline in loan prepayments.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

At June 30, 2008, our total number of branches was 174, of which 169 were located in California and five were located in Arizona. The average deposit size of our 84 traditional branches was \$94 million, while the average deposit size of our 90 in-store branches was \$22 million.

The following table sets forth information concerning our deposits and weighted average rates paid at the dates indicated.

Borrowings

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

At June 30, 2008, our borrowings totaled \$1.8 billion, down \$69 million from a year ago but up \$426 million from year-end 2007, partially to cover deposit outflows. At quarter end, we had borrowed \$98 million through transactions in which securities were sold under agreements to repurchase, compared to \$588 million for the same period a year ago. These repurchase agreements are entered into with selected major securities dealers, using securities of government sponsored entities from our portfolio as collateral. Partially offsetting the decline in securities sold under agreements to purchase was a \$421 million increase in FHLB advances to \$1.5 billion.

The following table sets forth information concerning our FHLB advances and other borrowings at the dates indicated.

<i>(Dollars in Thousands)</i>	<i>June 30,</i> 2008	<i>March 31,</i> 2008	<i>December 31,</i> 2007	<i>September 30,</i> 2007	<i>June 30,</i> 2007

^(a) Included the impact of interest rate swap contracts, with notional amounts totaling \$430 million of receive-fixed, pay-3-month LIBOR variable interest, which contracts serve as a permitted hedge against a portion of our FHLB advances.

Off-Balance Sheet Arrangements

We consolidate majority-owned subsidiaries that we control. We account for other affiliates, including joint ventures, in which we do not exhibit significant control or have majority ownership, by the equity method of accounting. For those relationships in which we own less than 20%, we generally carry them at cost. In the course of our business, we participate in real estate joint ventures through our wholly-owned subsidiary, DSL Service Company. Our real estate joint ventures do not require consolidation as a result of applying the provisions of Financial Accounting Standards Board Interpretation 46 (revised December 2003).

We utilize financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to originate fixed and variable rate mortgage loans held for investment, undisbursed loan funds, lines and letters of credit, commitments to purchase loans and mortgage-backed securities for our portfolio and commitments to invest in community development funds. The contract or notional amounts of these instruments reflect the extent of involvement we have in particular classes of financial instruments. For further information, see Asset/Liability Management and Market Risk on page 48 and Note 3 of Notes to the Consolidated Financial Statements on page 10.

We use the same credit policies in making commitments to originate or purchase loans, lines of credit and letters of credit as we do for on-balance sheet instruments. For commitments to originate loans held for investment, the contract amounts represent exposure to loss from market fluctuations as well as credit loss. In regard to these commitments, adverse changes from market fluctuations are generally not hedged. We control the credit risk of our commitments to originate loans held for investment through credit approvals, limits and monitoring procedures.

We do not dispose of loans or assets by means of unconsolidated special purpose entities.

Transactions with Related Parties

There are no significant related party transactions required to be disclosed in accordance with FASB Statement No. 57, Related Party Disclosures. Loans to our executive officers and directors were made in the ordinary course of business and were made on substantially the same terms as comparable transactions.

Asset/Liability Management and Market Risk

Market risk is the risk of loss or reduced earnings from adverse changes in market prices and interest rates. Our market risk arises primarily from interest rate risk in our lending and deposit taking activities. Interest rate risk primarily occurs to the degree that our interest-bearing liabilities reprice or mature on a different basis and frequency than our interest-earning assets. Since our earnings depend primarily on our net interest income, which is the difference between the interest and dividends earned on interest-earning assets and the interest paid on interest-bearing liabilities, our principal objectives are to actively monitor and manage the effects of adverse changes in interest rates on net interest income. Our primary strategy in managing interest rate risk is to emphasize the origination for investment of adjustable rate mortgage loans or loans with relatively short maturities. Interest rates on adjustable rate mortgage loans are primarily tied to COFI, MTA, LIBOR and CMT. We also may execute swap contracts to change interest rate characteristics of our interest-earning assets or interest-bearing liabilities to better manage interest rate risk.

In addition to the interest rate risk associated with our lending for investment and deposit-taking activities, we also have market risk associated with our secondary marketing activities. Changes in mortgage interest rates, primarily fixed rate mortgage loans, impact the fair value of loans held for sale as well as our interest rate lock commitment derivatives, where we have committed to an interest rate with a potential borrower for a loan we intend to sell. Our objective is to hedge against fluctuations in interest rates through the use of loan forward sale and purchase contracts with government-sponsored enterprises and whole loan sale contracts with various other parties. These contracts are typically obtained at or about the time the interest rate lock commitments are made. Therefore, as interest rates fluctuate, the changes in the fair value of our interest rate lock commitments and loans held for sale tend to be offset by changes in the fair value of the hedge contracts. We continue to hedge as previously done before the issuance of SFAS 133. As applied to our risk management strategies, SFAS 133 may increase or decrease reported net income and stockholders' equity, depending on interest rates and other variables affecting the fair values of derivative instruments and hedged items, but will have no effect on the overall economics of the transactions. The method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge. We generally do not enter into derivative contracts for speculative purposes.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Changes in mortgage interest rates also impact the value of our MSR. Rising interest rates typically result in slower prepayment speeds on the loans being serviced for others which increase the value of MSR. Declining interest rates typically result in faster prepayment speeds which decrease the value of MSR. Over time, we may use derivatives or securities to provide an economic hedge against value changes in our MSR.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

One measure of our exposure to differential changes in interest rates between assets and liabilities is shown in the following table which sets forth the repricing frequency of our major asset and liability categories as of June 30, 2008, as well as other information regarding the repricing and maturity differences between our interest-earning assets and total deposits and borrowings in future periods. We refer to these differences as *gap*. We have determined the repricing frequencies by reference to projected maturities, based upon contractual maturities as adjusted for scheduled repayments and repricing mechanisms provisions for changes in the interest and dividend rates of assets and liabilities. Prepayment rates on substantially our entire loan portfolio are based upon anticipated future prepayment behavior as derived from external models of loans with similar characteristics. Repricing mechanisms on a number of our assets are subject to limitations, such as caps on the amount that interest rates and payments on our loans may adjust, and accordingly, these assets may not respond to changes in market interest rates as completely or rapidly as our liabilities. The interest rate sensitivity of our assets and liabilities illustrated in the following table would vary substantially if we used different assumptions or if actual experience differed from the assumptions set forth.

