THIS FORM 10-KSB CONTAINS FORWARD-LOOKING STATEMENTS WITHIN THE MEANING OF 27A OF THE SECURITIES ACT OF 1933 AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934. THE ACTUAL RESULTS COULD DIFFER MATERIALLY FROM THOSE SET FORTH IN THE FORWARD-LOOKING STATEMENTS. CERTAIN FACTORS THAT MIGHT CAUSE SUCH A DIFFERENCE ARE DISCUSSED IN ITEM 6, "MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION-CERTAIN FACTORS THAT MAY AFFECT FUTURE RESULTS," WITHIN THIS REPORT.

PART I

ITEM 1. BUSINESS.

GENERAL

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Our mission is to identify, develop and commercialize high-margin, proprietary technologies suited for high-volume, high-growth markets and, in turn, achieve attractive long-term growth for our company. Our focus to date has been and continues to be on unique technology related to image and video enhancement designed to enrich picture and video output with clearer, more defined detail in texture, color, contrast and tone, at low cost. Our initial products can be used by original equipment manufacturers (OEM's) for placement into products that produce images on display screens such as televisions or DVD players, for supplementing and increasing video quality on existing television monitors and video displays via set-top boxes containing our technology, the Security and Surveillance Market in both the Governmental and private sectors and by individuals over the Internet for improving their personal photographs. Our patented high speed filtering technology removes approximately 70% of the picture noise while retaining correct focus (the image and text in the image does not blur). The three product lines based upon our proprietary technology are: (1) retail and security/surveillance products; (2) the NUWAVE Video Processor ("NVP") Technology; and (3) digital filtering technology.

Retail and Security/Surveillance Products

During the second half of 2002, we announced a new line of retail video products. The new products are powered by our new state-of-the-art "1104 ASIC chip technology." The retail line is expected to be marketed and sold through consumer electronic distributors, national retail chains and specialty audio/video stores and includes a series of video game hook-up cables, an "S" Video Enhancer (SVE) set-top box and four video selector boxes that feature the company's proprietary technology for image enhancement. The introduction of these products will allow consumers to mix multiple video sources, from popular products such as DVD Players, Satellite Receivers, Video Camcorders, and Video Game Consoles.

During 2002 we entered into a non-exclusive alliance with Unical Enterprises, Inc. for the marketing, sales and distribution of our newly introduced line of proprietary products as well as a full line of consumer electronics accessories with access to the Sylvania brand. The initial contractual agreement expired on April 1, 2003 and we are in the process of renewing our agreement. Unical Enterprises, Inc., a leading manufacturer and distributor of Northwestern Bell Phones and the exclusive licensee of the Sylvania name for home automation and consumer electronics accessories, recently announced its entry into the video game accessories market. Along with video game accessories we will now, with Unical's support, market a full line of consumer electronics accessories, with access to the Sylvania brand. This line will include products like Universal Remote Controls, Indoor TV antennas, Web Cams, and NUWAVE ENABLED hookup cables. In connection with this agreement we received a \$2.85 million order for universal remote control units to be delivered to Electronics Etc., Inc. over the next year. We initially anticipated this order would begin shipping during the fourth quarter of 2002 but due to product specification changes the order has been delayed until the customer has approved the product revisions. We anticipate that a portion of this order will ship during 2003. In addition to Unical, the Company is in discussions with other potential retail distribution customers who have seen demonstrations of our new retail products and have expressed interest in going forward.

We recently introduced a line of NUWAVE ENABLED Security/Surveillance image enhancement products that include NUWAVE's patented hardware chip technology which breaks down a video signal into its chrominance and luminance

components and then modifies specific parameters: color, luminance, black level, clarity and noise reduction, to remove visual noise before reassembling the

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

signal and sending it to a playback device, such as a video monitor. When integrated into a security and surveillance system, this technology has applications for law enforcement, anti-terrorism and business surveillance, in public locations such as airports, retail stores, sports stadiums and other public gathering places. The Company has received and shipped its first order from an agency of the Federal Government for this new line of security/surveillance image enhancement products.

The NUWAVE Video Processor (NVP) technology is proprietary video-enhancement technology designed to significantly enhance video output devices with clearer, sharper details and more vibrant colors when viewed on the display screen. We are marketing this technology in the form of ASIC chips (Application Specific Integrated Circuits) directly to OEM's who by incorporating this enabling technology would improve picture quality in their televisions, VCR's, DVD's, camcorders, set-top boxes and other video output devices. This technology can also be licensed to the OEM for incorporation onto their own ASIC design. The "NVP 104" plastic (silicon) chip was completed during 2001.

During the second half 2002, the Company announced the completion of its new ASIC Chip, the "NVP 1104." This new chip can create economies of scale in the marketplace by offering a superior product with unique features, which satisfy customer's demands for higher video quality at modest prices. It supports the latest video standards such as component video and progressive scan systems and includes features that are targeted at video enhancement for the Security/Surveillance and Home Entertainment applications. These important features together with its low cost implementation make it very attractive to incorporate into OEM consumer audio/video products like DVD players, AV receivers, Video Games, Satellite Receivers, AV Selectors, TV's and Retail set-top box products. The NVP 1104 is "future proofed" due to its unique design philosophy, and by its ability to function with the many video standards available today. We are currently in discussions with potential retail customers and major OEM's who have indicated their desire to incorporate our technology into their products.

Digital Software Technology

Our proprietary digital filters remove graininess and digital artifacts while preserving proper focus we believe better than any other "real time" filters that are on the market today. In October 2001, we were granted a patent by the U.S. Patent Office covering our digital filters. We plan to license our digital filtering technology to OEM's for embedding in products such as PC's, printers, scanners, camcorders and DVD's, among other digital imaging devices. These patented filters are expected to be in demand for use in processing digital video and movies used for streaming video over the Internet. The digital technology not only complements our proprietary analog ASIC chip technology but can also work in conjunction with it to further improve the resulting image quality. In April 2002, we signed an agreement with Sony Corporation, giving Sony the non-exclusive right to use one of our filters in its digital color printers, in return for a nominal one-time licensing fee. In January 2003, Sony signed a new license agreement and purchased the non-exclusive right to an upgrade to this filter. While these initial steps may lead to a growing relationship between Sony Corporation and NUWAVE, there is no assurance that such a relationship will develop.

Although we anticipate deriving increased revenues from the sale of our ASIC chips and retail products and the licensing of our proprietary digital software, no assurance can be given that these products will be successfully marketed or that losses will not continue to occur during such period. See "Liquidity and Capital Resources."

BACKGROUND--VIDEO IMAGES

The human eye perceives all images as a result of its ability to recognize light. Light travels as continuous electromagnetic waves ("Analog Light Waves") that are either emitted by the object being observed or reflected from it. Analog Light Waves vary in frequency and amplitude, and can be directly captured as images. For example, in photography, light waves strike film treated with certain chemicals and the energy from the light wave causes chemical reactions that change the translucency of the film. As a result, the image can be recreated by again passing light through the film. In computers, visual images can be stored and manipulated after Analog Light Waves have been broken down into smaller constituent parts expressed as digital signals. These digital signals are transmitted as bits and then reconstituted into Analog Light Waves visible to the human eye.

Broadcast television technology is based on Analog Light Wave transmissions. Analog Light Waves are captured by an electronic television camera and turned into usable electrical energy in the form of lower frequency waves in the form of electrical currents in an electric circuit ("Analog Video Waves"). That wave is transmitted to a receiver, where it is projected at the standard broadcast rate of 30 frames per second ("fps") against a phosphorescent screen. The screen then emits Analog Light Waves, making the image visible to the human eye.

Modern video telecommunications, such as satellite broadcasting and cable television, generally combine both analog and digital processes in order to capture and transmit images. For example, in digital satellite video telecommunication the image is digitized by a computer processor and then broadcast to a satellite. The digital information is received and rebroadcast by the satellite directly to a receiver, and then reconstituted into energy in the form of an analog wave and displayed at 30 fps to create a visible image.

Bandwidths available for satellite video transmission are limited by the Federal Communications Commission ("FCC"). These limitations significantly restrict the amount of information that can be transmitted in any time interval and require most information to be transmitted in a compressed digitized format.

Given the physical limitations of satellite, cable and telephone systems, and their increasing interactivity, ever more emphasis is being placed on compression technology as a means to allow more data to be transmitted in any time interval. Using a variety of techniques, portions of a digital description of an image are omitted in the transmission of information, and, by mathematical formula or inference, most of the omitted data is then replaced after reception. The result of this compression technology has been to increase the number of channels available for digital satellite broadcasting from 50 to 150, and to significantly improve the quality of images transmitted over the Internet. We believe that improvements in the amount of compression possible will continue. However, as the amount of compression increases, more data will likely be lost, and the quality of the image will deteriorate.

Image information may be lost in the process of compression or distorted during recording, transmission or playback because of various factors, including signal interference or deterioration of original film quality and camera focus. Some of the problems from this loss or distortion of image information include lack of clarity, a "washed out" look and reduced or inadequate black level.

One of the methods used to compress digitized video information for

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

storage and transmission (other than television transmission) is to eliminate frames. A phenomenon causing analogous results occurs when the hard drive of a computer, or some other component, cannot retrieve or present data at sufficiently high fps. In either case, image movement is erratic and unrealistic. Regardless of whether the signal is compressed, the image may be subject to random salt and pepper noise patterns.

3

OUR COMPANY'S VIDEO ENHANCEMENT PRODUCTS

The NVP Technology

Our patented NVP controls, corrects and improves analog video signals using digital control (software). The NVP first detects and replaces all important picture synchronization and stability attributes. It then corrects the color and black and white information. The NVP enhances fine details of an image and reduces distortions incurred in the course of transmitting the image, corrects the pure black content of images and adjusts perceived light on projected images. Fine detail enhancement is achieved by a proprietary circuit that analyzes the form of the analog waves at the point of origin or display, and processes the wave to significantly increase the clarity of the image.

The NVP achieves "blackness" correction by establishing a "reference to true black" and adjusting the rest of the color spectrum to that reference, making a "washed out" image appear more vivid. Similar referencing currently is available only in expensive video display units, TV monitors and projection systems; the NVP's proprietary circuits enable the process to be performed inexpensively on a printed circuit board, ASIC or a small portion of a integrated circuit chip.

The NVP also contains circuits that provide for the adjustment of light in images and brightness of the colors presented, similar to circuits traditionally included in televisions.

The NVP can be used prior to further processing of the Analog Video Wave at the source of the video signal and/or at the other end of the process prior to the display of the video image. In the form of a chip, it can be included in a television set, video projector or in a video conference display or in the decoder or routing box that connects a typical television to a cable broadcasting company or a multichannel satellite provider. The NVP also can be included in any personal computer that has a video capture board, a device enabling the computer to convert standard broadcast video signals into a digitized form. This enables the image to be enhanced prior to digitization.

We have developed patented Softsets to control the functions of the NVP. The Softsets give both end-users and manufacturers who use the NVP in their products the ability to manipulate the attributes of video images to their own taste or standards. For example, the manufacturer of a set-top box who includes the NVP and Softsets in its product could offer viewers the ability to select predetermined optimum video parameters for "Sports," "Movies," "Drama" or other predesignated programming from their remote control ("Active Softsets"). Additionally, program providers or other transmitters can encode their signal so that a receiving device containing the Softsets and enhanced NVP will automatically adjust its video parameters to a predetermined value when the signal is received ("Passive Softsets"). The encoded signal can also be included in the actual programming.

Digital Video and Photo Software Video Enhancement Technology

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

We have developed a proprietary technology to remove noise, graininess in pictures, to complement our clarity technology used in the NVP-104 ASIC. The result of this development is a set of patented algorithms that remove 70% of the picture noise while retaining correct focus (the image does not blur). In addition, the NUWAVE algorithm process is three times faster than any other known algorithm or filter thus allowing use in and during real time streaming video.

We believe our company has proprietary solutions for sale in both analog and digital form to meet the continuing evolution and convergence of the PC to television markets and the worldwide trend away from analog devices toward digital devices.

4

Other Potential Products

Our company, both internally and through the use of outside consultants, continues to conduct investigation and research and development with respect to other new technologies/products to address the digital, PC and internet markets, which are new markets for us to participate in. We intend to continue to use outside consultants to assure exposure to new ideas and technology. These activities may give rise to additional products that we may commercialize. However, there can be no assurance that our efforts will result in marketable products or products that can be produced at commercially acceptable costs or that the Company will have sufficient funds available to support the development and commercialization of such products.

