UNITED BANCORPORATION OF ALABAMA, INC.
AND SUBSIDIARY

Notes to Condensed Consolidated Financial Statements

NOTE 1 General

This report includes interim consolidated financial statements of United Bancorporation of Alabama, Inc. (the Corporation) and its wholly-owned subsidiary, United Bank (the Bank). The interim consolidated financial statements in this report have not been audited. In the opinion of management, all adjustments necessary to present fairly the financial position and the results of operations for the interim periods have been made. All such adjustments are of a normal recurring nature. The results of operations are not necessarily indicative of the results of operations for the full year or any other interim periods. For further information, refer to the consolidated financial statements and footnotes included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents**NOTE 2 Net Earnings per Common Share**

Basic net earnings per common share were computed by dividing net earnings by the weighted average number of shares of common stock outstanding during the three month periods ended March 31, 2009 and 2008. Common stock outstanding consists of issued shares less treasury stock. Diluted net earnings per share for the three month periods ended March 31, 2009 and 2008 were computed by dividing net earnings by the weighted average number of shares of common stock and the dilutive effects of the shares subject to options and restricted stock grants awarded under the Corporation's equity incentive plans. Presented below is a summary of the components used to calculate diluted earnings per share for the three months ended March 31, 2009 and 2008:

	Three Months Ended March 31,	
	2009	2008
Diluted earnings per share	\$ 0.05	\$ 0.14
Weighted average common shares outstanding	2,233,863	2,250,439
Dilutive effect of the assumed exercise of stock options	1,425	5,075
Total weighted average common shares and potential common stock outstanding	2,235,288	2,255,514

Table of Contents**NOTE 3 Allowance for Loan Losses**

The following table summarizes the activity in the allowance for loan losses for the three month periods ended (\$ in thousands):

	March 31,	
	2009	2008
Balance at beginning of year	3,592	3,982
Provision charged to expense	360	240
Loans charged off	(53)	(326)
Recoveries	14	7
Balance at end of period	3,913	3,903

At March 31, 2009 and 2008, the amounts of nonaccrual loans were \$19,345,112 and \$10,399,244 respectively.

NOTE 4 Operating Segments

Statement of Financial Accounting Standard 131 (SFAS 131), *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for the disclosure made by public business enterprises to report information about operating segments in annual financial statements and requires those enterprises to report selected information about operating segments in interim financial reports issued to shareholders. It also establishes standards for related disclosures about products and services, geographic areas, and major customers. The Corporation operates in only one segment – commercial banking.

NOTE 5 Stock Based Compensation

At March 31, 2009, the Corporation had two stock-based compensation plans. The 1998 Stock Option Plan and the 2007 Equity Incentive Plan are described more fully in Note 13 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2008. The Corporation accounts for its stock based compensation plans under FAS 123R, *Share-Based Payment*, whereby compensation cost is recognized for all stock-based payments based upon the grant-date fair value.

Table of Contents*Stock Options***1998 Stock Option Plan**

The following table represents stock option activity for the three months ended March 31, 2009:

	Shares under option	Weighted average exercise price per share	Weighted average remaining contractual life
Options outstanding, beginning of period	38,806	\$ 15.36	3.1
Granted			
Surrendered			
Exercised			
Options outstanding, end of period	38,806	15.36	2.8
Exercisable, end of period	38,006	15.30	2.7

The following table displays information pertaining to the intrinsic value of option shares outstanding and exercisable for the periods ended March 31, 2009 and 2008, respectively.

	2009	2008
Aggregate intrinsic value of outstanding options	\$16,157	\$219,093
Aggregate intrinsic value of exercisable options	\$16,157	\$214,493
Shares available for future stock option grants to employees and directors under the 1998 Stock Option Plan of United Bancorporation of Alabama, Inc. were 170,400 at March 31, 2009. The Corporation does not intend to issue additional options under the 1998 Stock Option Plan.		

2007 Equity Incentive Plan

There were no outstanding stock options under the 2007 Equity Incentive Plan as of March 31, 2009.

