TELEDYNE TECHNOLOGIES INCORPORATED AND SUBSIDIARIES  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

July 1, 2007

**Note 1. General**

**Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared by Teledyne Technologies Incorporated (Teledyne Technologies or the Company) pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures normally included in notes to consolidated financial statements have been condensed or omitted pursuant to such rules and regulations, but resultant disclosures are in accordance with accounting principles generally accepted in the United States as they apply to interim reporting. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto in Teledyne Technologies Annual Report on Form 10-K for the fiscal year ended December 31, 2006 (2006 Form 10-K).

In the opinion of Teledyne Technologies management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly, in all material respects, Teledyne Technologies consolidated financial position as of July 1, 2007, and the consolidated results of operations for the three and six months then ended and cash flows for the six months then ended. The results of operations and cash flows for the period ended July 1, 2007, are not necessarily indicative of the results of operations or cash flows to be expected for any subsequent quarter or the full fiscal year.

Certain reclassifications have been made to the financial statements and notes for the prior year to conform to the 2007 presentation.

**Recent Accounting Pronouncements**

On January 1, 2007, Teledyne Technologies adopted Financial Accounting Standards Board ( FASB ) Interpretation No. 48, Accounting for Uncertainty in Income Taxes ( FIN 48 ). As a result of the implementation the Company recognized a \$0.2 million increase in the liability for unrecognized tax benefits, which was accounted for as a cumulative-effect adjustment (decrease) to the beginning balance of retained earnings. As of the date of adoption and after the impact of recognizing the increase in the liability noted above, the Company s total gross unrecognized tax benefits totaled \$5.5 million. Due to offsetting related deferred tax assets, \$3.9 million represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in any future periods. See Note 9 for additional disclosures regarding the adoption of FIN 48.

**Note 2. Business Combinations**

On June 20, 2007 Teledyne Technologies through its subsidiary, Teledyne Cougar, Inc., completed the acquisition of Tindall Technologies, Inc., ( Tindall ) a designer and supplier of microwave subsystems for defense applications for consideration of \$6.6 million. At July 1, 2007 total cash paid, net of cash acquired was \$5.6 million. Teledyne Technologies also recorded \$1.0 million in contingent payments, in connection with the acquisition, payable through 2010 in three installments. Tindall, which has been merged into Teledyne Cougar, designs and manufactures high performance Instantaneous Frequency Measurement ( IFM ) based systems and subsystems, including integrated frequency locked sources and set-on receiver-jammers used for U.S. Navy and Air Force training. Tindall s operations, based in Pleasanton, California, are being consolidated with the operations of Teledyne Cougar in Sunnyvale, California. Tindall s balance sheet is reflected in the Teledyne Technologies condensed consolidated balance sheet at July 1, 2007. Tindall s results of operations and cash flows will be included beginning July 2, 2007. Tindall had revenue of \$2.7 million for its fiscal year ended December 2006.

On March 30, 2007, Teledyne Technologies through its subsidiary, Teledyne Instruments, Inc., completed the acquisition of assets of D.G. O'Brien, Inc. ( DGO ) for consideration of \$37.1 million, which includes a \$1.0 purchase price adjustment. DGO, headquartered in Seabrook, New Hampshire, is a leading manufacturer of highly reliable electrical and fiber-optic interconnect systems, primarily for subsea military and offshore oil and gas applications. At July 1, 2007, total cash paid including other fees, was \$36.1 million. On July 13, 2007, Teledyne Technologies paid the purchase price adjustment of \$1.0 million. DGO's balance sheet was reflected in the Teledyne Technologies condensed consolidated balance sheet at April 1, 2007. DGO's results of operations and cash flows have been included beginning April 2, 2007. DGO had sales of \$26.2 million for its fiscal year ended September 2006. Teledyne Technologies operates this business under the name Teledyne D.G. O'Brien.

On September 15, 2006, Teledyne Technologies through its subsidiary, Teledyne Brown Engineering, Inc. acquired Rockwell Scientific Company LLC for \$167.5 million in cash, with the sellers retaining certain liabilities. Total cash paid, including other fees, net of \$9.5 million in cash acquired was \$158.6 million. The Company now operates as Teledyne Scientific & Imaging, LLC ( Scientific Company ). Headquartered in Thousand Oaks, California, Scientific Company is a leading provider of research and development services, as well as a leader in developing and manufacturing infrared and visible light imaging sensors for surveillance applications. Scientific Company's results have been included since the date of the acquisition.

The unaudited pro forma financial information below combines Teledyne Technologies historical income statement information with Scientific Company's historical income statement information and assumes that Scientific Company had been acquired at the beginning of the 2006 fiscal year and includes the effect of estimated amortization of acquired identifiable intangible assets, increased depreciation expense for fixed assets, as well as increased interest expense on acquisition debt. This unaudited pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have resulted had the acquisition been in effect at the beginning of the period. In addition, the unaudited pro forma results are not intended to be a projection of future results and do not reflect any operating efficiencies or cost savings that might be achievable.

(amounts in millions, except per-share amounts)	<b>Second Quarter</b> 2006	<b>Six Months</b> 2006
Net sales	\$379.8	\$739.3
Net income	\$ 20.3	\$ 37.6
Basic earnings per common share	\$ 0.59	\$ 1.10
Diluted earnings per common share	\$ 0.57	\$ 1.07

(a) The above unaudited proforma information is presented for the Scientific Company acquisition as it is considered a material acquisition in accordance with Statement of Financial Accounting Standards

No. 141,  
Business  
Combinations.

On August 16, 2006, Teledyne Technologies through its subsidiary, Teledyne Instruments, Inc., acquired a majority interest in Ocean Design, Inc. ( ODI ) for approximately \$30 million in cash. ODI, headquartered in Daytona Beach, Florida, is a leading manufacturer of subsea, wet-mateable electrical and fiber-optic interconnect systems used in offshore oil and gas production, oceanographic research and military applications.

The ODI minority stockholders have the option to sell their shares to Teledyne Instruments following the end of each quarter through the quarter ended March 31, 2009, at a formula-determined price. In September 2006, Teledyne Instruments acquired an additional 9.9% of ownership in ODI for \$5.8 million. In 2007, Teledyne Instruments acquired an additional 0.4% of ownership in ODI for \$0.2 million. Total cash paid to date, including the initial investment and subsequent share purchases, net of cash acquired was \$34.6 million. At July 1, 2007, Teledyne Instruments owns 61.3% of ODI. All shares not sold to Teledyne Instruments following the quarter ended March 31, 2009, will be purchased by Teledyne Instruments following the quarter ended June 30, 2009, at the same formula-determined price, at which time Teledyne Instruments will own all of the ODI shares held by the participating stockholders.

On August 16, 2006, Teledyne Technologies, through its subsidiary, Teledyne Brown Engineering, Inc., acquired CollaborX, Inc. ( CollaborX ) for consideration of \$17.5 million, less certain transaction-related expenses. Teledyne Technologies recorded \$2.9 million in notes payable related to the transaction, payable through 2009. At July 1, 2007, total cash paid, including other fees, net of cash acquired was \$14.9 million. CollaborX, based in Colorado Springs, Colorado, provides government engineering services primarily to the U.S. Air Force and select joint military commands.

On April 28, 2006, Teledyne Wireless, Inc. completed the acquisition of certain assets of KW Microwave Corporation ( KW Microwave ), a manufacturer of defense microwave components and subsystems, for \$10.5 million in cash. Total cash paid, including the receipt of a \$0.2 million purchase price adjustment, was \$10.3 million. Principally located in Poway, California, the business operates as Teledyne KW Microwave.

On January 27, 2006, we acquired all of the outstanding shares of Benthos, Inc. ( Benthos ) for \$17.50 per share in cash. The aggregate consideration for the outstanding Benthos shares was approximately \$40.6 million (including payments for the settlement of outstanding stock options) or \$32.2 million taking into consideration \$8.4 million in cash acquired. Benthos, located in North Falmouth, Massachusetts, is a provider of oceanographic products used in port and harbor security services, military applications, energy exploration and oceanographic research.