- (g) Excludes embedded interest rate caps with a notional amount of \$50 million and a three-month LIBOR strike rate equal to 5.50%.*

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Our six-month gap at June 30, 2008 was a negative 17.51%. This means more deposits and borrowings mature or reprice within six months than total interest-earning assets. This compares to our positive six-month gap of 3.59% at December 31, 2007 and 0.24% a year ago, which reflected more interest-earning assets repricing within six months than total deposits and borrowings. The change since year-end 2007 from a positive to negative gap is primarily due to an increase of adjustable rate loans with interest rates fixed for the first 3 to 5 years without a commensurate increase in the maturities for our FHLB advances and certificates of deposit.

We continue to emphasize the origination of adjustable rate mortgages for our investment portfolio, which includes our adjustable fixed for 3-5 years loans that carry a fixed interest rate for a period of three to five years then adjust semi-annually or annually thereafter. For the twelve months ended June 30, 2008, we originated and purchased for investment \$2.1 billion of adjustable rate loans, of which \$1.8 billion or 84% were adjustable fixed for 3-5 years loans, which represented essentially all of the loans we originated and purchased for investment during the period.

At June 30, 2008, December 31, 2007 and June 30, 2007 essentially all of our interest-earning assets mature, reprice or are estimated to prepay within five years. Essentially all of our loans held for investment and mortgage-backed securities portfolios consisted of adjustable rate loans and loans with a due date of five years or less, and totaled \$11.3 billion at June 30, 2008 compared with \$11.2 billion at December 31, 2007 and \$12.1 billion a year ago. During the current quarter, we continued to offer residential fixed rate loan products to our customers primarily for sale in the secondary market. We originate fixed rate loans primarily for sale in the secondary market and price them accordingly to create loan servicing income and to increase opportunities for originating adjustable rate mortgage loans. However, we may originate fixed rate loans for investment if these loans meet specific yield, interest rate risk and other approved guidelines, or to facilitate the sale of real estate acquired through foreclosure.

The following table sets forth the interest rate spread between our interest-earning assets and interest-bearing liabilities at the dates indicated.

	June 30, 2008	March 31, 2008	December 31, 2007	September 30, 2007	June 30, 2007
Weighted average yield:					
Loans and mortgage-backed securities ^(a)	6.57 %	7.10 %	7.41 %	7.45 %	7.49 %
Investment securities ^(b)	4.88	5.01	5.09	5.50	5.45
Interest-earning assets yield	6.44	6.84	7.14	7.15	7.22

Federal Home Loan Bank advances ^(c)	3.35	3.49	5.61	5.96	6.28
Senior notes	6.50	6.50	6.50	6.50	6.50
Total borrowings	3.64	3.80	5.74	5.79	6.00
Combined funds cost	3.06	3.52	4.14	4.26	4.26
Interest rate spread	3.38 %	3.32 %	3.00 %	2.89 %	2.96 %

^(a) Excludes adjustments for non-accrual loans, amortization of net deferred costs to originate loans, premiums and discounts, prepayment and late fees.

^(b) Excludes FHLB stock dividends and includes the yield on investment securities accounted for on a trade-date basis but for which interest

income will not be recognized until settlement. Yields for investment securities available for sale are calculated using historical cost balances and are not adjusted for changes in fair value that are reflected as a separate component of stockholders' equity.

^(c) Included the impact of interest rate swap contracts, with notional amounts totaling \$430 million of receive-fixed, pay-3-month LIBOR variable interest, which contracts serve as a permitted hedge against a portion of our FHLB advances.

The period-end weighted average yield on our loans and mortgage-backed securities was 6.57% at June 30, 2008, down from 7.41% at December 31, 2007 and 7.49% a year ago. At June 30, 2008, our adjustable rate mortgage portfolio of single family residential loans, including mortgage-backed securities, totaled \$10.8 billion with a weighted average rate of 6.58%, compared with \$10.8 billion with a weighted average rate of 7.29% at December 31, 2007, and \$11.7 billion with a weighted average rate of 7.47% at June 30, 2007.

Problem Loans and Real Estate

Non-Performing Assets and Troubled Debt Restructurings (TDRs)

Non-performing assets consist of loans on which we have ceased accruing interest (which we refer to as non-accrual loans), loans restructured at an interest rate below market and real estate acquired in settlement of loans. At the beginning of the third quarter of 2007, we initiated our borrower retention program to provide borrowers who are current with their loan payments a cost effective means to change from an adjustable rate loan subject to negative amortization to a less costly financing alternative. Those loans are considered TDRs and have been placed on non-accrual status even though the interest rates following modification were no less than those offered new borrowers. The reason for this is because the modified interest rate was lower than the interest rate on the original loan and the loan was not re-underwritten to prove that the new interest rate was, in fact, a market interest rate for a borrower with similar credit quality. Interest income is recorded as these borrowers make their loan payments and, in the current quarter, \$11.3 million was recognized including \$1.5 million of amortization of associated impairment allowance. If these borrowers perform pursuant to the modified terms for six consecutive months, the loans will be placed back on accrual status and, while still reported as TDRs, they will no longer be classified as non-performing assets because the borrower will have demonstrated an ability to perform in accordance with the loan modification and the interest rate was no less than those afforded new borrowers at the time of modification. Through June 30, 2008, \$347 million met the performance threshold and were removed from non-performing status.