Table of Contents*Restricted Stock*

The following table represents restricted stock activity under the 2007 Equity Incentive Plan for the three months ended March 31, 2009:

	Restricted stock activity	Weighted average fair value
Shares granted at beginning of period	9,580	17.34
Granted		
Surrendered		
Vested		
Shares granted at end of period	9,580	17.34

Shares available for future stock grants to employees and directors under the 2007 Equity Incentive Plan of United Bancorporation of Alabama, Inc. were 298,420 at March 31, 2009.

As of March 31, 2009, there was \$3,416 of total unrecognized compensation costs related to the nonvested share based compensation arrangements granted under the 1998 and 2007 Plans. That cost is expected to be recognized over a period of approximately 1.5 years.

NOTE 6 Fair Value of Financial Instruments

On January 1, 2008, the Corporation adopted Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS No. 157 applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements; accordingly, the standard does not require any new fair value measurements of reported balances. On February 12, 2008, the Financial Accounting Standards Board (FASB) issued Staff Position 157-2 which defers the effective date of SFAS No. 157 for certain nonfinancial assets and liabilities to fiscal years beginning after November 15, 2008. All other provisions of SFAS No. 157 are effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. On October 10, 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for that Asset Is Not Active*. This FSP clarifies the application of SFAS No. 157 in a market that is not active and reiterates that the results of distressed sales or forced liquidations are not determinative when measuring fair value. It emphasizes that when determining fair value, the use of management's internal assumptions concerning future cash flows discounted at an appropriate risk-adjusted interest rate is acceptable when relevant observable market data do not exist. In some situations, multiple inputs from a variety of sources may provide the best evidence of fair value. The FSP also describes how the use of broker quotes should be considered when assessing the relevance of observable and unobservable inputs. The impact of this statement is minimal, as this FSP provides clarification to existing guidance.

Table of Contents

As defined in SFAS No. 157, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Corporation uses various methods including market, income and cost approaches. Based on these approaches, the Corporation often utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and / or the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Corporation utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques the Corporation is required to provide the following information according to the fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1 Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Level 1 also includes U.S. Treasury and federal agency securities and federal agency mortgage-backed securities, which are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or similar assets or liabilities.

Level 3 Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

Table of Contents**Assets Measured at Fair Value on a Recurring Basis**

Following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Available-for-Sale Securities

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities would include highly liquid government bonds, mortgage products and exchange traded equities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. Level 2 securities include U.S. agency securities, mortgage-backed agency securities, obligations of states and political subdivisions and certain corporate, asset backed and other securities. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy. Currently, all of the Corporation's available-for-sale securities are considered to be Level 2 securities.

		Fair Value Measurements at March 31, 2009 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs Level (2)	Significant Unobservable Inputs (Level 3)
Assets/Liabilities	Measured at			
	Fair Value			
AFS Securities	\$76,882,032	\$	\$ 76,882,032	\$

Assets Measured at Fair Value on a Nonrecurring Basis

Following is a description of the valuation methodologies used for instruments measured at fair value on a non-recurring basis and recognized in the accompanying balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Impaired Loans

Loan impairment is reported when full payment under the loan terms is not expected. Impaired loans are carried at the present value of estimated future cash flows using the loan's existing rate, or the fair value of collateral if the loan is collateral dependent. A portion of the allowance for loan losses is allocated to impaired loans if the value of such loans is deemed to be less than the unpaid balance. If these allocations cause the allowance for loan losses to require increase, such increase is reported as a component of the provision for loan losses. Loan losses are charged against the allowance when management believes the uncollectability of a loan is confirmed. When the fair value of the collateral is based on an observable market price or a current appraised value, the Corporation records the loan impairment as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Corporation records the loan impairment as nonrecurring Level 3.

Table of Contents*Foreclosed Assets(Other Real Estate)*

Foreclosed assets are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Corporation records the foreclosed assets as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Corporation records the foreclosed asset as nonrecurring Level 3.

The following table presents the assets carried on the balance sheet by asset type and by level within the FAS No. 157 valuation hierarchy (as described above) as of March 31, 2009, for which a nonrecurring change in fair value has been recorded during the year ended December 31, 2008.

	Carrying Value at March 31, 2009				Three months ended March 31, 2009
	Total	Level 1	Level 2	Level 3	Total gains (losses)
Impaired loans (1)	\$ 17,713,047	\$	\$7,053,888	\$ 10,659,159	\$ (451,430)
Foreclosed assets	5,546,501		5,546,501		

(1) Losses related to loans were recognized as either charge-offs or specific allocations of the allowance for loan losses.