Teledyne Technologies funded the acquisitions primarily from borrowings under its credit facility and cash on hand. The following is a summary at the acquisition date of the estimated fair values allocated to the assets acquired and liabilities assumed for the DGO and Tindall acquisitions made in 2007 (in millions):

Current assets	\$ 14.7
Property, plant and equipment	1.5
Goodwill	23.8
Acquired intangible assets	7.1
Other assets	0.2
Current liabilities	(4.9)
Long-term liabilities	(0.7)
<b>Total net assets acquired</b>	<b>\$ 41.7</b>

Teledyne Technologies goodwill was \$351.5 million at July 1, 2007 and \$313.6 million at December 31, 2006. Teledyne Technologies net acquired intangible assets were \$63.0 million at July 1, 2007 and \$69.4 million at December 31, 2006. The change in the balance of goodwill in 2007 primarily resulted from the acquisitions made in 2007 and an adjustment for the Scientific Company acquisition. The change in the balance of acquired intangible assets in 2007 resulted from the acquisitions made in 2007, an adjustment for the Scientific Company acquisition and amortization of acquired intangible assets. In all acquisitions, the results are included in the Company's consolidated financial statements from the date of each respective acquisition, except as noted for DGO and Tindall. Each of the companies acquired, except for CollaborX, is part of the Electronics and Communications segment. CollaborX is part of the Systems Engineering Solutions segment. The Company is in the process of specifically identifying the amount to be assigned to intangible assets, as well as certain assets and liabilities for the CollaborX, ODI and Scientific Company acquisitions made in 2006 and the DGO and Tindall acquisitions made in 2007. The Company made preliminary estimates as of July 1, 2007, since there was insufficient time between the acquisition dates and the end of the period to finalize the valuations. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the ODI acquisition was \$16.8 million and \$13.8 million, respectively. The preliminary amount of goodwill and acquired intangible assets recorded as of December 31, 2006 for the ODI acquisition was \$15.9 million and \$13.8 million, respectively. The change in goodwill from December 31, 2006 reflects additional share purchases and changes to the estimated income tax balances. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the CollaborX acquisition was \$14.2 million and \$2.1 million, respectively, and did not change from December 31, 2006. The preliminary amount of goodwill and gross acquired intangible assets recorded as of July 1, 2007 for the

Scientific Company acquisition was \$74.3 million and \$8.3 million, respectively. The preliminary amount of goodwill and gross acquired intangible assets recorded as of December 31, 2006 for the Scientific Company acquisition was \$60.1 million and \$19.0 million, respectively. The primary change was a \$10.7 million reduction to acquired intangible assets and a corresponding increase to goodwill to reflect changes in the estimated amount of acquired intangible assets following the receipt of a preliminary appraisal report for the valuation acquired intangible asset. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the DGO acquisition was \$19.7 million and \$6.0 million, respectively. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the Tindall acquisition was \$4.1 million and \$1.1 million, respectively. These amounts were based on estimates that are subject to change pending the completion of the Company's internal review and the receipt of certain third party valuations and appraisals. Goodwill resulting from the CollaborX, Scientific Company and DGO acquisitions will be deductible for tax purposes.

**Note 3. Comprehensive Income and Retained Earnings**

Teledyne Technologies' comprehensive income is comprised of net income and foreign currency translation adjustments. Teledyne Technologies' total comprehensive income for the second quarter and first six months of 2007 and 2006 consists of the following (in millions):

	Second Quarter		Six Months	
	2007	2006	2007	2006
Net income	\$ 24.3	\$ 20.9	\$ 44.8	\$ 38.8
Other comprehensive gain, net of tax:				
Foreign currency translation gains	0.3	0.3	0.2	0.6
Total other comprehensive gain	0.3	0.3	0.2	0.6
Total comprehensive income	\$ 24.6	\$ 21.2	\$ 45.0	\$ 39.4

The following is a rollforward of the balance of retained earnings (in millions):

	Six Months	
	2007	2006
Balance at beginning of year	\$ 285.8	\$ 205.5
Net income	44.8	38.8
Cumulative effect of the adoption of Fin No. 48 (a)	(0.2)	
Balance at end of period	\$ 330.4	\$ 244.3

(a) Reflects impact of the adoption of FIN 48 effective January 1, 2007.

**Note 4. Earnings Per Share**

Basic and diluted earnings per share were computed based on net earnings. The weighted average number of common shares outstanding during the period was used in the calculation of basic earnings per share. This number of shares was increased by contingent shares that could be issued under various compensation plans as well as by the dilutive effect of stock options based on the treasury stock method in the calculation of diluted earnings per share.

The following table sets forth the computations of basic and diluted earnings per share (amounts in millions, except per share data):

	Second Quarter		Six Months	
	2007	2006	2007	2006
<b>Basic earnings per share</b>				
Net income	\$ 24.3	\$ 20.9	\$ 44.8	\$ 38.8
Weighted average common shares outstanding	35.0	34.4	34.9	34.2
Basic earnings per common share	\$ 0.69	\$ 0.61	\$ 1.28	\$ 1.13
<b>Diluted earnings per share</b>				
Net income	\$ 24.3	\$ 20.9	\$ 44.8	\$ 38.8
Weighted average common shares outstanding	35.0	34.4	34.9	34.2
Dilutive effect of exercise of options outstanding	1.1	1.0	1.1	1.1
Weighted average diluted common shares outstanding	36.1	35.4	36.0	35.3
Diluted earnings per common share	\$ 0.67	\$ 0.59	\$ 1.24	\$ 1.10

#### Note 5. Stock-Based Compensation Plans

Teledyne Technologies has long-term incentive plans pursuant to which it has granted non-qualified stock options, restricted stock and performance shares to certain employees. The Company also has non-employee director stock compensation plans, pursuant to which non-qualified stock options and common stock have been issued to its directors.

The following disclosures are based on stock options granted to Teledyne Technologies employees and directors. Effective January 2, 2006, the Company adopted the provisions of Statement of Financial Accounting Standards ( SFAS ) No. 123(R) using the modified prospective method and began recording stock option compensation expense in the consolidated statements of income, but did not restate prior year financial statements. For the second quarter and first six months of 2007, the Company recorded a total of \$1.6 million and \$3.3 million, respectively in stock option expense. For the second quarter and first six months of 2006, the Company recorded a total of \$1.5 million and \$2.9 million, respectively in stock option expense. In 2007, the Company expects approximately \$6.8 million in stock option compensation expense based on current assumptions regarding the estimated fair value of expected stock option grants during the remainder of the year. However, our assessment of the estimated compensation expense is affected by our stock price and actual stock option grants during the year as well as assumptions regarding a number of complex and subjective variables and the related tax impact. These variables include, but are not limited to, the volatility of our stock price and employee stock option exercise behaviors. The Company issues shares of common stock upon the exercise of stock options.

The Company used a combination of the historical volatility of Teledyne Technologies stock price and the implied volatility based on the price of traded options on Teledyne Technologies stock to calculate the expected volatility assumption to value stock options. The Company used the actual stock trading history since January 2001 in its volatility calculation. The expected dividend yield is based on Teledyne Technologies practice of not paying dividends. The risk-free rate of return is based on the yield of U.S. Treasury Strips with terms equal to the expected life of the option as of the grant date. The expected life in years is based on historical actual stock option exercise experience. The following assumptions were used in the valuation of stock options granted in 2007 and 2006:

	2007	2006
Expected dividend yield		
Expected volatility	33.0%	36.0%
Risk-free interest rate	4.9%	4.7%
Expected life in years	5.6	5.5

Based on the assumptions in the table above, the grant date fair value of stock options granted in 2007 and 2006 was \$15.54 and \$13.30, respectively.

Stock option transactions for Teledyne's employees for the second quarter and first six months ended July 1, 2007 are summarized as follows:

	2007			
	Second Quarter		Six Months	
		Weighted Average Exercise Price		Weighted Average Exercise Price
	Shares		Shares	
Beginning balance	2,985,091	\$ 24.20	2,537,559	\$ 20.97
Granted	4,500	\$ 40.18	532,653	\$ 39.48
Exercised	(140,954)	\$ 18.59	(220,855)	\$ 19.21
Cancelled or expired	(10,499)	\$ 36.55	(11,219)	\$ 25.63
Ending balance	2,838,138	\$ 24.46	2,838,138	\$ 24.46
Options exercisable at end of period	1,876,364	\$ 18.83	1,876,364	\$ 18.83

Stock option transactions for Teledyne's non-employee directors for the second quarter and first six months ended July 1, 2007 are summarized as follows:

	2007			
	Second Quarter		Six Months	
		Weighted Average Exercise Price		Weighted Average Exercise Price
	Shares		Shares	
Beginning balance	307,041	\$ 19.45	301,186	\$ 19.32
Granted	37,284	\$ 45.38	43,139	\$ 42.77
Exercised	(1,191)	\$ 10.08	(1,191)	\$ 10.08
Ending balance	343,134	\$ 22.30	343,134	\$ 22.30
Options exercisable at end of period	287,251	\$ 18.79	287,251	\$ 18.79

#### Note 6. Cash Equivalents

Cash equivalents consist of highly liquid money-market mutual funds and bank deposits with maturities of three months or less when purchased. Cash equivalents totaled \$2.2 million at July 1, 2007 and \$6.0 million at December 31, 2006.