RESEARCH AND DEVELOPMENT

Our Advanced Engineering Group currently operates to support the continuing development of our products and related technology, and the identification of additional sources of new technology. We utilize our Advanced Engineering Group to create products and technology. These products and technology include the NVP 104 and NVP 1104 ASIC chips, a line of retail and Security and Surveillance products and a significant amount of the software included in each of its products.

The Advanced Engineering Group consists of our own employees, together with outside consultant organizations who have on their respective staffs engineers, technicians and support personnel who devote time to our company on an as-needed project-by-project basis. We anticipate that the make-up of our Advanced Engineering Group will change from time to time depending on our current and anticipated development and commercialization plans. Our strategy with respect to new products and technologies is to continue to utilize the Advanced Engineering Group as well as other independent third party sources and to increase its internal technical and engineering staff as appropriate.

During fiscal 2002 and 2001, \$681,000 and \$1,165,000, respectively, were spent on research and development activities. During the year ending December 31, 2003, we estimate that we will spend approximately \$150,000 on research and development. Any increases or decreases to these research and development expenditure estimates are expected to be directly related to revenues generated from our current and forecasted product line-up.

MARKETING AND SALES

Utilizing our proprietary technologies, we have completed development of three product lines: (1) retail and security/surveillance products; (2) the

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

NUWAVE Video Processor Technology; and (3) Digital Software (PicturePreptm Technology). These three product lines are currently being marketed to their respective distribution channels as follows:

Retail and Security/Surveillance Products

During the second half of 2002, we announced a new line of retail video products. The new products are powered by the Company's new state-of-the-art "1104 ASIC chip technology." The retail line is expected to be marketed and sold through consumer electronic distributors, national retail chains and specialty audio/video stores and includes a series of video game hook-up cables, an "S" Video Enhancer (SVE) set top box and four video selector boxes that feature the company's proprietary technology for image enhancement. The introduction of these products will allow consumers to mix multiple video sources, from popular products like DVD Players, Satellite Receivers, Video Camcorders, and Video Game Consoles

5

Also during the second half of 2002 we announced the newest addition to our retail product line, a universal remote control unit. At the same time we announced the receipt of a \$2.85 million purchase order for this product from Electronics Etc, Inc., a consumer products distributor with a wide retail customer base. Although this product does not contain NUWAVE's proprietary technology it is compatible with and complementary to NUWAVE's newly introduced line of retail video enhancement products and can therefore be sold either independent of or together with its retail video enhanced selector boxes. We initially anticipated this order would begin shipping during the fourth quarter of 2002 but due to product specification changes the order has been delayed until the customer has approved the product revisions. We anticipate that a portion of this order will ship during 2003.

During 2001, we completed development of our first retail product utilizing the NVP ASIC chip, the VGE set-top box for use with video games and DVD's. The VGE is a low-cost video game enhancer that provides home video "gamers" with better video quality, to give game players an "edge" to improve their scores. In late June 2001, we began introducing the VGE 101 through select distributors and manufacturer's representatives for placement in nationally known retail chains. In keeping with our focus to develop and commercialize video enhancement technology and to keep our operating costs to a minimum our objective was to develop, introduce and turn the manufacture and marketing of this product over to a recognized distributor with access to the retail market place. In December 2001, we entered into a strategic alliance with Gemini Industries ("Gemini"), a manufacturer and distributor of consumer electronics accessories. Gemini was granted a five-year exclusive license to market and distribute NUWAVE's VGE in North America. Initial shipments of the VGE and ASIC chips to Gemini took place during the first quarter of 2002. Minimum ongoing purchase requirements under the contract were to begin in July 2002. After having received a three-month extension Gemini still had not met their minimum contractual purchase requirements and management determined it was in the Company's best interest to terminate the agreement. We are considering the contractual implications as well as our alternatives so as to not further restrict our ability to sell and market our new line of products to the retail marketplace.

In line with our objectives, we entered into a non-exclusive alliance with Unical Enterprises, Inc. for the marketing, sales and distribution of our new line of proprietary products as well as a full line of consumer electronics accessories with access to the Sylvania brand. Unical Enterprises, Inc., a

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

leading manufacturer and distributor of Northwestern Bell Phones and the exclusive licensee of the Sylvania name for home automation and consumer electronics accessories, recently announced its entry into the video game accessories market. Along with video game accessories we will now, with Unical's support, market a full line of consumer electronics accessories, with access to the Sylvania brand. This line will include products like Universal Remote Controls, Indoor TV antennas, Web Cams, and NUWAVE ENABLED hookup cables.

MANUFACTURING

The Company does not contemplate that it will directly manufacture any of its products. It has contracted with third parties to manufacture its NVP ASIC chips and its product line up. It also may license to third parties the rights to manufacture the products, through direct licensing, OEM arrangements or otherwise.

The Company intends to produce the NVP ASIC chips in accordance with a customer's requirements supported by firm commitments rather than producing and storing in inventory ASIC chips in anticipation of applications required by customers in the future.

6

PATENTS; PROPRIETARY INFORMATION

To the extent practicable, the Company has filed and intends to file U.S. patents and/or copyright applications for certain of its proposed products and technology. The Company has also filed and intends to file corresponding applications in key industrial countries worldwide.

In April 1996, the Company filed two U.S. patent applications on behalf of Rave Engineering Corporation ("Rave") for its Randall connector system. One patent was received in November 1997 and the second one in January 1998. Under the terms of the settlement agreement with Rave, the Company retains the exclusive license rights to these patents.

In April 1998, the Company filed three U.S. patent applications for certain of its independently developed products: one for the NUWAVE Video Processor and two for the Softsets, these patents were granted in November 2000, February 2001 and May 2001, respectively. In August 1999, the Company filed a patent application for its digital software technology as used in PicturePrep product line, this patent was granted in October 2001. There is no assurance that any patent will afford us with commercially significant protection of our technology or that we will have adequate resources to enforce our patents.

The Company also sells its technology and products in foreign markets. As such, it has filed for foreign patent protection in the countries forming the European Common Union, Japan and Korea. The patent laws of other countries may differ significantly from those of the United States as to the patentability of the Company's products and technology. Moreover, the degree of protection afforded by foreign patents may be different from that in the United States. Patent applications in the United States are maintained in secrecy until the patents are issued, if a non-publication request is timely made and the applications are not foreign filed, and are otherwise published 18 months after filing. Publication of discoveries in scientific or patent literature tends to lag behind actual discoveries by several months. As a result, the Company cannot be certain that it will be the first creator of inventions covered by any patent applications it makes or the first to file patent applications on such inventions.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Management believes that the products the Company intends to market and sell do not infringe the patents or other proprietary rights of third parties. Further, it is not aware of any patents held by competitors that will prevent, limit or otherwise interfere with the Company's ability to make and sell its products. However, it is possible that competitors may have applied for, or may in the future apply for and obtain, patents which have an adverse impact on the Company's ability to make and sell its products. There is no assurance that competitors will not infringe the Company's patents. Defense and prosecution of patent suits, even if successful, are both costly and time consuming. An adverse outcome in the defense of a patent suit could subject the Company to significant liabilities to third parties, require disputed rights to be licensed from third parties or require it to cease selling its products.

The Company also relies on unpatented proprietary technology. There is no assurance that others may not independently develop the same or similar technology or otherwise obtain access to the Company's unpatented technology. To protect its trade secrets and other proprietary information, the Company requires employees, advisors and collaborators to enter into confidentiality agreements. The Company could be adversely affected in the event that these agreements fail to provide meaningful protection for its trade secrets, know-how or other proprietary information.

COMPETITION

The markets that the Company intends to enter are characterized by intense competition, and, particularly with respect to the market for video editing, video production and video processing products, significant price erosion over the life of a product. The Company's products will directly compete

7

with those of numerous well-established companies, such as Sony Electronics, Inc., Panasonic Division of Matsushita Electric Industrial Co., Motorola, Inc., Mitsubishi International Corp. and Royal Philips Electronics, NV, which design, manufacture and/or market video technology and other products. All of these companies have substantially greater financial, technical, personnel and other resources than the Company and have established reputations for success in the development, licensing, sale and service of their products and technology. Certain of these competitors dominate their industries and have the necessary financial resources to enable them to withstand substantial price competition or downturns in the market for video products.

EMPLOYEES

The Company currently has six full-time employees, of whom four are executives and depending on its level of business activity, expects to hire additional employees in the next 12 months, as needed, to support marketing and sales, manufacturing and research and development. The Company also retains a varying number of consultants on an as-needed basis.

ITEM 2. PROPERTIES

The Company has established its headquarters in Fairfield, New Jersey. Pursuant to the sublease relating to such facility, the Company is obligated to make monthly rental payments of \$6,090. The lease is on a month-to-month basis. The Company's subleased portion of the facility is approximately 2,500 square feet and the sublease entitles the Company to share certain common areas.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

ITEM 3. LEGAL PROCEEDINGS

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

On December 20, 2002 the Company held a special meeting of its stockholders to:

1. to elect four directors;
2. to authorize the Board of Directors to effect a reverse split of our outstanding common stock at the discretion of the Board at one of the following: at an exchange ratio of one-for-ten, at an exchange ratio of one-for-twenty, at an exchange ratio of one-for-thirty, at an exchange ratio of one-for-forty or at an exchange ratio of one-for-fifty; and as to the timing, based upon its view as what is in the best interests of the Company and the stockholders; and
3. to approve an amendment to the Company's Certificate of Incorporation to increase the number of authorized shares of our common stock to 140,000,000 shares, \$.001 par value per share.

The following table sets forth information regarding the number of votes cast for and against, with respect to the matter presented at the meeting.

8

PROPOSAL	FOR	AGAINST OR WITHHELD	ABSTENTIONS
1	15,306,186	428,618	0
2	15,112,316	611,033	11,455
3	14,614,796	1,086,253	33,755

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS MARKET FOR COMMON EQUITY

The Company's Common Stock, par value \$.001 per share ("Common Stock") is traded on the OTC bulletin board (OTCBB) Market under the symbol WAVE. The OTCBB is a regulated quotation service that displays real-time quotes, last-sale prices and volume information in over-the-counter (OTC) equity securities. Prior to August 13, 2002, the stock had been traded on the NASDAQ SmallCap Market. The following table sets forth the range of high and low closing sale prices for the Common Stock as reported on the NASDAQ SmallCap Stock Market during each of the quarters presented until August 12, 2002 and the OTCBB subsequent to August 12, 2002. The quotations set forth below are inter-dealer quotations, without retail mark-ups, mark-downs or commissions and do not necessarily represent actual transactions.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

	Common Stock	
QUARTERLY PERIOD ENDED	HIGH	LOW
March 31, 2001	1.44	.41
June 30, 2001	1.02	.60
September 30, 2001	1.89	.55
December 31, 2001	1.43	.86
March 31, 2002	1.05	.59
June 30, 2002	.71	.30
September 30, 2002	.41	.07
December 31, 2002	.14	.01

As of April 7, 2003, there were approximately 175 holders of record of the Company's Common Stock. This number does not include beneficial owners of the Common Stock whose shares are held in the names of various dealers, clearing agencies, banks, brokers and other fiduciaries.

The Company has never declared or paid any cash dividends. The Company currently intends to retain any future earnings to finance the growth and development of its business and future operations, and therefore does not anticipate paying any cash dividends in the foreseeable future.

9

RECENT SALES OF UNREGISTERED SECURITIES

On November 19, 2002 the Company issued 48,000 shares of its common stock to a consulting firm as partial compensation for services it rendered to the Company.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF CONDITION AND RESULTS OF OPERATIONS

SUMMARY FINANCIAL INFORMATION

The summary financial data set forth below are derived from and should be read in conjunction with the financial statements, including the notes thereto, filed as part of this Form 10-KSB.

	YEAR ENDED DECEMBER 31, 2002	YEAR ENDED DECEMBER 31, 2001	YEAR ENDED DECEMBER 31, 2000
STATEMENT OF OPERATIONS DATA:			
(in thousands, except share data)			
Revenues	\$ 286	\$ 505	\$ 1,283
Net Loss	\$ 2,674	\$ 4,273	\$ 4,283

FORWARD-LOOKING STATEMENTS

This Report on Form 10-KSB contains "forward-looking statements" within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). All statements other than statements of historical facts included in this Report, including without limitation, the statements under "General," "Marketing and Sales," "Research and Development," "Manufacturing," "Liquidity and Capital Resources" and "Plan of Operation" are forward-looking statements. The Company cautions that forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements, due to several important factors herein identified. Important factors that could cause actual results to differ materially from those indicated in the forward-looking statements ("Cautionary Statements") include delays in product development, competitive products and pricing, general economic conditions, risks of intellectual property litigation, product demand and industry capacity, new product development, commercialization of new technologies, the Company's ability to raise additional capital, and the risk factors detailed from time to time in the Company's annual report on Form 10-KSB and other materials filed with the Securities and Exchange Commission ("SEC").