In February, 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment of FASB Statement No. 115*. SFAS 159 allows companies to report selected financial assets and liabilities at fair value. The changes in fair value are recognized in earnings and the assets and liabilities measured under this methodology are required to be displayed separately in the balance sheet. While SFAS 159 is effective for the Corporation beginning January 1, 2008, the Corporation has not elected the fair value option that is offered by this statement.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward Looking Statements

When used or incorporated by reference herein, the words anticipate, estimate, expect, project, target, goal, and similar expressions, are intended to identify forward-looking statements within the meaning of Section 27A of the Securities Act of 1933. Such forward-looking statements are subject to certain risk, uncertainties, and assumptions including those set forth herein. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expected or projected. These forward-looking statements speak only as of the date they are made. The Corporation expressly disclaims any obligations or undertaking to publicly release any updates or revisions to any forward-looking statement contained herein to reflect any change in the Corporation's expectations with regard to any change in events, conditions or circumstances on which any such statement is based.

Critical Accounting Estimates

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America, which require management to make estimates and assumptions. Management believes that its determination of the allowance for loan losses is a critical accounting policy and involves a higher degree of judgment and complexity than the Bank's other significant accounting policies. Further, these estimates can be materially impacted by changes in market conditions or the actual or perceived financial condition of the Bank's borrowers, subjecting the Bank to significant volatility of earnings.

The allowance for loan losses is regularly evaluated by management and reviewed by the Board of Directors for accuracy by taking into consideration factors such as changes in the nature and volume of the loan portfolio; trends in actual and forecasted portfolio credit quality, including delinquency, charge-off and bankruptcy rates; and current economic conditions that may affect a borrower's ability to pay. The use of different estimates or assumptions could produce different provisions for loan losses. The allowance for credit losses is established through the provision for loan losses, which is a charge against earnings.

The estimation of fair value is significant to a number of the Corporation's assets, including, but not limited to, investment securities, other real estate, intangible assets and other repossessed assets. See NOTE 6 Fair Value of Financial Instruments for additional discussion. Investment securities are recorded at fair value while other real estate, intangible assets and other repossessed assets are recorded at either cost or fair value, whichever is lower. Fair values for investment securities are based on quoted market prices, and if not available, quoted prices on similar instruments. The fair values of other real estate and repossessions are typically determined based on third-party appraisals less estimated costs to sell. Intangible assets, such as the charter cost, discussed in Intangible Assets below, are periodically evaluated to determine if any impairment might exist.

Table of Contents

The estimation of fair value and subsequent changes of fair value of investment securities, other real estate, repossessions and intangible assets can have a significant impact on the value of the Corporation, as well as have an impact on the recorded values and subsequently reported net income.

Changes in interest rates is the primary determining factor in the fair value of investment securities, and the value at which these assets are reported in the Corporation's financial statements. Local economic conditions are often the key factor in the valuation of other real estate and repossessed assets. Changes in these factors can cause assets to be written down and have an impact on the financial results. The overall financial condition and results of operations of the banking unit is the primary determinant as to the value of recorded intangible assets.

Results of Operations

The following financial review is presented to provide an analysis of the results of operations of the Corporation and the Bank for the three months ended March 31, 2009 and 2008, compared. This review should be used in conjunction with the condensed consolidated financial statements included in the Form 10-Q.

Three Months Ended March 31, 2009 and 2008, Compared

Summary

Net income for the three months ended March 31, 2009 was \$209,327, a decrease of \$103,407, or 33.1%, from the same period in 2008. The primary reasons for the decrease were a decrease in net interest income and an increase in the provision made for the allowance for losses on loans. These are discussed in detail below. During the first quarter, the Corporation completed an analysis of its expenses and specifically made a determination as to which were controllable and which were not. The Corporation identified several categories of expenses that were either discretionary or could potentially be eliminated. The result of this analysis was the establishment of the expense control program that is referenced in the discussion below.