**Note 7. Inventories**

Inventories are primarily valued under the LIFO method. Since an actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time, interim LIFO calculations must necessarily be based on the Company's estimates of expected year-end inventory levels and costs. Because these are subject to many factors beyond the Company's control, interim results are subject to the final year-end LIFO inventory valuation. Inventories consist of the following (in millions):

	July 1, 2007	December 31, 2006
Balance at		
Raw materials and supplies	\$ 63.9	\$ 59.3
Work in process	126.6	106.2
Finished goods	20.3	15.9
	210.8	181.4
Progress payments	(0.5)	(1.2)
LIFO reserve	(25.4)	(24.4)
Total inventories, net	\$ 184.9	\$ 155.8

**Note 8. Supplemental Balance Sheet Information**

Other long-term assets included amounts related to deferred compensation of \$22.9 million and \$19.5 million at July 1, 2007 and December 31, 2006, respectively. Accrued liabilities included salaries and wages and other related compensation liabilities of \$58.2 million and \$60.1 million at July 1, 2007 and December 31, 2006, respectively. Other long-term liabilities included aircraft product liability reserves of \$48.4 million and \$44.4 million at July 1, 2007 and December 31, 2006, respectively and deferred compensation liabilities of \$22.3 million and \$19.3 million at July 1, 2007 and December 31, 2006, respectively. Other long-term liabilities also included reserves for workers compensation, environmental liabilities and the long-term portion of compensation liabilities. Some of the Company's products are subject to specified warranties. The Company maintains a warranty reserve for the estimated future costs of repair, replacement or customer accommodation and periodically reviews this reserve for adequacy. Such review would generally include a review of historic warranty experience with respect to the applicable business or products, as well as the length and actual terms of the warranties. Changes in the Company's product warranty reserve during the period are as follows (in millions):

	Six Months	
	2007	2006
Balance at beginning of year	\$ 11.4	\$ 10.3
Accruals for product warranties charged to expense	3.7	3.9
Cost of product warranty claims	(3.9)	(3.3)
Acquisitions	0.1	0.2
Balance at end of period	\$ 11.3	\$ 11.1

**Note 9. Income Taxes**

On January 1, 2007, Teledyne Technologies adopted FIN No. 48. As a result of the implementation the Company recognized a \$0.2 million increase in the liability for unrecognized tax benefits, which was accounted for as a cumulative-effect adjustment (decrease) to the beginning balance of retained earnings. As of the date of adoption and after the impact of recognizing the increase in the liability noted above, the Company's total gross unrecognized tax benefits totaled \$5.5 million. Due to offsetting related deferred tax assets, \$3.9 million represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in any future

periods.

Except for claims for refunds related to credits for research activities, the Company has substantially concluded all U.S. federal income tax matters for years through 2002. California tax returns for 2002 and

2003 are currently under examination. Substantially all other material state and local, and foreign income tax matters have been concluded for years through 2002.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. In conjunction with the adoption of FIN 48, the Company recognized approximately \$0.6 million for the payment of interest and did not recognize any amounts for the payment of penalties which are included as a component of the unrecognized tax benefit noted above. During the first six months of 2007, the Company recognized approximately \$0.2 million in interest associated with uncertain tax positions. To the extent interest is not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision.

The Company anticipates the total unrecognized tax benefits will be reduced by \$1.8 million due to the settlement of audits and the expiration of statutes of limitations in the next 12 months.

The Company's effective tax rates for the second quarter and first six months of 2007 were 38.3% and 38.0%, respectively. The Company's estimated effective income tax rate for the full year of 2007 is 35.3%, and reflects the anticipated filing for tax credits of approximately \$3.0 million in the third quarter of 2007. Excluding the benefit for tax credits our estimated effective income tax rate for 2007 would be 37.2%. The Company's effective tax rates for the second quarter and first six months of 2006 were 36.5% and 37.0%, respectively.

#### **Note 10. Long-Term Debt and Capital Lease**

At July 1, 2007, Teledyne Technologies had \$206.0 million outstanding under its \$400.0 million credit facility. Excluding interest and fees, no payments are due under the credit facility until it matures in July 2011. Available borrowing capacity under the \$400.0 million credit facility, which is reduced by borrowings and outstanding letters of credit, was \$185.1 million at July 1, 2007. The credit agreement requires the Company to comply with various financial and operating covenants, including maintaining certain consolidated leverage and interest coverage ratios, as well as minimum net worth levels and limits on acquired debt. At July 1, 2007, the Company was in compliance with these covenants. The Company also has two \$5.0 million uncommitted credit lines available. These credit lines are utilized, as needed, for periodic cash needs. Total debt at July 1, 2007 includes \$206.0 million outstanding under the \$400.0 million credit facility at a weighted average interest rate of 5.8%, \$7.5 million outstanding under the two \$5.0 million uncommitted credit lines and \$2.7 million in other debt, of which \$0.8 million is current. The amounts outstanding under the two uncommitted bank facilities are classified as long term debt on the balance sheet as the Company has the ability and the intent to repay these using its credit facility, if necessary. The Company also has a \$3.9 million capital lease, of which \$0.1 million is current. At July 1, 2007, Teledyne Technologies had \$8.9 million in outstanding letters of credit.

#### **Note 11. Lawsuits, Claims, Commitments, Contingencies and Related Matters**

The Company is subject to federal, state and local environmental laws and regulations which require that it investigate and remediate the effects of the release or disposal of materials at sites associated with past and present operations, including sites at which the Company has been identified as a potentially responsible party under the federal Superfund laws and comparable state laws.

In accordance with the Company's accounting policy disclosed in Note 2 to the consolidated financial statements in the 2006 Form 10-K, environmental liabilities are recorded when the Company's liability is probable and the costs are reasonably estimable. In many cases, however, investigations are not yet at a stage where the Company has been able to determine whether it is liable or, if liability is probable, to reasonably estimate the loss or range of loss, or certain components thereof. Estimates of the Company's liability are subject to uncertainties as described in Note 15 to the consolidated financial statements in the 2006 Form 10-K. As investigation and remediation of these sites proceeds, it is likely that adjustments in the Company's accruals will be necessary to reflect new information. The amounts of any such adjustments could have a material adverse effect on the Company's results of operations in a given period, but the amounts, and the possible range of loss in excess of the amounts accrued, are not reasonably estimable. Based on currently available information, management does not believe that future environmental costs in excess of those

accrued, with respect to sites with which the Company has been identified, are likely to have a material adverse effect on the Company's financial condition. The Company cannot provide assurance that additional future developments, administrative actions or liabilities relating to environmental matters will not have a material adverse effect on the Company's financial condition or results of operations.

At July 1, 2007, the Company's reserves for environmental remediation obligations totaled \$5.0 million, of which \$0.7 million is included in other current liabilities. The Company periodically evaluates whether it may be able to recover a portion of future costs for environmental liabilities from its insurance carriers and from third parties. The timing of expenditures depends on a number of factors that vary by site, including the nature and extent of contamination, the number of potentially responsible parties, the timing of regulatory approvals, the complexity of the investigation and remediation, and the standards for remediation. The Company expects that it will expend present accruals over many years, and will complete remediation of all sites with which it has been identified in up to 30 years.

Various claims (whether based on U.S. Government or Company audits and investigations or otherwise) may be asserted against the Company related to its U.S. Government contract work, including claims based on business practices and cost classifications and actions under the False Claims Act. Although such claims are generally resolved by detailed fact-finding and negotiation, on those occasions when they are not so resolved, civil or criminal legal or administrative proceedings may ensue. Depending on the circumstances and the outcome, such proceedings could result in fines, penalties, compensatory and treble damages or the cancellation or suspension of payments under one or more U.S. Government contracts. Under government regulations, a company, or one or more of its operating divisions or units, can also be suspended or debarred from government contracts based on the results of investigations. Although the outcome of these matters cannot be predicted with certainty, management does not believe there is any audit, review or investigation currently pending against the Company, of which management is aware, that is likely to result in suspension or debarment of the Company, or that is otherwise likely to have a material adverse effect on the Company's financial condition. The resolution in any reporting period of one or more of these matters could, however, have a material adverse effect on the Company's results of operations for that period.

A number of other lawsuits, claims and proceedings have been or may be asserted against the Company, including those pertaining to product liability, patent infringement, commercial contracts, employment and employee benefits. While the outcome of litigation cannot be predicted with certainty, and some of these lawsuits, claims or proceedings may be determined adversely to the Company, management does not believe that the disposition of any such pending matters is likely to have a material adverse effect on the Company's financial condition. The resolution in any reporting period of one or more of these matters could have a material adverse effect on the Company's results of operations for that period. Teledyne Technologies has aircraft and product liability insurance with an annual self-insured retention for general aviation aircraft liabilities incurred in connection with products manufactured by Teledyne Continental Motors of \$21.0 million. The Company's current aircraft product liability insurance policies expire on May 31, 2008.

#### **Note 12. Pension Plans and Postretirement Benefits**

Teledyne Technologies has a defined benefit pension plan covering substantially all employees hired before January 1, 2004. As of January 1, 2004, non-union new hires participate in an enhanced defined contribution plan as opposed to the Company's existing defined benefit pension plan. On September 15, 2006, Teledyne Technologies merged the defined benefit pension plan acquired with the acquisition of Rockwell Scientific with its existing defined benefit plan. The defined benefit pension plan is frozen to new Teledyne Continental Motors (TCM) Toledo union entrants as of November 10, 2006 and to new TCM Mobile union entrants as of February 20, 2007. The Company's assumed discount rate on plan liabilities is 6.0% for 2007 and 2006. The Company's assumed long-term rate of return on plan assets is 8.5% for 2007 and 2006.