Our non-performing assets totaled \$1.958 billion at June 30, 2008, up from \$1.042 billion at December 31, 2007 and \$227 million at June 30, 2007. Virtually all of the \$395 million increase in non-performing assets during the current quarter came from our single family residential loans which, in turn, reflected the following:

- A \$236 million increase in non-TDR loans;
- A \$130 million increase in TDR loans modified in loan workout situations and borrower retention program loans where at least one payment due has not been made; and
- A \$72 million net increase in single family residential real estate acquired in settlement of loans.

These increases were partially offset by performing TDR loans modified as part of our previously disclosed borrower retention program which had a net decline of \$41 million. At June 30, 2008, \$355 million of TDR loans for which we have received six consecutive months of successful loan payments were removed from non-performing assets and placed on accrual status, of which \$347 million were associated with our borrower retention program and \$8 million were associated with loans modified in loan workout situations.

Our non-performing assets as a percentage of total assets were 15.50 % at June 30, 2008, up from 7.77% at year-end 2007 and 1.53% at June 30, 2007. To the extent borrowers whose loans were modified pursuant to the borrower retention program are current with their loan payments and included in non-performing assets, it is relevant to distinguish those from total non-performing assets because, these loans are paying interest at interest rates no less than those offered new borrowers. At June 30, 2008, \$548 million or 82% of such borrowers had made all loan payments due. Accordingly, the 15.5% ratio of non-performing assets to total assets includes 4.34% related to performing TDRs, resulting in an adjusted ratio of 11.16%.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table summarizes our non-performing assets at the dates indicated.

(Dollars in Thousands)	June 30, 2008	March 31, 2008	December 31, 2007	September 30, 2007	June 30, 2007

Performing troubled debt restructurings excluded					
from non-performing assets ^(c)	\$ 354,842	\$ 49,141	\$ -	\$ -	\$ -

^(a) Represents TDRs associated with loans modified pursuant to our borrower retention program and all payments due have been made. These loans are considered TDRs and have been placed on non-accrual status even though the interest rate following modification was no less than that offered new borrowers at the time of loan modification. These TDR loans will be on non-accrual status until six consecutive months of successful payment history has been established, at which time they will be removed from non-accrual status and from non-performing assets; however, they will continue to be reported as TDRs. While these loans are on non-accrual status, interest income is recognized only when paid by borrowers on a cash basis.

^(b) Amount is net of a valuation allowance of \$18 million at June 30, 2008 and \$12 million at March 31, 2008, which reflects recent loss experience from sales compared to their fair value prior to sale.

^(c) Represents loans where the borrower has made six consecutive months of successful loan payments and the loan has been placed on accrual status, including \$347 million associated with our borrower retention program and \$8 million related to loans modified in loan workout situations.

We evaluate the need for property valuations of non-performing assets on a periodic basis. We generally will obtain a new property valuation when we believe there may have been an adverse change in the property operations or in the economic conditions of the geographic market of the property securing our loans. Our policy is to obtain new property valuations at least annually for all real estate acquired in

settlement of loans, but in a declining real estate market such as the recent market, we typically obtain new property valuations more frequently.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

At June 30, 2008, 90% of our non-performing assets were located in California, compared with 85% a year ago. The following table summarizes by major geographical area our residential one-to-four unit non-performing assets at the dates indicated.

Troubled Debt Restructurings

We consider a restructuring of a debt a TDR when we, for economic or legal reasons related to the borrower's financial difficulties, grant a concession to the borrower that we would not otherwise grant. TDRs may include changing repayment terms, reducing the stated interest rate, reducing the amounts of principal and/or interest due or extending the maturity date. The restructuring of a loan is intended to recover as much of our investment as possible and to achieve the highest yield possible. During the current quarter, the total interest recognized on the impaired portfolio was \$19.9 million. At June 30, 2008, we had \$1.156 billion of TDRs of which \$1.012 billion related to the borrower retention program, \$131 million related to other residential one-to-four unit loans and \$13 million related to two construction loans. Of those TDRs related to our borrower retention program, \$347 million have demonstrated six consecutive months of successful payment history, were accruing interest and were no longer reported as a non-performing asset at June 30, 2008. During the current quarter, we recorded \$11.3 million of interest income from loan payments made by borrowers whose loans were modified as part of our borrower retention program and are still included in non-performing assets. There are \$8 million TDR loans modified in loan workout situations that are currently accruing interest.

Real Estate Acquired in Settlement of Loans

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Real estate acquired in settlement of loans consists of real estate acquired through foreclosure or deeds in lieu of foreclosure and totaled \$262 million at June 30, 2008. Of this amount, \$236 million, net of a \$18 million valuation allowance which reflects recent loss experience from sales compared to their fair value prior to sale, was for 888 residential one-to-four unit properties, \$18 million represented one property consisting of raw land for approximately 545 single family lots and \$8 million represented one property consisting of 113 single family lots. We generally require private mortgage insurance on loans in excess of 80% of their appraised value. In the current quarter, subsequent to our acquiring real estate in the settlement of loans, we collected \$3.3 million in private mortgage insurance to mitigate any losses incurred.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

The following table summarizes the activity of our number of residential one-to-four unit properties acquired in settlement of loans and the loss given default on those sold for the quarters indicated.

<i>(Dollars in Thousands)</i>	<i>June 30,</i> <i>2008</i>	<i>March 31,</i> <i>2008</i>	<i>December 31,</i> <i>2007</i>	<i>September 30,</i> <i>2007</i>	<i>June 30,</i> <i>2007</i>
Number of residential one-to-four unit properties acquired in settlement of loans					
Count at beginning of period	575	326	162	90	53
New	522	316	212	109	50
Sold	(209)	(67)	(48)	(37)	(13)
Count at end of period	888	575	326	162	90
Loss given default ^(a)	31.8 %	22.3 %	22.2 %	8.1 %	6.8 %

^(a) Reflects the difference between the net sales proceeds and loan principal balance at foreclosure adjusted for associated deferred costs and fees, premiums and discounts, and collection of mortgage insurance as a percentage of their loan principal balance at foreclosure. The ratio does not include the cost to carry or real estate related costs, such as property taxes, which are expensed as incurred.