Additionally, the balance sheet of the Corporation significantly changed during the first quarter of 2009 as a result of significant reductions of deposits from two customers totaling approximately \$69 million. This reduction was anticipated by the Corporation as one of the depositors represented was holding a temporary deposit where the customer would be disbursing the funds for a project over the course of 2009. The other item represented a seasonal property tax receipt deposit for a local municipal government, which was planned to be disbursed to its operating departments during the quarter. For the temporary transaction, approximately \$35 million of the funds were either disbursed or placed in investments during the quarter. For the seasonal deposit, approximately \$34 million were distributed to the departments. As these deposits are subject to immediate withdrawal, the Corporation invests them in short term, highly liquid deposits or investment securities.

Table of Contents

Net Interest Income

Net interest income was \$3,207,787 during the first quarter of 2009, a reduction of \$212,617 (6.2%) from the level experienced during the same period in 2008. Total interest income decreased \$1,431,726 (21.6%) in the first quarter of 2009. A major part of the decrease was the effect of the significant reduction of the overnight fed funds rate by the Federal Reserve and the reductions impact on market rates charged on various loans, including, but not limited to, the prime rate. The most recent rate reduction of 75 basis points was made in mid-December 2008 and capped a total 400 basis points reduction in a series of actions during 2008. Interest and fees on loans was lower by \$972,000 and this resulted in a reduction in the rate earned to 6.00% compared to 7.35% in the 2008 period. A major contributing factor to the decline in yield and interest income was the approximately \$8,946,000 increase in non accrual loans at March 31, 2009 as compared to March 31, 2008. These revenue declines were partially offset by increased earning assets as average loans for the period ended March 31, 2009 were \$3,052,000 higher than the average for the same period in 2008 and average total earning assets were \$39,646,000 higher.

Total interest expense for the first quarter of 2009 decreased by \$1,219,109 (37.9%) compared to the first quarter of 2008. The reduction in interest rates impacts interest bearing liabilities more slowly because time deposits maintain their rate until they can be repriced at their maturity. The effect of lower rates was countered by the decrease in interest bearing liabilities of \$39,970,000 (10.6%) between the periods.

Both the increase in earning assets and the decrease in liabilities were primarily the result of the temporary or seasonal transactions for the two customers described above. The net interest margin decreased to 2.85% in the quarter from 3.33% in the same period in 2008. The effect of lower rates and the increased asset size at lower spreads caused by the transactions discussed above were the major factors in this reduction.

Provision for Loan Losses

The provision for loan losses totaled \$360,000 for the first quarter of 2009 as compared to \$240,000 for the same period in 2008. The increase to the Bank's provision is reflective of historical loan losses, the additional non accrual loans being carried and growth in the loan portfolio. For further discussion of these changes see Allowance for Loan Losses below.

Noninterest Income

Total noninterest income decreased \$13,997 or 1.3% for the first quarter of 2009. Revenue from service charges and fees on deposit accounts increased approximately \$39,600 (4.9%). This increase was more than offset by reductions in fees from the origination of mortgage loans (reduction of \$28,000) and fees from insurance and securities sales (reduction of \$45,000).

Table of Contents

Noninterest Expense

Total noninterest expense decreased \$184,227, or 4.6%, in the first quarter of 2009 compared to the same quarter of 2008 primarily as a result of the previously discussed expense control program. Salaries and benefits did increase as the bank put into service the new facility in Loxley, Alabama during the fourth quarter of 2008. Occupancy expense was lower in the quarter by \$110,000 (16.1%) as costs for repairs, maintenance and insurance were closely managed. Other expenses were lower by \$114,000 (9.9%). In the first quarter of 2008, the Corporation took a writedown of \$85,000 in anticipation of the sale of an ORE property. There was no similar loss in the same period in 2009. Additionally, expenses in many categories were lower as a result of the expense control program. These reductions were evident in advertising (lower by \$35,000) and legal/litigation fees (lower by \$65,000). These declines were partially offset by expenses related to the new communications system (\$23,000) and courier expenses associated with the new branch locations and increases in volume (\$21,000).

Income Tax Benefits

Earnings before taxes for the first quarter of 2009 were \$137,339 as compared to \$299,726 in the first quarter of 2008, a decrease of \$162,387 or 54.2%. Income tax benefits for the first quarter were \$71,988 compared to \$13,008 for the same period in 2008.