Teledyne Technologies' net periodic pension expense was \$2.9 million and \$5.9 million for the second quarter and first six months of 2007, compared with net periodic pension expense of \$4.1 million and \$8.2 million for the second quarter and first six months of 2006 in accordance with the pension accounting requirements of SFAS No. 87 and SFAS No. 158. Pension expense allocated to contracts pursuant to U.S.

Government Cost Accounting Standards ( CAS ) was \$2.6 million and \$5.1 million for the second quarter and first six months of 2007, compared with \$2.5 million and \$4.9 million for the second quarter and first six months of 2006.

Pension expense determined under CAS can generally be recovered through the pricing of products and services sold to the U.S. Government.

The Company sponsors several postretirement defined benefit plans including a plan acquired with the acquisition of Scientific Company that cover certain salaried and hourly employees. The plans provide health care and life insurance benefits for certain eligible retirees.

The following tables set forth the components of net period pension benefit expense for Teledyne Technologies defined benefit pension plans and postretirement benefit plans for the second quarter and first six months of 2007 and 2006 (in millions):

	Second Quarter		Six Months	
	2007	2006	2007	2006
Pension Benefits				
Service cost benefits earned during the period	\$ 4.2	\$ 3.5	\$ 8.3	\$ 7.0
Interest cost on benefit obligation	9.2	7.7	18.4	15.4
Expected return on plan assets	(11.8)	(8.8)	(23.5)	(17.6)
Amortization of prior service cost	0.4	0.5	0.8	1.0
Recognized actuarial loss	0.9	1.2	1.9	2.4
Net periodic benefit expense	\$ 2.9	\$ 4.1	\$ 5.9	\$ 8.2

	Second Quarter		Six Months	
	2007	2006	2007	2006
Postretirement Benefits				
Service cost benefits earned during the period	\$	\$	\$	\$
Interest cost on benefit obligation	0.2	0.3	0.5	0.6
Recognized actuarial gain	(0.1)	(0.1)	(0.3)	(0.3)
Net periodic benefit expense	\$ 0.1	\$ 0.2	\$ 0.2	\$ 0.3

### Note 13. Industry Segments

Teledyne Technologies is a leading provider of sophisticated electronic components, instruments and communications products, systems engineering solutions and information technology services, and aerospace engines and components as well as on-site gas and power generation systems. Its customers include aerospace prime contractors, general aviation companies, government agencies and major communications and other commercial companies. Teledyne Technologies operates in four business segments: Electronics and Communications, Systems Engineering Solutions, Aerospace Engines and Components, and Energy Systems. The factors for determining the reportable segments were based on the distinct nature of their operations. They are managed as separate business units because each requires and is responsible for executing a unique business strategy.

Segment operating profit includes other income and expense directly related to the segment, but excludes minority interest, interest income and expense, gains and losses on the disposition of assets, sublease rental income, non revenue licensing and royalty income, domestic and foreign income taxes and corporate office expenses.

The following table presents Teledyne Technologies' interim industry segment disclosures for net sales and operating profit including other segment income. The table also provides a reconciliation of segment operating profit and other segment income to total net income (amounts in millions):

	Second Quarter 2007	Second Quarter 2006	% Change	Six Months 2007	Six Months 2006	% Change
Net sales:						
Electronics and Communications	\$ 266.0	\$ 215.4	23.5%	\$ 514.3	\$ 417.4	23.2%
Systems Engineering Solutions	73.7	68.9	7.0%	147.6	137.8	7.1%
Aerospace Engines and Components	53.7	57.8	(7.1)%	111.8	110.9	0.8%
Energy Systems	6.9	6.0	15.0%	12.2	12.2	
Total net sales	\$ 400.3	\$ 348.1	15.0%	\$ 785.9	\$ 678.3	15.9%
Operating profit and other segment income:						
Electronics and Communications	\$ 37.3	\$ 27.9	33.7%	\$ 67.5	\$ 51.1	32.1%
Systems Engineering Solutions	6.4	6.6	(3.0)%	12.9	12.5	3.2%
Aerospace Engines and Components (a)	6.8	4.9	38.8%	14.5	11.2	29.5%
Energy Systems	0.3	0.2	50.0%	0.4	0.2	100.0%
Segment operating profit and other segment income						
	\$ 50.8	\$ 39.6	28.3%	\$ 95.3	\$ 75.0	27.1%
Corporate expense	(7.2)	(6.1)	18.0%	(14.8)	(12.7)	16.5%
Other income, net	0.2	0.5	(60.0)%	0.5	1.5	(66.7)%
Minority interest	(0.9)		*	(1.6)		*
Interest expense, net	(3.5)	(1.1)	218.2%	(7.1)	(2.2)	222.7%
Income before income taxes	39.4	32.9	19.8%	72.3	61.6	17.4%
Provision for income taxes	15.1	12.0	25.8%	27.5	22.8	20.6%
Net income	\$ 24.3	\$ 20.9	16.3%	\$ 44.8	\$ 38.8	15.5%

(a) The first six months of 2006, includes the first quarter receipt of \$2.5 million, pursuant to an agreement with Honda Motor Co., Ltd. related to the piston engine business.

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

### **Strategy**

Our strategy continues to emphasize growth in our core markets of defense electronics, instrumentation and government systems engineering. We intend to strengthen and expand our core businesses with targeted acquisitions. We intend to aggressively pursue operational excellence to continually improve our margins and earnings. At Teledyne Technologies, operational excellence includes the rapid integration of the businesses we acquire. Over time, our goal is to create a set of businesses that are truly superior in their markets. We intend to continue to evaluate our product lines to ensure that they are aligned with our strategy.

### **Results of Operations**

#### Second quarter of 2007 compared with the second quarter of 2006

Teledyne Technologies' second quarter 2007 sales were \$400.3 million, compared with sales of \$348.1 million for the same period of 2006, an increase of 15.0%. Net income for the second quarter of 2007 was \$24.3 million (\$0.67 per diluted share) compared with net income of \$20.9 million (\$0.59 per diluted share) for the second quarter of 2006, an increase of 16.3%. The increase in sales for the 2007 period, compared with the same 2006 period, was driven primarily by acquisitions.

The second quarter of 2007, compared with the same period in 2006, reflected higher sales in each operating segment except the Aerospace Engines and Components segment. The higher sales in the Electronics and Communications segment resulted from strategic acquisitions, including the acquisition of certain assets of KW Microwave Corporation ( KW Microwave ) in April 2006, the majority interest in Ocean Design, Inc. ( ODI ) acquired on August 16, 2006, Rockwell Scientific Company LLC ( Scientific Company ) acquired on September 15, 2006 and assets of D.G. O'Brien, Inc. ( DGO ) acquired on March 30, 2007. The higher sales in the Systems Engineering Solutions segment reflected both organic growth and the acquisition of CollaborX, Inc. ( CollaborX ) on August 16, 2006. Incremental revenue in the second quarter of 2007 from businesses acquired since the end of the first quarter of 2006 was \$55.1 million.

The increase in earnings for the second quarter of 2007, compared with the same period of 2006, reflected improved operating profit in each operating segment except the Systems Engineering Solutions segment. Incremental operating profit in the second quarter of 2007 from businesses acquired since the end of the first quarter of 2006, including synergies, was \$5.3 million.

The second quarter of 2007 included pretax pension expense, in accordance with the pension requirements of SFAS No. 87 and No. 158 of \$2.9 million, compared with pretax pension expense of \$4.1 million in the second quarter of 2006. Pension expense allocated to contracts pursuant to U.S. Government Cost Accounting Standards ( CAS ) was \$2.6 million in the second quarter of 2007, compared with pretax pension expense of \$2.5 million in the second quarter of 2006.

For the second quarter of 2007 and 2006, we recorded a total of \$1.6 million and \$1.5 million respectively in stock option expense.

Cost of sales in total dollars was higher in the second quarter of 2007, compared with the second quarter of 2006, primarily due to higher sales, driven by acquisitions. Cost of sales as a percentage of sales for the second quarter of 2007 decreased to 68.7% from 70.5% for the second quarter of 2006 and reflected sales mix differences. Cost of sales for the second quarter of 2007 also reflected higher LIFO expense of \$0.4 million.

Selling, general and administrative expenses, including research and development and bid and proposal expense, in total dollars were higher in the second quarter of 2007, compared with the second quarter of 2006. This increase is primarily due to higher sales, driven by acquisitions. Selling, general and administrative expenses for the second quarter of 2007, as a percentage of sales, increased to 20.4%, compared with 19.9% in the second quarter of 2006, which reflected slightly higher general and administrative expenses as percentage of sales. Corporate expense for the second quarter of 2007, compared with the same period in 2006, was impacted by higher compensation expense and higher professional fee expenses.