At June 30, 2008, 87 properties or 9.7% of our one-to-four unit residential properties were in escrow to be sold and offers were being negotiated on an additional 84 properties.

Delinquent Loans

At June 30, 2008, loans delinquent 30 days or more as a percentage of total loans was 11.21%, up from 6.05% at December 31, 2007 and 2.11% at June 30, 2007. The increase from the year-ago quarter occurred primarily in our residential one-to-four unit loan classification. As a percentage of its loan category, delinquent residential one-to-four units increased from 2.08% at June 30, 2007 to 11.61% at June 30, 2008, reflecting the continued weakness in the residential real estate market. A higher incidence of delinquency is expected when the minimum payments reset on our adjustable rate loans subject to negative amortization or interest only payments, whereby the interest rate is fixed for the first three to five years. For example, we had loans subject to negative amortization or with interest only payments that have not been modified within our loans held for investment, which recasted for the first time in 2007 or 2008 of \$1.5 billion, of which 39.9% were delinquent 30 days or more at June 30, 2008. The increase in delinquency is considered when we analyze the adequacy of our credit loss allowance.

Allowance for Credit and Real Estate Losses

We maintain a valuation allowance for credit and real estate losses to provide for losses inherent in those portfolios at the balance sheet date. The allowance for credit losses includes an allowance for loan losses reported as a reduction of loans held for investment and the allowance for loan-related commitments reported in accounts payable and accrued liabilities. Management evaluates the adequacy of the allowance quarterly to maintain the allowance at levels sufficient to provide for inherent losses at the balance sheet date.

We use an internal asset review system and loss allowance methodology designed to provide for timely recognition of problem assets and an adequate allowance to cover asset and loan-related commitment losses. The amount of the allowance is based upon the total of general valuation allowances, allocated allowances and specific allowances. General valuation allowances relate to assets and loan-related commitments with no well-defined deficiency or weakness and take into consideration losses that are imbedded within the portfolio but have not yet been realized. Allocated allowances relate to assets segregated into different classifications with well-defined deficiencies or weaknesses. Loans evaluated individually that are deemed to be impaired are separated from our other credit loss analysis in accordance with FASB Statement No. 114, Accounting by Creditors for Impairment of a Loan. If we determine the carrying value of our asset exceeds the net fair value and no alternative payment source exists, then a specific allowance is recorded for the amount of that difference.

The OTS has the authority to require us to change our asset classifications. If the change results in an asset being classified in whole or in part as loss, a specific allowance must be established against the amount so classified or that amount must be charged off. The OTS generally directs its examiners to rely on management's estimates of adequate general valuation allowances if the Bank's process for determining adequate allowances is deemed to be sound.

Provision for credit losses totaled \$258.9 million in the second quarter of 2008, compared with \$9.5 million a year ago. Our current quarter provision for credit losses less net loan charge-offs and the TDR yield adjustment resulted in an increase of \$186.0 million in our allowance for credit losses reflecting an increase of \$110.1 million in the general valuation allowance and an increase of \$75.9 million in the allocated allowance. The increase in the allowance was primarily related to our one-to-four unit residential portfolio due to the unfavorable impact to our borrowers from the continued weakening and uncertainty of the residential housing market and increased delinquency due, in part, to payment recasts and high debt burdens where borrowers obtained additional financing subsequent to the funding of our loan.

At June 30, 2008, the allowance for credit losses was \$734 million, comprised of \$732 million for loan losses and \$2 million for loan-related commitments. That compares to an allowance for credit losses of \$349 million at year-end 2007, comprised of \$348 million for loan losses and \$1 million for loan-related commitments. Loan-related commitments are reported on the balance sheet in the category accounts payable and accrued liabilities. The allowance for credit losses increased \$186 million this quarter, of which \$30 million was related to specific allowances associated with certain troubled debt restructurings pursuant to our borrower retention program. These specific allowances totaled \$93 million at quarter end and will be accreted into interest income over the remaining life of the modified loans as long as they remain on accrual status. The balance of the increase in the allowance for credit losses primarily reflects further declines in the value of underlying home collateral as well as further increases in delinquent loans.

Downey's allowance methodology incorporates assumptions related to default probabilities, loss severities and loss horizons based on historical experience, current market conditions, and the unique characteristics of each borrower, loan and underlying collateral. On a comparative basis, these factors individually increase or decrease the amount of the allowance for loan losses from prior periods. Both default probabilities and loss severities increased in the current quarter as a result of the challenging market conditions continuing to affect the residential housing market. In particular, collateral values have been trending downward in the greater Sacramento, Stockton, Modesto and Contra Costa areas of Northern California, the Inland Empire area of Southern California and San Diego County. Also, the horizon over which borrower defaults are projected to occur has shortened. The shorter default horizon reflects our recent experience of losses emerging earlier in the current environment compared with prior periods as the loan portfolio has continued to age, real estate values have continued to decline and borrowers have continued to experience reduced levels of equity in their homes. Net loan charge-offs totaled \$70.2 million in the current quarter, compared with \$1.0 million a year ago.

^(a) For TDRs of residential one-to-four unit loans, a specific valuation allowance is calculated as the difference between the recorded investment of the original loan and the present value of the expected cash flows of the modified loan (discounted at the effective interest rate of the original loan based on an expected life). This difference is recorded as a provision for credit losses in current earnings and subsequently amortized over the expected life of the loans as an adjustment to loan yield or as a reduction of the provision if the loan is prepaid.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Net charge-offs of loans totaled \$70.2 million in the current quarter, compared to \$1.0 million a year ago. The current quarter net charge-offs primarily related to residential one-to-four unit loans, with an annualized net charge-off ratio associated with these loans increasing to 2.60% from 0.03% a year ago.

For the first six months of 2008, the provision for credit losses totaled \$495.7 million and net charge-offs were \$107.3 million. This compares with a \$10.1 million provision for credit losses and net charge-offs of \$1.7 million a year ago.