Financial Condition and Liquidity

Total assets on March 31, 2009 were \$500,798,323, a decrease of \$49,247,000 or 9.0% from December 31, 2008. At year end two customers had deposits which were either temporary or seasonal in nature. The temporary transactions have been discussed earlier and are primarily responsible for the reduction in deposits. The Corporation continues to take steps to maintain a strong liquidity position that is designed to provide sufficient availability of funds to meet planned needs. This liquidity position has been held at a higher than historical level because of the current economic uncertainty. The ratio of total loans to deposits plus repurchase agreements on March 31, 2009 was 63.8% as compared to 56.8% on December 31, 2008. This increase is the result of the decline in the temporary and seasonal transactions discussed earlier and growth in the loan portfolio of \$3.6 million.

Cash and Cash Equivalents

Cash and cash equivalents as of March 31, 2009 decreased by \$63,216,000, or by 44.0%, from December 31, 2009. The decrease is a result of the withdrawal of the temporary and seasonal deposits discussed earlier.

Investment Securities Available for Sale

Investment securities available for sale decreased \$8,645,000, or 10.1%, during the first quarter of 2009 as new investments and a portion of maturing and called investment securities were reinvested in the Held to Maturity category. Total investment securities showed an increase of \$13.9 million during the quarter.

Table of Contents

Investment Securities Held to Maturity

Investment securities held to maturity increased \$22,538,000, or 344.1%, during the first quarter of 2009. The Corporation, in 2008, determined that a portion of the investment portfolio represented a permanent investment and purchased securities in that amount that were designated as held to maturity. The amount at March 31, 2009 represents the maximum that is to be considered permanent investments at this time. Securities designated as held to maturity are not liquid or subject to sale. The Corporation will review the limits on this category regularly.

Loans

Gross loans increased by \$3,604,000 or 1.3% at March 31, 2009, from December 31, 2008. The increases are in both consumer and commercial loans in the markets served by the Corporation.

Allowance for Loan Losses

The allowance for losses on loans is maintained at levels that reflect the historic loss rate on the majority of the portfolio and the difference between the loan balance and value for loans that are considered to be impaired. A loan is considered to be impaired when it is 1) probable that the Corporation will be unable to collect all amounts due according to the contractual terms of the loan agreements or 2) the loan terms have be renegotiated to provide a reduction or deferral of interest or principal because of deterioration in the financial condition of the borrower. The historic loss rate is adjusted for the effects of: general economy, local economy, trends in problem loans and past due loans, growth in loans and peer levels of reserves. Loans that are deemed to be impaired are valued either at the present value of the cash flow anticipated or the value of the collateral, reduced by the estimated costs to sell. At the end of the first quarter of 2009, a reserve level of \$3,913,301 was considered to be appropriate. This is equivalent to 1.38% of gross loans. The Bank's 1.38 reserve percentage represents an increase from the 1.28% carried at year end 2008. Net charged-off loans for the first three months of 2009 were \$38,000, as compared to \$319,000 for the same period in 2008.

The Corporation has in place procedures to identify and deal with problem loans and potential problem loans. It is the goal of the Corporation to identify any problems, to develop and execute strategies to deal with those identified and establish reserves to deal with identified and historic shortfalls. Although reserves may be considered appropriate at a point in time, future events may change the ability of a borrower to pay or the underlying value of collateral. The Corporation will continue to monitor closely the condition of the portfolio and, in the current, uncertain economy, continue with its program to strengthen the level of reserves.

Table of Contents

The following is a summary of information pertaining to the identified classifications of impaired and past due loans:

	As of the three months ended March 31,	
	2009	2008
Impaired loans with a valuation allowance	\$ 13,839,767	\$ 9,511,312
Impaired loans without a valuation allowance	5,379,342	
Total impaired loans	\$ 19,219,109	\$ 9,511,312
Valuation allowance related to impaired loans	\$ 2,004,794	\$ 2,159,505
Total nonaccrual loans	19,345,112	10,399,244
Total loans past due ninety days or more and still accruing	30,715	17,157
Troubled debt restructured loans	2,439,955	31,724

Non-performing Assets: The following table sets forth the Corporation's non-performing assets at March 31, 2009 and December 31, 2008. Under the Corporation's nonaccrual policy, a loan is placed on nonaccrual status when collectibility of principal and interest is in doubt.