Interest expense, net of interest income, was \$3.5 million in the second quarter of 2007, compared with \$1.1 million for the second quarter of 2006. The increase in net interest expense primarily reflected the impact of higher debt levels due to acquisitions. Minority interest primarily reflects the minority ownership interest in ODI.

The Company's effective tax rate for the second quarter of 2007 was 38.3% compared with 36.5% for the second quarter of 2006.

First six months of 2007 compared with the first six months of 2006

Teledyne Technologies' sales for the first six months of 2007 were \$785.9 million, compared with sales of \$678.3 million for the same period of 2006, an increase of 15.9%. Net income for the first six months of 2007 was \$44.8 million (\$1.24 per diluted share) compared with net income of \$38.8 million (\$1.10 per diluted share) for the first six months of 2006, an increase of 15.5%. The increase in sales for the 2007 period, compared with the same 2006 period, was driven by acquisitions.

The first six months of 2007, compared with the same period in 2006, reflected higher sales in each operating segment except the Energy Systems segment which had flat sales. The higher sales in the Electronics and Communications segment resulted from strategic acquisitions, including Benthos, Inc. ( Benthos ), acquired in January 2006, KW Microwave, the majority interest in ODI, Scientific Company and DGO. The higher sales in the Systems Engineering Solutions segment reflected both organic growth and the acquisition of CollaborX. Incremental revenue in the first six months of 2007 from businesses acquired since the end of 2005 was \$106.2 million.

The increase in earnings for the first six months of 2007, compared with the same period of 2006, reflected improved operating profit in each operating segment. Incremental operating profit in the first six months of 2007 from businesses acquired since the end of 2005, including synergies, was \$11.3 million. The first six months of 2007 included pretax pension expense in accordance with the pension requirements of SFAS No. 87 and SFAS No. 158 of \$5.9 million, compared with pretax pension expense of \$8.2 million in the first six months of 2006. Pension expense allocated to contracts pursuant to U.S. Government Cost Accounting Standards ( CAS ) was \$5.1 million in the first six months of 2007, compared with pretax pension expense of \$4.9 million in the first six months of 2006. For the first six months of 2007 and 2006, we recorded a total of \$3.3 million and \$2.9 million respectively in stock option expense. Cost of sales in total dollars was higher in first six months of 2007, compared with the first six months of 2006, primarily due to higher sales, driven by acquisitions. Cost of sales as a percentage of sales for the first six months of 2007 decreased to 69.6% from 71.1% for the first six months of 2006 and reflected sales mix differences. Cost of sales for the first six months of 2007 also reflected higher LIFO expense of \$0.9 million.

Selling, general and administrative expenses, including research and development and bid and proposal expense, in total dollars were higher in the first six months of 2007, compared with the first six months of 2006. This increase is primarily due to higher sales, driven by acquisitions. Selling, general and administrative expenses for the first six months of 2007, as a percentage of sales, increased slightly to 20.2%, compared with 20.1% in the first six months of 2006. Corporate expense for the first six months of 2007, compared with the same period in 2006, was impacted by higher compensation expense and higher professional fee expenses.

Other income for the first six months of 2006 includes the first quarter receipt of the final \$2.5 million payment, pursuant to an agreement with Honda Motor Co., Ltd. related to the piston engine business and is included as part of our Aerospace Engines and Components segment operating profit and other segment income for segment reporting purposes. Interest expense, net of interest income, was \$7.1 million in the first six months of 2007, compared with \$2.2 million for the first six months of 2006. The increase in net interest expense primarily reflected the impact of higher debt levels due to acquisitions. Minority interest primarily reflects the minority ownership interest in ODI. The Company's effective tax rate for the first six months of 2007 was 38.0% compared with 37.0% for the first six months of 2006.

**Review of Operations:**

The following table sets forth the sales and operating profit for each segment (amounts in millions):

	Second Quarter 2007	Second Quarter 2006	% Change	Six Months 2007	Six Months 2006	% Change
Net sales:						
Electronics and Communications	<b>\$ 266.0</b>	\$ 215.4	23.5%	<b>\$ 514.3</b>	\$ 417.4	23.2%

(a) The first six months of 2006, includes the first quarter receipt of \$2.5 million, pursuant to an agreement with Honda Motor Co., Ltd. related to the piston engine business.

\* not meaningful

**Electronics and Communications**

Second quarter of 2007 compared with the second quarter of 2006

Our Electronics and Communications segment's second quarter 2007 sales were \$266.0 million, compared with second quarter 2006 sales of \$215.4 million, an increase of 23.5%. Second quarter 2007 operating profit was \$37.3 million, compared with operating profit of \$27.9 million in the second quarter of 2006, an increase of 33.7%.

The second quarter 2007 sales improvement resulted primarily from revenue growth in defense electronics and electronic instruments, partially offset by lower sales of other commercial electronics. The revenue growth of \$28.7 million in defense electronics was driven by the acquisition of Rockwell Scientific in September 2006. The revenue growth of \$23.9 million in electronic instruments was driven by recent acquisitions. Revenue growth in electronic instruments included the acquisition of the majority interest in ODI in August 2006 and the acquisition of assets of DGO in March 2007. Second quarter 2007 organic sales of electronic instruments increased slightly with increased sales of instruments for the industrial and environmental monitoring instrumentation markets being partially offset by lower sales of geophysical sensors for the energy exploration market. Sales of geophysical sensors are expected to decline in 2007, compared with 2006, due to lower first half sales. Lower sales of other commercial electronics primarily reflected lower sales of medical electronic manufacturing services. Declines in electronic manufacturing services are expected to continue in the remainder of 2007. Incremental revenue in the second quarter of 2007, from businesses acquired since the first quarter of 2006, was \$51.4 million. Segment operating profit was favorably impacted by revenue from acquisitions. Incremental operating profit in the second

quarter of 2007, from businesses acquired since the second quarter of 2006, including synergies, was \$5.2 million. Segment operating profit was negatively impacted by \$0.7 million of stock option compensation expense in the second quarter of 2007, compared with \$0.6 million for the first quarter of 2006. Pension expense, in accordance with the pension accounting requirements of SFAS No. 87 and No. 158, was \$1.0 million in the second quarter of 2007, compared with \$1.2 million in the second quarter of 2006. Pension expense allocated to contracts pursuant to CAS was \$0.5 million in the second quarter of 2007 compared with \$0.4 million in the second quarter of 2006.

First six months of 2007 compared with the first six months of 2006

Our Electronics and Communications segment's first six months 2007 sales were \$514.3 million, compared with first six months 2006 sales of \$417.4 million, an increase of 23.2%. First six months 2007 operating profit was \$67.5 million, compared with operating profit of \$51.1 million in the first six months of 2006, an increase of 32.1%. The first six months 2007 sales improvement resulted primarily from revenue growth in defense electronics and electronic instruments, partially offset by lower sales of other commercial electronics. The revenue growth of \$61.8 million in defense electronics was driven by the acquisition of Rockwell Scientific in September 2006 and the acquisition of assets of KW Microwave in April 2006. The revenue growth of \$38.9 million in electronic instruments was driven by recent acquisitions. Revenue growth in electronic instruments included the acquisition of the majority interest in ODI in August 2006 and Benthos, Inc. in January 2006 and the acquisition of assets of DGO in March 2007. The first six months 2007 organic sales of electronic instruments increased slightly with increased sales of instruments for the industrial and environmental monitoring instrumentation markets being partially offset by lower sales of geophysical sensors for the energy exploration market. Lower sales of other commercial electronics primarily reflected lower sales of medical electronic manufacturing services. Incremental revenue in the first six months of 2007, from businesses acquired since the end of 2005, was \$98.8 million. Segment operating profit was favorably impacted by revenue from acquisitions. Incremental operating profit for the first six months of 2007, from businesses acquired since the end of 2005, including synergies, was \$11.0 million. Segment operating profit was negatively impacted by \$1.5 million of stock option compensation expense in the first six months of 2007, compared with \$1.2 million for the first six months of 2006. Pension expense, in accordance with the pension accounting requirements of SFAS No. 87 and No. 158, was \$2.0 million in the first six months of 2007, compared with \$2.4 million in the first six months of 2006. Pension expense allocated to contracts pursuant to CAS was \$0.9 million in the first six months of 2007 and \$0.7 million in the first six months of 2006. Segment operating profit for the first six months of 2007 reflected higher LIFO expense of \$0.5 million. In the first six months of 2006, we recorded \$0.7 million in charges in our commercial electronics business for warranty reserves and inventory obsolescence related to the termination of a product line.