The following table presents gross charge-offs, gross recoveries and net charge-offs by category of loan for the periods indicated.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

In determining impairment, we consider large non-homogeneous loans that are on non-accrual, have been restructured or are performing but exhibit, among other characteristics, high loan-to-value ratios or delinquent taxes. We base the measurement of collateral dependent impaired loans on the net fair value of the loan's collateral. We value non-collateral dependent loans based on a present value calculation of expected future cash flows discounted at the loan's effective rate or the loan's observable market price. We generally use cash receipts on impaired loans not performing according to contractual terms to reduce the carrying value of the loan, unless we believe we will recover the remaining principal balance of the loan, in which case we may recognize interest income. We include impairment losses in the allowance for loan losses through a charge to provision for credit losses. We include adjustments to impairment losses due to changes in the fair value of the collateral of impaired loans in provision for credit losses. For TDRs of residential one-to-four unit loans, we include adjustments to impairment losses due to the change in cash flow as an adjustment to loan yield. Upon disposition of an impaired loan, we record loss of principal through a charge-off to the allowance for loan losses.

At June 30, 2008, the recorded investment in loans for which we recognized impairment totaled \$1.178 billion, up from \$486 million at December 31, 2007 and \$19 million at June 30, 2007. Of the current quarter total, \$1.143 billion related to residential one-to-four unit loan TDRs with an allowance for loss of \$100 million and \$13 million related to two construction loans with an allowance for loss of \$2 million. This is up from 2007 year-end totals of \$441 million related to residential one-to-four unit loan TDRs with an allowance for loss of \$39 million, \$29 million related to one land loan with an allowance for loss of \$4 million, \$15 million related to two construction loans with an allowance for loss of \$2 million, and \$1 million related to one residential one-to-four unit loan with no allowance for loss; and up from the year-ago quarter total of \$19 million with an allowance of less than \$1 million. During the current quarter, the total interest recognized on the impaired portfolio was \$19.9 million, compared to \$10.5 million in the first quarter of 2008 and no interest recognized in the year-ago quarter.

The following table summarizes the activity in our allowance for credit losses associated with impaired loans for the quarters indicated.

(In Thousands)	<i>Three Months Ended</i>				
	<i>June 30, 2008</i>	<i>March 31, 2008</i>	<i>December 31, 2007</i>	<i>September 30, 2007</i>	<i>June 30, 2007</i>

We value real estate acquired through foreclosure at fair value less cost to sell, with any subsequent losses recorded as a direct write-off to net operations. Given the decline in home values in the residential market, we established a valuation allowance at quarter end of \$18 million for our one-to-four unit residential properties acquired through foreclosure. This valuation allowance reflects recent loss experience from sales compared to their fair value prior to sale. As that loss experience changes over time, our estimate of this valuation allowance will be reassessed.

Capital Resources and Liquidity

Our sources of funds include deposits, advances from the FHLB and other borrowings; proceeds from the sale of loans, available for sale securities, and real estate; payments of loans and payments for and sales of loan servicing; and income from other investments. Interest rates, real estate sales activity and general economic conditions significantly affect repayments on loans and deposit inflows and outflows.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Our primary sources of funds generated in the second quarter of 2008 were from:

- maturities or calls of \$593 million of U.S. Treasury, government sponsored entities and other investment securities available for sale;
- principal repayments of \$368 million on loans held for investment, including prepayments but excluding refinances of our existing loans; and
- a net increase of \$85 million in borrowings.

We used these funds to:

- originate and purchase \$769 million of loans held for investment, excluding refinances of our existing loans; and
- absorb a \$363 million reduction in deposits, primarily higher cost certificates of deposit.

In addition to its deposits, Downey's principal source of liquidity is its ability to utilize borrowings, as needed. The Bank's primary source of borrowings is the FHLB. At June 30, 2008, the Bank's FHLB borrowings totaled \$1.5 billion, representing 12.1% of total assets. As of August 8, 2008, the Bank's FHLB borrowings totaled \$2.8 billion. Approximately half of the Bank's increase in FHLB borrowings subsequent to June 30, 2008 is being held in cash equivalents and short-term investment securities to meet our liquidity needs. The Bank currently is approved by the FHLB to borrow up to a maximum of \$3.0 billion to the extent it provides qualifying collateral, providing the Bank with an additional \$0.2 billion of borrowing capacity from the FHLB as of August 8. The amount the FHLB is willing to advance differs based on the quality and character of qualifying collateral offered by the Bank, and the advance rates for the same collateral may be adjusted upwards or downwards by the FHLB from time to time. The Bank also is approved to borrow funds on an overnight basis from the Federal Reserve Bank of San Francisco subject to the amount of qualifying collateral it pledges. The Bank views the Federal Reserve Bank of San Francisco as a back-up source of liquidity. As of August 8, 2008, the Bank had no outstanding borrowings from the Federal Reserve Bank of San Francisco and the Bank's available qualifying collateral would have permitted it to borrow up to an additional \$1.5 billion. Neither the FHLB nor the Federal Reserve Bank of San Francisco is obligated to lend to us under these loan facilities. To the extent deposit renewals and deposit growth are not sufficient to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans and investment securities and otherwise fund working capital needs and capital expenditures, the Bank may utilize additional borrowing capacity from its FHLB and Federal Reserve Bank borrowing arrangements.

As of June 30, 2008, we had commitments to borrowers for short-term interest rate locks, before the reduction of expected fallout, of \$460 million, of which \$78 million were related to residential one-to-four unit loans being originated for sale in the secondary market. We also had undisbursed loan funds and unused lines of credit of \$278 million, loan forward purchase contracts of \$4 million and operating leases of \$16 million.