All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the Cautionary Statements.

10

GENERAL

Our mission is to identify, develop and commercialize high-margin, proprietary technologies suited for high-volume, high-growth markets and, in turn, achieve attractive long-term growth for our company. We have been focusing on technology related to image and video enhancement designed to enrich picture and video output with clearer, more defined detail in texture, color, contrast and tone, at low cost. Our initial products can be used by original equipment manufacturers (OEM's) for placement into products that have or utilize display screens such as televisions or DVD players, for supplementing and increasing video quality on existing television monitors and video displays via set-top boxes containing our technology, and by individuals over the Internet for improving their personal photographs. Our patented high speed filtering technology removes approximately 70% of the picture noise while retaining correct focus (the image and text in the image does not blur). We have developed and are currently marketing three product lines based upon our proprietary technology. These products lines are: 1) Retail and Security/Surveillance Products; 2) the NUWAVE Video Processor (NVP) Technology and 3) Digital Filtering Technology (see "Marketing and Sales").

RESULTS OF OPERATIONS

Revenues for the year ended December 31, 2002 were \$286,000 as compared to \$505,000 for the prior year. Revenues for the two years were a direct result of the introduction of our first retail product, the VGE 101 and an agreement which made Gemini Industries, Inc. the exclusive licensee of NUWAVE's VGE retail

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

product. In late June 2001, we began introducing the VGE 101 through select distributors and manufacturer's representatives for placement in nationally known retail chains. In keeping with our focus to develop and commercialize video enhancement technology and to keep our operating costs to a minimum our objective was to develop, introduce and turn the manufacture and marketing of this product over to a recognized distributor with access to the retail market place. In December 2001, we entered into a strategic alliance with Gemini Industries ("Gemini"), a manufacturer and distributor of consumer electronics accessories. Gemini was granted a five-year exclusive license to market and distribute NUWAVE's VGE in North America. Initial shipments of the VGE and ASIC chips to Gemini took place during the first quarter of 2002. Minimum ongoing purchase requirements under the contract were to begin in July 2002. After having received a three-month extension Gemini still had not met their minimum contractual purchase requirements and management determined it was in the Company's best interest to terminate the agreement. We are considering the contractual implications as well as our alternatives so as to not further restrict our ability to sell and market our new line of products to the retail marketplace. The sales for the year ended December 31, 2002 were primarily sales of the Company's remaining domestic VGE inventory to Gemini, as the Company's efforts were concentrated on sales of NVP 1104. Cost of Sales for 2002 was \$390,000 versus \$308,000 for 2001. The increase in cost of goods sold was primarily the result of a write-off of the Company's December 31, 2002 remaining physical inventory in the amount of \$230,000 consisting of the discontinued domestic and European VGE product and the related NVP 104 ASIC chips. Research and development costs for the year ended December 31, 2002 were 681,000; a reduction of \$484,000 from the prior year. This reduction included a decrease in engineering salaries and outside consulting fees of \$170,000; amortization of \$315,000 which represented amortization and impairment of the PicturePrep software and PicturePrepClub.Com website recognized during 2001; these reductions were offset by an increase in other expenses of \$1,000. General and administrative expenses for the year ended December 31, 2002 were \$2,071,000; a decrease of \$1,629,000 from the prior year. This decrease was the result of management's company wide cost cutting efforts resulting in major decreases in marketing and sales expenses of \$815,000, salaries of \$372,000, professional fees \$132,000, investor relations of \$111,000, financial consulting of \$94,000, bad debt expense of \$43,000, Employee benefits of \$38,000, depreciation of \$15,000 and other of \$9,000.

The net loss for the year ended December 31, 2002 of \$2,674,000 compared to a net loss for the year ended December 31, 2001 of \$4,273,000, a decrease in losses of \$1,599,000. The decrease in losses for the year ended 2002 were primarily attributable to decreases in advertising and sales expenses of \$815,000 relating to the reduced need for the Company market the VGE product in the retail marketplace and concentration on marketing to OEMs; a decrease in payroll costs of approximately \$372,000 relating to reduction of staff; and additional decreases in administrative expenses as detailed above totaling \$441,000; a decrease in Research and Development Costs of \$484,000. These decreases were offset by and a reduction in the Company's provision for income tax benefits of \$136,000; a reduction in gross profit of \$301,000 partially resulting from a write-off of obsolete inventory; and a reduction in net interest income of \$76,000.

Revenues for the year ended December 31, 2001 were \$505,000 as compared to \$14,000 for the prior year. This was a direct result of the introduction and sales of our VGE retail product and our ASIC chips. Cost of Sales for 2001 was \$308,000 versus \$4,000 for 2000 also as a direct result of the increased sales. Research and development costs for the year ended December 31, 2001 were \$1,165,000; a reduction of \$18,000 from the prior year. This reduction included a decrease in engineering salaries and outside consulting fees of \$257,000 and miscellaneous related costs of \$10,000 primarily due the completion of the initial development of our core technologies. These reduced development costs were partially offset by an increase in amortization and write off of

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

development costs related to the PicturePrep software and the PicturePrepCub.com website over 2000 of \$249,000. General and administrative expenses for the year ended December 31, 2001 were \$3,699,000, an increase of from the prior year. Such increases were primarily a result of accounting treatment for performance stock options granted during 2001 (\$226,000), increased legal fees as a result of additional SEC filings and contract work during 2001 (\$144,000) and other (\$15,000). Interest expense (net of interest income) for the year ended December 31, 2001 was \$76,000 as compared to \$264,000 for the prior year as a result of lower cash balances throughout 2001 compared to 2000. During the year ended 2001 the Company showed a benefit arising from income taxes of \$318,000 as compared to a provision for income taxes in 2000 of \$66,000. This change is a direct result of estimates posted for the sale of state tax credits based on a special New Jersey State program. As a result of the above the Company had a net loss for the year ended December 31, 2001 of \$4,273,000 compared to a net loss for the year ended December 31, 2000 of \$4,289,000, a decrease in losses of \$16,000.

11

Although we anticipate deriving increased revenues from the sale of our ASIC chips and retail products and the licensing of our proprietary digital software during 2003, no assurance can be given that these products will be successfully marketed or that losses will not continue to occur during such period. See "Liquidity and Capital Resources."

LIQUIDITY AND CAPITAL RESOURCES

From its inception until the IPO in 1996, the Company relied for all of its funding (\$2,900,000 in cash plus the cancellation of the notes in the principal amount of \$350,000) on private sales of its debt and equity securities ("Private Financings"). In July 1996, the Company completed its IPO and received net proceeds of \$9,538,428. The Company used \$2,073,652 of the net proceeds of the IPO to repay the principal and interest on the outstanding notes issued to investors in connection with the Private Financings. On February 6, 1998, the Company issued 253,485 shares of its Common Stock for an aggregate purchase price of \$1,000,000 to a Private Limited Partnership. Between May 19, 1998 and June 9, 1998, pursuant to a placement agency agreement with Janssen-Meyers Associates, L.P. ("Janssen-Myers"), the Company issued 2,742,904 shares of the Company's Common Stock and 2,057,207 Class A Redeemable Warrants for an aggregate purchase price of \$7,280,546.

12

During the period, beginning August 28, 2001 and ending November 12, 2001, the Company issued a total of 844,922 of its shares at a reduced exercise price of \$1 to the holders of certain of its placement agent warrants. These warrants were originally issued to the placement agent in connection with two private placements of the Company's equity in May 1998 and March 2000 at exercise prices of \$3.24 and \$3.95 respectively. As a special incentive offer to the holders of the placement agent warrants, the original exercise prices was reduced during the period August 15, 2001 to January 15, 2002.

On February 5, 2002, the Company entered into a private placement agreement with investors whereby the Company issued 600,000 shares of its Common Stock for an aggregate purchase price of \$330,000. On February 27, 2002 the Company entered into agreement with an investor whereby the Company issued 214,286 shares of Common Stock and warrants to purchase up to 50,000 shares of

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Common Stock for an aggregate purchase price of \$150,000. The warrants have an exercise price of \$1.00 per share with exercise period of five years expiring February 27, 2007.

On April 15, 2002, we entered into an Equity Line of Credit Agreement with Cornell Capital Partners, L.P., and amended and restated the Agreement as of May 17, 2002. Pursuant to the Equity Line of Credit Agreement, as amended and restated, we obtained an Equity Line of Credit under which, we may, at our discretion, periodically sell to Cornell Capital Partners, L.P. shares of common stock for a total purchase price of up to \$3.0 million. For each share of common stock purchased under the Equity Line of Credit, Cornell Capital Partners, L.P. will pay 97% of the lowest closing bid price on the Over the Counter Bulletin Board or other principal market on which our common stock is traded for the five days immediately following the advance notice date. Cornell Capital Partners, L.P. is a private limited partnership whose business operations are conducted through its general partner, Yorkville Advisors, LLC. Further, Cornell Capital Partners, L.P. will be paid a fee of 4% of each advance under the Equity Line of Credit. The effectiveness of the sale of the shares under the Equity Line of Credit is conditioned upon us registering the shares of common stock with the Securities and Exchange Commission. As of April 9, 2003, we have registered on Forms SB-2 with the SEC 79,000,000 shares of our common stock to be issued to Cornell Capital Partners, L.P. upon advances under the terms of the Equity Line of Credit Agreement. As of March 31, 2003, Cornell Capital Partners, L.P. under the terms of the Equity Line of Credit Agreement has advanced \$525,500 to NUWAVE and we have issued 37,071,858 shares of our common stock to Cornell Capital Partners, L.P. In addition, as of March 31, 2003 there was outstanding loan balances due to Cornell Capital Partners, L.P. of \$289,500 which we plan to repay over the next five months from the proceeds of puts under the Equity Line of Credit Agreement.

In June 2002, we entered into stock purchase agreements with 16 investors whereby we issued 1,101,165 shares of our Common Stock for an aggregate purchase price of \$330,350. On December 31, 2002, we had cash and cash equivalents of approximately \$174,000 and long-term liabilities of \$200,000. In addition, on December 10, 2002, we entered into a sixty day Revolving Line of Credit and Secured Promissory Note with Gerald Zarin, the Company's CEO. Under the terms of the agreement, Mr. Zarin agreed to lend the Company, as needed for working capital requirements, up to \$230,000. Mr. Zarin received a commitment fee of \$8,000 in connection with this agreement. At December 31, 2002 the Company had an outstanding balance of \$115,000 under the Revolving Line of Credit which was repaid to Mr. Zarin on January 2, 2003.

On December 20, 2002 the Company's Stockholders voted to increase the authorized Common Stock by 100,000,000 shares from 40,000,000 shares to 140,000,000 shares in conjunction with a reduction in Common Stock par value

13

from \$.01 per share of Common Stock to \$.001 per share of Common Stock. The Company's Stockholders further voted to authorize the Board of Directors to effect a reverse split of the Company's outstanding common stock at the discretion of the Board at one of the following: at an exchange ratio of one-for-ten, at an exchange ratio of one-for-twenty, at an exchange ratio of one-for-thirty, at an exchange ratio of one-for-forty or at an exchange ratio of one-for-fifty; and as to the timing, based upon its view as what is in the best interests of the Company and the stockholders. Management anticipates that a reverse split is likely to be effected during the current second quarter.

We will continue to require utilization of the Cornell Capital Equity

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

for our working capital needs. Assuming the availability of required monthly advances under the Equity Line of Credit, we should be able to satisfy contemplated cash requirements for at least through the next twelve months. In their report on the audit of NUWAVE's financial statements for the years ended December 31, 2002, and 2001 our independent auditors included an explanatory paragraph in their report because of the uncertainty that we could continue in business as a going concern. In the event we are unable to raise the anticipated operating capital needs through utilization of the Cornell Equity Line or some other form of financing or receive cash from sales of our products, there would be substantial doubt about our ability to continue as a going concern.

CERTAIN FACTORS THAT MAY AFFECT FUTURE RESULTS

The following factors, among others, could cause actual results to differ materially from those contained in forward-looking statements made in this Annual Report on Form 10-KSB and presented elsewhere by management from time to time.