**Systems Engineering Solutions**

Second quarter of 2007 compared with the second quarter of 2006

Our Systems Engineering Solutions segment's second quarter 2007 sales were \$73.7 million, compared with second quarter 2006 sales of \$68.9 million, an increase of 7.0%. Second quarter 2007 operating profit was \$6.4 million, compared with operating profit of \$6.6 million for the second quarter of 2006, a decrease of 3.0%. Second quarter 2007 sales reflected revenue growth in aerospace and defense programs of \$9.2 million, partially offset by lower environmental sales of \$3.9 million. The revenue growth in aerospace and defense programs included \$3.7 million in revenue from the acquisition of CollaborX in August 2006. Operating profit in the second quarter of 2007 reflected the impact of higher revenue, lower pension expense and operating profit of \$0.1 million from CollaborX, partially offset by lower margins in certain defense programs. Segment operating profit was impacted by \$0.2 million of stock option compensation expense for both the second quarter of 2007 and the second quarter of 2006. Operating profit also included pension expense under SFAS No. 87 and No. 158, of \$1.6 million in the second quarter of 2007, compared with \$2.3 million in the second quarter of 2006. Pension expense allocated to contracts pursuant to CAS was \$2.0 million in the second quarter of 2007, compared with \$1.9 million in the second quarter of 2006.

First six months of 2007 compared with the first six months of 2006

Our Systems Engineering Solutions segment's first six months 2007 sales were \$147.6 million, compared with first six months 2006 sales of \$137.8 million, an increase of 7.1%. First six months 2007 operating profit was \$12.9 million, compared with operating profit of \$12.5 million for the first six months of 2006, an increase of 3.2%.

The first six months 2007 sales reflected revenue growth in aerospace and defense programs of \$17.3 million, partially offset by lower environmental sales of \$7.4 million. The revenue growth in aerospace and defense programs included \$7.4 million in revenue from the acquisition of CollaborX in August 2006. Operating profit in the first six months of 2007 reflected the impact of higher revenue, lower pension expense and operating profit of \$0.3 million from CollaborX, partially offset by lower margins in certain defense programs. Segment operating profit was impacted by \$0.4 million of stock option compensation expense for both the first six months of 2007 and the first six months of 2006. Operating profit also included pension expense under SFAS No. 87 and No. 158, of \$3.2 million in the first six months of 2007, compared with \$4.7 million in the first six months of 2006. Pension expense allocated to contracts pursuant to CAS was \$4.0 million in both the first six months of 2007 and first six months of 2006.

**Aerospace Engines and Components**

Second quarter of 2007 compared with the second quarter of 2006

Our Aerospace Engines and Components segment's second quarter 2007 sales were \$53.7 million, compared with second quarter 2006 sales of \$57.8 million, a decrease of 7.1%. Second quarter 2007 operating profit was \$6.8 million, compared with operating profit of \$4.9 million in the second quarter of 2006, an increase of 38.8%.

The lower second quarter 2007 sales reflected decrease sales of aftermarket piston engines and overhaul services, partially offset by higher spare part sales for a total decrease of \$2.0 million and lower turbine engine sales of \$2.1 million. The lower turbine engine sales for 2007 reflected lower Joint Air-to-Surface Standoff Missile ( JASSM ) engine sales. Operating profit for the second quarter of 2007 reflected the receipt of a litigation settlement of \$1.4 million, net of expenses, the impact of improved operating performance, as well as a favorable mix of higher margin sales. Segment operating profit was impacted by \$0.2 million of stock option compensation expense for the second quarter of 2007, compared with \$0.1 million for the second quarter of 2006. Segment operating profit also included pension expense, under SFAS No. 87 and No. 158, of \$0.2 million in the second quarter of 2007 compared with \$0.3 million in the second quarter of 2006. Segment operating profit for the second quarter of 2007 also reflected higher LIFO expense of \$0.4 million.

First six months of 2007 compared with the first six months of 2006

Our Aerospace Engines and Components segment's first six months 2007 sales were \$111.8 million, compared with first six months 2006 sales of \$110.9 million, an increase of 0.8%. The first six months 2007 operating profit was \$14.5 million, compared with operating profit of \$11.2 million in the first six months of 2006, an increase of 29.5%. The higher first six months 2007 sales resulted from greater sales of \$0.4 million in the piston engine business, as a result of increased spare parts sales, partially offset by reduced sales of OEM and aftermarket engines. Sales in the turbine engine business increased \$0.5 million. The higher turbine engine sales for 2007 reflected higher Harpoon engine sales and higher research and development sales, partially offset by lower JASSM engine sales. Operating profit for the first six months of 2007 reflected the impact of higher sales and improved operating performance, the receipt of a litigation settlement of \$1.4 million, net of expenses, as well as a favorable mix of higher margin sales. Segment operating profit was impacted by \$0.3 million of stock option compensation expense for the first six months of 2007, compared with \$0.2 million for the first six months of 2006. Segment operating profit also included pension expense, under SFAS No. 87 and No. 158, of \$0.4 million in the first six months of 2007 compared with \$0.6 million in the first six months of 2006. Segment operating profit for the first six months of 2007 also reflected higher LIFO expense of \$0.4 million. Operating profit for the first six months of 2006 included the receipt of the final \$2.5 million payment pursuant to an agreement with Honda Motor Co., Ltd. related to the piston engine business.

## **Teledyne Energy Systems**

### Second quarter of 2007 compared with the second quarter of 2006

Our Energy Systems segment's second quarter 2007 sales were \$6.9 million, compared with \$6.0 million, an increase of 15.0%. Second quarter 2007 operating profit was \$0.3 million, compared with \$0.2 million, an increase of 50.0%. Second quarter 2007 sales primarily reflected higher commercial hydrogen generator sales partially offset by lower government sales. Operating profit improvement in the second quarter 2007 was primarily due to higher sales. Segment operating profit also included pension expense, under SFAS No. 87 and No. 158, of \$0.1 million for the second quarter of 2007, compared with \$0.2 million for the second quarter of 2006. Pension expense allocated to contracts pursuant to CAS was \$0.1 million in the second quarter of 2007 compared with \$0.2 million for the second quarter of 2006.

### First six months of 2007 compared with the first six months of 2006

Our Energy Systems segment's sales were \$12.2 million for both the first six months 2007 and the first six months 2006. Operating profit was \$0.4 million for the first six months of 2007, compared with \$0.2 million for the first six months of 2006, an increase of 100%.

The first six months 2007 sales primarily reflected higher commercial hydrogen generator sales offset by lower government sales. Operating profit improvement in the first six months of 2007 was primarily due to sales mix. Segment operating profit also included pension expense, under SFAS No. 87 and No. 158, of \$0.2 million for the first six months of 2007, compared with \$0.2 million for the first six months of 2006. Pension expense allocated to contracts pursuant to CAS was \$0.2 million in the first six months of 2007 compared with \$0.2 million for the first six months of 2006.

## **Financial Condition, Liquidity and Capital Resources**

Our net cash provided by operating activities was \$68.9 million for the first six months of 2007, compared with \$41.1 million for the same period of 2006. The higher net cash provided in the first six months of 2007, compared with the first six months of 2006, was primarily due to incremental cash flow from companies acquired since 2005, higher net income and \$4.9 million in lower pension contributions, partially offset by \$6.5 million in higher tax payments.

Our net cash used by investing activities was \$64.2 million for the first six months of 2007, compared with cash used by investing activities of \$52.5 million for the first six months of 2006. The 2007 and 2006 amount included \$42.7 million and \$43.5 million, respectively, for the purchase of businesses, net of cash acquired.

On June 20, 2007, Teledyne Technologies through its subsidiary, Teledyne Cougar, Inc., completed the acquisition of Tindall Technologies, Inc. ( Tindall ) a designer and supplier of microwave subsystems for defense applications for consideration of \$6.6 million. At July 1, 2007 total cash paid, net of cash acquired was \$5.6 million. Teledyne Technologies also recorded \$1.0 million in contingent payments in connection with the acquisition payable through 2010 in three installments. Tindall, which has been merged into Teledyne Cougar, designs and manufactures high performance Instantaneous Frequency Measurement ( IFM ) based systems and subsystems, including integrated frequency locked sources and set-on receiver-jammers used for U.S. Navy and Air Force training. Tindall's operations, based in Pleasanton, California, are being consolidated with the operations of Teledyne Cougar in Sunnyvale, California. Tindall's balance sheet is reflected in the Teledyne Technologies' condensed consolidated balance sheet at July 1, 2007. Tindall's results of operations and cash flows will be included beginning July 2, 2007. Tindall had revenue of \$2.7 million for its fiscal year ended December 2006.

On March 30, 2007, Teledyne Technologies through its subsidiary, Teledyne Instruments, Inc., completed the acquisition of assets of DGO for consideration of \$37.1 million, which includes a \$1.0 purchase price adjustment. DGO, headquartered in Seabrook, New Hampshire, is a leading manufacturer of highly reliable electrical and fiber-optic interconnect systems, primarily for subsea military and offshore oil and gas applications. At July 1, 2007, total cash paid, including other fees was \$36.1 million. On July 13, 2007, Teledyne Technologies paid the purchase price adjustment of \$1.0 million. DGO had sales of \$26.2 million for its fiscal year ended September 2006. Teledyne Technologies operates this business under the name Teledyne D.G. O'Brien.