Description	March 31, 2009	December 31, 2008
(Dollars in Thousands)		
A Loans accounted for on a nonaccrual basis	\$ 19,345	\$ 14,700
B Loans which are contractually past due ninety days or more as to interest or principal payments (excluding balances included in (A) above)	31	28
C Loans, the terms of which have been renegotiated to provide a reduction or deferral of interest or principal because of a deterioration in the financial position of the borrower.	2,440	1,106
D Other non-performing assets	5,547	5,524
Total	\$ 27,363	\$ 21,358

Table of Contents

Premises and Equipment

Premises and equipment decreased \$309,218 during the first quarter of 2009. The Corporation has completed the currently planned addition of branches. The previously planned addition of one branch has been delayed until economic conditions become clearer. The reduction in this account is due to the assets being depreciated with little additional capital spending to counter the reduction.

Intangible Assets

As of March 31, 2009 and December 31, 2008, the Corporation had recorded \$934,763 in intangible assets.

Florida Charter On July 2, 2004, the Corporation acquired a State of Florida banking charter from a financial institution for \$917,263. Subsequent to the purchase, the charter was terminated but the Corporation retained the legal right to branch into Florida through its existing Alabama bank charter. The Corporation accounts for the charter cost as an indefinite lived intangible asset because the legal right acquired does not have an expiration date under Florida banking laws and there is no renewal process to keep the branching rights. The Corporation tests the intangible asset each September 30 for impairment. At March 31, 2009, the Corporation operated three branch offices in Florida.

Internet Domain Address On March 21, 2007, the Bank purchased the rights to the internet domain name www.unitedbank.com for \$17,500. This internet domain is defined as an intangible asset with an indefinite life under FAS 142 and, as such, is not required to be amortized over any period of time.

For the three months ended March 31, 2009 no impairment was recorded related to the intangible assets.

Deposits

Total deposits decreased \$47,027,000, or 9.6%, at March 31, 2009 from December 31, 2008, including decreases of \$27,763,000 in non-interest bearing deposits and \$19,265,000 in interest bearing deposits. As previously discussed, the temporary and seasonal transactions accounted for the decline. Core deposits have continued to grow during the first quarter, primarily in the time deposit (savings and certificates of deposit) accounts which increased \$9,700,000.

Repurchase Agreements

There was no amount held in securities sold under agreement to repurchase as of March 31, 2009, as compared to the balance of \$1,861,237 as of December 31, 2008. This decrease is the result of customers choosing to move their funds into deposit accounts instead of repurchase agreements due to deposit products that offered higher interest rates, higher insurance coverage by the FDIC, or both.

Table of Contents

Liquidity

One of the Corporation's goals is to provide adequate funds to meet changes in loan demand or any potential increase in the normal level of deposit withdrawals. This goal is accomplished primarily by generating cash from operating activities and maintaining sufficient short-term assets. These sources, coupled with a stable deposit base, allow the Corporation to fund earning assets and maintain the availability of funds. Management believes that the Corporation's traditional sources of maturing loans and investment securities, cash from operating activities and a strong base of core deposits are adequate to meet the Corporation's liquidity needs for normal operations. To provide additional liquidity, the Corporation has historically utilized market based sources such as short-term financing through the purchase of federal funds, and a borrowing relationship with the Federal Home Loan Bank. In the current economy, these sources are not as reliable as in more normal times. The Corporation has chosen to maintain on balance sheet sources of liquidity such as federal funds sold and liquid short term investments at higher than historical levels to assure an adequate source of liquid funding. Should the Corporation's traditional sources of liquidity be constrained, forcing the Corporation to pursue avenues of funding not typically used, the Corporation's net interest margin could be impacted negatively. The Corporation's bank subsidiary has an Asset Liability Management Committee, which has as its primary objective the maintenance of specific funding and investment strategies to achieve short-term and long-term financial goals. The Corporation's liquidity at March 31, 2009 is considered appropriate by management.

Capital Adequacy

Total stockholders' equity on March 31, 2009, was \$42,143,525, an increase of \$5,813, from December 31, 2008. This small increase is a combination of current period earnings of \$209,327, the decrease of accumulated other comprehensive income net of tax of \$160,506, the payment of a preferred stock dividend of \$74,389 related to the U.S. Treasury's Capital Purchase Program as described in the footnotes to the audited financial statements accompanying the Corporation's Form 10-K for the year ended December 31, 2008, an increase in additional paid in capital of \$20,807 arising from 1) the dividend reinvestment plan 2) an offering under the Corporation's Employee Stock Purchase Plan and 3) compensation related to previous years' grants of stock options, and the reduction in unearned stock based compensation of \$9,472.