1. WE HAVE PRIMARILY BEEN A DEVELOPMENT STAGE ENTERPRISE WITH ONLY A LIMITED OPERATING HISTORY.

Until June of 2001 we were a development stage enterprise. At that time we shifted to commercialization and thus have had only a limited operating history. Since our inception in July 1995, we have been engaged primarily in raising funds and directing, supervising, and coordinating the activities of our Advanced Engineering Group, made up of our own employees and third-party consultants who work with us on a project-by-project basis, in the continuing development of the NUWAVE Video Processor (NVP) Technology, retail products utilizing the NVP technology and our digital image enhancement software filters. During the second half of 2001 we began producing and selling the NVP Video Processor in an ASIC (Application Specific Integrated Chip) format for the OEM market and our first set top box product utilizing the NVP technology the VGE for the retail market (See Marketing and Sales). Although we experienced some early success with these products, our prospects must be considered in light of the risks associated with the establishment of a new and small capitalized business in the evolving electronic video industry. In our case this is particularly so, as further risks will be encountered in our shift from the development to the commercialization of new products based on innovative technology. There can be no assurance that we will be able to generate significant revenues or achieve profitable operations.

2. WE HAVE A HISTORY OF INCURRING LOSSES AND WE ANTICIPATE THAT WE WILL CONTINUE TO INCUR LOSSES.

To date, we have received only limited revenue from the sale of our products. There can be no assurance that our technology and products will be able to compete successfully in the marketplace and/or generate significant revenue. We have incurred significant costs in connection with the development of our technologies and proposed products and there is no assurance that it will achieve sufficient revenues to offset anticipated operating costs. As of December 31, 2002, we had an accumulated deficit of approximately \$27,114,000. Although we anticipate deriving revenues from the sale of products within the next twelve months, no assurance can be given that these products will be successfully marketed. Management anticipates that we may continue to incur

losses for at least the next twelve months. Included in such former and future losses are research and development expenses, marketing costs, and general and

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

administrative expenses. We anticipate that our losses will continue until we are able to generate sufficient revenues to support our operations.

3. OUR CONTINUED DEVELOPMENT EFFORTS AND FUTURE GROWTH DEPEND UPON OUR ABILITY TO RAISE ADDITIONAL CAPITAL WHICH MAY NOT BE AVAILABLE TO US WHEN NEEDED OR ON ACCEPTABLE TERMS.

Our capital requirements in connection with our development activities have been significant. We have been dependent upon the proceeds of sales of our securities to private investors to fund our initial development activities. Since our initial public offering in July 1996, we have obtained needed capital through private placements of our securities. We anticipate, based on our current proposed plans and assumptions relating to our operations, that we will require additional capital in order to implement our business plan (see Liquidity and Capital Resources and Plan of Operation). On April 15, 2002, the Company entered into a \$3 million Equity Line of Credit with a qualified investor (the "Purchaser"). Provided it is in compliance with the terms of the agreement including the effective registration of shares to be sold, the Company may, at its option, require the investor to purchase up to \$300,000 per month of the Company's Common Stock (the "put shares") up to a maximum of \$3 million over the next two years from the effective date. The purchase price of the put shares will be 97% of the then market price. As of March 31, 2003, we have utilized \$525,500 of the Equity Line leaving a balance of \$2,474,500. In their report on the audit of NUWAVE's financial statements for the year ended December 31, 2002, our independent auditors included an explanatory paragraph in each of their reports because of the uncertainty that the Company could continue in business as a going concern. In the event we are unable to raise the anticipated operating capital needs through utilization of the Cornell Equity Line or some other form of financing or receive cash from sales of our products, there would be substantial doubt about our ability to continue as a going concern. To the extent that any future financing involves the sale of our equity securities, our existing stockholders could be substantially diluted.

4. WE DEVELOP TECHNOLOGY AND PRODUCTS USING NEW CONCEPTS, SO THERE IS UNCERTAINTY ABOUT MARKET ACCEPTANCE OF OUR PRODUCTS, AND WE HAVE LIMITED MARKETING EXPERIENCE.

We develop technology and products using new concepts and designs in video imagery and processing. Our prospects for success will depend on our ability to successfully sell our products to key manufacturers and distributors who may be inhibited from doing business with us because of their commitment to their own technologies and products or because of our relatively small size and lack of sales and production history. As a result, demand and market acceptance for our technology and products are subject to a high level of uncertainty. We currently have limited financial, personnel and other resources to undertake the extensive marketing activities that will be necessary to market our technology and products once their development is completed. No assurance can be given that any of our potential customers will enter into any arrangements with us. Further, there is no assurance that our marketing efforts will be successful.

5. WE DEPEND ON THE MANUFACTURERS OF PRODUCTS WHO WISH TO INCLUDE OUR NVP VIDEO PROCESSOR TO MAKE DESIGN MODIFICATIONS NECESSARY TO INCORPORATE OUR TECHNOLOGY INTO THEIR PRODUCTS.

Commercialization of the NVP Video Processor and sale to manufacturers of the relevant video equipment will require such manufacturers to adopt new circuit configurations to accommodate the relevant chip in their products. Although the NVP Video Processor meets the various video broadcast standards, we anticipate that manufacturers wishing to use the NVP Video Processor will make such modifications because of the benefits derived from the improved performance of their products and the relative simplicity of such modifications. However, there is no assurance that such modifications will be made. Also, the cost of

such modifications may inhibit or prevent their adoption. Our ability to sell and/or license our products would be adversely affected if designers and manufacturers fail to make such modifications.

6. WE WILL RELY ON OTHERS TO MANUFACTURE OUR DEVICES, AND WE MAY NOT BE ABLE TO MEET CUSTOMER DEMAND IF OUR SUPPLIERS CANNOT MEET OUR QUANTITY AND QUALITY REQUIREMENTS.

We do not plan to directly manufacture any of our products. We contract with third parties to manufacture our NVP Video Processor and related retail products. We may also license to third parties the rights to manufacture our products, either through direct licensing, original equipment manufacturer arrangements or otherwise.

We are dependent on third parties to manufacture our NVP ASIC (the application specific integrated circuit-based NVP Video Processor) and related products as well as future products we may choose to commercialize. There can be no assurance that our current suppliers will dedicate sufficient production capacity to satisfy our requirements within scheduled delivery times, or at all. Failure or delay by our suppliers in fulfilling our anticipated needs would have an adverse effect on our ability to develop and market our products. In addition, we will be dependent on third-party vendors for many of the components necessary for the final assembly of our products. We may have difficulty in obtaining contractual agreements with suppliers of these materials due to, among other things, possible material shortages or possible lack of adequate purchasing power. While our management believes that these components are available from multiple sources, it is anticipated that we will obtain certain of them from a single source, or limited number of sources, of supply. In the event that certain of these suppliers are unable or unwilling to provide us with these components on commercially reasonable terms, or at all, delays in securing alternative sources of supply would result and could have a material adverse effect on our operations.

7. COMPETITION

Intense competition exists in the markets that we are in. Further, with respect to the market for video editing, video production and video processing products, significant price erosion over the life of a product exists. Our products will directly compete with those of numerous well-established companies, including the following companies, which design, manufacture and/or market video technology and other products: Sony Electronics, Inc., Panasonic Division of Matsushita Electric Industrial Co., Motorola, Inc., Mitsubishi International Corp., and Royal Philips Electronics, NV.

All of the above companies have substantially greater financial, technical, personnel and other resources than we do for production and innovation of products, and for marketing and sales. Further, each has established a reputation for success in the development, licensing, sale and service of its products and technology. In addition, certain of these competitors dominate their industries and have the necessary financial resources to enable them to withstand substantial price competition or downturns in the market for video products.

8. OUR INDUSTRY IS CHARACTERIZED BY RAPID TECHNOLOGICAL CHANGES AND AGGRESSIVE COMPETITION.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Rapid changes characterize the markets for our technology and products. Further, evolving industry standards often result in product obsolescence or short product life cycles. Certain companies may be developing technologies or products which may be functionally similar, or superior, to some or all of our proposed products. As a result, our ability to compete will depend on our ability to, among other things: complete development and introduce to the marketplace in a timely and cost-competitive manner our products and technology;

16

continually enhance and improve our products and technology; adapt our products to be compatible with specific products manufactured by others; and successfully develop and market new products and technology.

There is no assurance that we will be able to compete successfully or that our competitors will not develop similar or competitive technologies or products that render our products and technology obsolete or less marketable. Further, there is no assurance that we will be able to successfully enhance our proposed products or technology or adapt them satisfactorily.

9. TO THE EXTENT PRACTICABLE, WE HAVE FILED U.S. PATENTS AND/OR COPYRIGHT APPLICATIONS, BUT THERE IS NO ASSURANCE THAT ANY PATENT OR COPYRIGHT WILL AFFORD US COMMERCIALY SIGNIFICANT PROTECTION.

To the extent practicable, the Company has filed and intends to file U.S. patents and/or copyright applications for certain of its proposed products and technology. The Company has also filed and intends to file corresponding applications in key industrial countries worldwide.

In April 1996, the Company filed two patent applications on behalf of Rave for its Randall connector system. One patent was received in November 1997 and the second one in January 1998. Under the terms of the settlement agreement with Rave, the Company retains the exclusive license rights to these patents. In April 1998, the Company filed three patent applications for certain of its independently developed products: one for the NUWAVE Video Processor and two for the Softsets, these patents were granted in November 2000, February 2001 and May 2001, respectively. In August 1999, the Company filed a patent application for its digital software technology as used in PicturePrep product line, this patent was granted in October 2001. There is no assurance that any patent will afford us with commercially significant protection of our technology or that we will have adequate resources to enforce our patents.

Management believes that the products the Company intends to market and sell do not infringe the patents or other proprietary rights of third parties. Further, it is not aware of any patents held by competitors that will prevent, limit or otherwise interfere with the Company's ability to make and sell its products. However, it is possible that competitors may have applied for, or may in the future apply for and obtain, patents which have an adverse impact on the Company's ability to make and sell its products. There is no assurance that competitors will not infringe the Company's patents. Defense and prosecution of patent suits, even if successful, are both costly and time consuming. An adverse outcome in the defense of a patent suit could subject the Company to significant liabilities to third parties, require disputed rights to be licensed from third parties or require it to cease selling its products.

10. NO DIVIDENDS

We have not paid any cash dividends to date. Payment of dividends on our common stock is within the discretion of our board of directors and will

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

depend upon our earnings, capital requirements and financial condition, and other relevant factors. We do not intend to declare any dividends on our common stock in the foreseeable future. Instead, we plan to retain any earnings we receive for development of our business operations.

11. LIMITATION ON TAX LOSS CARRYFORWARDS

As of December 31, 2002, we had available unused net operating loss carryforwards aggregating approximately \$26,925,000 to offset future federal taxable income. The unused net operating loss carryforwards expire in various years from 2010 to 2021. Under Section 382 of the Internal Revenue Code of 1986, utilization of prior net operating loss carryforwards is limited after an ownership change. We may be subject to limitations on the use of our net operating loss carryforwards as provided under Section 382 by reason of prior

17

placements of our securities and future transactions. Accordingly, there can be no assurance that a significant amount of the existing net operating loss carryforwards will be available to use. In the event that we achieve profitability, as to which there can be no assurance, such limitation would have the effect of increasing our tax liability and reducing our net income and available cash resources in the future.

12. LIMITATION ON LIABILITY OF DIRECTORS AND OFFICERS

Our company's certificate of incorporation provides that we will indemnify any of our directors, officers, employees or agents against actions, suits or proceedings relating to our company and, subject to certain limitations, a director shall not be personally liable for monetary damages for breach of his fiduciary duty. In addition, we have entered into an indemnification agreement with each of our directors. Such indemnification agreement provides that a director is entitled to indemnification to the fullest extent permitted by law.

13. WE MUST ATTRACT AND RETAIN KEY PERSONNEL IN ORDER TO REMAIN COMPETITIVE WHICH MAY BE DIFFICULT GIVEN OUR SMALL SIZE AND LIMITED RESOURCES COMPARED TO MANY OF OUR COMPETITORS.

Our operations depend largely on the continued employment of Mr. Gerald Zarin, Chairman of the Board, President and Chief Executive Officer. If Mr. Zarin or other members of management or key personnel resign or otherwise leave our company, our business and financial condition could be materially adversely affected.