On September 15, 2006, Teledyne Technologies through its subsidiary, Teledyne Brown Engineering, Inc. acquired Scientific Company for \$167.5 million in cash, with the sellers retaining certain liabilities. Total cash paid, including other fees, net of \$9.5 million in cash acquired was \$158.6 million. The Company now operates as Teledyne Scientific and Imaging, LLC. Headquartered in Thousand Oaks, California, Scientific Company is a leading provider of research and development services, as well as a leader in developing and manufacturing infrared and visible light imaging sensors for surveillance applications.

On August 16, 2006, Teledyne Technologies through its subsidiary, Teledyne Instruments, Inc., acquired an initial majority interest in ODI for approximately \$30 million in cash. ODI, headquartered in Daytona Beach, Florida, is a leading manufacturer of subsea, wet-mateable electrical and fiber-optic interconnect systems used in offshore oil and gas production, oceanographic research, and military applications.

The ODI minority stockholders have the option to sell their shares to Teledyne Instruments following the end of each quarter through the quarter ended March 31, 2009, at a formula-determined price. In September 2006, Teledyne Instruments acquired an additional 9.9% of ownership in ODI for \$5.8 million. In 2007, Teledyne Instruments acquired an additional 0.4% of ownership in ODI for \$0.2 million. Total cash paid to date, including the initial investment and subsequent share purchases, net of cash acquired was \$34.6 million. At July 1, 2007, Teledyne Instruments owns 61.3% of ODI. All shares not sold to Teledyne Instruments following the quarter ended March 31, 2009, will be purchased by Teledyne Instruments following the quarter ended June 30, 2009, at a same formula-determined price, at which time Teledyne Instruments will own all of the ODI shares held by the participating stockholders. Based on the formula-determined purchase price as of the quarter ended April 1, 2007, the aggregate amount of funds required to repurchase all the shares held by the remaining minority ODI stockholders would be approximately \$31.9 million. However, the actual aggregate amount of funds that we will spend to repurchase the shares held by minority stockholders through June 30, 2009, could be significantly higher or lower than this amount, as this amount will depend on when individual stockholders elect to exercise their put options and on the actual financial performance of ODI.

On August 16, 2006, Teledyne Technologies, through its subsidiary, Teledyne Brown Engineering, Inc., acquired CollaborX for consideration of \$17.5 million, less certain transaction-related expenses. Teledyne Technologies recorded \$2.9 million in notes payable related to the transaction, payable through 2009. At July 1, 2007, total cash paid, including other fees, net of cash acquired was \$14.9 million. CollaborX, based in Colorado Springs, Colorado, provides government engineering services primarily to the U.S. Air Force and select joint military commands.

On April 28, 2006, Teledyne Wireless, Inc. completed the acquisition of certain assets of KW Microwave, a manufacturer of defense microwave components and subsystems, for \$10.5 million in cash. Total cash paid, including the receipt of a \$0.2 million purchase price adjustment, was \$10.3 million. Principally located in Poway, California, the business operates as Teledyne KW Microwave.

On January 27, 2006, we acquired all of the outstanding shares of Benthos for \$17.50 per share in cash. The aggregate consideration for the outstanding Benthos shares was approximately \$40.6 million (including payments for the settlement of outstanding stock options) or \$32.2 million taking into consideration \$8.4 million in cash acquired. Benthos, located in North Falmouth, Massachusetts, is a provider of oceanographic products used in port and harbor security services, military applications, energy exploration and oceanographic research.

Our net cash used by investing activities for the first six months of 2007 and 2006 each included a \$0.8 million contingent payment related to the Cougar Components Corporation acquisition made in 2005.

Teledyne Technologies funded the acquisitions primarily from borrowings under its credit facility and cash on hand.

Capital expenditures for the first six months of 2007 and 2006 were \$22.4 million and \$9.2 million, respectively. The increase included costs of \$9.4 million to relocate a manufacturing facility and other capital projects.

Teledyne Technologies' goodwill was \$351.5 million at July 1, 2007 and \$313.6 million at December 31, 2006.

Teledyne Technologies' net acquired intangible assets were \$63.0 million at July 1, 2007 and \$69.4 million at December 31, 2006. The change in the balance of goodwill in 2007 primarily resulted from the acquisitions made in 2007 and an adjustment for the Scientific Company acquisition. The change in the balance of acquired intangible assets in 2007 resulted from the acquisitions made in 2007, an adjustment for the Scientific Company acquisition and amortization of acquired intangible assets. In all acquisitions, the results are included in the Company's consolidated financial statements from the date of each respective acquisition, except as noted for DGO and Tindall. Each of the companies acquired, except for CollaborX, is part of the Electronics and Communications segment. CollaborX is part of the Systems Engineering Solutions segment. The Company is in the process of specifically identifying the amount to be assigned to intangible assets, as well as certain assets and liabilities for the CollaborX, ODI and Scientific Company acquisitions made in 2006 and the DGO and Tindall acquisitions made in 2007. The Company made preliminary estimates as of July 1, 2007, since there was insufficient time between the acquisition dates and the end of the period to finalize the valuations. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the ODI acquisition was \$16.8 million and \$13.8 million, respectively. The preliminary amount of goodwill and acquired intangible assets recorded as of December 31, 2006 for the ODI acquisition was \$15.9 million and \$13.8 million, respectively. The change in goodwill from December 31, 2006 reflects additional share purchases and changes to the estimated income tax balances. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the CollaborX acquisition was \$14.2 million and \$2.1 million, respectively, and did not change from December 31, 2006. The preliminary amount of goodwill and gross acquired intangible assets recorded as of July 1, 2007 for the Scientific Company acquisition was \$74.3 million and \$8.3 million, respectively. The preliminary amount of goodwill and gross acquired intangible assets recorded as of December 31, 2006 for the Scientific Company acquisition was \$60.1 million and \$19.0 million, respectively. The primary change was a \$10.7 million reduction to acquired intangible assets and a corresponding increase to goodwill to reflect changes in the estimated amount of acquired intangible assets following the receipt of a preliminary appraisal report for the valuation acquired intangible asset. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the DGO acquisition was \$19.7 million and \$6.0 million, respectively. The preliminary amount of goodwill and acquired intangible assets recorded as of July 1, 2007 for the Tindall acquisition was \$4.1 million and \$1.1 million, respectively. These amounts were based on estimates that are subject to change pending the completion of the Company's internal review and the receipt of certain third party valuations and appraisals. Goodwill resulting from the CollaborX, Scientific Company and DGO acquisitions will be deductible for tax purposes.

Cash used by financing activities for the first six months of 2007 included net repayments of borrowings of \$11.8 million. The first six months of 2007 and 2006 included \$2.1 million and \$5.2 million, respectively, in excess tax benefits related to stock-based compensation. Proceeds from the exercise of stock options were \$4.2 million and \$7.1 million for the first six months of 2007 and 2006, respectively.

Working capital was \$220.8 million at July 1, 2007, compared with \$216.4 million at December 31, 2006. The increase in working capital was due to the addition of working capital from our recent acquisition and higher accounts receivables, partially offset by higher income taxes payable.

Our principal capital requirements are to fund working capital needs, capital expenditures, pension contributions and debt service requirements, as well as acquisitions. It is anticipated that operating cash flow, together with available borrowings under the credit facility described below, will be sufficient to meet these requirements over the next twelve months. To support acquisitions, we may need to raise additional capital. We currently expect capital expenditures to be approximately \$40.0 million in 2007, of which \$22.4 million has been spent in the first six months of 2007. Teledyne expects to pay up to a maximum of \$3.6 million in August 2007 related to the RD Instruments acquisition made in 2005. The \$3.6 million was recorded as a liability at the time of the acquisition.

Our credit facility has lender commitments totaling \$400.0 million and expires on July 14, 2011. Excluding interest and fees, no payments are due under the credit facility until it matures. The credit agreement requires the Company to comply with various financial and operating covenants, including maintaining certain consolidated leverage and

interest coverage ratios, as well as minimum net worth levels and limits on acquired debt. At July 1, 2007, the Company was in compliance with these covenants. Available borrowing capacity under the \$400.0

million credit facility, which is reduced by borrowings and outstanding letters of credit, was \$185.1 million at July 1, 2007.

Our liquidity is not dependent upon the use of off-balance sheet financial arrangements. We have no off-balance sheet financing arrangements that incorporate the use of special purpose entities or unconsolidated entities.

#### **Critical Accounting Policies**

Our critical accounting policies are those that are reflective of significant judgments and uncertainties, and may potentially result in materially different results under different assumptions and conditions. Our critical accounting policies are the following: contract revenue recognition and contract estimates; aircraft product liability reserve; accounting for pension plans; and accounting for business combinations, goodwill and other long-lived assets. For additional discussion of the application of these and other accounting policies, see Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Note 2 of the Notes to Consolidated Financial Statements included in Teledyne Technologies Annual Report on Form 10-K for the fiscal year ended December 31, 2006 (2006 Form 10-K).