The table below sets forth various capital ratios for the Corporation and the Bank. Under current regulatory guidelines, debt associated with trust preferred securities qualifies for Tier 1 capital treatment. At March 31, 2009, trust preferred securities included in Tier 1 capital totaled \$10 million.

Quantitative measures established by regulation to ensure capital adequacy require the Corporation and its Bank to maintain minimum total capital (Total Risk-Based Capital) of at least 8% of risk-weighted assets, minimum core capital (Tier I Risk-Based Capital) of at least 4% of risk-weighted assets, and a minimum leverage ratio of at least 4% of average assets. Management believes, as of March 31, 2009 that the Corporation and its Bank meet all capital adequacy requirements to which they are subject.

Table of Contents

As of March 31, 2009, the most recent notification from the appropriate regulatory agencies categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum Total Risk Based Capital, Tier I Risk-Based Capital, and leverage ratios of at least 10%, 6%, and 5% respectively. There are no conditions or events since that notification that management believes have changed the Bank's category.

Information regarding risk-based capital and leverage ratios of the Corporation and the Bank are set forth in the table below:

	March 31, 2009	Well Capitalized Treatment
United Bancorporation of Alabama, Inc.		
Total risk-based capital	16.43%	N/A
Tier 1 risk-based capital	15.25	N/A
Leverage Ratio	9.69	N/A
United Bank		
Total risk-based capital	16.04%	10.00%
Tier 1 risk-based capital	14.87	6.00
Leverage ratio	9.45	5.00

Based on management's projections, existing regulatory capital should be sufficient to satisfy capital requirements in the foreseeable future for existing operations, and for some expansion efforts. Although the Bank has suspended further immediate expansion plans, continued growth into new markets may require the Corporation to further access external funding sources. There can be no assurance that such funding sources will be available to the Corporation.

Off Balance Sheet items

The Bank is a party to financial obligations with off-balance sheet risk in the normal course of business. The financial obligations include commitments to extend credit, standby letters of credit issued to customers, and standby letters of credit issued to the Bank by Federal Home Loan Bank of Atlanta (FHLB) which are pledged as collateral to insure public deposits held in the SAFE Program of the Alabama State Treasurer.

The following table sets forth the off-balance sheet risk of the Bank as of the end of the period.

	March 31, 2009
Commitments to extend credit	\$ 36,338,000
Standby letters of credit	1,889,420

Table of Contents

Item 4. Controls and Procedures

Based on evaluation of the Corporation's disclosure controls and procedures (as such term is defined in Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the period covered by this quarterly report, the principal executive officer and the principal financial officer of the Corporation have concluded that as of such date the Corporation's disclosure controls and procedures were effective to ensure that information the Corporation is required to disclose in its filings under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by the Corporation in the reports that it files under the Exchange Act is accumulated and communicated to the Corporation's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in the Corporation's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rules 13a-15 or 15d-15 that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes to the risk factors previously disclosed in the Corporation's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Item 4. Submission of Matters to a Vote of Security Holders

- (a) The Annual Meeting of Stockholders of United Bancorporation of Alabama, Inc. was held on May 6, 2009.
- (b) The following nominees were elected as Directors of the Corporation, to serve until the 2012 Annual Meeting of Stockholders, by the votes indicated:

Nominee	For	Withheld
L. Walter Crim	1,389,604	3,339
Leslie H. Cunningham	1,388,839	4,105
William J. Justice	1,159,856	233,088
Richard K. Maxwell	1,381,865	11,078

The Directors of the Corporation whose terms of office continued after the 2009 Annual Meeting are as follows:

Director	To Serve Until the Annual Meeting of Stockholders in the year
Michael R. Andreoli	2010
David Swift	2010
Dale M. Ash	2011
Robert R. Jones, III	2011

- (c) The stockholders for the Corporation approved the advisory (non-binding) proposal regarding the compensation of executive officers by the following vote:

For	Against	Abstained	Broker Non Votes
950,036	246,595	196,312	- 0 -