14. PROVISIONS IN THE EMPLOYMENT CONTRACT OF OUR PRESIDENT AND IN THE SEVERANCE AGREEMENTS OF OUR EXECUTIVE OFFICERS ARE TRIGGERED BY A CHANGE IN CONTROL, WHICH ALSO COULD DISCOURAGE UNSOLICITED TAKEOVER ATTEMPTS.

Provisions in the employment contract of our President and our Chief Financial Officer providing for various termination benefits are triggered by certain changes in control of our company. Such provisions could have the effect of discouraging, delaying or preventing unsolicited takeover attempts.

15. PROVISIONS IN OUR COMPANY'S CERTIFICATE OF INCORPORATION COULD DISCOURAGE UNSOLICITED TAKEOVER ATTEMPTS WHICH COULD DEPRESS THE MARKET PRICE OF OUR COMMON STOCK.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Provisions of our company's certificate of incorporation and by-laws and of Delaware law could discourage potential acquisition proposals and could delay or prevent a change in control. Such provisions could diminish the opportunities for a stockholder to participate in tender offers, including tender offers at a price above the then-current market value of our common stock. Such provisions may also inhibit fluctuations in the market price of our common stock that could result from takeover attempts. In addition, our board of directors, without further stockholder approval, may issue preferred stock that could have the effect of delaying or preventing a change in control. The issuance of preferred stock could also adversely affect the voting power of the holders of common stock, including the loss of voting control to others.

16. MARKET PRICE FLUCTUATIONS

The trading price of our common stock may be subject to wide fluctuations in response to quarter-to-quarter variations in operating results, general conditions in the computer, video and telecommunications industries, changes in earnings estimates, recommendations by analysts and other events.

18

Our common stock has been relatively thinly traded and we cannot predict the extent to which a trading market will develop.

Our common stock has been traded on the Over the Counter Bulletin Board ("OTC:BB") since August 13, 2002. Prior to that date, our common stock was traded on the Nasdaq SmallCap Market, from which it was delisted for not meeting the minimum requirements for continued listing. Our common stock is thinly traded compared to larger more widely known companies in our industry. Thinly traded common stock can be more volatile than common stock trading in an active public market. We cannot predict the extent to which an active public market for the common stock will develop or be sustained after this offering.

17. OUR COMMON STOCK HAS BECOME SUBJECT TO "PENNY STOCK" RESTRICTIONS UNDER FEDERAL SECURITIES LAWS, WHICH COULD REDUCE THE LIQUIDITY OF OUR COMMON STOCK, SO STOCKHOLDERS FACE SIGNIFICANT RESTRICTIONS ON THE RESALE OF OUR STOCK.

The Securities and Exchange Commission has adopted regulations, which generally define penny stocks to be an equity security that has a market price less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exemptions. On December 20, 2002, the closing price for our common stock, as quoted on the Over the Counter Bulletin Board, was \$0.02 per share and therefore, our common stock is designated a "Penny Stock." As a penny stock, our common stock may become subject to Rule 15g-9 under the Exchange Act or the Penny Stock Rules. These rules include, but are not limited to, Rules 3a51-1, 15g-1, 15g-2, 15g-3, 15g-4, 15g-5, 15g-6 and 15g-7 under the Securities Exchange Act of 1934, as amended. These rules impose additional sales practice requirements on broker-dealers that sell such securities to persons other than established customers and "accredited investors" (generally, individuals with a net worth in excess of \$1,000,000 or annual incomes exceeding \$200,000, or \$300,000 together with their spouses). For transactions covered by Rule 15g-9, a broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to sale. As a result, this rule may affect the ability of broker-dealers to sell our securities and may affect the ability of purchasers to sell any of our securities in the secondary market.

The rules may further affect the ability of owners of our shares to

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

sell their securities in any market that may develop for them. There may be a limited market for penny stocks, due to the regulatory burdens on broker-dealers. The market among dealers may not be active. Investors in penny stock often are unable to sell stock back to the dealer that sold them the stock. The mark-ups or commissions charged by the broker-dealers may be greater than any profit a seller may make. Because of large dealer spreads, investors may be unable to sell the stock immediately back to the dealer at the same price the dealer sold the stock to the investor. In some cases, the stock may fall quickly in value. Investors may be unable to reap any profit from any sale of the stock, if they can sell it at all.

For any transaction involving a penny stock, unless exempt, the rules require delivery, prior to any transaction in a penny stock, of a disclosure schedule prepared by the Securities and Exchange Commission relating to the penny stock market. Disclosure is also required to be made about sales commissions payable to both the broker-dealer and the registered representative and current quotations for the securities. Finally, monthly statements are required to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stock.

The penny stock restrictions will no longer apply to our common stock if we become listed on a national exchange; we would again qualify for listing on the Nasdaq SmallCap Market if we attain \$2,000,000 minimum net tangible assets and a \$1.00 per share market price. In any event, even if our common

19

stock were exempt from the penny stock restrictions, we would remain subject to Section 15(b)(6) of the Exchange Act, which gives the Securities and Exchange Commission the authority to restrict any person from participating in a distribution of penny stock, if the Securities and Exchange Commission finds that such a restriction would be in the public interest.

Stockholders should be aware that, according to the Securities and Exchange Commission Release No. 34- 29093, the market for penny stocks has suffered in recent years from patterns of fraud and abuse. These patterns include:

- o control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer;
- o manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases;
- o "boiler room" practices involving high pressure sales tactics and unrealistic price projections by inexperienced sales persons;
- o excessive and undisclosed bid-ask differentials and markups by selling broker-dealers; and
- o the wholesale dumping of the same securities by promoters; and
- o broker-dealers after prices have been manipulated to a desired level, along with the inevitable collapse of those prices with consequent investor losses.

18. FUTURE SALES BY OUR STOCKHOLDERS MAY ADVERSELY AFFECT OUR STOCK AND OUR ABILITY TO RAISE FUNDS IN NEW STOCK OFFERINGS.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Future Sales of our common stock in the public market could lower the market price of our common stock. Sales may also make it more difficult for us to sell equity securities or equity-related securities in the future at a time and price that our management deems acceptable or at all. Of the 50,676,055 shares of common stock outstanding as of March 31, 2003 46,719,124 shares are, or will be, freely tradable without restriction. The remaining 3,956,931 shares of common stock held by our "affiliates" or persons who recently purchased their shares from the company without Securities and Exchange Commission registration are "restricted securities" and may be resold in the public market only if registered or pursuant to an exemption from registration. Some of these shares may be resold under Rule 144.

In addition, there are outstanding warrants to purchase up to 4,211,176 shares of common stock.

19. IN THE FUTURE, WE MAY ISSUE MORE SHARES OF OUR COMMON STOCK. THIS WOULD REDUCE EXISTING STOCKHOLDERS' PERCENTAGE OF OWNERSHIP AND MAY REDUCE SHARE VALUE.

Under our amended and restated certificate of incorporation, we are authorized to issue a total of 140 million shares of common stock and 2 million shares of preferred stock. If we issue all or part of our remaining authorized common stock or preferred stock this will result in dilution in the percentage of common stock held by existing stockholders. The issuance of common stock for future services or acquisitions or other corporate actions may have the effect of diluting the value of the shares held by our investors, and might have an adverse effect on the value of our shares.

20

20. OUTSTANDING SHARES THAT ARE CURRENTLY RESTRICTED FROM RESALE MAY BE SOLD IN THE FUTURE, CAUSING THE MARKET PRICE OF OUR COMMON STOCK TO DECLINE SIGNIFICANTLY, EVEN IF OUR BUSINESS IS DOING WELL.

As of December 31, 2002, we had 25,386,714 shares of our common stock issued and outstanding, of which 21,419,709 are freely transferable and 3,967,005 shares are held by affiliates of the company who have held such shares for more than one-year and may sell the shares pursuant to Rule 144. Rule 144 provides, in essence, that a person holding "restricted securities" for a period of one year may sell an amount every three months equal to the greater of (a) one percent of the company's issued and outstanding shares, or (b) the average weekly volume of sales during the four calendar weeks preceding the sale. As restrictions on resale end, the market price of our common stock could drop significantly if the holders of these restricted shares sell them or are perceived by the market as intending to sell them.

ITEM 7. FINANCIAL STATEMENTS

The information required by this item is incorporated by reference to pages F-1 through F-19 of this Annual Report on Form 10-KSB.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

PART III

ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Set forth below are the names as of April 10, 2003 and the business experience of the directors and executive officers of the Company:

NAME	AGE	POSITION
Gerald Zarin	62	Chairman of the Board of Directors, President and Executive Officer
Edward Bohn	57	Director
Joseph A. Sarubbi	74	Director
Eric Lipetz	66	Director
Jeremiah F. O'Brien	56	Vice President, Secretary and Chief Financial Officer
Stanley Chayka	50	Vice President - Engineering
Leonard Langsner	48	Vice President - Sales

GERALD ZARIN has been a Director and President and Chief Executive Officer of the Company since July 1995. He has been Chairman of the Board of Directors since January 28, 1996. From June 1993 to July 1995, he was President and Chief Executive Officer at AMD Consulting, Inc., a business-consulting firm. From June 1991 until January 1993, Mr. Zarin was the Chairman, President and Chief Executive Officer of Emerson Radio Corporation ("Emerson Radio"), which designs and sells consumer electronics products. From November 1990 to June 1991, he was President and Chief Executive Officer of JEM, Inc., an importer of fine furnishings. From August 1987 to October 1990, he was Senior Vice President and Chief Financial Officer of Horn & Hardart, Inc., the parent company for

21

Hanover House and various other hotels and fast food chains. From 1976 to 1986, he was President and Chief Executive Officer of Morse Electro, Inc., which designed and sold consumer electronics products.

EDWARD BOHN has been a Director of and a consultant to NUWAVE Technology, Inc., since July 1995. Since March 2001, he has been Chief Financial Officer of Nova Corp., which constructs and manages the construction of data centers serving the telecommunications (Internet) industry both domestically and internationally, after having been a Director and Consultant since December 1999. Since February 1995, he has been a Director and Consultant of Jennifer Convertibles, a furniture distributor. Since September 1994, he has operated as an independent consultant in financial and operational matters. From January 1983 to March 1994, Mr. Bohn was employed in various capacities by Emerson Radio, including from March 1993 to March 1994, as Senior Vice President-Special Projects; and from March 1991 to March 1993, as Chief Financial Officer and Treasurer/Vice President of Finance. Prior to March 1991, he was Vice President of Finance and Treasurer. Prior to Emerson he held positions as an Officer and Assistant Controller of Jersey Central Power and Light, was Coordinator of Internal Auditing for the GPU System, controller of a multi-million food manufacturing company, and held various positions in a public accounting firm.

JOSEPH A. SARUBBI has been a Director of the Company since March 1996. From October 1993 to June 6, 1996, he was a director of The Panda Project, Inc., a manufacturer of computers and semiconductor packages. Since April 1988, Mr.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Sarubbi has been a self-employed management and technical consultant to various technology companies. From February 1986 to April 1988, he was Senior Vice President of Manufacturing Operations for Tandon Corporation, a computer manufacturer. From December 1952 to January 1986, Mr. Sarubbi was employed by IBM in various senior engineering positions.

ERIC LIPETZ was elected a Director of the Company in December 2002. He is an independent financial consultant who specializes in securing venture capital for start-up companies and small-cap public companies seeking additional financing and assists companies with strategic planning and M&A activities. He started his career the Purcell Graham in 1960 and was affiliated with other brokerage firms until 1978. From 1978 to 1987, Mr. Lipetz worked on agricultural projects in Israel specializing in "Hot House" farming. From 1987 to 1995, Mr. Lipetz worked on several ventures to raise funding for small companies in the USA. From 1995 to the present, Mr. Lipetz has been active in helping Israeli companies learn the American market and direct them to sources of capital as well as merger activity. Also during this period, Mr. Lipetz was consulting for International Franchise Systems (IFS), which has the exclusive license for Dominos Pizza Europe. Currently involved with Katan Associates International and various Israeli companies.

JEREMIAH F. O'BRIEN has been Vice President and Secretary of NUWAVE Technologies since July 1995. Mr. O'Brien has been the Chief Financial Officer of NUWAVE since January 1996. Prior to joining NUWAVE, Mr. O'Brien held a six-year post as CFO and Executive Vice President for Cardiac Resuscitator Corporation, a medical electronic manufacturer. From September 1989 to June 1991, he served as Senior Vice President of Finance for Emerson Computer Corporation and Emerson Technologies, Inc., both of which manufacture and sell electronic components and products. Mr. O'Brien has also held a Corporate Controller's position for Andin International, a jewelry manufacturing company. Mr. O'Brien has also acted as an independent financial consultant to various private corporations.