#### **Recent Accounting Pronouncements**

On January 1, 2007, Teledyne Technologies adopted Financial Accounting Standards Board ( FASB ) Interpretation 48, Accounting for Uncertainty in Income Taxes ( FIN 48 ). As a result of the implementation the Company recognized a \$0.2 million increase in the liability for unrecognized tax benefits, which was accounted for as a cumulative-effect adjustment (decrease) to the beginning balance of retained earnings. As of the date of adoption and after the impact of recognizing the increase in the liability noted above, the Company's total gross unrecognized tax benefits totaled \$5.5 million. Due to offsetting tax benefits, \$3.9 million (net of the federal benefit on state issues) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in any future periods. See Note 9 for additional disclosures regarding the adoption of FIN 48.

#### **Outlook**

Based on its current outlook, the Company's management believes that third quarter 2007 earnings per share will be in the range of approximately \$0.69 to \$0.72. The full year 2007 earnings per share outlook is expected to be in the range of approximately \$2.56 to \$2.62. The Company's estimated effective income tax rate for 2007 is 35.3% and reflects the anticipated receipt of tax credits of approximately \$3.0 million in the third quarter of 2007. Excluding the receipt of tax credits our estimated effective income tax rate for 2007 would be 37.2%.

Our 2007 outlook reflects anticipated sales growth in the defense electronics and instrumentation businesses, due primarily to the contribution of our acquisitions completed in 2006 and 2007. The Company's third quarter and full year 2007 earnings per share outlook reflects an anticipated increase in expenses, including intangible asset amortization and higher interest expense, as a result of the acquisitions completed in 2006 and 2007. Our current outlook reflects continued declines in sales of electronic manufacturing services in the remainder of 2007. In addition, full year sales of geophysical sensors are expected to decline in 2007, compared with 2006, due to lower first half sales.

The full year 2007 earnings outlook includes approximately \$11.9 million in pension expense under SFAS No. 87 and No. 158, or \$1.7 million in net pension expense after recovery of allowable pension costs from our CAS covered government contracts. Full year 2006 earnings included \$15.4 million in pension expense under SFAS No. 87 and No. 158, or \$4.9 million in net pension expense after recovery of allowable pension costs from our CAS covered government contracts. The decrease in full year 2007 pension expense reflects pension contributions made in 2006, the impact of favorable market returns on plan assets and changes to the Company's pension assets and liabilities resulting from the merger of the Scientific Company pension plan with Teledyne Technologies pension plan.

The Company's 2007 earnings outlook also reflects \$6.8 million in stock option compensation expense, an increase from the prior outlook of \$6.7 million. The Company's 2006 earnings included \$5.9 million in stock option compensation expense.

**EARNINGS PER SHARE SUMMARY (a)**

(Diluted earnings per common share from continuing operations)

	2007 Full Year Outlook		2006	2005
	Low	High	Actual	Actual
Earnings per share (excluding net pension expense, stock option expense and excluding income tax benefit)	\$ 2.63	\$ 2.67	\$ 2.36	\$ 1.91
Pension expense SFAS No. 87	(0.21)	(0.21)	(0.27)	(0.23)
Pension expense CAS (b)	0.18	0.18	0.18	0.17
Earnings per share (excluding stock option expense and income tax benefit)	2.60	2.64	2.27	1.85
Stock option expense (c)	(0.12)	(0.12)	(0.10)	
Income tax benefit (d)	0.08	0.10	0.09	
Earnings per share GAAP	\$ 2.56	\$ 2.62	\$ 2.26	\$ 1.85

(a) We believe that this supplemental non-GAAP information is useful to assist management and the investment community in analyzing the financial results and trends of ongoing operations. The table facilitates comparisons with prior periods and reflects a measurement management uses to analyze financial performance.

(b) Pension expense determined

allowable under CAS can generally be recovered through the pricing of products and services sold to the U.S. Government.

- (c) Effective January 2, 2006, we adopted the provisions of SFAS No. 123(R) and began recording stock option compensation expense. No compensation expense related to stock options was recorded in 2005 or in prior years.
  
- (d) Fiscal year 2006 included the reversal of income tax contingency reserves of \$3.3 million. These reserves were determined to be no longer needed due to the expiration of applicable statutes of limitations. Fiscal year 2007 reflects the anticipated receipt of tax credits of approximately \$3.0 million in the third quarter

of 2007.

**Safe Harbor Cautionary Statement Regarding Outlook and Forward-Looking Information**

From time to time we make, and this report contains forward looking statements, as defined in the Private Securities Litigation Reform Act of 1995, relating to earnings, growth opportunities, product sales, pension matters, stock option compensation expense, tax credits and strategic plans. All statements made in this Management's Discussion and Analysis of Financial Condition and Results of Operations that are not historical in nature should be considered forward-looking. Actual results could differ materially from these forward-looking statements. Many factors, including changes in demand for products sold to the defense electronics, instrumentation and energy exploration and production, commercial aviation, semiconductor and communications markets, funding, continuation and award of government programs, continued liquidity of our customers (including commercial aviation customers) and economic and political conditions, could change the anticipated results. In addition, financial market fluctuations affect the value of our pension assets.

Global responses to terrorism and other perceived threats increase uncertainties associated with forward-looking statements about our businesses. Various responses to terrorism and perceived threats could realign government programs, and affect the composition, funding or timing of our programs. Flight restrictions would negatively impact the market for general aviation aircraft piston engines and components.

We continue to take action to assure compliance with the internal controls, disclosure controls and other requirements of the Sarbanes-Oxley Act of 2002. While we believe our control systems are effective, there are inherent limitations in all control systems, and misstatements due to error or fraud may occur and not be detected.

While our growth strategy includes possible acquisitions, we cannot provide any assurance as to when, if or on what terms any acquisitions will be made. Acquisitions involve various inherent risks, such as, among others, our ability to integrate acquired businesses and to achieve identified financial and operating synergies.

Additional information concerning factors that could cause actual results to differ materially from those projected in the forward-looking statements is contained in Teledyne Technologies' periodic filings with the Securities and

Exchange Commission, including its 2006 Form 10-K and this Form 10-Q. We assume no duty to update forward-looking statements.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Other than as set forth below, there were no material changes to the information provided under Item 7A, Quantitative and Qualitative Disclosure About Market Risk included in our 2006 Annual Report on Form 10-K. At July 1, 2007, there were no hedging contracts outstanding.

**Interest Rate Exposure**

We are exposed to market risk through the interest rate on our borrowings under our amended and restated credit facility. Borrowings under our credit facility are at fixed rates that vary with the term and timing of each loan under the facility. Loans under the facility typically have terms of one, three or six months and the interest rate for each such loan is subject to change if the loan is continued or converted following the applicable maturity date. Interest rates are also subject to change based on our debt to earnings before interest, taxes, depreciation and amortization (EBITDA) ratio. As of July 1, 2007, we had \$206.0 million in outstanding indebtedness under our amended and restated credit facility. A 100 basis point change in interest rates would result in an increase in annual interest expense of approximately \$2.1 million, assuming the \$206.0 million in debt was outstanding for the full year.

**Item 4. Controls and Procedures**

Our disclosure controls and procedures are designed to ensure that information required to be disclosed in reports that we file or submit, under the Securities Exchange Act of 1934, are recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Our Chairman, President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer, with the participation and assistance of other members of management, have reviewed the effectiveness of our disclosure controls and procedures and have concluded that the disclosure controls and procedures, as of July 1, 2007, are effective in timely alerting them to material information relating to the Company that is required to be included in its SEC periodic filings.

In connection with our evaluation during the quarterly period ended July 1, 2007, we have made no change in our internal controls over financial reporting that have materially affected or are reasonably likely to materially affect our internal controls over financial reporting. There also were no significant deficiencies or material weaknesses identified for which corrective action needed to be taken.

**PART II OTHER INFORMATION**

**Item 1A. Risk Factors**

There are no material changes to the risk factors previously disclosed in our 2006 Annual Report on Form 10-K in response to Item 1A to Part 1 of Form 10-K. See also our Outlook discussion beginning at page 24 for some factors reflected in our 2007 earnings per share guidance.

**Item 4. Submission of Matters to a Vote of Security Holders**

This information was provided in Teledyne Technologies First Quarter 2007 Form 10-Q under Part II Item 4, filed on May 9, 2007.

**Item 6. Exhibits**

(a) Exhibits

Exhibit 31.1 302 Certification Robert Mehrabian

Exhibit 31.2 302 Certification Dale A. Schnittjer

Exhibit 32.1 906 Certification Robert Mehrabian

Exhibit 32.2 906 Certification Dale A. Schnittjer