After the end of the second quarter, the Bank experienced elevated levels of deposit withdrawals. More recently, in response to steps taken by management to address the situation, the Bank has experienced net deposit inflows. If the Bank's deposit levels continue to stabilize with withdrawals at historical levels, Downey believes its current sources of funds, including deposits; advances from the FHLB and other borrowings; proceeds from the sale of loans and real estate; payments of loans and payments for and sales of loan servicing; and income from other investments would enable Downey to meet its obligations while maintaining liquidity at appropriate levels. However, if elevated levels of net deposit outflows resume, the Bank's usual sources of liquidity could become depleted, and the Bank would be required to raise additional capital or enter into new financing arrangements to satisfy its liquidity needs. In the current economic environment, there are no assurances that we would be able to raise additional capital or enter into additional financing arrangements.

Management believes that the Holding Company, on a stand-alone basis, currently has adequate liquid assets to meet its current obligations, which are primarily interest payments on \$199 million of senior notes. Limitations imposed by the OTS currently prohibit the Bank from providing a dividend to the Holding Company without prior OTS approval, and currently prohibit the Holding Company from paying a dividend (other than the quarterly dividend payable in August 2008) without prior non-objection of the OTS. At June 30, 2008, the Holding Company's liquid assets, including amounts deposited with the Bank, totaled \$53 million, down from \$102 million at the end of 2007 due primarily to a \$50 million capital contribution to the Bank.

Downey's stockholders' equity totaled \$0.9 billion at June 30, 2008, down from \$1.3 billion at December 31, 2007 and \$1.5 billion at June 30, 2007. The Board reduced the quarterly per share dividend payment from \$0.12 to \$0.01 for the dividend payable in August 2008, after which no future dividends will be paid without prior non-objection of the OTS.

On July 25, 2008, following Downey's second quarter earnings release on July 24, 2008, Moody's Investors Service downgraded the Holding Company's senior unsecured debt rating to B1 from Ba1. In addition, the Bank's financial strength was downgraded to D from the previous rating of a D+, long-term deposit rating to Ba2 from Baa3 and short-term deposits to Not Prime from Prime-3, with the ratings of the Holding Company and the Bank under review for downgrade. On July 26, 2008, Standard & Poor's Ratings Services lowered its senior unsecured and counterparty credit rating on the Holding Company to BB+/B from BBB-/A-3. In addition, the Bank's counterparty and deposit ratings were lowered to BBB-/A-3 from BBB/A-2, with the ratings of both the Holding Company and the Bank on negative watch. These lower ratings, and any further ratings downgrades, could make it more difficult for the Holding Company and the Bank to access the capital markets going forward, as the cost to borrow or raise capital would most likely become more expensive. The cost of the Bank's primary funding sources (deposits and FHLB borrowings) is not influenced directly by the Bank's credit ratings.

In addition, the Holding Company may not issue new debt or renew existing debt without prior non-objection of the OTS.

Contractual Obligations and Other Commitments

Through the normal course of operations, we have entered into contractual obligations and other commitments. Our obligations generally relate to funding of our operations through deposits and borrowings as well as leases for premises and equipment, and our commitments generally relate to our lending operations.

We have obligations under long-term operating leases, principally for building space and land. Lease terms generally cover a five-year period, with options to extend, and are non-cancelable. Currently, we have no material contractual vendor obligations.

We have executed interest rate swap contracts to change interest rate characteristics of a portion of our FHLB advances to better manage interest rate risk. The contracts have notional amounts totaling \$430 million of receive-fixed, pay 3-month LIBOR variable interest and serve as a permitted fair value hedge.

Our commitments to originate fixed and variable rate mortgage loans are agreements to lend to a customer as long as there is no violation of any condition established in the commitment. Undisbursed loan funds on construction projects and unused lines of credit on home equity and commercial loans include committed funds not disbursed. Letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party.

Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The credit risk involved in issuing lines and letters of credit requires the same creditworthiness evaluation as that involved in extending loan facilities to customers. We evaluate each customer's creditworthiness.

We receive collateral to support commitments when deemed necessary. The most significant categories of collateral include real estate properties underlying mortgage loans, liens on personal property and cash on deposit with us.

We enter into derivative financial instruments as part of our interest rate risk management process, including loan forward sale and purchase contracts related to our sale of loans in the secondary market. The associated fair value changes to the notional amount of the derivative instruments are recorded on-balance sheet. The total notional amount of our derivative financial instruments does not represent future cash requirements. At June 30, 2008, Downey had a notional amount of interest rate lock commitments identified to sell as part of its secondary marketing activities of \$54 million, with a change in fair value resulting in a gain of \$0.7 million, compared with a notional amount of interest rate lock commitments of \$123 million with a change in fair value resulting in a loss of \$0.3 million at June 30, 2007. For further information, see Asset/Liability Management and Market Risk on page 48 and Note 3 of Notes to the Consolidated Financial Statements on page 10.

We sell all loans without recourse. When a loan sold to an investor without recourse fails to perform according to the contractual terms, the investor will typically review the loan file to determine whether defects in the origination process occurred and whether such defects give rise to a violation of a representation or warranty we made to the investor in connection with the sale. If such a defect is identified, we may be required to either repurchase the loan or indemnify the investor for losses sustained. If there are no such defects, we have no commitment to repurchase the loan. During the first six months of 2008, we repurchased \$2 million of loans and \$1 million of real estate acquired in settlement of loans and recorded \$0.2 million of repurchase or indemnification losses related to defects in the origination process.

These loan and servicing sale contracts may also contain provisions to refund sale price premiums to the purchaser if the related loans prepay during a period typically 90 days, but not to exceed 120 days from the sale's settlement date. We

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

reserved less than \$1 million at June 30, 2008, December 31, 2007 and June 30, 2007 to cover the estimated loss exposure related to early payoffs. However, if all the loans related to those sales prepaid within the refund period, as of June 30, 2008, our maximum sales price premium refund would be \$1.4 million. See Note 3 of Notes to the Consolidated Financial Statements on page 10.