STANLEY J. CHAYKA has been Vice President of Engineering at NUWAVE Technology since June 2001. From April 1998 to May of 2001, he was the Director of Engineering for A.F.A. Products Group/Liberty Media, a R&D division of Liberty Livewire, where he was responsible for new product concept and development in the field of Advanced Digital Television Systems. From April 1976

22

to March 1998, he served as Vice President and President of Corporate Communications Consultants Inc. DBA ColorVision, where he was responsible for the conception and development of electronic Color Correction Systems used in television post-production. Over 19 U.S. and foreign patents were issued to developments made by Mr. Chayka as well as an Emmy for Outstanding Engineering Achievement from the Academy of Arts and Sciences. From 1970 to 1977, Mr. Chayka served at various levels of engineering and management for Teletronics International (NY) a leading post-production firm. He is a member of the S.M.P.T.E. and the I.E.E.E. engineering societies.

LEONARD LANGSNER has been Vice President of Sales for NUWAVE since September, 2002. He joined the company in October 2001 as National Sales Manager prior to his recent promotion. Lenny has over 24 years of experience in consumer electronics. His professional career started at Willoughby Peerless, where he was the leading buyer of audio equipment for each of the five years with the company. For the next seven years, he was part Select Representatives group responsible for establishing a dealer network in New York and New Jersey for product lines including JVC, Teac, Phase Linear, JBL, Sound Design, and Midland.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

From 1984 to 1993, Mr. Langsner joined Tops Appliance City as Corporate Merchandise Manger with responsibilities of sales, product training, commissioning, Plan-O-Grams, sales budgets and advertising. In 1994 and for the next five years, Mr. Langsner was with RCA's accessories group as the National Sales Manager, responsible for product and dealer brand marketing. From 1999 to 2001, Mr. Langsner headed Zenith Electronics as Sales Manager, Product Development and Marketing Manager.

ITEM 10. EXECUTIVE COMPENSATION

COMPENSATION OF EXECUTIVE OFFICERS

The following table sets forth the annual compensation paid by the Company for services performed on the Company's behalf for the fiscal years ended December 31, 2000, 2001 and 2002, with respect to those persons who were, as of December 31, 2002, the Company's Chief Executive Officer and the Company's executive officers (the "Named Executive Officers").

SUMMARY COMPENSATION TABLE

NAME AND PRINCIPAL POSITION -----	YEAR ----	ANNUAL COMPENSATION -----		OTHER ANNUAL COMPENSATION -----
		SALARY -----	BONUS -----	
Gerald Zarin, President and Chief Executive Officer	2002	\$ 155,000	\$ 30,000	\$0
	2001	\$ 144,000	\$0	\$0
	2000	\$ 140,000	\$ 50,000	\$0
Jeremiah F. O'Brien, Chief Financial Officer, Vice President and Secretary	2002	\$ 122,000	\$ 25,000	\$0
	2001	\$ 108,000	\$0	\$0
	2000	\$ 114,000	\$ 25,000	\$0
Stanley Chayka, Vice President, Engineering	2002	\$ 100,000	\$ 10,000	\$0
	2001	\$ 60,000	\$0	\$0
Leonard Langsner, Vice President, Engineering	2002	\$ 102,000	\$0	\$0
	2001	\$ 20,000	\$0	\$0

23

- (1) On January 12, 2003, the Executive Officers and Directors of the Company voluntarily and irrevocably surrendered all options granted to them though that date.

OPTION GRANTS IN LAST FISCAL YEAR

The number of shares available for grant under the Company's 1996 Stock Incentive Plan for Employees and Consultants (the "Employee Stock Option Plan") is 1,205,000. Options for an aggregate of 942,000 shares have been granted under the Employee Stock Option Plan through December 31, 2002. The Company did not issue options to its Named Executive Officers or employees during fiscal year 2002. On January 12, 2003, the Executive Officers of the Company and all

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

employees voluntarily and irrevocably surrendered all options granted to them though that date.

AGGREGATED OPTION EXERCISES

No options were exercised in fiscal year 2002 by any of the Named Executive Officers. The following table sets forth, as of December 31, 2002, the number of stock options and the value of unexercised stock options held by the Named Executive Officers.

AGGREGATED OPTION EXERCISES IN YEAR ENDED DECEMBER 31, 2002 AND YEAR-END OPTION VALUES

NAME	NUMBER OF SECURITIES UNDERLYING UNEXERCISED OPTIONS AT DECEMBER 31, 2002 (1)		VALUE OF UN IN-THE-MONEY AT DECEMBER
	EXERCISABLE	UNEXERCISABLE	EXERCISABLE
Gerald Zarin	785,000	0	\$0
Jeremiah F. O'Brien	175,000	0	\$0
Stanley Chayka	10,000	10,000	\$0
Leonard Langsner	10,000	5,000	\$0
Total	980,000	15,000	

(1) On January 12, 2003, the Executive Officers and Directors of the Company and all employees voluntarily and irrevocably surrendered all options granted to them though that date.

(2) The dollar value of the unexercised options has been calculated by determining the difference between the fair market value of the securities underlying the options and the exercise price of the option at fiscal year-end.

DIRECTORS' COMPENSATION

Directors who are not employees of the Company are entitled to a fee of \$2,500 per year and \$500 per meeting attended (other than telephonic meetings) for serving on the Board of Directors. Each director is also reimbursed for expenses incurred in connection with attendance at meetings of the Board of Directors. For the fiscal year ended December 31, 2002 the Directors have waived the annual fee and meeting fees, therefore, the Directors received no compensation for the year.

EMPLOYMENT AGREEMENTS

Mr. Zarin entered into an employment agreement with the Company, dated as of April 1, 2000, pursuant to which he agreed to serve as the Company's President and Chief Executive Officer through December 31, 2007 after which time the Employment Agreement shall automatically continue for additional one year periods (the "Renewal Terms") unless either Zarin or the Corporation notifies

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

the other at least six months prior to the end of the initial or any Renewal Term. The agreement provided for an initial salary of \$120,000 per year which was increased to \$150,000 on May 11, 2000. Mr. Zarin is also entitled to an annual bonus based on the performance of the Corporation equal to (i) 50% of his base compensation if the Company's net profits before taxes are equal to projections to be approved by the Company's Board of Directors, (ii) 75% of his base compensation if the Company's net profits before taxes are equal to 105% of such projections, and (iii) 100% of his base compensation if the Company's net profits before taxes are equal to 115% of such projections. Mr. Zarin can terminate the agreement upon 180 days notice. The Company can terminate the agreement for good cause at any time. If the Company elects not to renew the Agreement and has given proper notification, Mr. Zarin will receive on the date of termination an amount equal to 150% of his base compensation, his entitled performance bonus and an amount equal to the average of any discretionary bonus paid for the preceding two calendar years (the "Termination Bonuses"). If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement prior to December 31, 2005, Mr. Zarin will receive a single payment equal to the remaining payments he would have been entitled to receive during the unexpired portion of the agreement, an additional two years base compensation and any termination bonuses. If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement after December 31, 2005, Mr. Zarin will receive a single payment equal to the remaining payments he would have been entitled to receive during the unexpired portion of the agreement, an additional three years base compensation and any termination bonuses.

Mr. O'Brien entered into an employment agreement with the Company, dated as of January 12, 2003, pursuant to which he agreed to serve as the Company's Vice- President and Chief Financial Officer through December 20, 2004 after which time the Employment Agreement shall automatically continue for additional one year periods (the "Renewal Terms") unless either O'Brien or the Corporation notifies the other at least six months prior to the end of the initial or any Renewal Term. The agreement provided for an initial salary of \$120,000 per year. Mr. O'Brien can terminate the agreement upon 60 days notice. The Company can terminate the agreement for good cause at any time. If the Company elects not to renew the Agreement and has given proper notification, Mr. O'Brien will receive on the date of termination an amount equal to 50% of his base compensation, his entitled performance bonus and an amount equal to the average of any discretionary bonus paid for the preceding two calendar years (the "Termination Bonuses"). If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement prior to December 20, 2004, Mr. O'Brien will receive a single payment equal to two years base compensation and any termination bonuses.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT PRINCIPAL SHAREHOLDERS AND SECURITY OWNERSHIP OF MANAGEMENT

The table below is based on information obtained from the persons named therein with respect to the shares of Common Stock beneficially owned, as of the March 31, 2003 (except as noted below), by (i) each person known by the Company to be the owner of more than 5% of the outstanding shares of Common Stock, (ii) each director of the Company, (iii) each executive officer of the Company, and (iv) all executive officers and directors of the Company as a group

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

NAME AND ADDRESS OF BENEFICIAL OWNER (1) -----	BENEFICIAL OWNERSHIP (2) -----	OWNED -----
Gerald Zarin	453,000	.88%
Edward Bohn	5,000	.01
Joseph A. Sarubbi	35,000	.07
Eric Lipetz	0	.00
Jeremiah F. O'Brien	5,000	.01
Stanley Chayka	0	.00
Leonard Langsner	0	.00
Cornell Capital Partners, LP 101 Hudson Street - Suite 3606 Jersey City, New Jersey 07302 Attn: Portfolio Manager	893,783	1.76
All executive officers and directors as a group (7 persons)	498,000	.96

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Since 1996, Edward Bohn, a director of the Company, has been acting as a consultant to the Company from time to time on matters specified by the Company's President. In March 1997, Mr. Bohn entered into a consulting agreement with the Company pursuant to which he agreed to act as the Company's consultant at a rate of \$1,000 per day with a maximum of \$2,750 per week regardless of the actual time spent on the Company's behalf. For the years ended December 31, 2001 and 2002, Mr. Bohn received \$0 on account of such consulting services.

Since 1996, Joseph A. Sarubbi, a director of the Company, has been acting as a consultant to the Company from time to time on matters specified by the Company's President. In that connection he has received compensation on a per diem basis of \$1,000 per day. For the years ended December 31, 2001 and 2002, Mr. Sarubbi received \$0 on account of such consulting services.

ITEM 14. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have reviewed and evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 240.13a-14(c) and 15d-14(c) as of a date within 90 days before the filing date of this quarterly report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective and timely, providing all material information relating to the Company required to be disclosed in reports filed or submitted under the Exchange Act.

Changes in Internal Controls

There have not been any significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation. We are not aware of any significant deficiencies or material weaknesses, therefore no corrective actions were taken.

INDEPENDENT AUDITORS REPORT

Board of Directors and Stockholders
NUWAVE Technologies, Inc.
Fairfield, New Jersey

We have audited the accompanying balance sheet of NUWAVE Technologies, Inc. as of December 31, 2002, and the related statements of operations, stockholders' equity (capital deficit), and cash flows for each of the years in the two-year period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements enumerated above present fairly, in all material respects, the financial position of NUWAVE Technologies, Inc. as of December 31, 2002, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has experienced recurring net losses, its operating activities have resulted in cash out flows, and at December 31, 2002 it has both a negative working capital position and a capital deficit. These matters raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-7

1. ORGANIZATION AND BUSINESS

NUWAVE Technologies, Inc. (the Company or "NUWAVE") was incorporated in Delaware on July 17, 1995. The Company's focus is on technology related to enhancing image and video output. The Company has developed a proprietary video-enhancement technology known as the NUWAVE Video Processor (NVP) technology. In addition the Company has developed patented high speed filtering technology. NUWAVE has three product lines 1) the NUWAVE Video Processor (NVP) Technology, 2) Retail Products and Security/Surveillance products and 3) Digital Filtering Technology.

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplates continuation of the Company as a going concern and realization of assets and settlement of liabilities and commitments in the normal course of business. The Company has incurred substantial losses since its inception and anticipates continued net losses. The Company will continue to require utilization of the Equity line of Credit (see Note 7) for its working capital needs. Assuming the availability of required advances under the Equity Line, the Company may be able to satisfy its contemplated cash requirements through December 31, 2003. In the event the Company is unable to raise an amount sufficient to meet its anticipated working capital needs through utilization of the Equity Line or some other form of financing or receive sufficient cash through the sale of its products, the Company may be required to curtail operations or seek financing under unfavorable terms. There is no assurance the Company will achieve significant sales of any of its products or technology. In addition, the Company operates in an environment of rapid change in technology and is dependent upon the services of its employees and its consultants. If the Company is unable to successfully market its NVP and digital filtering technology and related products it is unlikely that the Company could continue its business. Substantial doubt exists about the ability of the Company to continue as a going concern. These financial statements include no adjustments that might be necessary as a result of this uncertainty.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amount of assets

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. The most significant estimates relate to the valuation allowance in connection with deferred tax assets. Actual results could differ from those estimates.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include all cash balances, money market instruments, and other highly liquid investments with insignificant interest rate risk and original maturities of three months or less. At December 31, 2002,

F-8

\$174,000 of money market accounts and commercial checking accounts, the fair value of which approximate cost, are included in cash and cash equivalents.

INVENTORY

Inventory is stated at the lower of cost (first-in, first-out method) or market.

PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost less accumulated depreciation. The cost of maintenance and repairs is charged against results of operations as incurred.

Depreciation is charged against results of operations over the estimated useful lives of the related assets.

Sales and retirements of depreciable property are recorded by removing the related cost and accumulated depreciation from the accounts. Gains or losses on sales and retirements of property and equipment are reflected in the results of operations.

REVENUE RECOGNITION

Revenue is recognized when products are shipped to customers.

RESEARCH AND DEVELOPMENT EXPENSES

Research and development costs are expensed as incurred.

ADVERTISING EXPENSES

The Company expenses advertising costs as incurred which consist primarily of promotional items, print and digital media. Advertising and promotional expenses charged to operations for the years ended December 31, 2002 and December 31, 2001 amounted to \$5,000 and \$265,000 respectively.

CONCENTRATIONS

The Company's financial instruments that are exposed to concentrations of credit risk consist of cash and cash equivalents. The Company places its cash and cash equivalents in high quality institutions with three types of accounts, 1) an operating account where the cash balance is in excess of the FDIC insurance limit, 2) a money market fund which invests only in U.S. Government securities and 3) certificates of deposit.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

For the year ended December 31, 2002 one customer accounted for sales of approximately \$268,000 (94%).

PER SHARE DATA

The basic per share data has been computed on the basis of the loss for the period divided by the historic weighted average number of shares of common stock outstanding. All potentially dilutive securities have been excluded from the computations since they would be antidilutive. Potentially dilutive stock

F-9

options and warrants aggregated 7,023,337 and 10,648,320 as of December 31, 2002 and 2001, respectively.

The following table summarizes the pro forma operating results of the Company had compensation costs for the stock options granted been determined in accordance with the fair-value-based method of accounting for stock based compensation as prescribed by SFAS No. 123. Since certain option grants awarded during 2002 and 2001 vest over several years and additional awards are expected to be issued in the future, the pro forma results noted below are not likely to be representative of the effects on future years of the application of the fair-value-based method.

	YEAR ENDED	
	DECEMBER 31, 2002	DECEMBER 31, 2001
Net loss.....	\$ (2,674,000)	\$ (4,273,000)
Proforma stock option expense.....	(28,000)	(132,000)
Pro forma net loss.....	\$ (2,702,000)	\$ (4,405,000)
	=====	=====
Basic and diluted loss per share.....	\$ (.19)	\$ (.40)
Proforma stock option expense.....		(.01)
	-----	-----
Pro forma basic and diluted loss per share.....	\$ (.19)	\$ (.41)
	=====	=====

For the purpose of the above pro forma information, the fair value of these options was estimated at the date of grant using the Black-Scholes option pricing model. The weighted-average fair value of the options granted during 2001 was \$.78. The following weighted-average assumptions were used in computing the fair value of option grants for 2001: weighted-average risk-free interest rates ranged from 5.09% to 5.39%; zero dividend yield; volatility of the Company's Common Stock of 110%; and an expected life of the options of ten years.

INCOME TAXES

The Company recognizes deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined on the basis of the differences between the tax basis of assets and liabilities and their respective financial reporting amounts

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

("temporary differences") at enacted tax rates in effect for the years in which the differences are expected to reverse.

RECENT ACCOUNTING PRONOUNCEMENTS

In August 2001, the FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." This statement supercedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of." The statement retains the previously existing accounting requirements related to the recognition and measurement of the impairment of long-lived assets to be held and used while expanding the measurement requirements of long-lived assets to be disposed of by sale to include discontinued operations. It also expands the previously existing reporting requirements for discontinued operations to include a component of an entity that either has been disposed of or is classified as held for sale. The Company implemented SFAS No. 144 on January 1, 2002. Management does not expect this statement to have a material impact on the Company's financial position or results of operations.

In June 2002, the FASB issued Statement of Financial Accounting Standards No. 146, Accounting for Costs Associated with Exit or Disposal Activities ("SFAS 146"), which addresses financial accounting and reporting for costs associated with exit or disposal activities and supersedes Emerging Issues Task Force

F-10

("EITF") Issue 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). SFAS 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF Issue 94-3, a liability for an exit cost as defined in EITF Issue 94-3 was recognized at the date of an entity's commitment to an exit plan. SFAS 146 also establishes that the liability should initially be measured and recorded at fair value. SFAS 146 is effective for exit and disposal activities initiated after December 31, 2002. Management is currently evaluating the provisions of SFAS 146 but expects that they will not have a material impact on the Company's results of operations and financial position upon adoption.

In November 2002, the FASB issued FASB Interpretation No. 45 ("FIN 45"), Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees and Indebtedness of Others. FIN 45 elaborates on the disclosures to be made by the guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also requires that a guarantor recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The initial recognition and measurement provisions of this interpretation are applicable on a prospective basis to guarantees issued or modified after December 31, 2002; while the provisions of the disclosure requirements are effective for financial statements of interim or annual reports ending after December 15, 2002. Management does not expect this statement to have a material impact on the Company's financial position or results of operations.

In December 2002, the FASB issued Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure ("SFAS 148"). SFAS 148 amends Statement No. 123, Accounting for Stock-Based Compensation ("SFAS 123"), to provide alternative methods for voluntary transition to SFAS 123's fair value method of accounting for stock-based employee compensation ("the fair value method"). SFAS 148 also

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

requires disclosure of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income (loss) and earnings (loss) per share in annual and interim financials statements. The provisions of SFAS 148 are effective in fiscal years beginning after December 15, 2002. Management has not yet determined whether it will adopt the fair value or disclosure only provisions. Accordingly, management is unable to determine the statement's impact on the Company's financial position or results of operations.

In January 2003, the FASB issued FASB Interpretation No. 46 ("FIN 46"), Consolidation of Variable Interest Entities. In general, a variable interest entity is a corporation, partnership, trust, or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. FIN 46 requires certain variable interest entities to be consolidated by the primary beneficiary of the entity if the investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The consolidation requirements of FIN 46 apply immediately to variable interest entities created after January 31, 2003. The consolidation requirements apply to older entities in the first fiscal year or interim period beginning after June 15, 2003. Certain of the disclosure requirements apply in all financial statements issued after January 31, 2003, regardless of when the variable interest entity was established. Management does not expect this statement to have a material impact on the Company's financial position or results of operations.

F-11

3. PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses and other current assets consist of the following:

	DECEMBER 31, 2002

Prepaid Insurance.....	\$123,000
Other.....	36,000

Total.....	\$159,000

4. PROPERTY AND EQUIPMENT

Property and equipment consist of the following:

	USEFUL LIVES IN YEARS	DECEMBER 31, 2002
	-----	-----
Furniture and Fixtures.....	10	\$ 6,000
Computers.....	5	221,000

	\$ 338,000
Less, accumulated depreciation.....	291,000

	\$ 47,000
	=====

5. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liabilities consist of the following:

	DECEMBER 31,
	2002

Accounts payable.....	\$ 341,000
Legal and accounting fees.....	168,000
Accrued payroll.....	28,000

	\$ 537,000
	=====

Substantially all accounts payable are past due.

6. DEBT

NOTE PAYABLE OFFICER/STOCKHOLDER

On December 10, 2002, the Company entered into a sixty day Revolving Line of Credit and Secured Promissory Note with Gerald Zarin, the Company's CEO and stockholder. Under the terms of the agreement, Mr. Zarin agreed to lend the Company, as needed for working capital requirements, up to \$230,000. At December 31, 2002 there was an outstanding balance of \$115,000, which was repaid on January 2, 2003. Advances under the line of credit accrue interest at 18% per annum. Included in the statement of operations is interest expense and a commitment fee of \$1,000 and \$8,000, respectively.

F-12

NOTE PAYABLE

In connection with the Equity Line of Credit (see Note 7), the Company received loans aggregating \$525,000. During 2002, in accordance with the Equity Line of Credit, through the issuance of its common stock the Company repaid \$325,000. The three notes are non-interest bearing for the first 120, 140 or 163 days after which the notes will bear interest at 24%.

7. CAPITAL TRANSACTIONS

COMMON STOCK AND WARRANTS

On December 20, 2002, the stockholders approved increasing the number of shares authorized from 40,000,000 to 140,000,000 and reducing the par value per share from \$0.01 to \$0.001. The change in par value has been reflected in the financial statements.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

On August 16, 2001, the Company offered to the holders of its placement agent warrants the opportunity to exercise such warrants at a reduced exercise price of \$1 per share of common stock. During the period, beginning August 28, 2001 and ending November 12, 2001, the Company received a total of \$844,922 and issued a total of 844,922 of its common shares to the holders of its placement agent warrants, who chose to take advantage of this offer. On January 15, 2002 this reduced price offer expired and the original exercise price per share was reinstated.

On February 5, 2002, the Company entered into a private placement agreement with investors whereby the Company issued 600,000 shares of the Company's Common Stock for an aggregate purchase price of \$330,000. In connection with this agreement, the Company issued to the Placement Agent a Placement Agent Warrant, exercisable to purchase up to 30,000 shares of Common Stock, representing five percent of the total of the stock issued in the Offering. The warrants shall be exercisable for a period of five years, expiring on February 5, 2007, at an exercise price of \$.55 per share. The Placement Agent also received a cash placement fee of eight percent of the purchase price and a non-accountable allowance equal to two percent of the purchase price, totaling \$33,000.

On February 27, 2002, the Company entered into agreement with an investor whereby the Company issued 214,286 shares of Common Stock for an aggregate purchase price of \$150,000 and warrants to purchase up to 50,000 shares of Common Stock at an exercise price of \$1.00 per share with an exercise period of five years expiring February 27, 2007. Under the terms of the agreement a consultant was paid a finder's fee of \$1,500 representing one percent of the purchase price.

On April 15, 2002, the Company entered into a \$3.0 million Equity Line of Credit Agreement with Cornell Capital Partners, LP (the "Purchaser"). Provided the Company is in compliance with the terms of the Agreement, the Company may, at its option, periodically require the Purchaser to purchase up to \$100,000 in any seven day period of the Company's Common Stock (the "put" shares) up to a maximum of \$3.0 million over the next two years, commencing on May 31, 2002 (the effective date of a Securities Act of 1933 (the "Securities Act") registration statement on Form SB-2 for the registration of 5,000,000 shares of Common Stock to be sold under the Equity Line of Credit, plus 238,095 shares of common stock mentioned below). The Company issued to the Purchaser 218,095 shares of Common Stock as a commitment fee for entering into the Equity Line of Credit Agreement. In addition, the Company issued to the placement agent 20,000 shares of NUWAVE's common stock. For each share of Common Stock purchased under the Equity Line of Credit, the Purchaser will pay 97% of the then Market Price (as defined in the Equity Line of Credit), and will be paid a fee of 4% of each advance.

F-13

The Equity Line of Credit is non-exclusive; thereby permitting the Company to offer and sell its securities to third parties while the Equity Line of Credit is in effect. NUWAVE has the option to terminate the Equity Line of Credit Agreement at any time, provided there is no pending advance thereunder.

Between June 7, 2002 and June 30, 2002 the Company entered into agreements with various investors whereby a total of 1,101,165 shares of Common Stock and warrants exercisable at \$1 per share for 50,000 shares of common stock were issued for an aggregate purchase price of \$330,350. In connection with the issuance of these shares, the Company incurred costs of \$35,664 in placement agent fees and expenses.

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

On July 3, 2002, 2,530,000 of the Company's unexercised Public Warrants, issued in the Company's initial public offering expired.