At June 30, 2008, scheduled maturities of obligations and commitments, excluding accrued interest, were as follows:

<i>(In Thousands)</i>	<i>Within 1 Year</i>	<i>After 1 Through 3 Years</i>	<i>After 3 Through 5 Years</i>	<i>Beyond 5 Years</i>	<i>Total Balance</i>

Operating leases	5,531	7,778	2,702	437	16,448

^(a) Amount represents the notional amount of the commitments or contracts. The notional amount for interest rate lock commitments before the reduction of expected fallout was \$78 million.

Regulatory Capital Compliance

The Bank's core and tangible capital ratios were both 7.57% and its total risk-based capital ratio was 14.31% at June 30, 2008. The Bank's regulatory capital position was enhanced by \$62 million during the current quarter from a contribution of \$50 million of equity from the Holding Company and a \$12 million dividend paid by DSL Service Company, the Bank's wholly-owned real estate subsidiary. This was more than offset by the net loss recorded in the current quarter.

The following table is a reconciliation of the Bank's stockholder's equity to federal regulatory capital as of June 30, 2008.

<i>(Dollars in Thousands)</i>	<i>Tangible Capital</i>		<i>Core Capital</i>		<i>Risk-Based Capital</i>	
	<i>Amount</i>	<i>Ratio</i>	<i>Amount</i>	<i>Ratio</i>	<i>Amount</i>	<i>Ratio</i>
Stockholder's equity	\$ 1,008,642		\$ 1,008,642		\$ 1,008,642

^(a) Limited to 1.25% of risk-weighted assets.

^(b) Represents the minimum requirement for tangible capital, as no well capitalized requirement has been established for this category.

^(c) A third requirement is Tier 1 capital to risk-weighted assets of 6.00%, which the Bank met and exceeded with a ratio of 12.98%.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding quantitative and qualitative disclosures about market risk, see Asset/Liability Management and Market Risk on page 48.

ITEM 4. CONTROLS AND PROCEDURES

As of June 30, 2008, Downey carried out an evaluation, under the supervision and with the participation of Downey's management, including Downey's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of Downey's disclosure controls and procedures pursuant to Securities and Exchange Commission (SEC) rules. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded Downey's disclosure controls and procedures were effective as of the end of the period covered by this report. There have been no significant changes during the most recent quarter in Downey's internal controls over financial reporting or in other factors that could significantly affect these controls subsequent to the evaluation date.

Disclosure controls and procedures are defined in SEC rules as controls and other procedures designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Downey's disclosure controls and procedures were designed to ensure that material information related to Downey, including subsidiaries, is made known to management, including the Chief Executive Officer and Chief Financial Officer, in a timely manner.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

On October 29, 2004, two former traditional branch employees brought an action in Los Angeles County Superior Court, Case No. BC323796, entitled *Margie Holman and Alice A. Meseck, et al. v. Downey Savings and Loan Association*. The first amended complaint seeks unspecified damages for alleged unpaid regular and overtime wages, inadequate meal breaks, failure to pay split-shift and reporting time wages, and related claims. The plaintiffs are seeking class action status to represent all other current and former Bank employees who held the position of Customer Service Supervisor and/or Customer Service Representative at the Bank's in-store branches at any time from October 29, 2000 to date. The Bank has opposed the claim and asserted all appropriate defenses, and has provided for what is believed to be a reasonable estimate of exposure for this matter in the event of loss. While acknowledging the uncertainties of litigation, management believes that the ultimate outcome of this matter will not have a material adverse effect on Downey's operations, cash flows or financial position.

Two purported shareholder class actions, one brought on behalf of Waterford Township General Employees Retirement System, Case No. CV-08-03261, and the other brought on behalf of Stephen J. Mihalacki, Case No. SACV08-00609, were filed on May 16, 2008 and June 2, 2008, respectively, in the United States District Court for the Central District of California against the Holding Company and certain of its current and former officers and certain former directors. The complaints, filed on behalf of all persons who purchased Holding Company common stock during October 16, 2006 to March 14, 2008, seek unspecified damages for alleged violation of federal securities laws, claiming that the defendants made misleading statements and omissions regarding Downey's business and financial results, thereby artificially inflating the common stock price. Specifically, the plaintiffs contend that the defendants concealed that (a) the Bank's portfolio of option ARMs contained millions of dollars worth of impaired and risky securities; (b) the Bank had been aggressive in acquiring loans from mortgage brokers that were highly risky; (c) the Bank had failed to properly account for highly leveraged loans; (d) the Bank had inadequate underwriting practices, which led to large numbers of loan defaults; and (e) the Bank had not adequately reserved for option ARM loans. A motion to consolidate the two actions is pending, after which it is expected that the plaintiffs will file a consolidated complaint.

Related to the shareholder class actions, two purported shareholder derivative lawsuits, one entitled *Michael L. McDougall v. Daniel D. Rosenthal, et al.*, Case No. 30-2008-00180029, and the other entitled *Joyce Mendlin v. Maurice L. McAlister, et al.*, Case No. 30-2008-00087854, were filed on June 10, 2008 and July 28, 2008, respectively, in Orange County Superior Court, in California. The plaintiffs, who purport to bring the lawsuits on behalf of the Holding Company against certain of its current and former officers, its current directors and certain former directors, allege that commencing in October 2006, the defendants caused or allowed Downey to issue a series of press releases and other statements that significantly overstated Downey's business prospects and financial results; that the statements failed to disclose that Downey was more exposed to the subprime market crisis than it had disclosed; that Downey's portfolio of subprime and option ARM mortgage-related assets was overvalued; and that as a result, Downey's reported earnings and business prospects were inaccurate. The plaintiffs allege that the defendants' action constitutes breaches of fiduciary duty, waste of corporate assets and unjust enrichment, and seek, among other relief, unspecified damages to be paid to the Holding Company, corporate governance reforms, and equitable and injunctive relief, including restitution and the creation of a constructive trust.

Downey has been named as a defendant in other legal actions arising in the ordinary course of business, none of which, in the opinion of management, will have a material adverse effect on its operations, cash flows or financial position.