As of December 31, 2002, under the terms of the Equity Line of Credit Agreement the Company issued 11,782,517 shares of our common stock to Cornell Capital Partners, L.P. in exchange for \$365,000

At December 31, 2002 there were 5,655,480 warrants outstanding as follows:

NUMBER OF COMMON SHARES UNDERLYING WARRANTS	EXERCISE PRICE RANGE PER SHARE	WEIGHTED AVERAGE EXERCISE PRICE	EXPIRATION DATES
-----	-----	-----	-----
4,668,980	\$1.22 - \$4.00	\$3.54	March 2003 to December 2003
231,500	\$1.07 - \$1.40	\$1.25	November 2004 to December 2004
600,000	\$0.75 - \$2.00	\$1.40	February 2005 to November 2005
155,000	\$0.10 - \$1.00	\$0.77	January 2007 to October 2007

STOCK OPTIONS

The Company accounts for stock options in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees ("APB No. 25") and related interpretations. Under APB No. 25, generally, no compensation expense is recognized in the financial statements in connection with the awarding of stock option grants to employees provided that, as of the grant date, all terms associated with the award are fixed and the quoted market price of the Company's stock, as of the grant date, is not more than the amount an employee must pay to acquire the stock as defined; however, to the extent that stock options are granted to non employees, for goods or services, the fair value of these options is included in operating results as an expense.

A summary of the Company's stock option activity under its plans (which are discussed below), and related information, is as follows:

F-14

	NUMBER OF COMMON SHARES	EXERCISE PRICE RANGE PER SHARE	WEIGHTED AVERAGE EXERCISE PRICE	NUMBER OF SHARES EXERCISABLE
	-----	-----	-----	-----
Outstanding at December 31, 2000....	1,392,000	\$1.00 - \$6.88	\$3.01	1,282,340
Granted.....	442,143	\$0.61 - \$1.16	\$0.85	
Cancelled.....	(206,143)	\$0.79 - \$6.00	\$2.28	

Outstanding at December 31, 2001....	1,628,000	\$0.61 - \$6.88	\$2.52	1,492,171
	=====			=====

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

Cancelled.....	260,143	\$0.73 - \$6.88	\$3.80	

Outstanding at December 31, 2002....	1,367,857	\$0.61 - \$6.75	\$2.29	1,349,526
	=====			=====

Exercise prices and weighted-average contractual lives for stock options outstanding as of December 31, 2002 are as follows:

RANGE OF EXERCISE PRICES	OPTIONS OUTSTANDING			OPTIONS EXERCISABLE	
	NUMBER OUTSTANDING	WEIGHTED AVERAGE REMAINING CONTRACTUAL LIFE	WEIGHTED AVERAGE EXERCISE PRICE	NUMBER EXERCISABLE	WEIGHTED AVERAGE EXERCISE PRICE
\$ 0.61 - \$ 2.56	725,357	4.64	\$1.26	707,026	\$1.27
\$ 3.00 - \$ 3.25	603,000	5.40	\$3.25	603,000	\$3.25
\$ 5.87 - \$ 6.88	39,500	1.67	\$6.61	39,500	\$6.61

As a result of performance incentive stock options granted and earned during 2001, the Company incurred a charge to operations of \$216,000 in 2001.

At December 31, 2002, there were 7,095,480 shares of the Company's Common Stock reserved for the exercise of warrants and options under the plans.

Performance Incentive Stock Option Plan

On January 31, 1996, the Company adopted its 1996 Performance Incentive Stock Option Plan (the "Plan"). Under the Plan, incentive and nonqualified stock options, stock appreciation rights and restricted stock may be granted to key employees and consultants (the "Participants") by certain disinterested directors of the Board of Directors. Any incentive option granted under the Plan will have an exercise price of not less than 100% of the fair market value of the shares on the date on which such option is granted. With respect to an incentive option granted to a Participant who owns more than 10% of the total combined voting stock of the Company or of any parent or subsidiary of the Company, the exercise price for such option must be at least 110% of the fair market value of the shares subject to the option on the date on which the option is granted. A nonqualified option granted under the Plan (i.e., an option to purchase the common stock that does not meet the Internal Revenue Code's requirements for incentive options) must have an exercise price of at least the par value of the stock. Stock appreciation rights may be granted in conjunction with the grant of an incentive or nonqualified option under the Plan or independently of any such stock option. The directors determine the vesting of the options under the Plan at the date of grant. A maximum of 1,205,000 options can be awarded under the Plan (as amended May 26, 1998). No options were issued

F-15

during the year ended December 31, 2002 under the Performance Incentive Stock Option Plan.

Non-Employee Director Stock Option Plan

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

On November 25, 1996, the Company established a Non-Employee Director Stock Option Plan (the "Director's Plan"). The Director's Plan provides that each member of the Board of Directors (an "Eligible Director") who otherwise (1) is not currently an employee of the Company, or (2) is not a former employee still receiving compensation for prior services (other than benefits under a tax-qualified pension plan) shall be eligible for the grant of stock options under the Director's Plan. Each Eligible Director at the time of his election to the Board of Directors, shall be granted an option to purchase 3,000 shares of the Company's common stock at an exercise price equal to closing price of such common stock at close of business at the date of such grant, such option to vest immediately and to expire five years from the date of such grant.

Beginning with the annual meeting of the stockholders of the Company held on May 29, 1997 and provided that a sufficient number of shares remain available under the Director's Plan, each year immediately following the date of the annual meeting of the Company there automatically will be granted to each Eligible Director who is then serving on the Board an option to purchase 5,000 shares of the Company's Common Stock. The first 1,000 options vest immediately, the remainder vest equally over the next four years from the date of grant and are exercisable at the closing price of such shares of common stock at the date of grant. Such options expire five years from the date of vesting. No options were issued during the year ended December 31, 2002 under the Director's Plan.

The maximum number of shares of Common Stock with respect to which options may be granted under the Director's Plan (as amended May 26, 1998) is 235,000 shares.

8. EMPLOYEE BENEFIT PLAN

The Company maintains a noncontributory Employee Savings Plan, in accordance with the provisions of Section 401(k) of the Internal Revenue Code. Pursuant to the terms of the plan, participants can defer a portion of their income through contributions to the Plan. During the year ended December 31, 2002, the Company did not make any discretionary additional contributions to the plan.

9. INCOME TAXES

The tax effect of temporary differences consists of the following:

	DECEMBER 31, 2002 -----
Deferred tax assets:	
Research credits.....	186,000
Net operating loss carryforward.....	9,633,000

	9,819,000
Deferred tax liabilities:	
Property, equipment and software.....	28,000

	9,791,000
Valuation allowance.....	(9,561,000)

	\$ 230,000
	=====

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

F-16

Income tax benefit (expense) as of December 31, 2002 and 2001 consists of the following:

	2002	2001
	----	----
State.....		
Current.....	\$ 232,000	\$ 278,000
Deferred.....	(50,000)	40,000
	-----	-----
	\$ 182,000	\$ 318,000
	=====	=====

In accordance with New Jersey statutes, the Company has entered into an agreement to sell certain New Jersey net operating losses and research and development credits accordingly, a state income tax benefit (expense) and deferred tax asset has been recognized in 2002 and 2001.

The increase in valuation allowances for the years ended December 31, 2002 and 2001 were \$968,000 and \$1,520,000, respectively.

The difference between the statutory federal income tax rate and the effective rate for the Company's income tax benefit for each of the years ended December 31, 2002 and 2001, respectively, is summarized as follows:

	2002	2001
	----	----
Statutory federal income tax rate.....	34.0%	34.0%
State income tax benefit (expense) net of federal tax effect....	4.2%	4.6%
Increase in valuation allowance.....	(33.9)%	(31.9)%
Miscellaneous.....	(2.1)%	0.2%
Effective income tax rate.....	6.4%	6.9%

As of December 31, 2002, the Company has unused net operating loss carryforwards of \$26,925,000 available for federal income tax purposes. The unused net operating loss carryforwards expire in various years from 2010 to 2022. The Company, in the future, may be subject to limitations on the use of its NOL's as provided under Section 382 of the Internal Revenue Code.

10. COMMITMENTS

LEASES

The Company leases shared office space on a month-to-month basis. Rent expense incurred for the years ended December 31, 2002 and December 31, 2001 amounted to \$77,000 and \$90,000, respectively.

EMPLOYMENT AGREEMENTS

Mr. Zarin, the CEO, entered into an employment agreement with the Company,

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

dated as of April 1, 2000, pursuant to which he agreed to serve as the Company's President and Chief Executive Officer through December 31, 2007 after which time the Employment Agreement shall automatically continue for additional one year periods (the "Renewal Terms") unless either Mr. Zarin or the Corporation notifies the other at least six months prior to the end of the initial or any

F-17

Renewal Term. The agreement provided for an initial salary of \$120,000 per year which was increased to \$150,000 on May 11, 2000. Mr. Zarin is also entitled to an annual bonus based on the performance of the Corporation equal to (i) 50% of his base compensation if the Company's net profits before taxes are equal to projections to be approved by the Company's Board of Directors, (ii) 75% of his base compensation if the Company's net profits before taxes are equal to 105% of such projections, and (iii) 100% of his base compensation if the Company's net profits before taxes are equal to 115% of such projections. Mr. Zarin can terminate the agreement upon 180 days notice. The Company can terminate the agreement for good cause at any time. If the Company elects not to renew the Agreement and has given proper notification, Mr. Zarin will receive on the date of termination an amount equal to 150% of his base compensation, his entitled performance bonus and an amount equal to the average of any discretionary bonus paid for the preceding two calendar years (the "Termination Bonuses"). If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement prior to December 31, 2005, Mr. Zarin will receive a single payment equal to the remaining payments he would have been entitled to receive during the unexpired portion of the agreement, an additional two years base compensation and any termination bonuses. If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement after December 31, 2005, Mr. Zarin will receive a single payment equal to the remaining payments he would have been entitled to receive during the unexpired portion of the agreement, an additional three years base compensation and any termination bonuses.

Mr. O'Brien, the CFO, entered into an employment agreement with the Company, dated as of January 12, 2003, pursuant to which he agreed to serve as the Company's Vice- President and Chief Financial Officer through December 20, 2004 after which time the Employment Agreement shall automatically continue for additional one year periods (the "Renewal Terms") unless either Mr. O'Brien or the Corporation notifies the other at least six months prior to the end of the initial or any Renewal Term. The agreement provided for an initial salary of \$120,000 per year. Mr. O'Brien can terminate the agreement upon 60 days notice. The Company can terminate the agreement for good cause at any time. If the Company elects not to renew the Agreement and has given proper notification, Mr. O'Brien will receive on the date of termination an amount equal to 50% of his base compensation, his entitled performance bonus and an amount equal to the average of any discretionary bonus paid for the preceding two calendar years (the "Termination Bonuses"). If the Company otherwise terminates the agreement without cause, or otherwise materially breaches the agreement prior to December 20, 2004, Mr. O'Brien will receive a single payment equal to two years base compensation and any termination bonuses.

11. FINANCIAL INSTRUMENTS

Statement of Financial Accounting Standards No. 107 "Disclosures about Fair Values of Financial Instruments" ("SFAS 107") requires disclosure of fair value information about financial instruments, whether or not recognized on the balance sheet, for which it is practicable to estimate that value. Because no market exists for certain of the Company's assets and liabilities, fair value estimates are based upon judgments regarding credit risk, investor expectation

Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10KSB

of economic conditions, normal cost of administration and other risk characteristics, including interest rate and prepayment risk. These estimates are subjective in nature and involve uncertainties and matters of judgment, which significantly affect the estimates.

The following summarizes the information about the fair value of the financial instruments recorded on the Company's financial statements in accordance with FAS 107:

F-18

	DECEMBER 31, 2002	
	CARRYING VALUE	FAIR VALUE
Cash and cash equivalents.....	\$174,000	\$174,000
Note payable to officer/stockholder.....	115,000	115,000
Note Payable.....	200,000	200,000

The methodology and assumptions utilized to estimate the fair value of the Company's financial instruments are as follows:

Cash and cash equivalents

The carrying amount of cash approximates fair value.

Note payable officer/stockholder and note payable

Since these are short term, the carrying amounts approximate fair value.

12. SUBSEQUENT EVENTS

On January 12, 2003 the Company's employees and directors rescinded their interest in 1,189,000 of the Company's options that had been granted to them.

On January 23, 2003 and March 6, 2003 the Company received loans from Cornell Capital Partners, LP each in the amount of \$125,000. The loans were secured by advance puts under the Equity Line of Credit Agreement. From January 1, 2003 through March 28, 2003, \$145,000 of outstanding loans have been repaid from the proceeds of puts under the Equity Line of Credit Agreement, leaving a current balance of \$305,000. From January 1, 2003 through March 28, 2003, under the terms of the Equity Line of Credit Agreement, the Company has received a total of \$145,000 and had issued 21,210,393 shares of common stock.