ITEM 1A. Risk Factors

Downey's 2007 Form 10-K presents, on pages 22 to 27, a comprehensive set of risk factors that may impact Downey's future results. Given recent developments in the mortgage, housing and secondary markets, we are adding the following:

Downey's access to liquidity sources may be negatively impacted if market conditions and regulatory restrictions persist or if further ratings downgrades occur.

While Downey actively manages its liquidity risk and maintains liquidity at least sufficient to cover all maturing debt obligations or other forecasted funding requirements, Downey's liquidity may be affected by an inability to access the capital markets or by unforeseen or extraordinary demands on cash. This situation may arise due to circumstances beyond Downey's control, and is subject to the Holding Company's and the Bank's credit ratings as assigned by nationally recognized statistical rating organizations. Recent disruptions in the capital markets have substantially limited the ability of mortgage originators, including Downey, to sell mortgage loans to the capital markets through whole loan sales or securitization. As a result, Downey has experienced a general loss of liquidity in most secondary markets for its loans.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Downey cannot forecast if or when market liquidity conditions will improve from current stresses, although it is Downey's expectation that the existing turmoil in the financial and credit markets may continue to affect its performance at least throughout 2008.

On July 25, 2008, following Downey's second quarter earnings release on July 24, 2008, Moody's Investors Service downgraded the Holding Company's senior unsecured debt rating to B1 from Ba1. In addition, the Bank's financial strength was downgraded to D from the previous rating of a D+, long-term deposit rating to Ba2 from Baa3 and short-term deposits to Not Prime from Prime-3, with the ratings of the Holding Company and the Bank under review for downgrade. On July 26, 2008, Standard & Poor's Ratings Services lowered its senior unsecured and counterparty credit rating on the Holding Company to BB+/B from BBB-/A-3. In addition, the Bank's counterparty and deposit ratings were lowered to BBB-/A-3 from BBB/A-2, with the ratings of both the Holding Company and the Bank on negative watch. These lower ratings, and any further ratings downgrades, could make it more difficult for the Holding Company and the Bank to access the capital markets going forward, as the cost to borrow or raise capital would most likely become more expensive. The cost of the Bank's primary funding sources (deposits and FHLB borrowings) is not influenced directly by the Bank's credit ratings.

In addition, the Holding Company may not issue new debt or renew existing debt without prior non-objection of the OTS.

Current market conditions have also limited the Bank's liquidity sources principally to secured funding outlets such as the FHLB and, as back-up, the Federal Reserve Bank of San Francisco, and to FDIC-insured deposits originated through the Bank's branch network. Other sources of funding, such as medium-term notes and uninsured institutional deposits, have largely been closed to the Bank. There can be no assurance that actions by the FHLB or the Federal Reserve Bank would not reduce or eliminate our borrowing capacity or that we would be able to continue to attract deposits at competitive rates. Such events could have a material adverse impact on our results of operations and financial condition.

Future regulatory actions may also adversely impact our ability to raise funds through deposits. In particular, there is currently no restriction on our ability to acquire deposits through deposit brokers (although we have not generally done so) or on the rates we may offer on deposits to attract customers. If our capital position were to deteriorate, or other circumstances were to occur, such that we become classified as an inadequately capitalized institution (or in any lower regulatory capital category), we could be prohibited from acquiring funds through deposit brokers and from paying rates on deposits that are significantly higher than the prevailing rates of interest on deposits offered by insured depository institutions in our normal market area.

After the end of the second quarter, the Bank experienced elevated levels of deposit withdrawals. More recently, in response to steps taken by management to address the situation, the Bank has experienced net deposit inflows. If the Bank's deposit levels continue to stabilize with withdrawals at historical levels, Downey believes its current sources of funds would enable Downey to meet its obligations while maintaining liquidity at appropriate levels. However, if elevated levels of net deposit outflows resume, the Bank's usual sources of liquidity could become depleted, and the Bank would be required to raise additional capital or enter into new financing arrangements to satisfy its liquidity needs. In the current economic environment, there are no assurances that we would be able to raise additional capital or enter into additional financing arrangements.

The OTS restrictions on the Bank's and the Holding Company's ability to pay dividends, and on the Holding Company's ability to issue new debt or renew its existing debt, may adversely affect our ability to pay dividends and ultimately to service our Holding Company debt.

Our ability to pay regular quarterly dividends to our stockholders and to pay interest on our debt at the Holding Company level depends to a large extent upon the dividends we receive from the Bank. The OTS, the Bank's principal regulator, has prohibited the Bank from paying dividends to the Holding Company without the OTS's prior approval. In addition, the OTS has prohibited the Holding Company from paying dividends (after the quarterly dividend payable in August 2008) without the OTS's prior non-objection.

At June 30, 2008, the Holding Company's liquid assets, including amounts deposited with the Bank, totaled \$53 million. Management believes that the Holding Company, on a stand-alone basis, currently has adequate liquid assets to meet its current obligations, which are primarily interest payments on \$199 million of senior notes. However, in the longer term, the Holding Company's ability to service its senior debt depends on its ability to receive dividends from the Bank and, when the notes mature, on its ability to renew or refinance the senior debt. However, the OTS has prohibited the Holding Company to issue or renew debt without its non-objection. We cannot predict whether the OTS will approve payments of dividends by the Bank to the Holding Company, or will object to the payment of future Holding Company dividends or how long these OTS restrictions will remain in effect.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Submission of Matters to a Vote of Security Holders

On April 23, 2008, Downey held its annual meeting of shareholders to elect three Class 1 Directors for terms of three years each and to ratify the Board of Directors' appointment of KPMG LLP as auditors for the year ending December 31, 2008. The number of votes cast at the meeting as to each matter acted upon was as follows:

1. Election of Directors:

<i>Nominees</i>	<i>Votes For</i>	<i>Votes Withheld</i>	<i>Unvoted</i>
Gary W. Brummett	21,380,878	2,937,522	3,535,383
